Interprovincial migration

In the second quarter of 2019, Ontario had a net inflow of 802 people from other provinces and territories compared to a net gain of 688 people in the same quarter of 2018. Ontario experienced net gains in its exchanges with six of the 12 other provinces and territories. The largest gains came from Manitoba (1,010) and Saskatchewan (962). The largest losses were to British Columbia (-351) and Alberta (-343). Over the last 12 months, Ontario's total net interprovincial migration gain was 11,731, compared to a net gain of 9,944 during the previous year.

Year-over-year growth

Over the last 12 months, Ontario's population grew by 248,002 or 1.7%, higher than growth of 245,930 during the previous year. Among the provinces, Ontario had the second fastest population growth rate, after Prince Edward Island (2.2%). Canada's population grew at a rate of 1.4% over the period.

1. Statistics Canada's population estimates based on the 2016 Census.

2. All projections are produced by the Ontario Ministry of Finance (Summer 2019), except those for Canada (and Ontario as % of Canada), which are from Statistics Canada.

3. Total dependency ratio is the ratio of the population aged 0–19 and 65+ to the population aged 20–64.

4. Total Fertility Rates and life expectancy estimates are for calendar year, and projections are for census year. Life expectancy estimates represent three-year averages (e.g., 2006 reported life expectancy corresponds to the average recorded over 2005–2007).

5. Households are Census data.

6. In the "Components of Change" table, flows are for the 12-month period July 1 to June 30. Net international migration is calculated as the net balance of immigrants, net emigrants and net non-permanent residents (NPRs). Components may not add up due to existence of residuals.

Note: All population figures are for July 1st.
