7/6/2008	14:00	0:28	Heads Up!	Where Is the Centre of the Universe?		Everything seems to move around us. The sun, moon, stars and planets all rise in the east, pass overhead and set in the west. No wonder ancient astronomers thought the Earth was at the centre of the solar system. Now we know our planet is just one of many going around the sun, but what about the rest of the universe? Stars and galaxies in every direction all seem to be moving away from us. Are back at the centre again. Come on a journey to the edge of space to find out if there is even a centre at all.	CC	G
