

Open Doors – Ontario's Environmental Bill of Rights

Environmental Commissioner of Ontario Supplement to the 1997 Annual Report

The *Environmental Bill of Rights* requires that the Environmental Commissioner of Ontario include a summary of the information gathered in the review of the implementation of the legislation and how ministries comply with the act.

In addition, the Environmental Commissioner of Ontario must provide a list of all proposals posted on the Environmental Registry for which decisions had not been posted by December 31, 1997.

This Supplement provides the following information, intended to complement the main body of the 1997 Annual Report of the Environmental Commissioner of Ontario.

Appendix A: Posted Acts and Regulations

Appendix B: 1997 Policy Postings

Appendix C: Unposted Decisions

Appendix D: Selected 1997 Exceptions

Appendix E: Environmental Monitoring Programs

Appendix F: Selected Ontario Voluntary Agreements

Appendix G: Applications for Reviews and Investigations

Appendix H: Ministry Compliance with 1996 Recommendations

Appendix I: Technical Supplement

Section 1: List of Policies, Acts and Regulations

Section 2: List of Instruments

Section 3: Education Outreach

Appendix A: Posted Acts and Regulations

ONTARIO MINISTRY OF AGRICULTURE, FOOD AND RURAL AFFAIRS (OMAFRA)

Bill 146, *Farming and Food Production Protection Act*, 1997 (AC7E0001.P)

Proposal posted 28-Jan-97

Decision not posted

- Provides broader protection to farmers against complaints from neighbours than the *Farm Practices Protection Act 1988 (FPPA)* which it replaces
- Expands list of nuisances that farmers are permitted to cause as a result of normal farm practices from noise odour and dust to include flies smoke vibration light.
- No municipal by law can restrict a normal farm practice

Environmental Implications and Public Participation

- If a farm practice is determined to be a "normal" practice by the Normal Farm Practices Protection Board neighbours cannot succeed in stopping the practice through a court order.
- Under the new *FPPA* as under the old *FPPA* environmental protection legislation is still paramount "normal" farm practices are not protected practices if they contravene environmental regulations permits or statutory provisions.
- The Normal Farm Practices Protection Board will have to be applied to before a complainant can sue in court for harm to a public resource or public nuisance (under the *EBR*) or for nuisance under common law.

ECO Commentary

- A discussion paper posted on the Registry in January 1997 proposed changes to the act; public consultation on the proposal led to Bill 146.
- The ECO commends the early posting of the discussion paper thus maximizing the opportunity for public participation. However to satisfy the *EBR* requirement to notify the public of proposals for environmentally significant acts the proposal should have been posted a second time for public comment once the full text of the bill was drafted.
- The ECO will review this law when it is finalized.

CONSUMER AND COMMERCIAL RELATIONS (MCCR)

Standard adopted under the *Gasoline Handling Act: Diking and Secondary Containment for Aboveground Tanks* (RL6E0003.D)

Proposal posted 28-Nov-96

Decision posted 9-May-97

- Double-walled aboveground gasoline storage tanks will no longer be required to be surrounded by an earth dike (single-wall tanks will still require dikes).

Environmental Implications and Public Participation

- The TSSA reports that the use of double-walled tanks to contain potential spills may decrease the risk of leaks secondary containment through double-walled tanks instead of dikes has been approved by the Underwriters Laboratories of Canada, an organization that performs tests on equipment and certifies it for safety and standardized manufacturing.

ECO Commentary

- Documentation on SEV consideration provided by the TSSA showed that the TSSA applied MCCR's SEV carefully in making this decision.

Standard adopted under the *Gasoline Handling Act: Forest Management Activities* (RL7E0001.P)

Proposal posted 3-Jan-97

Decision not yet posted

- Prescribes standards for the handling of gasoline in the forest industry including provisions for the use of mobile refuelling equipment.
- Some companies will be required to make equipment upgrades and provide additional training to their employees by early to mid-1998.

Environmental Implications and Public Participation

- The standards should ensure a minimum level of care in the handling of gasoline and the prevention of spills and other accidents.

ECO Commentary

- The standards came into force in Nov. 1997, but a decision notice was not posted in 1997.
- MCCR or the TSSA should ensure that decision notices are posted in a timely manner.

**Fuel Oil Regulation and Fuel Oil Code, made under the
Energy Act (RL7E0002.P)**

Proposal posted 31-Jan-97

Decision not yet posted

- Provides new standards for underground petroleum tanks.
- New tanks will have to be built to higher standards (including double walls) and large existing single-wall tanks will have to be replaced with double-wall tanks.

Environmental Implications and Public Participation

- Leaking underground storage tanks are a serious environmental problem; double walled tanks leak less often.

ECO Commentary

- The ECO commends MCCR for using the Registry to facilitate public comment on this important regulation; MCCR was not required by the *EBR* to post the Fuel Oil Regulation for public comment (because the *Energy Act* is not prescribed).
- A decision notice was not posted on this proposal in 1997; the ECO will review this when the decision notice is posted.

**O.Reg 156/97 (Certification of Petroleum Equipment
Mechanics), made under the *Gasoline Handling Act*
(RL7E0003.P)**

Proposal posted 7 Apr 97

Decision not yet posted

- The regulation creates a certification system for petroleum equipment mechanics operators of licensed service stations and marinas will be required to have equipment installed, serviced, and maintained by certified persons.

Environmental Implications and Public Participation

- Certification will ensure minimum standards of knowledge among operators and maintainers of petroleum equipment in retail facilities which could reduce leaks and accidents. Such events can cause serious environmental harm and create a risk to the public.

ECO Commentary

- The regulation came in force in July 1997, but no decision notice was posted in 1997.
- The regulation was filed May 2 1997, five days before the 30-day comment period had ended.
- MCCR or the TSSA should ensure that decision notices are posted in a timely manner and that they do not act contrary to the *EBR* by finalizing decisions before the end of the publicized comment period.

ENVIRONMENT (MOE)

**Amendments to Regulation 271/91 (Gasoline Volatility),
made under the *Environmental Protection Act* (RA7E0003.E)**

Exception notice posted 25 Feb-97

- Revised summertime gasoline volatility requirement from 72 kilopascals (kPa) to 62 kPa in southern Ontario.

Environmental Implications and Public Participation

- Lower gasoline volatility could lower smog levels slightly.
- Smog levels are high in southern Ontario during the summer.
- An exception notice for equivalent public participation was posted by MOE.

ECO Commentary

- Consultation was solicited through a program coordinated by the Canadian Council of Ministers of the Environment (CCME); as well, the amendment was discussed in REP, the large package of proposed reforms put forward through the MOE Regulatory Review process (which was posted on the Registry).
- Consultation by the CCME, while commendable, is not equivalent to *EBR* consultation with the Ontario public.
- This proposal should have been posted on the Registry separately, not just as part of a large package of reforms.

**Bill 107, *Water and Sewage Services Improvement Act*,
1997 (AA7E0001.D)**

Proposal posted 20-Jan-97

Decision posted 29-Jul 97

- Authorizes the transfer of water and sewage works owned by the Ontario Clean Water Agency to municipalities
- Municipal councils, and in unorganized areas, the Ministry of Municipal Affairs and Housing, are given enforcement responsibility for the sewage system provisions of the *Environmental Protection Act*.

Environmental Implications and Public Participation

- Septics provisions have not been proclaimed and are superseded by provisions in Bill 152, the *Services Improvement Act*, that transfer responsibility for septic systems from MOE to municipalities.
- It is unclear what environmental impact the transfer of water and sewage works to municipalities will bring about.
- Impacts cannot be accurately predicted, because they will depend on the choices of individual municipalities after transfers of works.

ECO Commentary

- MOE decision notice was informative and provided a good summary of the comments that had been made to the ministry and the ministry's responses.

Bill 57, *Environmental Approvals Improvement Act, 1997*
(AA6E0001.D)

Proposal posted 3-Jun-96

Decision posted 7-Aug-97

- Amends the *Environmental Protection Act (EPA)* and the *Ontario Water Resources Act (OWRA)*.
- Eliminates the Environmental Compensation Corporation and repeals the *Ontario Waste Management Corporation Act*.
- Allows exemptions from individual approval requirements of the *EPA* and *OWRA*.
- Companies may be deemed to have a certificate of approval (C of A) or may be exempt from applying for a C of A if they meet the requirements of Standardized Approvals Regulations (SARs); these regulations have not yet been released.
- Grants Cabinet a broad power to exempt companies, processes, activities, or entire industries from any provisions of the *EPA* or the *OWRA*.
- Expands the fee-charging authority under the *EPA* and the *OWRA*.
- MOE has told the ECO that "... many of the proposed regulations require a professional engineer to ensure that certain standards have been met, or require the consent of a municipality to the undertaking, or both. Under the proposed standardized approval regulations, regulated parties will be required to submit a notice to the ministry containing detailed information which will be subject to ministry review. In addition, the information contained in the notices is proposed to be included in an integrated ministry database system, which will be accessible by all ministry abatement and enforcement officers for inspection purposes. "

Environmental Implications and Public Participation

- Allows Cabinet to make environmentally significant decisions without public notification or consultation.
- Commenters noted that holders of standardized approvals may be able to invoke the defence of statutory authorization in response to lawsuits - however, unlike certificates of approval, with standardized approvals there is little or no scrutiny either by the ministry or by the public in the granting of the approval.
- Could reduce the number of classified instruments issued under the *EPA* and *OWRA*, thus reducing opportunities for public participation under the *EBR*.
- Standardized approvals may make consideration of cumulative impacts on the environment difficult.
- In a summary of its decision-making record for Bill 57, MOE indicated that since all the changes are "financial or administrative in nature and would not result in any impacts on the environment," there was no need to consider its SEV. The ministry went on to add that the SEV will be considered when (SARs) are being developed to exempt the requirement for C of As for certain activities under the *EPA* and *OWRA*.
- Impacts will depend on the provisions of new regulations which will be made under the *EPA*.

ECO Commentary

- MOE's decision notice did not provide a description of the comments that had been made to the ministry; the notice should have described the substantial changes suggested and stated why those changes were not incorporated into the decision.
- ECO rejects MOE's assertion that because this bill is environmentally

insignificant (financial or administrative in nature), there was no need to consider the ministry's SEV. This is an environmentally significant act which should have undergone SEV consideration.

