1. Statistics Canada's population estimates and components of change are 2001 Census-based adjusted for net undercoverage.

2. Except for Canada, all projections are produced by the Ontario Ministry of Finance (Spring 2008 Update). Projections for Canada are Statistics Canada.

3. Total dependency ratio is the ratio of the population aged 0-19 and 65+ to the population aged 20-64.

4. Total Fertility Rates and life expectancy estimates are for calendar year, and projections are for census year.

5. Families and households are Census data.

6. In the "Components of Change" table, flows are for the 12-month period July 1 to June 30. Net international migration is calculated as the net balance of immigrants, net emigrants and net non-permanent residents (NPRs).

Note: All population figures are for July 1st.
