Findings:

1. The resident is identified as being at high risk for falls. He/She fell on January 18 2011. He/She was assessed post fall to need PASDs (positioning aids safety devices). A lap belt, which he /she can release, and a chair alarm were added to his/her wheelchair post fall.
2. On January 28, 2011 at 11:15 am , it was observed by the MOHLTC inspector that the resident did not have his/her wheelchair lap belt applied around his/her waist as identified in his/her plan of care. The lap belt buckle ends were clipped together. The lap belt was behind the resident's back.
3. The wheelchair chair alarm is connected to the lap belt buckle. In the occurrence noted above, the resident did not have his/her lap belt applied and therefore did not have his/her chair alarm applied as identified in his/her plan of care.
4. The Personal Support Worker who was providing direct care to the resident told the MOHLTC inspector on January 28, 2011, that her/she did not apply the wheelchair lap belt and chair alarm, as identified in the resident's plan of care that morning.
