Appendix C – Inspection Log
Appendix D – Manifests
1.0 BACKGROUND

1.1 Purpose

Oil/water separators are installed at MTO patrol yards to remove oil, grease and sediment from vehicle wash water.

1.1.1 Operation

When equipment is washed in the garage, some oil, grease, hydraulic fluid and/or fuels (collectively called oil and grease) are carried away with the wash water into the floor drains. At all of our patrol yards, floor drains are connected to a three-compartment oil/water separator. A schematic of the separator is shown below as Figure 1.

Separators operate on the principle of density. Materials lighter than water (such as oils) will float while materials heavier than water (such as grit and sediment) will sink. Water acts as the separating layer between the light and heavy layers.

In the oil/water separator, the flow of wash water is slowed down in the first compartment so that the droplets of oil and grease have enough time to float to the top, while sludge, grit and sediment can settle to the bottom. The oil & grease and the sediment stay in the first chamber while the treated wash water moves from near the bottom of the first compartment to the top of the second through a siphon tube. The same action takes place in the second and the third compartments to further clean the wash water. In the third chamber, the
water is mostly free of oil and grease and is either discharged to a ditch or a dry well.

1.1.2 Need for Oil/Water Separators

Regulations in Ontario dictate how much oil and grease can be present in wash water before discharging it into the environment. Without oil/water separators, patrol yard wash water would not likely meet the criterion. MTO must operate and maintain the oil/water separators properly to ensure that our regulatory obligations are met.

1.1.3 Certificate of Approval

The Ministry of the Environment (MOE) regulates wastes in Ontario. Wash water generated at patrol yards is considered a waste and, therefore, must meet the requirements of Ontario's environmental legislation. In order to install and operate our oil/water separators, MTO applied for and received a Certificate of Approval from the MOE. A copy of the Certificate of Approval is provided in this guide in Appendix A.

The Certificate of Approval permits MTO to install and operate oil/water separators, and discharge treated wastewater from the units into the environment. The Certificate of Approval also specifies a number of operational requirements, such as mandatory inspections, data recording and maintenance, on the operation of the units. These requirements mean that MTO must follow all of the directions specified in the Certificate of Approval in order to be in compliance with our regulatory requirements. The specific requirements will be spelled out in detail in the following section.
2.0 INSPECTIONS

Proper operation of our oil/water separators will ensure that wastewater discharged to the environment meets applicable guidelines and regulations. It will ensure that both MTO and its employees are protected from potential legal action.

Visual inspections for oily sheens, sediment and debris are conducted to ensure that the oil/water separators are operating the way that they were designed to. Regular visual inspections can also help identify problems with the separator early enough that adverse effects to the environment can be minimized.

There are THREE types of OWS inspections that **MUST BE** carried out. They are:

1. Inspection of floor grates / sumps / catch basins,
2. Inspection of OWS discharge outlet, and
3. Inspection of OWS chambers.

All inspections **MUST BE** recorded on the supplied log forms (record keeping is discussed further in Section 3.0). Checklists for completion of the required inspections are provided in Appendix B. Keep all of your completed inspection logs in Appendix C. Blank inspection forms are also provided in Appendix C.

This section will specifically outline your responsibilities in ensuring that our oil/water separators are being inspected and maintained properly.

2.1 Garage Floor Grates / Catch Basins / Sumps

In the winter months (October 1 to April 30), garage floor grates / sumps / catch basins must be visually inspected once per week. In the summer (May 1 to September 30), inspections must be conducted once per month. The inspections must consist of the following steps:
### Steps | Procedure | Observations
--- | --- | ---
**Step 1** | Look for fuel, oil, grease, etc. | If present, find the source of the problem (e.g., leaky vehicle) and fix it.
A sheen (i.e., a rainbow) may mean there is fuel present.

**Step 2** | Look for sediment or debris. | Sediment and debris must be cleaned out regularly (i.e., once per week).
If present, remove sediment. Store in secure location for disposal as waste.

**Step 3** | Inspect for flow and offensive odours. | Offensive odours or difficulty draining may indicate that the outlet pipe is blocked with sediment.
If outlet pipe is blocked, remove sediment (refer to Step 2, above).

**Step 4** | Data recording. | Record the details of your inspection in the logbook (refer to Section 3.0 for details on what information is required).

---

**2.2 OWS Discharge Outlet**

**2.2.1 Discharges to a ditch**

If your separator discharges to a ditch, you are required to carry out the following inspections of the pipe end in the ditch.
2.2.2 Discharges to a drywell

If your separator discharges to a drywell, you must carry out the following inspections of the drywell.

<table>
<thead>
<tr>
<th>Inspection Timing</th>
<th>Frequency</th>
<th>Procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer Months (May 1 to Sept 30)</td>
<td>Weekly, during discharging</td>
<td>Look for fuel, oil, sheens (i.e., rainbow), debris, stained soil, dead vegetation, etc. If present, contact the Maintenance Superintendent or the Environmental Unit.</td>
</tr>
<tr>
<td>Winter Months (Oct 1 to Apr 30)</td>
<td>Weekly, during discharging**</td>
<td>Look for fuel, oil, sheens (i.e., rainbow), debris, stained soil, dead vegetation, etc. If present, contact the Maintenance Superintendent or the Environmental Unit.</td>
</tr>
</tbody>
</table>

**Where outlet is covered in snow, no inspections are required. Do not uncover the drywell, as it could cause freezing and the separator to back up.**

Record your observations in the logbook, including any statements saying that no inspections were conducted because of the snow.
The weekly inspections should consist of the following steps:

<table>
<thead>
<tr>
<th>Steps</th>
<th>Procedure</th>
<th>Observations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 1</td>
<td>Use a clean sample container and lower it into the sampling port outlet while the separator is discharging. Alternatively, you can lift the cover of the drywell off using a loader and inspect the interior of the drywell.</td>
<td></td>
</tr>
<tr>
<td>Step 2</td>
<td>Inspect the effluent for evidence of oil, grease, sediment or fuel. Note any fuel-like odours.</td>
<td></td>
</tr>
<tr>
<td>Step 3</td>
<td>Inspect the drywell for evidence of sediment build-up or standing water. Excessive sediment may hinder proper drainage. Standing water means there is poor drainage. Either of these conditions requires that the drywell be cleaned out (fine material removed and sent for disposal, rocks replaced).</td>
<td></td>
</tr>
<tr>
<td>Step 4</td>
<td>If fuels, staining or odours are noted, STOP using the separator and contact the Maintenance Superintendent or the Environmental Unit.</td>
<td></td>
</tr>
<tr>
<td>Step 5</td>
<td>Record observations in the logbook.</td>
<td></td>
</tr>
</tbody>
</table>

2.3 Oil/Water Separator Units

Oil/water separator units must be inspected twice per year: once in the spring and once in the fall. Separators must not be inspected in the winter months to prevent possible freezing of the units, unless the inspection is carried out as an emergency inspection resulting from a spill or malfunction of the separator. Separator inspections must consist of the following steps:

<table>
<thead>
<tr>
<th>Steps</th>
<th>Procedure</th>
<th>Observations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 1</td>
<td>Inspect the first chamber (closest to the building). Look for floating oil, grease or fuel. Use a dip stick and place some water-finding paste on the bottom. Slowly insert the stick to find the thickness of floating oil (the paste will change colour when it finds water).</td>
<td>If more than 12 inches (31 cm) of oil is present, arrange for the separator to be pumped out. Contact the Maintenance Superintendent for further directions. If a spill has occurred, STOP USING THE SEPARATOR and contact the Maintenance Superintendent or the Environmental Unit.</td>
</tr>
</tbody>
</table>
Step 2  Look for sediment.
Use a dip stick to attempt to measure the thickness of sediment at the bottom of the unit.