- No SARs were posted on the Registry in 1997 but a posting outlining "proposal concepts" for 14 regulations was posted in early February 1998.
- The ECO will review the regulations when they are posted.

Regulations and regulatory amendments on duplicate hearings, related to the *Environmental Assessment and Consultation Improvement Act, 1996*

(RA6E0018.D, RA6E0019.D, RA6E0020.D)

Proposals posted 23-Dec-96

Decisions posted 15-Jul-97

- One regulatory amendment and two new regulations were made, under the *Consolidated Hearings Act (CHA)*, the *Environmental Protection Act (EPA)* and the *Ontario Water Resources Act (OWRA)*.
- If a hearing is being held under the *Environmental Assessment Act (EAA)*, the hearing provisions for waste disposal sites under the *EPA* and sewage systems under the *OWRA* will not apply.
- The amendments to O.Reg 173 (under the *CHA*) update the regulation to reflect new procedures under the *EAA*.

Environmental Implications and Public Participation

- Opportunities for public participation in siting proposals for some waste management sites could be reduced.
- Changes may reduce some duplication and overlap; however, the hearings labelled "duplicate" are not identical in purpose and scope.
- Previously some waste management site proposals required hearings under the *EPA*; that requirement is replaced with ministerial discretion as to whether to hold an *EAA* hearing.

ECO Commentary

- The ECO will monitor the application of the regulations to determine whether public consultation is improved and environmental protection is enhanced.

Timelines regulation related to the *Environmental Assessment and Consultation Improvement Act, 1996*

(RA7E0010.P)

Proposal posted 22-Jul-97

Decision not yet posted

- Draft terms of reference for environmental assessments will be available on MOE's Worldwide web site, with four weeks for public comment.
- Reductions in the time available at each step of the environmental assessment process are intended to reduce the time needed for approval from two years to one.

Environmental Implications and Public Participation

- Under the initial 1996 proposal, terms of reference were to be posted for comment for only 14 days, in response to public requests, the final regulation is expected to allow 28 days for comments.

ECO Commentary

- A decision notice was not posted on this proposal in 1997.
- The ECO will review this decision when posted.

Regulatory Standards for New Landfill Sites Accepting Non-Hazardous Waste (RA6E0006.P)

Proposal posted 17-Jun-96

Decision not yet posted

- The standards are intended to codify current MOE approval requirements for most landfills in order to provide a more certain and rational process of waste management planning.
- There are design standards for location of new landfills site assessment and design, and operation and monitoring.

Environmental Implications and Public Participation

- Several commenters have criticized the proposed standards for restricting site specific consideration of landfills.
- Under the proposed standards public participation would be reduced for sites which use the generic standards prescribed by the regulations.
- Construction costs for the two generic designs included in the standards are high, so many proponents may opt to continue with the existing site specific approval process.

ECO Commentary

- No decision has been posted on this proposal in over one and some half years; the ECO will review the decision when it is posted.

Amendments to Regulation 347 (Waste Management), made under the *Environmental Protection Act* (RA7E0012.P)

Proposal posted on 22-Oct-97

Decision not yet posted

- Amends the list of designated wastes under the *EPA*.
- Several wastes are exempted from certificate of approval requirements including photographic waste that contains silver (when it is being transferred to a site where silver is recovered); chop line residues transferred by a generator and destined for a site at which it is to be processed for recovery of metal and plastic (chop line residue is residue remaining after metal is recovered from wire and cable and it contains polyvinyl chloride lead and cadmium); and spent pickle liquor (where it will be used as a treatment chemical in a sewage or wastewater treatment plant).

Environmental Implications and Public Participation

- The proposed regulation reduces regulatory control of these substances which all contain hazardous wastes.
- This was a complex proposal which only a few people felt qualified to comment on; one organization requested an extension of the comment period until Dec. 31, 1997, which was not granted.

ECO Commentary

- In December 1997, MOE indicated that the proposed amendments were still under discussion and that a decision notice was expected by the end of 1997. However a decision notice has not yet been posted.

Proposed amendments to Regulation 914, made under the *Pesticides Act* (RA6E0010.P)

Proposal dated 9-Aug-96

Decision not yet posted

- Proposal includes numerous amendments to Regulation 914; some are substantive but most are predominantly administrative. Substantive amendments include:
 - products registered under the federal *Fertilizers Act* now fall within the ambit of the *Pesticides Act* (in addition to products registered under federal *Pest Control Products Act*)
 - procedures for proper disposal of empty containers
 - licensing requirements and exemptions for use of fumigant gases
 - exemption from licence requirement for extermination of rodents in burrows not near a building
 - exemption from licensing requirement for certain kinds of exterminations

Environmental Implications and Public Participation

- The proposed amendments are intended to clarify, consolidate, and streamline Regulation 914, making it more comprehensible to users.
- It took two years to develop the proposed amendments, during which stakeholders were consulted, and it has been a year and a half since the proposal was posted on the Registry; now MOE is considering these amendments as part of its Regulatory Review.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.

Proposed amendments to Regulation 914, made under the *Pesticides Act* (RA7E0037.P)

Proposal dated 24-Dec 97

Decision not yet posted

- The regulation sets out rules by which scheduled pesticides can be applied, either by certified agriculturists, non-certified agriculturists under the supervision of certified agriculturists, or non-certified agriculturists without supervision.
- The proposed amendment would allow agriculturists under the supervision of certified agriculturists to apply Schedule 2 and 5 pesticides after March 31 1998 (currently the regulation allows only certified agriculturists to apply Schedule 2 and 5 pesticides).
- The proposed amendment would allow agriculturists to apply Schedule 3 pesticides without supervision after March 31, 1998 (currently the regulation allows only certified agriculturists to apply Schedule 3 pesticides).

Environmental Implications and Public Participation

- The proposed amendment strengthens the guidelines for supervision of non-certified agriculturists by certified agriculturists and places on the supervisor responsibility for the acts and omissions of non-certified agriculturists and labourers.
- Requires a non-certified agriculturist who applies Schedule 2 and 5 pesticides to attend a course on safe pesticide use, but no exam required.
- For Schedule 2 and 5 pesticides, only a certified agriculturist may decide on the pesticide mix to be used, purchase the products, and oversee proper storage.

- Removes the certification requirement for Schedule 3 pesticides on the basis that these pesticides are readily available to untrained homeowners who are not certified.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.
- New guidelines on supervision and pesticide use ate positive steps in ensuring safe use of pesticides.
- The ECO questions the comparison between ordinary homeowners and agriculturists using Schedule 3 pesticides, since the latter are bound to use greater quantities over larger tracts of land; they should not necessarily be treated the same in terms of certification requirements for pesticide use because the environmental implications may be different.

Proposed amendments to O.Reg. 77/92 (Exemption for Ground Source Heat Pumps), made under the Environmental Protection Act (RA7E0017.P)

Proposed 24-Dec-97

Decision not yet posted

- The amendment would ban the use of methanol as a heat transfer agent in new ground source heat pumps.
- Prohibits the alteration, extension or replacement of existing ground source heat pumps that use methanol.

Environmental Implications and Public Participation

- Methanol is a highly toxic agent that can contaminate ground water and can cause death through either severe doses or prolonged exposure.
- The proposed amendment would require the use of safer alternatives to methanol as a transfer agent for ground source heat pumps.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.
- These amendments were first presented in "Responsive Environmental Protection" (RA6E0009.P) and are now proposed, without changes, as part of the "Better, Stronger, Clearer" initiative.

Consolidation of O.Regs. 660/85, 661/85, 663/85 and Regulation 355 ("Acid Rain Regulations"), made under the Environmental Protection Act (RA7E0030.P)

Proposal posted 30-Dec 97

Decision not yet posted

- The proposed regulation would replace four previous regulations, which limit sulphur dioxide (and, in one case nitric oxide) emissions released by four companies: Inco, Falconbridge, Algoma Steel, and Ontario Hydro.
- Under the new regulation emissions limits would remain the same; reporting would be reduced from twice or four times per year to once per year.

Environmental Implications and Public Participation

- The changes streamline existing regulations and make some administrative changes, while maintaining the same regulatory standards.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.

Proposed amendments to O.Reg. 215/95 (Electric Power Generation Sector), made under the EPA (MISA reg.) (RA7E0018.P)

Proposed amendments to O.Reg. 214/95 (Iron and Steel Sector Regulation), made under the EPA (MISA reg.) (RA7E0019.P)

Proposed amendments to O.Reg. 562/94 (Metal Casting Sector Regulation), made under the EPA (MISA reg.) (RA7E0022.P)

Proposed amendments to O.Reg. 537/93 (Petroleum Refineries Sector Regulation), made under the EPA (MISA reg.) (RA7E0026.P)

All Proposed 30-Dec 97

Decisions not yet posted

- Reduces chronic toxicity testing frequency from semi annual to annual following three years of semi annual chronic toxicity testing and adequate data collection to understand the harmful effects of the effluent.
- Reduces monitoring requirements from daily to three days a week where effluent parameters are equal to or less than 75% of the limit for 12 consecutive months; more frequent monitoring must be reinstated if limits are exceeded.
- Removes requirement to monitor parameters not used or present on site for 24 consecutive months; discharger must continue to monitor these parameters annually and reinstate more frequent monitoring if limits are exceeded.

Environmental Implications and Public Participation

- Because chronic toxicity testing is important in determining whether effluent may cause harm over a long period of time, there is some concern that reduced chronic toxicity testing may compromise understanding of harmful effects of effluent.

ECO Commentary

- A decision notice was not posted on this proposal in 1997.
- The ECO will review this decision when it is posted.
- These amendments were first presented in "Responsive Environmental Protection" (RA6E0009.P) and are now proposed, without changes, as part of the "Better, Stronger, Clearer" initiative.

