Inspection Report under
the Long-Term Care
Homes Act, 2007

Rapport d'inspection sous la
Loi de 2007 sur les foyers de
soins de longue durée

Non-compliance with requirements under the Long-Term Care Homes Act, 2007 (LTCHA) was found. (A requirement under the LTCHA includes the requirements contained in the items listed in the definition of "requirement under this Act" in subsection 2(1) of the LTCHA.)

The following constitutes written notification of non-compliance under paragraph 1 of section 152 of the LTCHA.

Le non-respect des exigences de la Loi de 2007 sur les foyers de soins de longue durée (LFSLD) a été constaté. (Une exigence de la loi comprend les exigences qui font partie des éléments énumérés dans la définition de « exigence prévue par la présente loi », au paragraphe 2(1) de la LFSLD.

Ce qui suit constitue un avis écrit de non-respect aux termes du paragraphe 1 de l'article 152 de la LFSLD.

WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 36. Every licensee of a long-term care home shall ensure that staff use safe transferring and positioning devices or techniques when assisting residents. O. Reg. 79/10, s. 36.

soins de longue durée**

1. Staff at the home did not ensure that safe positioning techniques were used for an identified resident prior to a fall that resulted in injury.

On the day of the fall, the identified resident was found to have fallen from their Tilt Chair and was laying on the floor in their room.

a) It was noted by the nurse who assessed the resident after the fall occurred that the Tilt Chair was in upright position and not tilted as per the direction in the resident's plan of care. It was reported by staff at the home that a person who was providing assistance to the resident was with the resident at dinner and had also returned the resident back to their room after dinner. This person had already left when the resident sustained the fall.

b) It was noted that prior to the fall, after the resident had been returned to their room by the person who was providing assistance, the resident was observed by a staff member to be sitting in the Tilt Chair in their room and the staff member also noted that the Tilt Chair was in upright position and was not tilted as directed in the resident's plan of care. It was noted that the staff member did not take any action at that time to correct the position of the chair.

c) The home's policy related to Tilt Chairs dated as last reviewed in April 2012, indicated that there are wheelchair description tags on Tilt Chairs. Green edged tags indicate "TILT - reposition every two hours". The red edged tags indicate "DO NOT TILT- please remove my footrests and place my feet on the ground". During an interview with the Director of Care it was confirmed that the the identified resident's Tilt Chair was equipped with a green edged tag requiring that the chair be tilted.

d) The document that the home referred to as the care plan indicated prior to the fall that the resident required application of an external device (Tilt Chair) for prevention of injury to self - characterized by high risk for injury/falls, impaired mobility, poor posture, cognitive impairment. The resident's Tilt Chair was identified in the care plan as a Personal Assistive Service Device (PASD).

A staff member who observed the resident to be incorrectly positioned did not take action to reposition the resident safely prior to them sustaining a fall with subsequent injury. [s. 36.]