Sediment must be cleaned out when it reaches a depth of about 4 inches (~10 centimetres).

OWS SEDIMENT MUST BE PICKED UP BY AN MOE-CERTIFIED CARRIER OR DISPOSED AT A LANDFILL SITE USING AN MTO VEHICLE. Refer to section 4.5 for a list of waste classifications.

Step 3  Inspect for flow and offensive odours.

Offensive odours or difficulty draining may indicate that the outlet pipe is blocked with sediment.

If outlet pipe is blocked, remove sediment or debris. To prevent freezing, **DO NOT** remove snow from outlet pipe.

Step 4  Inspect chambers 2 and 3.
Look for floating oil, foam, scum or unusual odours or colour.

If floating oil is present in chambers 2 and 3, there may have been a malfunction of the separator.

Foam may indicate that unapproved soaps or cleaning products have been discharged to the separator.

If any of the above conditions exist, **STOP** using the separator and contact the Maintenance Superintendent or the Environmental Unit.

Step 5  Data recording.

Record the details of your inspection in the logbook (refer to Section 3.0 for details on what information is required).

---

### 2.4  When Inspections Are Not Required

Some of our patrol yards are not manned at all during the summer months. The **ONLY** time that inspections are **NOT** required is if your patrol yard:
a) is not manned at all during the period in question,

AND

b) has no vehicles/equipment stored or parked in the garage for the period in question,

AND

c) is not being used at all for vehicle maintenance for the period in question.

If your site meets all three of the above requirements, then you are not required to carry out visual inspections for the period of time when the above conditions exist because the unit will not be discharging. However, you MUST make a note in the logbook at the beginning and end of this period stating that the site is not manned.

2.5 Problems

There may come a time when you encounter some problems with your separator. The following pages identify some of the common problems that you may encounter with your separator along with recommended actions. This is not an exhaustive list. If you see a condition that is out of the ordinary, STOP using the separator and contact your supervisor, MTO Maintenance Superintendent and/or the MTO Waste Environmental Planner.

</tbody>
</table>
| There is oil / fuel / rainbow in the drywell / ditch. | There has been a spill or the separator has failed. | Stop using the separator.  
Contact your supervisor and/or the MTO Maintenance Superintendent.  
Contact MOE Spills Action Centre (refer to Section 5.0 *Emergencies* for details).  
Further direction on clean-up procedures will be provided. |
|                         | There may be fuel/oil built up in the outlet pipe between the separator and the drywell / ditch. | Stop using the separator.  
Contact your supervisor and/or the MTO Maintenance Superintendent to arrange for steam-cleaning of the outlet pipe.  
Contact MOE Spills Action Centre (refer to Section 5.0 *Emergencies* for details). |
| The drywell is full of water and is not draining. | The drywell may be plugged with fine sediment. | Stop using the separator.  
Contact your supervisor and/or the MTO Maintenance Superintendent. Arrange for removal of the sediment and granular base. This material must be picked up by an MOE-certified carrier or transported to a licensed landfill site by an MTO vehicle. A new granular base must be installed. |
3.0 RECORD KEEPING

3.1 Logbooks

MTO must keep and maintain a logbook for each oil/water separator it operates. Some patrol yards have two separators and it is a good idea to keep two separate logbooks for the units.

This binder is your logbook. It contains everything that you need to ensure compliance with regulations. You must ensure that you record all of your inspections in this book. All records **MUST** be kept in this log book for at least **two years**.

Keep this logbook in a prominent location where anyone can access it. Everyone who works in the building should know what this book is for and where to find it. If an MOE inspector shows up on site to inspect your facility, they **will** want to see this binder.

If you have an **unmanned site** for a period of time, you must make an entry at the beginning and end of the unmanned period stating that the site is unmanned, and that no inspections will be carried out. Refer to Section 2.4 for further information on unmanned sites.

3.2 Manifests

**Every shipment of registerable waste requires a manifest.** Manifests are required for every shipment of:

- oil or oily water from the separator,
- liquid from the floor grates / catch basins and the separator, and
- any other miscellaneous registerable wastes.

**Every time** the oil/water separator is pumped out, an MOE-certified carrier must be used. The carrier must be certified to accept the class of waste that you are hauling. Most septic haulers are **NOT** certified to haul oil/separator waste. Before hiring a contractor to pump out your separator, ensure that the carrier has the appropriate licensing to do the work first. Refer to section 4.5 for a list of waste classifications.

**It is your responsibility to ensure that the carrier you choose is certified to haul oil/water separator waste.**
A copy of every manifest for shipping of separator waste must be placed in the logbook under the appropriate tab. A record of each shipment must also be maintained. Refer to Appendix D for a sample shipment record, sample manifests and blank forms.

Sediment from garage catch basins / sumps must go to landfill unless it is tested by a laboratory and found to be acceptable. Sediment can either be picked up by an MOE-licensed carrier or transported to a certified landfill site by an MTO vehicle under MTO’s Waste Management C of A. Under no circumstances should catch basin sediment be placed back in the treated sand dome nor can it be used as fill, unless testing at a laboratory proves the material is not contaminated.

MTO maintains a Waste Management C of A – this means that MTO vehicles are certified to haul certain types of wastes. If you intend to haul waste to a landfill site in an MTO vehicle, contact the Waste Environmental Planner for clarification on which wastes MTO can legally transport.
4.0 MAINTENANCE AND OPERATION

4.1 What can go into the separator?

The separator is designed for two purposes:

1. To separate fuels, oils and grease from wastewater before it is discharged into the environment, and
2. To catch an accidental spill of fuel, oil or grease and prevent it from discharging into the environment.

Every day operation of the separator revolves around purpose #1. Vehicle washing activities will not generate a lot of fuels, oils and grease and will not overwhelm the separator.

If a spill of fuel, oil or grease occurs in the garage and happens to drain into the floor drains / sumps and into the separator, the separator will MOST LIKELY contain it (depending on how much was released). However, the separator is not designed to continue regular operations after it has contained a spill. The reason is that there is a higher probability that the fuel will either not have enough time to separate, or the amount of fuel will exceed the storage capacity of oil in the separator. If a spill does occur, the separator must be pumped out. Refer to Section 4.5 for oil/water separator clean out procedures.

**Under NO circumstances must any fuels, oils, grease, unapproved soaps, cleaning products or solvents be deliberately discharged to the floor drains or the oil/water separator.**

4.2 Prevention Practices

Proper prevention practices can improve the efficiency of the separator and ensure compliance with regulations. Examples of good prevention practices are provided below.

**Keep equipment maintained.**
Equipment that is well maintained is less prone to leaking. This can eliminate one of the main sources of oils, fuels and grease that can enter the separator.

**Clean up spills immediately.**
When spills occur, clean them up ASAP using dry absorbent. This will prevent the liquids from running into the separator. Used dry absorbent must be disposed as a registerable waste at a registered landfill site. It
must be hauled to the dump in an MTO vehicle or by an MOE-licensed carrier. Spilled fluids **SHALL NOT** be washed into the floor drains.

**Sweep equipment before washing.**
Excess salt and sediment can affect proper operation of the separator. Always sweep salt and sediment from equipment before washing. Salt and sediment can be collected from the garage floor and returned to the treated sand storage building. Salt and sediment collected from inside the floor drains must be disposed as registerable waste (*i.e.*, it cannot be returned to the domes).

**Do not use unapproved cleaning solutions.**
Only three brands of soaps are approved for use in MTO garages. These are discussed in Section 4.3, below. No other cleaning solutions or solvents can be used in the garage or released through the separator, whether it is for washing vehicles or cleaning the garage floor.

### 4.3 Soaps

Regular, commercial soaps of any kind **CANNOT** be used for any activity that may discharge to the oil/water separator.