Proposed amendments to O.Reg. 561/94 (Industrial Minerals Sector), made under the *Environmental Protection Act (MISA reg)* (RA7E0020.P)

Proposed amendments to O.Reg. 64/95 (Inorganic Manufacturing Sector Regulation), made under the *Environmental Protection Act (MISA reg)* (RA7E0021.P)

Proposed amendments to O.Reg. 560/94 (Metal Mining Sector Regulation), made under the *Environmental Protection Act (MISA reg)* (RA7E0023.P)

Proposed amendments to O.Reg. 63/95 (Organic Chemical Manufacturing Sector Regulation), made under the *Environmental Protection Act (MISA reg)* (RA7E0024.P)

All Proposed 30-Dec 97

Decisions not yet posted

- Reduces chronic toxicity testing frequency from semi annual to annual following three years of semi annual chronic toxicity testing and adequate data collection to understand the harmful effects of the effluent.
- Removes requirement to monitor parameters not used or present on site for 24 consecutive months; discharger must continue to monitor these parameters annually and reinstate more frequent monitoring if limits are exceeded.

Environmental Implications and Public Participation

- Because chronic toxicity testing is important in determining whether effluent may cause harm over a long period of time, there is some concern that reduced chronic toxicity testing may compromise understanding of harmful effects of effluent.

ECO Commentary

- A decision notice was not posted on this proposal in 1997 the ECO will review this decision when it is posted.
- These amendments were first presented in "Responsive Environmental Protection" (RA6E0009.P) and are now proposed without changes, as part of the "Better, Stronger, Clearer" initiative.

Proposed amendments to O.Reg. 760/93 (Pulp and Paper Sector Regulation), made under the *Environmental Protection Act (MISA reg.)* (RA7E0025.P)

Proposed 31 Dec 97

Decision not yet posted

- Removes requirement that dischargers of AOX (total adsorbable organic halides) submit reports over time on how to eliminate AOX by year 2002, but introduces requirement that MOE review the science on AOX by 2000 in relation to its goal of eliminating generation of AOX.
- Advances date that dischargers must meet standard of 0.8 kg AOX/tonne of pulp from December 31, 1999 to the date this regulatory amendment is filed.
- Reduces chronic toxicity testing frequency from semi-annual to annual, following three years of semi annual chronic toxicity testing and adequate data collection to understand the harmful effects of the effluent.
- Reduces monitoring requirements from daily to three days a week where effluent parameters are equal to or less than 75% of the limit for 12 consecutive months; more frequent monitoring must be reinstated if limits are exceeded.
- Removes requirement to monitor parameters not used or present on site for 24 consecutive months; discharger must continue to monitor these parameters annually and reinstate more frequent monitoring if limits are exceeded.

Environmental Implications and Public Participation

- While MOE remains committed to elimination of AOX, the removal of the requirement that dischargers submit elimination plans may have a negative impact on the environment because the requirement was meant to encourage innovative technologies to deal with AOX generation; the science on AOX may not produce new technologies if the deadline for elimination of AOX by 2002 no longer exists.
- Because chronic toxicity testing is important in determining whether effluent may cause harm over a long period of time, there is some concern that reduced chronic toxicity testing may compromise understanding of harmful effects of effluent.
- In "Responsive Environmental Protection," MOE proposed removing both the requirement to submit elimination plans and MOE's review of the reports against the goal of zero AOX; MOE appears to have compromised by retaining the goal of eliminating AOX.
- The date that dischargers must meet the standard of 0.8 kg AOX/tonne of pulp has been advanced because dischargers are already meeting this standard due to new technology.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.

Proposed amendments to Regulation 351, Marinas Regulation, made under the *Environmental Protection Act* (RA7E0027.P)

Proposed 30-Dec-97

Decision not yet posted

- In "Responsive Environmental Protection," MOE proposed to revoke this regulation and replace it with a voluntary code.
- The regulation requires marinas to provide and maintain waste management facilities for boaters: litter containers and facilities for pumping out waste tanks.
- Under the December 1997 proposal, MOE would retain the current regulation, and supplement it with the voluntary code of practice already produced by the Ontario Marina Operators Association.

Environmental Implications and Public Participation

- Compliance with the code by private marina operators should increase environmental protection.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.
- MOE changed its position after public and stakeholder comments were made on the REP proposal. The key public concern was that not all marinas would follow the voluntary code.

Proposed amendments to O. Reg 73/94 (General), made under the *Environmental Bill of Rights* (RA7E0028.P)

Proposed 30-Dec-97

Decision not yet posted

- The amendments would update the regulation to reflect name changes to ministries and acts that had occurred since the regulation was prepared.

Environmental Implications and Public Participation

- The changes revise the regulation to reflect several changes to ministry and act names. For example, the regulation prescribes the Ministry of Energy, Science and Technology for parts of the *EBR*.
- The regulation deems certain orders under the amended *EAA* to be regulations for the purpose of the *EBR* and its regulations, such as a minister's declaration that the *EAA* does not apply to an undertaking Exemptions made under s. 29 of the *EAA* before Jan. 1, 1997 will also be deemed to be regulations.
- The regulation expressly states that MOE will operate the Environmental Registry.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.

Proposed amendments to Ontario Regulation 681/94 (Classification of Proposals for Instruments), made under the *Environmental Bill of Rights* (RA7E0029.P)

Proposed 30-Dec-97

Decision not yet posted

- In "Responsive Environmental Protection," MOE proposed removing certain instruments from the instrument classification regulation which the ministry claims had little environmental significance.
- As a result of comments received and other reform activities undertaken by the ministry, the ministry decided not to remove instruments from O. Reg. 681/94. According to the ministry proposal notice, the latest amendments propose to correct and clarify information and add instrument classification information for other prescribed ministries, specifically the Ministry of Consumer and Commercial Relations (MCCR).

Environmental Implications and Public Participation

- Once it is filed, this regulation will fulfil the requirement under ss. 19 and 20 of the *Environmental Bill of Rights*, and s. 4 of O. Reg. 73/94 under the *EBR*, for MCCR to classify its instruments. MCCR's instrument classification regulation will determine which instruments under the Gasoline Handling Act will receive public notice through posting on the Registry, and which instruments may be appealed, reviewed or investigated under the *EBR*.

ECO Commentary

- The ministry is commended for taking into account comments received during the consultation period and for not removing instruments from the *EBR*'s processes.
- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.

Environmental Practices Guide for Hot Mix Asphalt Facilities to Supplement Regulation 349 (Hot Mix Asphalt Facilities)

Proposal dated 30-Dec-97

Decision not yet posted

- In "Responsive Environmental Protection," MOE proposed to revoke Regulation 349 - which prohibits visible emissions and materials, including water plumes, from impinging outside the property line of hot mix asphalt facilities - and to replace it with a voluntary code under a standardized approval regulation.
- Under the proposal, MOE would retain Regulation 349 and supplement it with a voluntary code of practice developed by the Ontario Hot Mix Asphalt Producers Association, with MOE assistance.

Environmental Implications and Public Participation

- Retention of Regulation 349 ensures that minimum standards of environmental protection will be met.
- Voluntary code of practice encourages further measures on the part of industry to protect the environment.

ECO Commentary

- A decision notice was not posted on this proposal in 1997; the ECO will review this decision when it is posted.
- The ministry changed its original proposal following expressions of concern by the public about the enforcement of a voluntary code of practice through standardized approvals.

MUNICIPAL AFFAIRS AND HOUSING (MMAH)

Bill 98, *Development Charges Act, 1997* (AF7E0002.P)

Proposal posted 3-Feb-97

Royal Assent on 8-Dec-97

Decision not yet posted

- Limits the municipal services for which development charges can be levied.
- Requires municipalities to contribute 10% of cost of "soft services" financed with development charges (including libraries, community centres, parks).
- Requires preparation of a background study before municipalities can make development charges bylaws.

Environmental Implications and Public Participation

- The amendments reduce the ability of municipalities to levy development charges.
- Development charges can be used by municipalities to limit urban sprawl and promote sound development.
- Some municipalities may have more difficulty financing and planning for environmental and social programs.

ECO Commentary

- The main issue at stake was financial, pitting municipalities against developers.

Bill 152, *Services Improvement Act* (A17E0001.D)

Proposal posted 22-Aug-97

Royal Assent on 8-Dec-97

Decision posted 16-Dec-97

- Schedule B transfers authority for regulating small, on-lot septic systems from Part VIII of the *Environmental Protection Act* (administered by MOE) to the *Building Code Act, 1992* (administered by MMAH and enforced by municipalities). The small number of large and off-lot systems will still be regulated by MOE.
- The Building Code will establish standards that sewage systems must meet.
- The bill introduces mandatory certification of inspectors and installers under the Building Code.

Environmental Implications and Public Participation

- Following the transfer of responsibility for septic systems, it is unclear how MOE, MMAH and municipalities will work together to link septic issues to a strategy for the management and protection of groundwater.

ECO Commentary

- Regulatory responsibility for septic systems was transferred from MOE to municipalities as part of the government's "Who Does What" initiative, to facilitate "one window" building permits. This appears to place greater emphasis on the customer service side of septic system management rather than the environmental protection side.
- It is questionable whether all municipalities have adequate investigation and enforcement capabilities to deal with the cumulative and growing environmental and public health threats due to improperly functioning septic systems.
- Decision appears to be consistent with MMAH's SEV.

NATURAL RESOURCES (MNR)

Fish Sanctuary Implementation - 1997, Regulation made under the Federal *Fisheries Act* (RB7E2001.D)

Proposal posted 10-Jun-97

Decision posted 1-Oct-97

- MNR was responsible for developing regulatory amendments to the Ontario Fisheries Regulations under the *Fisheries Act*.
- Established 12 sanctuaries and expanded one other; the sanctuaries restrict fishing during spawning periods of walleye, northern pike, and brook trout.

Environmental Implications and Public Participation

- Decreases risk of damage to populations from over fishing on six lakes and two creeks and rivers in northern Ontario (Chapleau District).

ECO Commentary

- Since such regulations are federal, MNR was not required to post this as a regulation on the Registry; such recommendations can be seen as policies of the MNR, however, so this invitation to comment is appropriate.
- This is one of several fisheries regulations posted in 1997, not all are summarized here.

