Interprovincial migration

In the third quarter of 2019, Ontario had a net inflow of 2,959 people from other provinces and territories compared to a net gain of 6,937 people in the same quarter of 2018. Ontario experienced net gains in its exchanges with six of the 12 other provinces and territories. The largest gains came from Manitoba (1,496) and Quebec (1,205). The largest losses were to Nova Scotia (-679) and British Columbia (-455). Over the last 12 months, Ontario's total net interprovincial migration gain was 7,753, compared to a net gain of 11,896 during the previous year.

Year-over-year growth

Over the last 12 months, Ontario's population grew by 253,890 or 1.8%, slightly higher than growth of 253,570 during the previous year. Among the provinces, Ontario had the second fastest population growth rate, after Prince Edward Island (1.8%). Canada's population grew at a rate of 1.5% over the period.

1. Statistics Canada's population estimates based on the 2016 Census.

2. All projections are produced by the Ontario Ministry of Finance (Summer 2019), except those for Canada (and Ontario as % of Canada), which are from Statistics Canada.

3. Total dependency ratio is the ratio of the population aged 0–19 and 65+ to the population aged 20–64.

4. Total Fertility Rates and life expectancy estimates are for calendar year, and projections are for census year. Life expectancy estimates represent three-year averages (e.g., 2006 reported life expectancy corresponds to the average recorded over 2005–2007).

5. Households are Census data.

6. In the "Components of Change" table, flows are for the 12-month period July 1 to June 30. Net international migration is calculated as the net balance of immigrants, net emigrants and net non-permanent residents (NPRs). Components may not add up due to existence of residuals.

Note: All population figures are for July 1st.