Why? When soap and oils are mixed, the soap causes the oil droplets to break down into very tiny particles and mix with the water. These very tiny particles do not float and, therefore, cannot be retained or collected by the oil/water separator. When soaps are used in the separators, the oil breaks down and is discharged to the environment instead of being retained for disposal.

MTO carried out a soap study that evaluated a number of non-emulsifying soaps for use with oil/water separators. There are only **three brands of soap that are approved** for use with the separators:

<table>
<thead>
<tr>
<th>Brand</th>
<th>Supplier</th>
<th>Dilution Ratio (H₂O:soap)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hotsy Blue Thunder</td>
<td>Metrovan Hotsy Equipment Ltd.</td>
<td>110:1</td>
</tr>
<tr>
<td></td>
<td>Surrey, BC</td>
<td></td>
</tr>
<tr>
<td>Indo 510</td>
<td>Flexo Products</td>
<td>62.5:1</td>
</tr>
<tr>
<td></td>
<td>Niagara Falls, ON</td>
<td></td>
</tr>
<tr>
<td>Zep Split Vehicle Wash</td>
<td>Zep Manufacturing</td>
<td>62.5:1</td>
</tr>
<tr>
<td></td>
<td>Mississauga, ON</td>
<td></td>
</tr>
</tbody>
</table>

**Note:** Dilution ratio, for Hotsy Blue Thunder, means 110 parts water to 1 part of soap. (*e.g.* water must be added at a rate of 110 times the amount of soap). So 100 millilitres (mL) of soap requires 11,000 mL (or 11 Litres) of water.
4.4  **Inspections**

Carrying out inspections is part of our regular oil/water separator maintenance program. It helps us identify problems early, so that they can be fixed before they become too serious.

Refer to Section 2.0 for detailed information on inspections.

4.5  **Clean Out**

Oil/water separators must be cleaned out by an MOE-licensed carrier that is certified to haul oil/water separator waste. The carriers must be certified by MOE to haul the following classes of waste:

<table>
<thead>
<tr>
<th>Class</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>251L</td>
<td>Oil/water separator sludge/sediment</td>
</tr>
<tr>
<td>252L</td>
<td>Floating oil</td>
</tr>
</tbody>
</table>

If your carrier is not certified to haul your class of waste, you **CANNOT** use them. Both you and the carrier could face charges from the MOE!

When the carrier shows up to clean out the separator, the following steps should be followed:

1. Do not use the separator while the unit is being cleaned out.
2. Have the carrier clean out the floor drains first, including any accumulated oil or sediment.
3. Have the carrier pump out the separator. The carrier can either remove the sediment and the oil but leave the water, or they can pump the entire contents of all three chambers. Both options are acceptable; the only difference is the cost.
4. Sign and obtain a copy of the Waste Manifest (the carrier will supply and fill out this form). Ensure that the Waste Manifest identifies the specific patrol yard location.
5. Once the separator has been pumped out, **FILL THE CHAMBERS BACK UP WITH WATER**. Without the water layer, oil cannot float and the oil will seep out into the environment. All three chambers must be filled back up
with water so that the water level is at least 18 inches above the bottom of the siphon tubes (or at least 24 inches from the bottom of the separator). Do not fill up the separator by washing vehicles (this could cause fuels or oils generated by the vehicle washing to bypass the treatment system).
5.0 EMERGENCIES

5.1 What Constitutes an Emergency?

An emergency is when any oil, fuel or any other polluting substance has been discharged to the natural environment. This means any spills, bypass or loss of any fuel/oil, by-product, solvent, waste material or any other substance that comes out of the separator outlet pipe.

A spill of oils/fuels inside the garage, which is contained and cleaned up, does not require reporting. A spill that discharges into the floor drains and into the separator, but is contained by the separator does not require reporting.

A spill that discharges into the separator and either bypasses the separator or discharges out of the oil/water separator outlet pipe DOES require reporting.

5.2 Reporting an Emergency

All emergencies must be reported as soon as practical (i.e. without delay, as soon as possible after discovery of the emergency).

The first priority in an emergency is to ensure the site is safe and STOP THE SPILL. Other emergency contacts, such as the police or the fire department, should be made, if necessary.

Once the source of the spill has been stopped and the situation is temporarily under control, the following people should be contacted immediately:

<table>
<thead>
<tr>
<th>Position</th>
<th>Name</th>
<th>Contact #</th>
</tr>
</thead>
<tbody>
<tr>
<td>Immediate Supervisor</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Maintenance Superintendent</td>
<td></td>
<td></td>
</tr>
<tr>
<td>MOE Spills Action Centre</td>
<td>n/a</td>
<td>1-800-268-6060</td>
</tr>
</tbody>
</table>

The MOE Spills Action Centre (SAC) will ask for a lot of information related to the spill, the spiller and the site. You should be prepared to answer all of the questions before you call. A summary of the required information is provided below. A checklist that you can use for spill reporting is provided in Appendix B.

1. Your name, your telephone #.
2. Name of the company you work for and your position.
3. Name and telephone # of the spiller.
4. Description of where the spill occurred (i.e. the address, where on site, etc.).
5. Date and time that the spill was discovered.
6. Name and telephone # of everybody who was contacted to respond to the spill (i.e. police, fire department, etc.).

7. How long the spill occurred for and whether or not it is still occurring.

8. What was discharged, how much was discharged, and the name and description of any hazardous substances that were spilled.

9. Source of the spill, location of the spill and any information about the cause of the spill.

10. Description of the area around the site, such as locations of wells, flood plains, fish & wildlife habitat areas, or private property.

11. Description of any conditions that may have aggravated or mitigated the situation, such as weather or surface/ground water conditions.

12. If the spill affected neighbouring properties, whether or not the neighbour(s) will allow the spill to be cleaned up on their property.

13. Whether any other pollutants were spilled as a result of the original spill.

14. What actions have/are/will be taken to clean up the spill.

15. Name and telephone # of every person responsible for cleaning up the spill.

16. Description of any circumstances that may slow down the spill cleanup (i.e. weather, traffic, etc.).
Appendix A

Certificate of Approval
Ontario Ministry of Transportation
301 St. Paul St., Garden City Tower, 2nd Floor
St. Catharines, Ontario
L2R 7R4

Site Location: Various Patrol Yards Throughout the Province of Ontario

You have applied in accordance with Section 53 of the Ontario Water Resources Act for approval of:

establishment of sewage works for the collection, transmission, treatment and disposal of wastewater from the washing of highway maintenance vehicles at existing and functioning Patrol Yard Garages operated by the Ministry of Transportation and/or its agents at various locations in the Province of Ontario, as listed on the attached Schedule "B", consisting of the following:

- collection of wastewater in trenches and/or catchbasins, and transmission to a pre-cast concrete type oil/water separator, with discharge to various receivers,

all in accordance with the items listed below in Schedule "A".

SCHEDULE "A"

The following is a list of documents relied upon for the issuance of this Certificate of Approval:

1. Applications for Approval of Industrial Sewage Works submitted by the Ontario Ministry of Transportation.

For the purpose of this Certificate of Approval and the terms and conditions specified below, the following definitions apply:

For the purpose of this Certificate of Approval and the terms and conditions specified below, the following definitions apply:

1) "Owner" means the Ministry or Transportation and its agents operating the Patrol Yards;

2) "Ministry" means the Ontario Ministry of the Environment;

Page 1 - NUMBER 6501-587PSL
(3) "Director" means any Ministry employee appointed by the Minister under Section 5 of the Ontario Water Resources Act;

(4) "certificate" means a certificate of approval issued in accordance with Section 53 of the Ontario Water Resources Act; and,

(5) "works" means the facilities approved by the within certificate as described in its preamble, in the owner's application and in supporting information submitted by the Owner and to the extent approved by this certificate.