Bill 119, *Red Tape Reduction Act (Ministry of Natural Resources), 1997* (AB7E4001.P)

Proposal posted 6-Feb-97

Decision not posted

- Amends several acts prescribed under the *EBR*.
- Restrictions on the maximum size of parcels of public lands sold by MNR, and on their minimum price, would be removed from the *Public Lands Act* and such sales would be approved by the minister, rather than by Cabinet.
- Under the proposed legislation, many public land and water management decisions could be delegated to private organizations.
- Amendments to the *Conservation Authorities Act* would give conservation authorities the power to dispose of rights to gas and oil resources on their lands; extraction must be made from adjacent lands not owned by authorities.
- The provincial Cabinet would be given authority to make regulations "governing applications for approvals" under the *Lakes and Rivers Improvement Act*.

Environmental Implications and Public Participation

- Some commenters worry that Conservation Authorities would make deals for oil or gas extraction that harm sensitive lands in their ownership.
- Authorizing the delegation of environmental policy decisions to private organizations is of concern to some environmental groups, who argue that it is the role of governments to make such decisions.
- Public oversight of such delegation is not addressed in the proposals and accountability for these decisions may suffer.

ECO Commentary

- The bill received First Reading only during 1997; the bill was not passed before the session of the Legislature ended on Dec. 18, 1997, and thus died on the order paper. The ECO will review if the bill is re-introduced.

Standards and Associated Regulations made under the *Aggregate Resources Act* and the *Oil, Gas and Salt Resources Act* (RB7E4002.D)

Proposal posted 10-Mar 97

Decision posted 14-Jul 97

- New regulations reference a separate set of standards, rather than including the standards in the regulations themselves.
- The changes are part of a "self management" regime created by the *Aggregate and Petroleum Resources Statute Law Amendment Act* 1996; industry bears greater responsibility for the management of the approvals process, including public consultation, as well as annual inspection and reporting.

Environmental Implications and Public Participation

- The new standards are generally more stringent than the previous regulatory requirements.
- A coalition of several environmental groups believes that the standards will not be legally enforceable; other codes like the Fire Code and the Building Code are themselves regulations and thus clearly have the force of law; MNR states that the referencing of the standards in the regulation is sufficient to make them enforceable.
- The public consultation requirements under the standards have been increased compared to the previous regulation, but are now industry's responsibility.

ECO Commentary

- The ministry has indicated that for the purposes of the *EBR* an alleged contravention of the standards will be treated as an alleged contravention of the regulations under the *ARA*.
- The ECO will monitor the implementation of the new self assessment regime in 1998.

Bill 139, *Fish and Wildlife Conservation Act*, 1997

Related proposal-AB6E5010.P-posted 30-Sep-96 and AB7E6001.P (information notice) posted 19-Sep-97

Royal Assent on 18-Dec 97

Decision not yet posted

- The act is similar to the *Game and Fish Act (GFA)* which it replaces.
- The new act is better organized, and easier to read than the *GFA*.
- Terminology is somewhat different from the *GFA* categories of "specially protected" species introduced.
- Compared to the *GFA*, the new act protects more species; certain penalties are increased, particularly those relating to the illegal trade in animal parts; provides MNR with improved enforcement capabilities.
- Prohibits the establishment of new dog training facilities using wild animals, but existing facilities are grandfathered.

Environmental Implications and Public Participation

- MNR has conducted substantial public consultation on fish and wildlife policy over several years, outside the *EBR* regime.
- Proposed changes to the *GFA* were posted as a discussion paper in September 1996; public consultation led to Bill 139.
- New act offers somewhat expanded protection of species and better enforcement capability.
- Measures to combat the illegal trade in game parts (particularly black bear parts) were greatly needed, as pressure on the species from unauthorized hunting has increased dramatically.
- Game farming not regulated under new act will be regulated by OMAFRA following an environmental assessment.

ECO Commentary

- The ECO commends the early posting of the discussion paper, thus maximizing the opportunity for public participation. However to satisfy the *EBR* requirement to notify the public of proposals for environmentally significant acts, the proposal should have been posted a second time for public comment once full text of bill was drafted.
- Bill 139 was posted a second time as an information item.
- Bill 139 strikes a careful balance among the competing interests of various groups.
- The ECO will review new *Fish and Wildlife Conservation Act* regulations after they are made available.

Appendix C: Unposted Decisions

Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA)

RURAL JOB STRATEGY FUND

Unposted Decision

- A \$30 million fund to be invested in rural Ontario through partnerships that will enhance the quality of Ontario products, capitalize on marketing and export opportunities and encourage the adoption of new or upgraded information technology.
- Ministry promotional materials, released in Oct. 1997, state that the implementation of Environmental Management Systems (EMSs) is eligible for funding.

Ministry Rationale

- The program is financial in nature and is intended to address major barriers to rural economic development.
- Consultations on the program revealed that rural clients want to ensure that their business projects are standardized to satisfy environmental management practices. Thus, only projects that comply with current environmental standards and laws will be approved. The program does not fund the development of new environmental management standards.
- The *EBR* did not apply to the program and the ministry concluded that it was not required to post it on the Registry.

ECO Commentary

- The development of EMSs by farmers can have positive environmental effects.
- This decision has environmental significance but did not need to be posted since it falls under the exception for predominantly financial and administrative decisions.
- Since the decision has environmental dimensions, in the future the minister is encouraged to use his discretion to post s. 6 information notices about these decisions on the Registry.
- The ministry did not indicate whether the SEV was considered.

Citizenship, Culture and Recreation (MCzCR)

ALLOCATION OF GAMING FUNDS

Unposted Decision

- Consultation process to determine how to allocate gaming funds to charities, with individuals and organizations from many sectors including the environment.
- Decision could have implications for the funding of environmental non-government organizations (ENGOS).

Ministry Rationale

- Not posted because the consultation did not contain any environmentally significant matters.

ECO Commentary

- The ECO agrees that decision was not environmentally significant. However, posting would have been a way to inform environmental groups about the opportunity to apply for funds.

ARCHAEOLOGICAL ASSESSMENT GUIDELINES

Unposted Decision

- New guidelines for municipal officials determining whether a project needs an archaeological assessment.

Ministry Rationale

- Not posted because not environmentally significant SEV; considered.

ECO Commentary

- Ministry response is valid.

Economic Development, Trade and Tourism (MEDTT)

AMALGAMATION OF WATERLOO CENTRE FOR GROUNDWATER RESEARCH AND INSTITUTE FOR SPACE AND TERRESTRIAL SCIENCE

Unposted Decision

- Waterloo Centre for Groundwater Research and Institute for Space and Terrestrial Science to become the Environment, Space and Resource Management Centre.

Ministry Rationale

- Consolidation results from complementarity in research areas, convergence of technologies and need to align centres with major market sectors; based on proposals by chairs of boards of centres — opportunity to expand range of activities beyond groundwater to other environmental issues and resource management.

ECO Commentary

- This decision has environmental significance but did not need to be posted since it falls under the exception for predominantly financial and administrative decisions.

Environment (MOE)

EXTENSION OF EXEMPTION ORDER MNR-59/2 (O.REG. 332/94) UNDER s. 29 OF THE ENVIRONMENTAL ASSESSMENT ACT.

Unposted Decision

- This exemption order is in regard to the carrying out of the Provincial Parks Program. The extension of the exemption order expired June 30, 1997.

Ministry Rationale

- The exemption order clearly outlines the minister's authority to extend the exemption order through notice in the *Ontario Gazette*. Such notice is not a regulation under the *EBR*, therefore not subject to requirements of the *EBR*.
- MOE considers this an environmentally insignificant decision and therefore did not document SEV consideration.

ECO Commentary

- ECO agrees that the extension to the exemption order is not a regulation and therefore not subject to *EBR* requirements. However, this extension could have been characterized as a policy; it has important environmental implications and could have benefitted from public comment.

**GREAT LAKES REMEDIAL ACTION PLAN (RAP) - DECISION
TO PROVIDE ALTERNATIVE SUPPORT FOR THE PUBLIC ADVISORY
COMMITTEES AND RAP COORDINATORS**

Unposted Decision

- In January 1997, MOE eliminated funding for public advisory committees (PACs) developing clean up plans for water pollution problem areas on Ontario side of the Great Lakes.
- PACs were formed by community members in each area of concern (AOC) to oversee development of RAPs for that AOC.
- Work on RAPs for 16 AOCs in Ontario remains incomplete.
- Until January 14, 1997, each PAC and RAP had a RAP Coordinator, usually a MOE employee whose job was to coordinate the activities of the PAC and RAP. On January 14, 1997, most of these positions were cut.

Ministry Rationale

- Not a new policy or a change in existing policy, but rather inclusion of alternative support for the public advisory committees, which includes alternative funding.

ECO Commentary

- This decision has environmental significance, but did not need to be posted since it falls under the exception for predominantly financial and administrative decisions.
- This was the subject of a separate review by the ECO of alternative service delivery.

PRIORITY-SETTING PROCESS

Unposted Decision

- MOE is involved in priority-setting activities that include developing cross-program priorities, standardized criteria for minimum numbers of inspections, priorities for planned activities within specific programs such as a complaint response priority process, and priorities for enforcement actions.

Ministry Rationale

- Priority setting process has a security element to it; disclosure might aid those who violate environmental protection laws. Therefore, not posted on Registry.
- MOE also relies on the *Freedom of Information and Protection of Privacy Act (FOIPPA)*, which provides that disclosure of records may be refused if records would reveal procedures used in investigation or enforcement.

ECO Commentary

- Ministerial discretion exercised in decision not to post. It is not clear that disclosure would aid contraveners of environmental laws in all circumstances. The ministry could have differentiated between those aspects of the policy suitable for public comment and those that should have remained confidential.
- MOE considers this an environmentally insignificant decision and therefore did not document SEV consideration.

STATE OF ENVIRONMENT REPORT

Unposted Decision

- Decision to discontinue work on 1992 Status Report project and not publish any further State of Environment (SOE) reports.

Ministry Rationale

- MOE has told the ECO that "due to cost and resource implications and the fact that MOE publishes regular reports for most program areas, SOE reporting was discontinued as part of MOE's workplan."

ECO Commentary

- Inappropriate exception
- The decision is still subject to s. 11 requirement for SEV consideration.
- MOE considers this an environmentally insignificant decision and therefore did not document SEV consideration.

