

UPDATE # 28

March 8, 2002

The RBRVS Commission wishes to thank the OMA Clinical Sections for their feedback in response to the Commission's Draft Report. Almost all Sections provided a written submission, and, in February and early March the Commission met with 22 of those Sections to discuss their submissions in detail. The time and consideration that went into this final phase of consultations is much appreciated.

Please note that Sections providing additional information must have their submissions in to the Commission by the end of this month.

In addition, hundreds of letters were received from individual physicians providing further input and recommendations.

The Commission is now in the process of collating and reviewing the information it has received, in order to finalize its recommendations to the Ministry of Health and Long Term Care and the Ontario Medical Association. The final report will be submitted to both parties by the end of June 2002.