You are hereby notified that this approval is issued to you subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. INSTALLATION OF WORKS AT EXISTING PATROL YARDS

(1) In accordance with this certificate, the Owner may install works at existing and functioning Patrol Yards currently discharging wastewater from washing of highway maintenance vehicles into the environment without treatment.

(2) The oil/water separator will be sized for peak inflows of wastewater in accordance with the following:

<table>
<thead>
<tr>
<th>Separator Liquid Holding Capacity (Litres)</th>
<th>Flow Capacity Range (Litres per minute)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1000</td>
<td>10 to 40</td>
</tr>
<tr>
<td>2700</td>
<td>30 to 80</td>
</tr>
<tr>
<td>6000</td>
<td>70 to 150</td>
</tr>
</tbody>
</table>

(3) The outfall of the oil/water separator shall be installed in accordance with the following:

A. Surface Discharge

Where discharge occurs to the surface,

1. Where conditions permit, the Owner will provide for greater than 300 metres separation between the discharge outfall and a surface waterbody/watercourse.

2. Where a separation of greater than 300 metres is not achievable, MTO will provide for greater than 30 metres between the separator discharge and the surface waterbody/watercourse.
3. Notwithstanding the above, or if a separation of 30 metres between the separator outfall and the surface waterbody/watercourse is not achievable, the Owner will ensure that in no case is wastewater piped directly to a surface waterbody/watercourse.

B. Subsurface Discharge

Where discharge occurs to the subsurface,

1. Where conditions permit, the Owner will ensure that the dry well is installed at a location which will optimise on-site attenuation and thereby minimize risk of impact on downgradient receptors.

2. Under no conditions can a dry well be utilized where the bottom of the dry well is less than 1 metre above the water table.

3. Where a separation distance of greater than 1 m between the bottom of the dry well and the water table is not achievable, surface discharge will be utilized.

2. APPLICATION PROCESS FOR INSTALLING SEWAGE WORKS AT EXISTING SITES

(1) For each existing patrol yard at which the Owner is installing works in accordance with this certificate, an application shall be submitted to amend this certificate and its schedules accordingly.

(2) A letter certifying compliance with condition No. 1, signed by MTO's District Engineer or the Manager, Maintenance Office, will be included in every application for amendment to this certificate in accordance with Subsection (1).

3.0 TERMS AND CONDITIONS APPLICABLE FOR EACH SITE

The following terms and conditions shall apply to the operation and maintenance of the works at each existing patrol yard at which the Owner is installing oil/water separators in accordance with this certificate:

3.1 VISUAL CHECKS

(1) The Owner shall perform the following visual inspections on the operation of the oil separator, at the frequencies indicated:

(a) Weekly inspections of the catchbasins and sumps located in the garage during the winter months (ie. between October and April) and monthly inspections of these facilities during summer months (ie. April to September) for any visible oil sheens and accumulations of sediment and other debris;
(b) weekly inspections of the outlet of the oil/water separator during discharge of treated 
water for any visible sheen, foaming or floating debris; and,

(c) semi-annual inspections of the contents of the oil/water separator for the accumulation of 
oil material and sediment.

(2) Where the removal of snow from the outlet of the oil/water separator would result in effluent 
freezing, pipe blockage, and subsequent malfunction of the separator, the inspections in 
subsection (1)(b) are not required, but such circumstances shall be documented in the log book 
required in Condition No. 3.4.

3.2 REPORTING EMERGENCIES

(1) As related to the approved works, the Owner shall ensure that, upon the occurrence of any spill, 
bypass or loss of any product, by product, intermediate product, oils, solvents, waste material or 
any other polluting substance into the environment, such occurrence be immediately reported to 
the District Manager or his/her designate, during normal working hours, or otherwise the Spills 
Action Centre for the Ministry (Telephone No.1-800-268-6060).

(2) In furtherance to subsection (1), the Owner shall, within 10 working days of the occurrence, 
submit a written report of the occurrence to the District Manager, describing the cause and 
discovery of the spill or loss, clean-up and recovery measures taken, preventative measure to be 
taken and schedule of implementation.

3.3 OPERATION AND MAINTENANCE

The Owner shall ensure that the works, any related equipment and appurtenances which are installed or 
used to achieve compliance with this certificate are properly operated and maintained, including, the 
following:

(1) Aside from vehicle washing and floor clean-up allowed by this certificate, the Owner shall at all 
other times use dry clean-up absorbent agents to capture and contain spilled materials handled in 
the service area.

(2) The Owner shall drain, collect, and dispose of all automotive fluids in accordance with the 
Ministry’s Guideline for the Handling of Selected Liquid Wastes from Retail Motor Vehicle 
Service Stations.

(3) All dry clean-up absorbent agents used in the service area shall be disposed of in accordance with 
O.Reg. 347/90, as amended.

(4) At no time shall waters containing soaps, detergents or other surfactants be discharged to the 
separator.
3.4 RECORD KEEPING

(1) The Owner shall maintain a log-book at the site at all times, which shall be made available for inspection and copying by Ministry personnel upon request. The log-book shall contain the following:

(a) Results of visual inspections as per Condition No. 3.1;

(b) Quantity and frequency of slop oil and sediment disposal from the oil separator, including a copy of the waste manifest; and

(c) copy of any spills reports to the District Manager required in Condition No. 3.2.

(2) The Owner shall maintain the records in the log-book for a period of at least 2 years from the date in which the record was created.

3.5 RECEIVING WATERS

Notwithstanding any other Condition in this certificate, the Owner shall ensure that the effluent from the works is essentially free of floating and settleable solids and does not contain oil or any other substance in amounts sufficient to create a visible film or sheen or foam on any receiving waters.

SCHEDULE "B"

The following is a list of patrol yards approved under this Certificate of Approval:

Gore Bay Patrol Yard
Lot 5, Concession 9, Highway 540 B, 0.5 km North of Highway 540
Gordon Township, District of Manitoulin, Ontario

Dawson Road Patrol Yard
Lot 23, Concession A
Thunder Bay City, District of Thunder Bay, Ontario

Pearl Patrol Yard
Lot 5, Concession 3
Shuniah Township, District of Thunder Bay, Ontario

Spruce River Road Patrol Yard
Highway 527, 0.2 km North of the Junction with Highway 11/17
MacGregor Unorganized Township, District of Thunder Bay, Ontario
Pickle Lake Patrol Yard
Connell Unorganized Township, District of Kenora, Ontario

Beardmore Patrol Yard
Highway 11, 0.5 km N. of Beardmore
Beardmore Township, District of Thunder Bay, Ontario

Kakabeka Falls Patrol Yard
Lot 20, MR 331, Concession D
Paipoonge Unorganized Township, District of Thunder Bay, Ontario

Ignace Patrol Yard
Part 1, Location L.K.399, Ref. Plan P-28 55-27,
Ignace Township, District of Kenora, Ontario

Carleton Place Patrol Yard
Lot 14, Concession 10
Beckwith Township, County of Lanark, Ontario

Carlsbad Springs Patrol Yard
Lot 19, Concession 11
Cumberland Township, Regional Municipality of Ottawa-Carleton, Ontario

Crosby Patrol Yard
Lot 22, Concession 1
Rideau Lake Township, United Counties of Leeds & Grenville, Ontario

Haley Station Patrol Yard
Lot 22, Concession 3
Ross Township, County Of Renfrew, Ontario

Kanata Patrol Yard
Lot 3, Concession 2
Kanata City, Regional Municipality of Ottawa-Carleton, Ontario

Camden East Patrol Yard
Lot 20, Concession 5
Loyalist Township, County of Lennox & Addington, Ontario

Barriefield Patrol Yard
Lot 1, Concession 2
Kingston City, County Of Frontenac, Ontario
Summerstown Patrol Yard
Lot 14, Concession 2
South Glengarry Township, United Counties Of Stormont, Dundas & Glengarry, Ontario

