Findings/Faits saillants :**1. Log #O-000801-12**

The licensee failed to comply with LTCHA S.O.2007,c.8,s.3(1)1 when resident # 001 was not treated with courtesy and respect in a way that fully recognize the resident's individuality and dignity

Following an admission process a resident's family member requested to have resident #001 toileted. The family member approached the nursing station to request assistance with toileting and the RPN proceeded to inform the family member that she required an assessment for transfer, a commode was not available, a lift would be required and left to find staff. Thirty minutes later when no one had assisted the resident with toileting the family member went to inform the DOC that resident # 001 would be discharged, and took the resident home.

WN #2: The Licensee has failed to comply with O.Reg 79/10, s. 53. Responsive behaviours

Specifically failed to comply with the following subsections:

s. 53. (1) Every licensee of a long-term care home shall ensure that the following are developed to meet the needs of residents with responsive behaviours:

1. Written approaches to care, including screening protocols, assessment, reassessment and identification of behavioural triggers that may result in responsive behaviours, whether cognitive, physical, emotional, social, environmental or other.

2. Written strategies, including techniques and interventions, to prevent, minimize or respond to the responsive behaviours.

(a) the behavioural triggers for the resident are identified, where possible;

(b) strategies are developed and implemented to respond to these behaviours, where possible; and

1. Log # O-000059-12

The licensee failed to comply with O. Reg 79/10 s.53(4)(a) when behavioural triggers for resident # 002 were not identified for the resident's aggressive behaviour.

RPN stated that resident # 002 will become aggressive when other residents invade the resident's personal space.

There have been two incidents of aggression with resident # 002 and co-residents, where other residents have had minor injuries as a result of this type of situation.

The plan of care reviewed, does not identify triggers or list interventions on how to manage the aggressive behaviour for this resident, specific to invading the resident's personal space.

2. The Licensee failed to comply with O. Reg 79/10 s.53(1)1 by identifying on the written plan of care behavioural triggers that may result in a sexually inappropriate behaviour.

Resident # 002 was found to be sexually inappropriate with resident # 003. Review of the clinical health record and interviews with registered staff verifies that there have not been any incidents of inappropriate sexual behaviours for resident # 002 prior to or since the identified incident.

Licensee was made aware of the sexual inappropriate behaviour by the CCAC pre-application, family statements in admission note, past psychiatric history documented and on file in the resident's clinical health records.

The plan of care dated October 2011 reviewed for resident # 002 does not indicate any sexually inappropriate behaviour, triggers or interventions.