DELORO MINE CLEANUP

Unposted Decision

- In April 1997, MOE announced it would begin the cleanup of the abandoned Deloro mine site, on the Moira River near Belleville. According to MOE this is one of Ontario's most contaminated sites. MOE took control of the mine in 1979 and has been involved in studies, investigations and remediation in the intervening years. Over the past few years, MOE has worked with the Ministry of Northern Development and Mines to take care of collapsing mine shafts and other hazard problems at the site. MOE is now ready to do the final work to address the mine's environmental problems. As of April 1997, more than \$9 million has been spent cleaning up the site.

Ministry Rationale

- MOE's involvement with and intention to clean up the mine pre-dates the *EBR*.
- MOE assured the ECO that it will be following the *EBR* requirements in posting notices of the necessary certificates of approval on the Registry for public comment as part of the implementation of this project.

ECO Commentary

- The ECO will monitor MOE's involvement to ensure that instruments for the project are posted on the Registry. None were posted in 1997.
- In the fall of 1997, a private prosecution was launched by a Kingston environmental group in relation to alleged contraventions of the *Fisheries Act* caused by effluent from this site.
- This case highlights the cost of cleaning up abandoned mine sites, a theme discussed in the ECO's 1996 Annual Report in relation to amendments made to the *Mining Act* to loosen the financial assurance and mine cleanup rules that apply to mine developers. Some estimates suggest there are nearly 300 abandoned mine sites in Ontario that are in need of rehabilitation because they pose serious environmental or safety hazards.

ELIMINATION OF PROGRAM FOR SALT-CONTAMINATED DRINKING WATER

Unposted Decision

- Decision to abandon \$1 million aid program to people whose drinking water has been contaminated by winter road salt.

Ministry Rationale

- MOE will no longer finance water restoration due to road salt contamination, but will continue to investigate homeowners' complaints. The compensation program will continue under MTO and local municipalities, hence it is environmentally insignificant.

ECO Commentary

- MOE had a useful role as an impartial third party.

NO EXPIRY DATES FOR PERMITS TO TAKE WATER

Unposted Decision

- A report provided to the ECO quoting ministry staff suggests MOE has made a policy decision to issue permits without a time limit unless there are extenuating circumstances. Permits were previously issued for a period of ten years.
- In a MOE submission to the Environmental Appeal Board in the summer of 1997 with respect to a leave to appeal application on a MOE decision to issue a permit to take water (the Ricker case), a ministry official stated this was a new policy.

Ministry Rationale

- There has been no decision by the ministry regarding permits to take water, MOE has always had discretion to grant longer time periods, and is now exercising this discretion. EBR doesn't apply.

ECO Commentary

- The evidence MOE submitted for the Environmental Appeal Board's Ricker decision seems to contradict the rationale offered by the ministry.
- Although ministry policy has always included discretion to grant unlimited permits, the practice of granting such permits appears to have changed.

CLEANUP OF RANDLE REEF COAL TAR DEPOSIT IN HAMILTON HARBOUR

Unposted Decision

- MOE has pledged \$1 million toward the estimated \$8.5 million cleanup.

Ministry Rationale

- According to ministry policy G-3, ministry may allocate funding from the Environmental Security Account to environmentally significant cleanup activities. Each pledge of funding is not a policy, but is implementation of an existing policy which pre-dates the EBR. Therefore EBR does not apply to this initiative.

ECO Commentary

- Ministry response is technically valid; ministry should have considered posting an information notice on the Registry.

NEW ENVIRONMENTAL TECHNOLOGIES EVALUATION

Unposted Decision

- Program will evaluate private sector innovations in environmental industries and give the government's approval for products or processes as a marketing tool for industry.
- MOE will charge industries a fee for this service.

Ministry Rationale

- This program does not represent a new policy; it is an administrative policy which formalizes a service that has always been available through the ministry. The assessment is not an approval or endorsement of a new technology, it is a technical and administrative activity.

ECO Commentary

- It is unclear that the ministry has always provided this service on a consistent basis.
- MOE does not consider this to be an environmentally significant decision and therefore did not document SEV consideration.

AIR QUALITY MONITORING BY HIGH SCHOOL STUDENTS

Unposted Decision

- Local students test air quality for a variety of pollutants; program involves up to 15 schools. MOE will use data collected.

Ministry Rationale

- This is not a new policy of the ministry. It is a partnership that provides benefits to the ministry and to high school students.

ECO Commentary

- MOE does not consider this to be an environmentally significant decision and therefore did not document SEV consideration.

CLEANUP OF THUNDER BAY HARBOUR

Unposted Decision

- MOE has pledged to contribute \$1.5 million, along with Environment Canada and three industrial polluters, to clean up the Northern Wood Preservers site of Thunder Bay Harbour.

Ministry Rationale

- According to MOE policy, ministry may allocate funding from the Environmental Security Account to environmentally significant cleanup activities. Each pledge of funding is not a policy, but is implementation of an existing policy which pre-dates the EBR. Therefore EBR does not apply to this initiative.

ECO Commentary

- Ministry response is technically valid; ministry should have considered posting an information notice on the Registry.

COST RECOVERY SCHEME FOR HAZARDOUS WASTE

Unposted Decision

- MOE has proposed a cost-recovery scheme for certain kinds of waste, a form of user fee to be paid by waste generators and handlers.

Ministry Rationale

- MOE made a commitment to the ECO to post this as an information notice on the Registry.

ECO Commentary

- Proposal has generated significant negative feedback from industry.

Health (MOH)

BILL 152, SERVICES IMPROVEMENT ACT

Unposted Decision

- Contained an amendment to the *Health Protection and Promotion Act* which would have removed the duty of the Chief Medical Officer of Health of the province to keep informed of matters related to occupational and environmental health. This amendment would have left a gap in the monitoring of environmental health matters of regional or provincial scope, and was thus an environmentally significant decision.

Ministry Rationale

- The amendment in question was removed during clause-by-clause committee hearings in November, thus was no longer an environmentally significant decision.
- Bill 152 received Third Reading from the Legislative Assembly and passed into law in December 1997.

ECO Commentary

- ECO commends the ministry for removing this amendment to the *Health Protection and Promotion Act*.

Labour (MOL)

DISCUSSION PAPER ON OCCUPATIONAL HEALTH AND SAFETY ACT

Unposted Decision

- Release of discussion paper for consultation as part of comprehensive review and reform of act.

Ministry Rationale

- Discussion paper does not propose changes to the act, hence does not fall under s. 15 of the *EBR*.
- Review of the act is not environmentally significant.

ECO Commentary

- ECO urged the ministry to post notice on the Registry.
- The ministry SEV states "It is recognized that, on occasion, measures taken by employees to control worker exposure to hazardous materials may present a problem for the external environment."

Municipal Affairs and Housing (MMAH)

REGULATION 352/97 AMENDING REGULATION 26/96 UNDER THE MUNICIPAL ACT

Unposted Decision

- Prevents municipalities from imposing charges for the management of waste materials except on the person who actually discards the material or except where the charge relates to the cleanup of illegally disposed waste. Also prevents municipalities from charging user fees for allocating sewer and water capacity.
- Ministry was not required to post this regulation on the Registry since the Municipal Act is not a prescribed act under the *EBR*.

Ministry Rationale

- SEV is always taken into account in MMAH decision-making; however, for non-prescribed decisions, there is no written record of SEV consideration.

ECO Commentary

- SEV consideration should be documented for all environmentally significant ministry decisions, even if no Registry posting requirement.
- The ministry's decision does not appear to be consistent with MMAH SEV requirements to "ensure that structures and powers provided to municipal governments enable them to protect their local environments" and to "enable municipalities to fulfil the requirements of [ministry environmental] policies in a way that is innovative, sensitive to local circumstances and to the local community."

Natural Resources (MNR)

NEW REGULATION UNDER THE MINING ACT (O.REG. 116/97)

Unposted Decision

- Regulates exploration licences and production leases for oil and gas in Ontario.

Ministry Rationale

- This regulation consolidates two previous regulations to streamline mining fee system. Not posted because not environmentally significant, SEV considered.

ECO Commentary

- Ministry response is valid.

AMENDMENT TO REG. 511 MADE UNDER THE GAME AND FISH ACT (O.REG. 117/97)

Unposted Decision

- Allows hunting for wild turkeys in open season in Wildlife Management Units in Northumberland, Peterborough, Middlesex, Lambton and Kent Counties.

Ministry Rationale

- Limited hunting will not affect wild turkey population.
- Not posted because not environmentally significant; SEV considered.

ECO Commentary

- Ministry response is technically valid; ministry should have considered posting an information notice on the Registry.

**REGULATION 282/97 MADE UNDER THE CONSERVATION
AUTHORITIES ACT**

Unposted Decision

- Regulation deals with fill, construction and alteration to waterways - Otonabee Region Conservation Authority. Prohibits construction, placing of fill or altering of waterways within the flood areas described in the schedules.

Ministry Rationale

- Extensive public consultation took place. However, Registry posting was overlooked by MNR; all future environmentally significant regulations under the *Conservation Authorities Act* will be posted.

ECO Commentary

- Ministry failed to comply with the *EBR*.
- Commitment on future postings is noteworthy.

**AMENDMENT TO REG. 512 UNDER THE GAME AND FISH ACT
(O.REG. 387/97)**

Unposted Decision

- Amends the open seasons for hunting of deer and moose in certain wildlife management units.

Ministry Rationale

- There was an earlier broad amendment to the controlled deer hunt program (Reg. 512) which was posted in June 1997. No comments were received. This amendment is closely related to that earlier posting and it was not considered necessary to post it again since the subject matter was almost identical. SEV was considered.

ECO Commentary

- Ministry response is valid.

**TWO NEW FOREST MANAGEMENT GUIDELINES FOR PROTECTION
OF PINE MARTEN OR PILEATED WOODPECKER HABITAT IN
NEW LOGGING PLANS**

Unposted Decision

- Guidelines require conservation of non-game species and retention of old growth components to help maintain diversity in Crown forests.