Crystal Beach Patrol Yard
Lot 33, Concession 1, Highway 401 at County Road #2
Elizabethtown Township, United Counties of Leeds & Grenville, Ontario

Bergland Patrol Yard
Part of Lot of 2, Concession 4
Rainy River Town, District Of Rainy River, Ontario

Vankleek Hill Patrol Yard
Lot 24, Concession 9
North Glengarry Township, United Counties Of Stormont, Dundas & Glengarry, Ontario

Pembroke Patrol Yard
Lot 26, Concession B
Alice & Fraser Township, County Of Renfrew, Ontario

Morrisburg Patrol Yard
Lot 31, Concession 2
South Dundas Township, United Counties Of Stormont, Dundas & Glengarry, Ontario

Kemptville Patrol Yard
Lot 12, Concession 7
North Grenville Township, United Counties Of Leeds & Grenville, Ontario

Ear Falls Patrol Yard
Hwy. 105, 1.4 km North of Junction with Hwy. 804
Ear Falls Township, District of Kenora, Ontario

Red Lake Patrol Yard
Hwy. 105, Junction of Hwy. 125 & 105
Heyson Unorganized Township, District of Kenora, Ontario

Lansdowne Patrol Yard
Highway 401 at Country Road 3
Front of Leeds & Lansdowne Township, United Counties of Leeds & Grenville, Ontario

Emo Patrol Yard
Lot Part of 41, Concession River Range
Emo Township, District Of Rainy River, Ontario
Nestor Falls Patrol Yard  
Part 1, Plan P-25-14-13  
Phillips Unorganized Township, District of Kenora, Ontario

Sioux Lookout Patrol Yard  
Pt of Conc. 24 & 25, Pt 1 & 2 of R. P. P-8019-7  
Drayton Unorganized Township, District of Kenora, Ontario

Batchawana Patrol Yard  
Hwy. 17, 1.3 km. E. of the Junction with Hwy. 563  
Part 1, Reference Plan P-2375-19 & P-2395-30  
Fisher Unorganized Township, District of Algoma, Ontario

Longlac Patrol Yard  
Highway 11, 4.8 Km. East of the Village of Longlac  
Daley Township, District of Thunder Bay, Ontario

Fraserville Patrol Yard  
Lot 1, Concession 8  
Cavan-Millbrook-N. Monaghan Township, County Of Peterborough, Ontario

Whitney Patrol Yard  
Lot 7, Concession 10  
South Algonquin Township, District Of Nipissing

Eganville Patrol Yard  
Lot 20, Concession 12  
North Algona Wilberforce Township, County Of Renfrew, Ontario

Denbigh Patrol Yard  
Lot 22, Concession 6  
Addington Highlands Township, County Of Lennox & Addington, Ontario

Chapleau Patrol Yard  
Part of Location A, Block B  
Chapleau Township, District Of Sudbury, Ontario

Grafton Patrol Yard  
Lot 22, Concession 1  
Haldimand Town, Regional Municipality of Haldimand-Norfolk, Ontario

Dacre Patrol Yard  
Lot 37, Concession D  
Grattan Township, County Of Renfrew, Ontario
Cloyne Patrol Yard
Lot 18, Concession B
North Frontenac Township, County Of Frontenac, Ontario

Agawa Patrol Yard
Part of Location JL-164, Range 16, R.P.3215-11 & 3215-15
Labelle Unorganized Township, District of Algoma, Ontario

Dinorwic Patrol Yard
Part H. W. 163, Plan P-233T-47
Southwold Township, County Of Elgin, Ontario

Pontypool Patrol Yard
Lot 10, Conc 1
Manvers Township, County Of Victoria, Ontario

Arden Patrol Yard
Lot 18, Conc 8
Central Frontenac Township, County Of Frontenac, Ontario

Goulais River Patrol Yard
Hwy. 17, 1.9 km. S. of the Junction with Hwy. 552
VanKoughnet Unorganized Township, District of Algoma, Ontario

Wawa Patrol Yard
Highway 17, 0.7 km. west of the Junction with Highway 101
McMurray Unorganized Township, District of Algoma, Ontario

Echo Bay Patrol Yard
Highway 17, 1.6 km. south of the Junction with Highway 638
MacDonald Unorganized Township, District of Algoma, Ontario

Bow Lake Patrol Yard
Lot 20, Concession 10
Faraday Township, County Of Hastings, Ontario

Cobocork Patrol Yard
Lot 19, Concession GRR
Bexley Township, County Of Victoria, Ontario

Rainy River Patrol Yard
Lot Part of 14, Concession River Range
Rainy River Town, District Of Rainy River, Ontario
Ormsby Patrol Yard  
Lot 25, Concession 8  
Limerick Township, County Of Hastings, Ontario

Madoc Patrol Yard  
Lot 3, Concession 7  
Madoc Township, County Of Hastings, Ontario

Marysville Patrol Yard  
Lot 33, Concession 1  
Tyendinaga Township, County Of Hastings, Ontario

Maynooth Patrol Yard  
Lot 11, Concession 14 WHR  
Herschel Township, County Of Hastings, Ontario

Norwood Patrol Yard  
Lot 20, Concession 10  
Asphodel-Norwood Township, County Of Peterborough, Ontario

Youngs Point Patrol Yard  
Lot 37, Concession 12  
Smith-Ennismore Township, County Of Peterborough, Ontario

Lindsay Patrol Yard  
Lot 14, Concession 6  
Ops Township, County Of Victoria, Ontario

Marathon Patrol Yard  
Highway 17, 2.1 Km West of the Junction with Highway 626  
O'Neill Unorganized Township, District of Thunder Bay, Ontario

Barrys Bay Patrol Yard  
Lots 186 and 187, Concession 'B', Highway 60/62, at the East Limits of Barrys Bay  
Sherwood, Jones & Burns Township, County Of Renfrew, Ontario

Bloomfield Patrol Yard  
Lot 17, Concession 2  
Highway 62, 3.5 Kilometers North of Highway 33  
Prince Edward County City, County Of Prince Edward, Ontario

Field Patrol Yard  
Lot 14, Concession 6, Highway 64 1 km. North of Highway 539  
West Nipissing Municipality, District Of Nipissing, Ontario
Verner Patrol Yard
Lot 9, Concession 4
West Nipissing Municipality, District of Nipissing, Ontario

Powassan Patrol Yard
Lot 16, Concessions 13 & 14
South Himsworth Unorganized Township, District of Parry Sound, Ontario

Bruce Mines Patrol Yard
Part of South Half of Lot 5, Conc.4, R.P. P-3362
Plummer Additional Township, District Of Algoma, Ontario

Missinabie Patrol Yard
Crown Land, Part 1, Reference Plan P-2829-5
West Unorganized Township, District of Algoma, Ontario

Matheson Patrol Yard
Lot 4, Con. 6,
Bowman Unorganized Township, District of Cochrane, Ontario

Stonecliffe Patrol Yard
Lots 33/34, Con. 17,
Head, Clara & Maria Township, County Of Renfrew, Ontario

Nickle Lake Patrol Yard
Lot 5, Concession 3
Watten Unorganized Township, District of Rainy River, Ontario

Homepayne Patrol Yard
Part of Lot 13, Concession 4
Wicksteed Township, District of Algoma, Ontario

Iron Bridge Patrol Yard
Part of Lot 5, Concession 3
Gladstone Unorganized Township, District of Algoma, Ontario

Thessalon Patrol Yard
Part of SE 1/4 Section 33
Thessalon Town, District Of Algoma, Ontario

Matachewan Patrol Yard
Highway 66, 0.5 Km. West of the Junction of Highways 65 and 66
Township of Cairo, District of Timiskaming, Ontario
Englehart Patrol Yard
Lot 11, Concession 5
Evanturel Township, District of Timiskaming, Ontario

