Interprovincial Migration

In the third quarter of 2013, Ontario had a net loss of 990 people to other provinces compared to a net loss of 5,591 people in the same quarter of 2012. Ontario experienced net gains in its exchanges with eight of the 12 other provinces and territories, with the largest net gains from Quebec (2,473) and New Brunswick (503). Ontario's largest net losses were with Alberta (-4,661) and British Columbia (-129). Over the last 12 months, Ontario's total net interprovincial migration loss was 16,722 compared to a 16,039 loss during the previous year.

Year-Over-Year Growth

Over the last 12 months, Ontario's population grew by 128,442 or 1.0%, lower than growth of 140,356 during the previous year. Among the provinces, Alberta and Saskatchewan had the highest population growth rates (3.5% and 1.8% respectively). Canada's population growth rate over the period was 1.2%.

1. Statistics Canada's population estimates. Regional distribution figures are based on the 2006 Census. Other population estimates are based on the 2011 Census.

2. Except for Canada, projections are produced by the Ontario Ministry of Finance (Spring 2013). Projections for Canada are from Statistics Canada (based on 2006 Census).

3. Total dependency ratio is the ratio of the population aged 0-19 and 65+ to the population aged 20-64.

4. Total Fertility Rates and life expectancy estimates are for calendar year, and projections are for census year. Life expectancy estimates for years after 2006 represent three-year averages (e.g., 2006 reported life expectancy corresponds to the average recorded over 2005-2007).

5. Families and households are Census data.

6. In the "Components of Change" table, flows are for the 12-month period July 1 to June 30. Net international migration is calculated as the net balance of immigrants, net emigrants and net non-permanent residents (NPRs).

Note: All population figures are for July 1st.