Ministry Rationale

- Guidelines were not posted for public comment because Environmental Assessment Board decision in Timber Class EA required production of guidelines by specific date, which did not allow time for public consultation.
- Environmental conservation community and forest industry were aware, through public consultation in Timber Class EA hearings, that MNR was required to develop and implement guidelines. Therefore, public consultation not necessary.
- Ministerial discretion exercised in decision not to post. (Under *EBR*'s 15(1) the minister has the discretion not to post a notice on the Registry if he or she does not feel the public should have an opportunity to comment on the proposal.)

ECO Commentary

- Ministry response not valid; the Guidelines should have had public comment.
- Ministry response did not address SEV consideration.

FUNDING FOR COMMUNITY FISHERIES INVOLVEMENT PROGRAM

Unposted Decision

- MNR provided \$515,000 in funding to support volunteers in 242 fishery improvement projects across Ontario in 1996.

Ministry Rationale

- Program has been in place several years, funding changes each year according to need.
- Financial exception under s. 15(2); funding change not environmentally significant; no need for consultation because funding changes will not change direction set for these programs several years ago.

ECO Commentary

- Ministry response is valid; ministry should have considered posting an information notice on the Registry.

CHANGES TO TAX INCENTIVE PROGRAMS FOR CONSERVATION

Unposted Decision

- Managed Forest Tax Rebate Program and Conservation Land Tax Reduction Program will be replaced by system that reduces tax rate on eligible lands through regular property tax process.

Ministry Rationale

- Part of Ministry of Finance's broad tax reform program.
- Administrative and financial exception under s. 15(2); not environmentally significant because managed forests and conservation lands will continue to be protected as before.
- No opportunity for public consultation because no change to previous program direction.

ECO Commentary

- Ministry response is valid
- Ministry posted two information notices on the Registry after the ECO sent an enquiry letter

FUNDING FOR COMMUNITY WILDLIFE INVOLVEMENT PROGRAM

Unposted Decision

- MNR provided \$191,000 in funding to volunteers working on 140 wildlife projects across Ontario in 1996.

Ministry Rationale

- Program has been in place several years funding changes each year according to need.
- Financial exception under s. 15(2); funding change not environmentally significant, no need for consultation because funding changes will not change direction set for these programs several years ago.

ECO Commentary

- Ministry response is valid; ministry should have considered posting an information notice on the Registry.

MEASURES TO RESTORE ELK POPULATIONS IN ONTARIO

Unposted Decision

- Establishment of two committees responsible for implementing elk restoration project, made up of representatives from interested groups and from government.

Ministry Rationale

- MNR pledged to post an information notice on the Registry because its instrument classification regulation was not yet in force.

ECO Commentary

- Ministry response was not valid since the proposal was for a policy, not an instrument.
- Information notice about the establishment of the committees was not posted, but the "Plan for the Restoration of Elk in Ontario" was posted as a policy for a 30-day comment period.
- ECO commends MNR for posting this notice.

DRAFT INDEPENDENT FOREST AUDIT PROCESS AND PROTOCOL

Unposted Decision

- Designed to assess compliance with planning requirements, implementation of operations and effectiveness of management activities. Also designed to assess compliance with specific contractual obligations of sustainable forest licences; used in review of four licences in 1996.

Ministry Rationale

- MNR is currently developing an audit regulation under the *Crown Forest Sustainability Act* and is further refining the draft Independent Forest Audit Process and Protocol. Both will be posted on the Registry for comment.

ECO Commentary

- ECO wrote letter in November 1997 urging ministry to post the proposal.
- Ministry committed to post in early 1998; ECO will monitor ministry actions.

MNR FORESTRY COMPLIANCE POLICIES AND GUIDELINES

Unposted Decision

- Four new compliance policies: Understanding Compliance in Forest Operations; Guidelines for Forest Industry Compliance Planning; Data Requirements for Inspectors; Forest Operations Compliance Information System.

Ministry Rationale

- Understanding Compliance in Forest Operations provides administrative direction regarding roles and responsibilities; not environmentally significant. Forest Operations Compliance Information System is a computer program which does not contain policy direction and will not be posted on the Registry. The other two documents are being combined into one, which will be posted in February 1998.

AGREEMENT BETWEEN MNR AND DUCKS UNLIMITED CANADA

Unposted Decision

- Agreement implements a long term wetland conservation program.

Ministry Rationale

- MNR recognizes the need for changes with respect to development of these agreements to ensure *EBR* compliance. The ministry has identified two categories of agreements it enters into: policies and instruments. Any future environmentally significant agreements will be posted on the Registry. The agreement with Ducks Unlimited was categorized as an instrument, hence was not posted because MNR's instrument classification process was not complete and instruments were not yet being posted. In future, similar agreements will be posted as policies.
- SEV was considered.

ECO Commentary

- Inappropriate exclusion of proposal from Registry posting requirement.
- ECO commends ministry on its commitment to post similar agreements in the future.

ONTARIO PARKS BOARD OF DIRECTORS

Unposted Decision

- Creation of a new board to provide advice related to the planning, management and development of provincial parks.

Ministry Rationale

- The purpose of the Ontario Parks Board is to provide the minister with advice about Ontario Parks' overall program and policy direction. The Board has no decision-making authority. Hence, not environmentally significant; predominantly administrative.
- SEV was considered.
- New decisions arising from the Board's recommendations will be posted on the Registry for public comment.

ECO Commentary

- Ministry response is technically valid.
- It would have been appropriate to post an information notice on the Registry because the public has a right to know who sits on expert committees advising the ministry on environmentally significant decisions.

MUNICIPAL PLANNING MANUALS

Unposted Decision

- A group of related manuals developed by MNR to train municipal planning authorities to consider matters of provincial interest under MNR's mandate.

Ministry Rationale

- The manuals are working documents, still not finalized. Next version will be posted on Registry for public comment around March 1998, except for the Development Application Review Manual, which is procedural not environmentally significant.

ECO Commentary

- With respect to the Development Application Review Manual, the ECO disagrees with the ministry rationale. Definition of "policy" under *EBR* includes "guidelines or criteria to be used in making decisions about the issuance...of instruments." which seems to fit the Development Application Review Manual, especially since, in 1997, it was relied on and used as working draft by municipal planning staff.
- All of the manuals should have been posted on the Registry at an early stage in their development. The ECO acknowledges the ministry's commitment to post in 1998 and will monitor ministry actions.

ONTARIO FUR MANAGER FEDERATION

Unposted Decision

- Transfer of responsibility for fur management and trapline administration from MNR to Ontario Fur Manager Federation (OFMF).
- Some observers speculate that monitoring of trap catches may be reduced because of the transfer of responsibility from MNR to the OFMF.
- This initiative has generated controversy because First Nations and aboriginal groups have refused to be governed by the OFMF and have unilaterally set up their own fur management regime.

Ministry Rationale

- Only administrative functions have been transferred to the OFMF (e.g. issuance of licence renewals); MNR remains responsible for policy and regulatory functions. Not environmentally significant; SEV considered.

ECO Commentary

- This decision has environmental significance. To provide the public with greater transparency, this should have been posted as an information notice.

WOOD SUPPLY AGREEMENTS THAT GRANT COMPENSABLE TENURE

Unposted Decision

- In relation to the Lands for Life program, MNR has created precedent wood supply agreements that would grant companies "compensable tenure," that is, long term contractual rights to forest lands with compensation if rights are revoked.

Ministry Rationale

- Discussions regarding compensable tenure are at a very preliminary stage. MNR intends to post any policies that develop out of these conceptual stage discussions.

ECO Commentary

- ECO commends ministry on commitment to post and will monitor MNR actions in 1998.

- Since instruments are not being posted, it is important that the policies be posted.

Northern Development and Mines (MNDM)

BILL 120, RED TAPE REDUCTION ACT (MNDM), 1997

Unposted Decision

- Cabinet may prescribe circumstances where a proponent need not comply with a provision in *Mining Act* regulations respecting rehabilitation of mining lands.
- Eliminates requirement to stake out and record placer mining claims.
- This legislation was proclaimed on December 18, 1997.
- MNDM Director of Rehabilitation will monitor industry practices.

Ministry Rationale

- Changes in the act are positive and will be environmentally beneficial because they do not reduce requirements for closure plans as long as the standards met by the proponent exceed requirements under existing regulations. Thus, the proposal will have no significant environmental impact.

ECO Commentary

- The ECO recognizes that proponent compliance with higher mining land rehabilitation standards could increase environmental protection.
- Ministry response implies that there are no environmentally significant impacts if the proposal is intended to have positive outcome; however, *EBR* provisions apply to both positive and negative environmental impacts.

AMENDMENT TO O.REG.111/91 MADE UNDER MINING ACT (O.REG. 503/96)

Unposted Decision

- Amends certain prescribed forms under the *Mining Act* pertaining to mining claims exploration and prospecting.

Ministry Rationale

- Not posted because predominantly administrative and no environmental impact.

ECO Commentary

- Ministry response is valid.

Transportation (MTO)

MUNICIPALITIES TO FUND LOCAL TRANSPORTATION SERVICESFULLY

Unposted Decision

- Part of "Who Does What."
- Government claims it will reduce duplication in delivery of local transportation services by requiring municipalities to fund municipal transit and airports, GO Transit, and highways and ferries serving local needs.

Ministry Rationale

- Predominantly financial and administrative, hence not necessary to post on Registry or consider SEV.
- Municipalities responsible for maintaining standards of environmental protection and complying with the *Environmental Assessment Act*.

ECO Commentary

- Inappropriate exception.
- Failure to consider SEV.
- This decision seems likely to cause a decline in public transit ridership in many Ontario cities. Road vehicles are Ontario's number one source of smog-causing pollution, accounting for approximately 30 per cent of NOx and VOC emissions. Increased emphasis on public transit would help Ontario to achieve its smog reduction targets.

EXPANSION OF HIGHWAYS 11 AND 69

Unposted Decision

- Portions of Ontario Highways 11 and 69 to be expanded to four lanes from the existing two lanes.

Ministry Rationale

- Road-building qualifies as an approved undertaking under *EAA* and therefore is exempted from *EBR*.
- Project was subject of extensive environmental assessment under *EAA*. No requirement to post either as a proposal or as an exception because of equivalent participation.