Hinkler Lake Patrol Yard
Crown Land (Highway 129, 25.8 km. North of the Junction with Highway 556)
Martel Unorganized Township, District of Algoma, Ontario

Noelville Patrol Yard
Lot 1, Concession 4
French River Municipality, District Of Sudbury, Ontario

Feronia Patrol Yard
Lot 5, Concession 1
Widdifield Unorganized Township, District of Nipissing, Ontario

Britt Patrol Yard
Lot B, Concession 17
Henvey Unorganized Township, District of Parry Sound, Ontario

Point Alexander Patrol Yard
Lot 25, Range B, Highway 17, 160 km East of Highway 11
Rolph, Buchanan, Wylie & Mckay Township, County Of Renfrew, Ontario

Little Current Patrol Yard
Lot 23, Concession 1, Highway 540/Worthington St. at Cockburn Street
Northeastern Manitoulin & The Islands Town, District of Manitoulin, Ontario

Mattawa Patrol Yard
Lot 21, Concession 15, Highway 15, 5 km West of Junction Highway 533
Mattawa Town, District of Nipissing, Ontario

Farley's Corner Patrol Yard
Lot 30, Concession 11
Pringle Township, District of Parry Sound, Ontario

Cartier Patrol Yard
Highway 144, at Old Cartier Road
Cartier Township, District of Sudbury, Ontario

Rutter Patrol Yard
Lot 11, Concession 4
Bigwood Unorganized Township, District of Sudbury, Ontario
Shining Tree Patrol Yard
Part MCL 3638, MCL 44211
Asquith Unorganized Township, District of Sudbury, Ontario

Kenogami Patrol Yard
Lot 5, Concession 6
Eby Unorganized Township, District of Timiskaming, Ontario

Elk Lake Patrol Yard
Lot 6, Concession 5
James Township, District of Timiskaming, Ontario

McKerrow Patrol Yard
Lot 5, Conc. 1
Baldwin Township, District of Sudbury, Ontario

Mindemoya Patrol Yard
Lot 16, Conc. 5
Carnarvon Unorganized Township, District of Manitoulin, Ontario

Temagami Patrol Yard
Highway No. 11, Part MC 5591, P-2393
Strathcona Unorganized Township, District of Nipissing, Ontario

TriTown Patrol Yard
Lot 5, Concession 4
Bucke Unorganized Township, District of Timiskaming, Ontario

Wahnapitae Patrol Yard
Lot 10, Concession 3
Nickel Centre Town, Regional Municipality of Sudbury, Ontario

Walford Patrol Yard
1/4 Section 31
Sables-Spanish River Township, District of Sudbury, Ontario

Hilton Beach Patrol Yard
Lot C, Concession 16, Reference Plan P-2888-3
Hilton Township, District of Algoma, Ontario

Blind River Patrol Yard
Part of Lot 7, Concession 1
Striker Unorganized Township, District of Algoma, Ontario
Barrie (Main) Patrol Yard
Lot 6, Concession 1
Barrie City, County of Simcoe, Ontario

Clavering Patrol Yard
Lot 38, Concession 2, 4.7 km. N. of Hepworth on Highway #6
South Bruce Peninsula Town, County of Bruce, Ontario

Coldwater Patrol Yard
Lot 1, Concession 11
Oro-Medonte Township, County of Simcoe, Ontario

Kincardine Patrol Yard
Lot 1, Concession 1
Kincardine-Bruce-Tiverton Township, County of Bruce, Ontario

Arthur Patrol Yard
310 Smith Street
Mt. Forest/Arthur/W. Luther/Arthur Township, County of Wellington, Ontario

Barrie (Lower) Patrol Yard
Lot 6, Concession 14, 0.13 km. W. of Essa Rd. on Ardagh Road
Barrie City, County of Simcoe, Ontario

Brechin Patrol Yard
South half of Lot 11, Concession 6, Junction of Highway 12 and County Road No. 169
Ramara Township, County of Simcoe, Ontario

Guelph Patrol Yard “B”
Lot 2, Concession 10, 595 Elmira Road
Guelph City, County of Wellington, Ontario

Stayner Patrol Yard
Part of Lots 25, 26 and 27, County Road 91
Clearview Township, County of Simcoe, Ontario

Iona Patrol Yard
Lot C, Concession A
Chatham-Kent City, County of Kent, Ontario

Courtright Patrol Yard
Lot 27, Concession 5
Moore Township, County of Lambton, Ontario
Canfield Patrol Yard
Lot 1, Concession 13
Township of North Cayuga, Regional Municipality of Haldimand-Norfolk, Ontario

Cookstown Patrol Yard
Lot 1, Concession 4
Essa Township, County of Simcoe, Ontario

Kent Centre Patrol Yard
Lot 25, 1 ECR
Chatham-Kent City, County of Kent, Ontario

Kitchener Patrol Yard
Lot 8, B.F., 200 Sports World Drive
Cambridge City, Regional Municipality of Waterloo, Ontario

Port Franks Patrol Yard
Lot 35, Lake Road East
Bosanquet Town, County of Lambton, Ontario

 Tillsonburg Patrol Yard
Lot 19, Concession 11
Township of Oxford, County of Elgin, Ontario

Westminster Patrol Yard
Lot 65, East Concession, 6355 Westminster Road
London City, County of Middlesex, Ontario

Woodstock Patrol Yard
Lot 22, Concession 3, 575 Mill Street
South-West Oxford Township, County of Oxford, Ontario

Kapuskasing Patrol Yard
Lot 3, Concession 16
Val Rita-Harty Township, District of Cochrane, Ontario

Belle River Patrol Yard
1860 Belle River Road
Lakeshore Town, County of Essex, Ontario

Durham Patrol Yard
County Road #4, Lot 57, Concession 2, WGR
Bentinck Township, County of Grey, Ontario
Forest Home Patrol Yard  
Lot 16, Concession 14  
Oro-Medonte Township, County of Simcoe, Ontario

Elsinore Patrol Yard  
Lot 44, Indian Strip (Half Mile Strip)  
Arran-Elderslie Municipality, County of Bruce, Ontario

Nilestown Patrol Yard  
Lot 24, Concession 1  
North Dorchester Township, County of Middlesex, Ontario

Listowel Patrol Yard  
Lot 24, Concession 2  
North Perth Town, County of Perth, Ontario

Paris Patrol Yard  
Lot 10, Concession 2  
Brant County City, County of Brant, Ontario

Oldcastle Patrol Yard  
Lot 303, South Talbot Road  
Tecumseh Town, County of Essex, Ontario

Owen Sound District Office Patrol Yard  
1450, 7th Avenue East  
Owen Sound City, County of Grey, Ontario

Hillsdale Patrol Yard  
Lot 51, Concession 1  
Springwater Township, County of Simcoe, Ontario

Meaford Patrol Yard  
Lots 44 and 13, Concession 4, R.P. 309  
Meaford Town, County of Grey, Ontario

Guelph Patrol Yard ‘A’  
Lot 10, Concession 2  
Guelph City, County of Wellington, Ontario

Timmins Patrol Yard  
1563 Riverside Drive (Hwy. 101 West)  
Mountjoy Unorganized Township, District of Cochrane, Ontario
Minden Patrol Yard
Lot 5, Concession 12,
3.0 km. South of the Junction of Highway 121/35
Lutterworth Township, County of Haliburton, Ontario

New Hamburg Patrol Yard
Lot 19, HBR
Wilmot Township, Regional Municipality of Waterloo, Ontario

Nagagami Patrol Yard
Lot 6, Concession 8
McMillan Unorganized Township, District of Cochrane, Ontario

