ENERGY

Renewable Energy

January 20, 2017, v2.1

CONFIDENTIAL DRAFT

Outline

- Background
  - 2013 LTEP Commitments
  - Achievements since 2013 LTEP
  - Current Context
  - Stakeholder Feedback
- Proposed Initiatives
  1. LTEP Renewable Energy Targets
  2. Evolving Support Programs
  3. Focus on Distributed Generation
     a) Net Metering Part 2
     b) Further Initiatives to Support Distributed Generation
        i. Remove Barriers to Distributed Generation
        ii. Building Integrated Distributed Generation
        iii. Renewables Plus Storage Projects
  4. Renewable Fuels
  5. Sustaining Ontario's Renewable Energy Sector
- Next Steps

Current Context

Strong Supply and Rate Mitigation

- Ontario's strong supply situation and commitment to rate mitigation means large scale procurements are not necessary at this time. Any renewable energy investments will need to be ratepayer-neutral and provide value beyond generation alone.

[redacted]

Current Context (cont'd)

Ontario's Commitment to Renewables

[redacted]

- Renewable energy can contribute to:
  - Rate Mitigation