ECO Commentary

- The ECO found that the decision to expand the highways could have been characterized as a plan or objective of MTO, thereby constituting a "policy" for purposes of the *EBR*. Had the decision been exempt from the *EBR* public notice and comment requirements due to the equivalent public participation provision in s. 30 (1) (a), there would still be a need to post an exception notice on the Registry, which MTO did not do.
- The ECO encourages ministers to post these types of proposals as policies to alert members of the public to the nature of ministers' decisions and to provide greater transparency.

REGULATORY REFORM OF INTER-CITY BUS INDUSTRY

Unposted Decision

- Discussion paper on reform of the regulatory regime for inter-city bus transportation; goal is to open the marketplace to new companies.
- Posted on MTO's Internet website with request for public comments, but not posted on the Registry.

Ministry Rationale

- Proposed regulatory reform will simplify entry requirements needed for bus operators and thus will improve the inter-city bus system to meet travellers' needs. Same safety and environmental standards as before will apply, hence not environmentally significant.

ECO Commentary

- The ECO will monitor how this policy is implemented and report on its environmental impact in future annual reports. This policy decision is a missed opportunity to promote smog and greenhouse gas emission reductions.
- The ministry's SEV states that the ministry will promote an integrated transportation system and the use of public transportation.
- The ministry must continue to play a role in ensuring that inter-city bus travel remains a viable and affordable option for people who live in small communities so that alternatives to car travel remain available.

Appendix C: Unposted Decisions (cont.)

MOE: Instrument Decisions Not Posted on the Registry

In 1997, my staff and I reviewed a number of environmentally significant Ministry of Environment (MOE) decisions on Class III instruments that the ministry failed to post on the Environmental Registry. The chart on the following pages outlines the nature of these decisions, MOE's rationale for not posting them on the Registry, and a brief ECO commentary.

The majority of the approvals were for new waste sites or for expansions to existing landfills. My staff and I concluded that some of these approvals are Class III instruments under the *Environmental Bill of Rights (EBR)*. The *EBR* says that the Minister of the Environment should "do everything in his or her power to give notice to the public ... at least thirty days before a decision [was] made whether or not to implement the proposal." A posting on the Environmental Registry is required as part of that notice. All of the decisions involved hearings before the Environmental Assessment Board.

One example of MOE's failure to comply with posting requirements was an application for amendments to a certificate of approval establishing the first permanent PCB processing facility in Ontario. The proposal involved the handling of hazardous waste. The Ministry of Environment referred the application to the Environmental Assessment Board for a hearing and should have also posted notice of the hearing on the Environmental Registry. The amendments were approved by the Environmental Assessment Board on December 4, 1997. But no notice of the application was placed on the Environmental Registry.

As a result of this omission by MOE, the public was deprived of its right to receive notice on the Registry of this important proposal and did not learn about the opportunity to participate in the public hearing on this Class III instrument. If notice of this proposal for a Class III instrument had been placed on the Registry, additional members of the public could have contributed to the Environmental Assessment Board's deliberations. In its decision, the Environmental Assessment Board indicated its concern that it did not have the full benefit of intervenor evidence. Only one private citizen intervened. A number of people have contacted the ECO with their concerns after learning of the Board's decision.

In reply to my enquiries about this compliance issue, MOE takes the position that Registry notices under the *EBR* are not required and that the minister is not obligated to provide public notice nor to consider public comments made on these proposals. However, MOE acknowledges that the Registry represents an excellent means to share information about public hearings and has said that in the future MOE staff will use the Registry to post information notices about such hearings under section 6 of the *EBR*.

Some of the examples described in the following chart are serious breaches of the *EBR* posting requirements. The ECO will continue to monitor MOE's compliance with Class III instrument posting requirements.

Appendix C

Unposted Instrument Decisions

Unposted Decision	Ministry Rationale	ECO Commentary
Environment (MOE) Gary Steacy Dismantling Limited - The ministry failed to give Registry notice of a Class III proposal put forward by Gary Steacy Dismantling in Northumberland County for a permit to disassemble and then burn fluorescent light ballast components and other PCBs. The light components contain PCBs in concentrations of less than 500 ppm. When it begins operations, this will be the first stationary PCB incinerator in Ontario. - The hearing for this proposal was held in the summer of 1997 and the Environmental Assessment Board (EAB) released its decision on December 4, 1997. - The approval was sought under section 30 of the <i>EPA</i>, and under this provision the Director must refer these types of approvals to the EAB for a public hearing. - Participants in the hearing expressed concern about dioxins and metals that might be released by the proposed operation.	- MOE's position is that Registry notices under the <i>EBR</i> are not required because the issuance of the instrument was a step toward implementing an undertaking approved by a tribunal, and this is subject to an exception under the <i>EBR</i>; therefore, the minister is not obligated to provide public notice nor to consider public comments made on these proposals. - MOE indicates that in future it will voluntarily post information notices under section 6 of the <i>EBR</i> for these kinds of proposals.	- Citizens who might have been interested in this hearing were deprived of the right to get notice on the Registry. - In the decision, the Board indicated that there was a lack of intervenor evidence at the hearing. A Registry posting might have promoted the hearing and encouraged public participation. - This was a serious breach of the <i>EBR</i> requirements. The ECO will monitor whether MOE complies with these requirements in 1998.

Unposted Decision	Ministry Rationale	ECO Commentary
Material Resource Recovery SRBP Inc. - The ministry failed to give Registry notice of a Class III proposal put forward by Material Resource Recovery SRBP Inc. for a permit to establish and operate a new processing facility for mercaptan waste and waste fluorescent light ballasts. The facility is to be located in Cornwall. - The hearing for this proposal was held in December 1997, and the Environmental Assessment Board (EAB) released its decision on January 21, 1998. - The approval was sought under section 30 of the <i>EPA</i>, and under this provision the Director must refer these types of approvals to the EAB for a public hearing. - A representative of a local environmental group was a party to the hearing.	- Registry notices under the <i>EBR</i> are not required because the issuance of the instrument was a step toward implementing an undertaking approved by a tribunal, and this is subject to an exception under the <i>EBR</i>; therefore, the minister is not obligated to provide public notice nor consider public comments made on these proposals. - MOE indicates that in future it will voluntarily post information notices under section 6 of the <i>EBR</i> for these kinds of proposals.	- Notice of the proposal should have been posted on the Registry before the EAB hearing began. - The proposal notice should have indicated that a hearing would have to be held by the EAB and provided a contact name, address and phone number. - Citizens who might have been interested in this hearing were deprived of the right to get notice on the Registry. This was a serious breach of the <i>EBR</i>.

Unposted Decision	Ministry Rationale	ECO Commentary
1) Buchanan Landfill EAB Decision released on June 27th, 1997. 2) Township of South Gower EAB Decision released on August 16th, 1996. 3) Township of Stephen Landfill EAB Decision released on May 28th, 1996. 4) Regional Municipality of Sudbury, Onaping Falls Landfill EAB Decision released on January 31, 1996. The ministry failed to give Registry notice of these Class III proposals for certificates of approval to permit five-year interim expansions of existing landfill sites.	- Registry notices under the <i>EBR</i> are not required because the issuance of the instrument was a step toward implementing an undertaking approved under the <i>Environmental Assessment Act</i>, and this is subject to an exception under the <i>EBR</i>; therefore, the minister is not obligated to provide public notice nor consider public comments made on these proposals. - MOE indicates that in future it will voluntarily post information notices under section 6 of the <i>EBR</i> for these kinds of proposals.	- The proposal notice could have been posted indicating, that a hearing would be held by the EAB and providing a contact name, address and phone number - The ECO commends the MOE for agreeing to post notices of future EAB hearings on the Registry.

Unposted Decision	Ministry Rationale	ECO Commentary
Weil's Food Processing Limited - The ministry failed to indicate in its posting that the instrument sought by Weil's Food Processing Limited in Kent County for modifications to an existing sewage works under section 54 of the <i>Ontario Water Resources Act</i> was a Class III instrument. - The notice was posted in September 1996 as a Class II instrument. However, under s. 54 of the <i>OWRA</i>, a referral to the EAB is mandatory when a proposed sewage works is extended across a municipal boundary. - The ministry did not provide a notice of the hearing after the referral to the EAB was made in early 1997.	- Registry notices under the <i>EBR</i> are not required because the issuance of the instrument was a step toward implementing an undertaking approved by a tribunal, and this is subject to an exception under the <i>EBR</i>; therefore, the minister is not obligated to provide public notice nor consider public comments made on these proposals. - MOE indicates that in future it will voluntarily post information notices under section 6 of the <i>EBR</i> for these kinds of proposals.	- Notice of the proposal should have been posted on the Registry before the EAB hearing began. - The proposal notice should have indicated that a hearing would have to be held by the EAB and provided a contact name, address and phone number. - Citizens who might have been interested in this hearing were deprived of the right to get notice on the Registry. These failures to post were serious breaches of the <i>EBR</i>.

Unposted Decision	Ministry Rationale	ECO Commentary
General Electric Davenport - The ministry failed to give Registry notice of a Class III proposal put forward by General Electric Canada Inc. (GECI) to process PCB waste using an innovative, mobile waste processing technology developed by ELI ECO LOGIC. - GECI sought to obtain approval to destroy more than 6.4 million kilograms of PCB-contaminated soil, 80,000 kilograms of contaminated soil stored in drums, and other PCB-contaminated wastes such as concrete, asphalt, filter and wood. - The hearing for this proposal began in May 1996, but the proposal was withdrawn by the proponent in the fall of 1996. - The approval was sought under section 30 of the <i>EPA</i>, and under this provision the Director must refer these types of approvals to the EAB for a public hearing.	- Registry notices under the <i>EBR</i> are not required because the issuance of the instrument was a step toward implementing an undertaking approved by a tribunal, and this is subject to an exception under the <i>EBR</i>; therefore, the minister is not obligated to provide public notice nor consider public comments made on these proposals. - MOE indicates that in future it will voluntarily post information notices under section 6 of the <i>EBR</i> for these kinds of proposals.	- Notice of the proposal should have been posted on the Registry before the EAB hearing began. - The proposal notice should have indicated that a hearing would have to be held by the EAB and provided a contact name, address and phone number. - Citizens who might have been interested in this hearing were deprived of the right to get notice on the Registry. This was a serious breach of the <i>EBR</i>.