Mitchell Patrol Yard
Lot 26, Concession 4
Perth West Township, County of Perth, Ontario

Clinton Patrol Yard
Lot 21-22, Huron Road
Goderich Township, County of Huron, Ontario

Midhurst Patrol Yard
Part of Lot 3, Concession 4
Springwater Township, County of Simcoe, Ontario

Dorset Patrol Yard
Lot 1, Concession 11,
1.5 km. East of Junction of Hwy. #35 & 117
Lake of Bays Township, District Municipality of Muskoka, Ontario

Walden Patrol Yard
251 Regional Road 55
Walden Town, Regional Municipality of Sudbury, Ontario

Killarney Patrol Yard
1096 Highway 637
Killarney Municipality, District of Sudbury, Ontario

Elliot Lake Patrol Yard
134 Highway 108
Elliot Lake City, District of Algoma, Ontario
Harrison Patrol Yard
Lot 84, Concession ‘C’
Minto Township, County of Wellington, Ontario

Hearst Patrol Yard
Lot 2, Concession 11
Way Unorganized Township, District of Cochrane, Ontario

Emsdale Patrol Yard
Lot 15, Concession 10
Perry Township, District of Perry Sound, Ontario

Dunchurch Patrol Yard
Lot 30, Concession 10
Croft Unorganized Township, District of Parry Sound, Ontario

Flesherton Patrol Yard
Lot 150, Concession 2
Artemesia Township, County of Grey, Ontario

Smooth Rock Falls Patrol Yard
Lot 20, Concession 8
Smooth Rock Falls Town, District of Cochrane, Ontario

Gogama Patrol Yard
Lot 560
Jack Unorganized Township, District of Sudbury, Ontario

Cochrane Patrol Yard
Lot 8, Concession 6
Lamarche Unorganized Township, District of Cochrane, Ontario

Foleyet Patrol Yard
Lot 6, Concession 6
Foleyet Unorganized Township, District of Sudbury, Ontario

Elginfield Patrol Yard
Lot 37, Concession 6
Lucan Biddulph Township, County of Middlesex, Ontario

Coldwater (South) Patrol Yard
Lot 1, Concession 11, 1100 FR Nelson Road
Oro-Medonte Township, County of Simcoe, Ontario
MacTier Patrol Yard
Lots 2 and 3, Concession 5
Georgina Bay Township, District of Muskoka, Ontario

Parry Sound Patrol Yard
Lot 138, Concession B
Foley Unorganized Township, District of Parry Sound, Ontario

Baldwin Patrol Yard
24698 Highway No. 48, Lots 13 & 14, Concession VII
Immediately West of Highway No. 48, 0.5 Km. North of Smith Boulevard
Georgina Town, Regional Municipality of York, Ontario

Caledon Patrol Yard
18147 Highway No. 10, Lot 14, Conc. XIV
Immediately East of Highway No. 10, 1 Km. South of Highway No. 24
Caledon Town, Regional Municipality of Peel, Ontario

Bowen Patrol Yard
1900 Bowen Road
Fort Erie Town, Regional Municipality Of Niagara, Ontario

Beaverdams Patrol Yard
2636 Hansler Road, R.R. #1
Thorold City, Regional Municipality Of Niagara, Ontario

Arrow Road Patrol Yard
95 Arrow Road, Lot 17, Concession V
Toronto City, Municipality Of Metropolitan Toronto, Ontario

Palermo Patrol Yard
Part of Lot 31, Concession II
Milton Town, Regional Municipality of Halton, Ontario

Morriston Patrol Yard
7 Queen Street
Puslinch Township, County of Wellington, Ontario

Gravenhurst Patrol Yard
Lot 2, RE MR - Highway 11
Gravenhurst Town, District Municipality of Muskoka, Ontario
Huntsville Patrol Yard
Lot 2, Concession 14
Huntsville Town, District Municipality of Muskoka, Ontario

Reeces Corners Patrol Yard
4311 London Road, Lot 16, Concession V
Enniskillen Township, County of Lambton, Ontario

St. Marys Patrol Yard, Lot 22, Concession 20
R.R.#2
Perth South Township, County of Perth, Ontario

Strathroy Patrol Yard,
Lot 150, Concession 2, R.R.#6
Adelaide Township, County of Middlesex, Ontario

Duff's Corners Patrol Yard
1389 Highway 2, RR #1
Ancaster Town, Regional Municipality Of Hamilton-Wentworth, Ontario

Homer Patrol Yard
571 York Road
Niagara-On-The-Lake Town, Regional Municipality Of Niagara, Ontario

Walkerton Patrol Yard
Lot 22, Concession 2
Brockton Municipality, County Of Bruce, Ontario

Strathroy Patrol Yard
Lot 22, Concession 1, R.R. #6
Intersection of Highway #81 and Highway #22 North of Strathroy
Township of Adelaide, County of Middlesex, Ontario

Coldwater (North) Patrol Yard
Lot 1, Concession 11, 2.5 Kilometers North of Coldwater,
1 Kilometer North of the Junction of Highway #12 and Simcoe Road No. 23
Oro-Medonte Township, County of Simcoe, Ontario

Tweed Patrol Yard
Lot 8, Concession 8
Tweed Township, County of Hastings, Ontario
Highway 401 and Highway 10 Patrol Yard
6199 Hurontario Street
Mississauga City, Regional Municipality of Peel, Ontario

Geraldton Patrol Yard
Highway 11, 1 Km. East of the Junction with Highway 584
Ashmore Unorganized Township, District of Thunder Bay, Ontario

Armstrong Patrol Yard
Part 1, Reference Plan No. P-8060-55 on Highway No. 527,
0.6 kilometer south of the intersection with CN Tracks at Armstrong Station
Unorganized Area, District of Thunder Bay, Ontario

Dryden Patrol Yard  
Part of Lot 5, Concession 6  
Dryden City, District of Kenora, Ontario  

The reasons for the imposition of these terms and conditions are as follows:  

GENERAL CONDITIONS  

1. Condition No. 1 is included to specify criteria for sizing works to be installed at patrol yards, in order to enable compliance with the terms and conditions of this certificate, such that the environment is protected.  

2. Condition No. 2 is included to ensure that the Owner make application on a site specific basis for each patrol yard at which works are to be installed, such that site specific conditions will be accounted for, in order to prevent deleterious effects on the environment.  

TERMS AND CONDITIONS APPLICABLE FOR EACH SITE  

3.1 Condition No. 3.1 is included to ensure that the works are operated, inspected and maintained in accordance with Ministry guidelines.
3.2 Condition No. 3.2 is included to ensure that accurate information is readily available so that a proper and accurate assessment of the operating performance of the works may be conducted and that appropriate measures be taken should the operating performance of the works not be satisfactory.

3.3 Condition No. 3.3 is included to ensure that the Ministry is immediately informed of the occurrence of an emergency or otherwise abnormal situation so that appropriate steps are taken to address the immediate concerns regarding the protection of public health and the minimizing of severity of environmental damage and to be able to devise an overall abatement strategy to prevent long term degradation and the re-occurrence of the situation.

3.4 Condition No. 3.4 is included to ensure that only certain types of waste waters are treated in the approved separator and to ensure that substances which may cause an adverse impact on the environment or separator operation are not discharged to the separator.

3.5 Condition No. 3.5 is imposed to ensure that the effluent discharged from the works to the meets the Ministry’s effluent quality requirements as specified on a continual basis thus minimizing environmental impact to the receiver.

This Certificate of Approval revokes and replaces Certificate(s) of Approval No. 0245-4L8P2P issued on June 13, 2000.

In accordance with Section 100 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, as amended, you may by written notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 101 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, provides that the Notice requiring the hearing shall state:

1. The portions of the approval or each term or condition in the approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The Certificate of Approval number;
6. The date of the Certificate of Approval;
7. The name of the Director;
8. The municipality within which the works are located;

And the Notice should be signed and dated by the appellant.

AMENDMENT TO CERTIFICATE OF APPROVAL
INDUSTRIAL SEWAGE WORKS
NUMBER 6501-587PSL
Notice No. 5

Her Majesty the Queen in Right of Ontario as represented by the Minister of Transportation
301 St. Paul Street
St. Catharines, Ontario
L2R 7R4

Site Location: Various Patrol Yards Throughout the Province
St. Catharines City, Regional Municipality Of Niagara

You are hereby notified that I have amended Certificate of Approval No. 6501-587PSL issued
on April 22, 2002 for works serving various patrol yards throughout the province, as follows:

Condition 3.3 (4) is hereby replaced with the following:

(4) The Owner may only discharge waters containing those soaps, detergents or other surfactants to
the separator, that are included in the supporting documentation listed in Schedule “A” of this
Certificate, and in dilution ratios specified in the supporting documentation.

Schedule "A" of the Certificate is hereby amended to include the following documentation:

Application for Approval of Industrial Sewage Works dated September 16, 2004, and all supporting
documentation and information.

The reason for this amendment to the Certificate of Approval is as follows:

To permit the Owner to use soap alternatives at all their patrol yards throughout the province.

This Notice shall constitute part of the approval issued under Certificate of Approval No. 6501-587PSL
dated April 22, 2002

In accordance with Section 100 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, as
amended, you may by written notice served upon me and the Environmental Review Tribunal within 15 days
after receipt of this Notice require a hearing by the Tribunal. Section 101 of the Ontario Water Resources Act,
R.S.O. 1990, Chapter 0.40, provides that the Notice requiring the hearing shall state:

Part of Lot 10, Concession 6N, Highway 61
Neebing Township, District of Thunder Bay

Longbow Corners Patrol Yard
Lot 2, Concession 1
Haycock Unorganized Township, District Kenora

2. Condition 2. (2) of Terms and Conditions in the Certificate of Approval dated April 22, 2002 will replace "District Engineer" with "Manager of Operational Services".

All in accordance with the applications dated February 20, 2002, signed by Jennifer Boyer, Environmental Planner, Waste Management, Central Region; August 23, 2002, signed by Marlo Johnson, Supervisor, Environmental Unit, Northern Region; October 26, 2004, signed by Paula Sdao, Environmental Planner, Waste Management, and e-mail dated December 1, 2004 and letter December 15, 2004, from Terry Hilditch, Senior Policy Analyst, all from Ontario Ministry of Transportation and supporting documentation and information.
This Notice shall constitute part of the approval issued under Certificate of Approval No. 6501-587PSL dated April 22, 2002

In accordance with Section 100 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, as amended, you may by written notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 101 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, provides that the Notice requiring the hearing shall state:

1. The portions of the approval or each term or condition in the approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The Certificate of Approval number;
6. The date of the Certificate of Approval;
7. The name of the Director;
8. The municipality within which the works are located;

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*  
Environmental Review Tribunal  
2300 Yonge St., 12th Floor  
P.O. Box 2382  
Toronto, Ontario  
M4P 1E4  

The Director  
Section 53, Ontario Water Resources Act  
Ministry of the Environment  
2 St. Clair Avenue West, Floor 12A  
Toronto, Ontario

St. Catharines City, Regional Municipality Of Niagara

You are hereby notified that I have amended Certificate of Approval No. 6501-587PSL issued on April 22, 2002 for the establishment of sewage works for the collection, transmission, treatment and disposal of wastewater from the washing of highway maintenance vehicles at existing and functioning Patrol Yard Garages, as follows:

The following supporting documentation has been added:

This Notice shall constitute part of the approval issued under Certificate of Approval No. 6501-587PSL dated April 22, 2002.

In accordance with Section 100 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, as amended, you may by written notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 101 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, provides that the Notice requiring the hearing shall state:

1. The portions of the approval or each term or condition in the approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The Certificate of Approval number;
6. The date of the Certificate of Approval;
7. The name of the Director;
8. The municipality within which the works are located;

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*

Inspection Checklists
# Oil/Water Separator Maintenance Checklist

## Procedure for Pumping out OWS

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Action/Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 1</td>
<td>Stop using the separator.</td>
</tr>
<tr>
<td>Step 2</td>
<td>Ensure that the carrier is properly licensed to haul the oil/water separator waste.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Carrier cleans out floor drains of oil, water and sediment.</td>
</tr>
<tr>
<td>Step 4</td>
<td>Carrier flushes drain line from garage to separator (optional).</td>
</tr>
<tr>
<td>Step 5</td>
<td>Carrier waits for material in drain line to empty into separator and separate (n/a if Step 4 skipped).</td>
</tr>
<tr>
<td>Step 6</td>
<td>Carrier pumps oil and sediment from all three chambers of the separator and leaves the water (or pumps all three chambers dry).</td>
</tr>
<tr>
<td>Step 7</td>
<td>Ensure that the patrol yard location on the Waste Manifest is correct. Ensure that the waste class number is correct.</td>
</tr>
<tr>
<td>Step 8</td>
<td>Sign the waste manifest. Carrier gives a copy of the manifest to MTO.</td>
</tr>
<tr>
<td>Step 9</td>
<td>Place a copy of the manifest in the binder.</td>
</tr>
<tr>
<td>Step 10</td>
<td>Fill OWS chambers back up with water (either directly into the OWS, or through the floor drains).</td>
</tr>
</tbody>
</table>

Inspection Log
## Oil/Water Separator Inspection Procedure - MTO Facilities

<table>
<thead>
<tr>
<th>Task</th>
<th>Response</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inspect the floor drains/ sumps / catch basins.</td>
<td>Yes</td>
<td>Clean out grates and catch basins.</td>
</tr>
<tr>
<td>Is there salt, sediment or oil built up?</td>
<td></td>
<td>Catch basin sediment must go to landfill via an MOE Certified Carrier or in MTO vehicles. Record inspection in log sheet.</td>
</tr>
<tr>
<td>No</td>
<td></td>
<td>No action required. Record inspection in log sheet.</td>
</tr>
<tr>
<td>Inspect the OWS Outlet.</td>
<td>Yes</td>
<td>Stop using the separator. Contact maintenance superintendent or Environmental Unit for further direction.</td>
</tr>
<tr>
<td>Is there any oil/fuel, a visible sheen (i.e. rainbow), foaming or floating debris? Anything else unusual?</td>
<td></td>
<td>Record inspection in log sheet.</td>
</tr>
<tr>
<td>No</td>
<td></td>
<td>No action required. Record inspection in log sheet.</td>
</tr>
<tr>
<td>Inspect the OWS Chambers.</td>
<td>Yes</td>
<td>Arrange for an MOE-certified carrier to pump out the OWS.</td>
</tr>
<tr>
<td>Is there accumulated oil and/or sediment in the chambers? Is there more than 4 inches of sediment? Is there more than 12 inches of floating oil?</td>
<td></td>
<td>Obtain a copy of the waste manifest and place in OWS Log Book. Record inspection in log sheet.</td>
</tr>
<tr>
<td>No</td>
<td></td>
<td>No action required. Record inspection in log sheet.</td>
</tr>
<tr>
<td>The 1\textsuperscript{st} chamber should have the most oil, with less in the 2\textsuperscript{nd} and the least in the 3\textsuperscript{rd}. Is this the case?</td>
<td>Yes</td>
<td>No action required. Record inspection in log sheet.</td>
</tr>
<tr>
<td>No</td>
<td></td>
<td>The separator may be malfunctioning or there may have been a spill.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Stop using the separator. Contact maintenance co-ordinator or Environmental Unit for further direction.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Record inspection in log sheet.</td>