Appendix D: Selected 1997 Exceptions

MOE

RA7E0003.E

Description

MOE Regulation

Revision to the Gasoline Volatility Regulation (O. Reg 271/91 under the *EPA*) to lower the summertime gasoline volatility requirements in southern Ontario

posted 25-Feb-97

filed as O. Reg 45/97 13-Feb-97

Exception

Equivalent Public Participation

- Consultation through the Canadian Council of Ministers of the Environment (CCME)
- Announcement of MOE's Smog Plan
- 3 favourable comments received after REP proposal posted on the Registry in July 1996

ECO Comment

- Consultation by the CCME, while commendable, is not equivalent to *EBR* consultation with the Ontario public.
- This proposal should have been posted on the Registry, not just as part of a package of reforms.

IA5E0393.E

Description

MOE Instrument

OWRA s. 31 order to permit a controlled discharge of treated sewage from the Town of Mitchell sewage treatment system

posted 21-Mar-97

Exception

Emergency & Environmental Assessment (EA) Status

- Town is currently upgrading the sewage treatment works and may need additional storage as contingency to avoid uncontrolled discharge of partially treated sewage during start up of the upgraded system.

ECO Comment

- Appropriate use of emergency exception.

IA7E0360.E

Description

MOE Instrument

OWRA s. 31 order issued to the City of Sarnia to permit a controlled discharge of treated sewage at the Brights Grove Sewage Treatment Facility

posted 24-Mar-97

Exception

Emergency & EA status

- Waste stabilization ponds full, needed to permit a controlled discharge of treated waste to avoid uncontrolled discharge of partially treated sewage.

ECO Comment

- Appropriate use of emergency exception.

IA51086.E

Description

MOE instrument

OWRA s. 31 order issued to Nabisco Brands Ltd. in Niagara-on-the Lake for a controlled discharge from 2 lagoons

posted as a proposal 23-May-95

posted as an exception 04-Feb-97

Exception

Emergency

- First posted as a proposal 2 years ago, order issued at that time due to an emergency.

ECO Comment

- Exception posted almost 2 years after proposal notice and issuance of instrument

IA7E0873.E

Description

MOE instrument

EPA s. 17; *EPA* s. 18; *EPA* s. 44

Order requiring Go Vacations and 3 individuals to secure and manage the PCB waste stored on the property; study and remediate groundwater contamination; and register a certificate of prohibition on title to the property

posted 13-June-97

Exception

Emergency

- Order was required immediately to secure PCB waste and remediate groundwater contamination.

ECO Comment

- Appropriate use of emergency exception.

IA7E1362.E**Description**

MOE instrument

OWRA s. 31 Order issued to the Ontario Clean Water Agency to permit an emergency controlled discharge from the Stoney Point Sewage Treatment Facility

posted 05-Sept 97

Exception

Emergency

- Controlled discharge required to avoid failure of the dikes at the sewage treatment facility.

ECO Comment

- Appropriate use of emergency exception.

MNR

RB7E3001.E, RB6E4001.P, RB6E4001.D**Description**

MNR Regulation

Bullfrog Season Closure - Southeastern Ontario

Regulation under the *Game and Fish Act* to close the season for the commercial and personal harvest of bullfrogs in southeastern Ontario

posted 12-Dec-96, 17-Dec-96, 02-Apr-97

regulation filed 26-Sept-96

Exception

Equivalent Public Participation

- Previous public consultation included: media ads, news releases, direct mailouts to stakeholders, a notice in the 1996 Sport Fishing and Hunting Summaries, and a Hearing by the Game and Fish Hearing Board.

ECO Comment

- Posted 3 times in error.
- Posted as an exception after an inquiry from the ECO.
- Inappropriate 1996 exception.

RB7E3002.E**Description**

MNR Regulation

Amendment of O. Reg 951 under the *Provincial Parks Act* - name change and boundary amendment to change formally the name of the park from Blackstone Harbour (Massasauga Wildlands) Provincial Park to Massasauga Provincial Park, and amend the boundary by adding 1.129 hectares.

posted 27-Mar-97

regulation filed 13-Jul-96

Exception

Equivalent Public Participation

- Extensive public consultation prior to approval of the Management Plan in 1993.

ECO Comment

- Posted as an exception after an "unposted" letter from the ECO.

PA7E6001.E**Description**

MNR Policy

Nature's Best - Ontario's Parks & Protected Areas: A Framework & Action Plan

A policy committing the government to completing a system of parks and protected areas. The policy sets out steps for identifying and regulating new parks and conservation reserves.

posted 10-Mar-97

Exception

Equivalent Public Participation

- Rationale for exception not clear in notice.
- 1st notice said that no broad based consultation had occurred and implied that it was posted as an exception because it wasn't a new policy direction; 2nd notice implied that equivalent public participation
- Letter in response to ECO inquiry acknowledges that the ministry was incorrect in using an exception notice.

ECO Comment

- Inappropriate use of s. 30 exception.
- MNR has committed to "carefully consider the EBR requirements for each initiative in the Action Plan."

RA7E4003.E**Description**

MNR Regulations

Creation of 12 protected natural heritage areas

- O. Reg 951 under the Provincial Parks Act amended to create 5 new provincial parks and add lands to 3 existing parks.
- O. Reg 502 under the Game and Fish Act amended to permit hunting in a provincial park.
- O. Reg 805/94 under the Public Lands Act amended to create 4 new conservation reserves.

posted

26-Feb-97

all 3 regulations filed on

20-Feb-97

Exception

Equivalent Public Participation

- Notice states that MNR has conducted public consultation on the proposed areas over the past 2 years, including: information sessions, open houses and public meetings.
- Letter in response to ECO inquiry letter acknowledges that the consultation was not "substantially equivalent" but was still "significant."
- Most of the consultation occurred 1992-1994.

ECO Comment

- Inappropriate use of s. 30 exception, although significant consultation was carried out on most of the sites in 1992-94.

PB7E1003.E**Description**

MNR Policy - the "decision" is a report of recommendations submitted to MNR by an advisory team (made up of representatives from cottage groups tourist operators the OFAH and local residents) on Crown land management southwest of Thunder Bay. After the ministry makes a final decision, a management plan will be approved and implemented by a non-profit group to be established.

title: Crown Land Recreation Recommendations Northern Lights Lake Corridor

posted

08-May 97

Exception

Equivalent Public Participation

- The recommendations were developed by an advisory team who held 2 open houses attended by 100 people.
- News release and advertisement announcing a 30-day public comment period during March and April 1997.
- 180 comment sheets distributed; over 80 returned with comments.
- After the comments were considered, the advisory team decided to provide their recommendations to the MNR unchanged.
- The MNR District Manager opted for a compromise; plan hasn't been approved because they are waiting for direction from the minister's office.

ECO Comment

- Inappropriate use of s. 30 exception.
- MNR posted an advisory committee's recommendations before the ministry's final decision was made.
- Good local consultation, but not equivalent to EBR because there was no province-wide notice of the advisory team's recommendations; and no-one was given an opportunity to comment on the ministry's final decision, the management plan itself.

MNR/MEDTT

PB7E6002.E**Description**

MNR / MEDTT Policy

Ontario Resource-Based Tourism Policy

A policy to allocate resources such as lodge sites, land, fish and wildlife to remote tourism outfitters.

posted 27-Mar-97

anticipated date in effect 01-Apr-97

approved by Cabinet 05-Feb-97

Exception

Equivalent Public Participation

- Notice states that a multi-ministry team met with representatives of stakeholder groups from Feb - Dec 1996 and that several written submissions were received.
- In a joint response to the ECO, the ministries stated that they relied on ministerial discretion in s. 15(1) and MNR's interpretation of s. 30(1)(a) at the time to except the decision, and acknowledged that the consultation undertaken was not substantially equivalent to the EBR process.

ECO Comment

- Inappropriate use of s. 30 exception.
- The implementation plan for the policy was subsequently posted on the Registry.

Appendix E: Environmental Monitoring Programs

Water Quality Monitoring Programs

SEPTIC SYSTEMS MONITORING

Malfunctioning septic systems can contaminate nearby wells and ground water and pollute lakes. The overuse and the improper use of septic systems can produce the same effect.

Some components of sewage are very mobile once they enter the soil. Nitrate contamination of wells is already a concern for thousands of Ontario households.

There are currently more than one million septic systems installed across the province with an additional 22,000 approvals issued annually.

Related Ministry Targets

No targets related to septic systems.

The responsibility for regulating septic systems shifted from MOE to municipalities effective in 1998. Regulatory authority has shifted from the *Environmental Protection Act* to the *Building Code Act* administered by MMAH.

MOE confirmed in Dec. 1997 that it is working with other ministries to develop a groundwater protection and management framework for Ontario. MOE noted that the collection of good quality data is vital, but it is unclear how the issue of septic systems will be addressed by this framework or when the framework will be released.

Quality of Monitoring

Poor; has declined.

Septic systems are inspected upon being installed. Normally they are not inspected again over their functioning life - about 20 years - unless there are complaints.

For more than 20 years, MOE offered re-inspection of selected cottage septic systems on lakes where cottagers had requested the service. This monitoring suggested that about 30% of cottage systems were malfunctioning. This monitoring service was discontinued a few years ago due to funding cuts. An MOE phone survey of inspectors suggests that septic systems outside cottage country may be in much better shape, but there is limited data. Two surveys recently conducted in the Niagara Region suggest that between 3% and 30% of those septic systems may be malfunctioning.

Municipalities now regulate septic systems, but they are not required to carry out routine re-inspections. Some municipalities are re-inspecting systems at the request and expense of cottagers' associations.

Under the new system, municipalities are not required to submit data on faulty septic systems to MOE or MMAH, so there will be no way that a province-wide database for septic systems could be established.

Quality of Reporting

Poor; has ended

Under the old Cottage Pollution Control program, public health units reported faulty systems, and MOE produced an annual report. There is no indication that municipalities will be maintaining databases, or report ing on the condition of septic systems.

SPILLS MONITORING

Spills are defined as releases of pollutants into the natural environment from a structure, vehicle or other container, and that are abnormal in light of all circumstances.

Spills can contaminate land, surface waters and groundwater, and can be very expensive to clean up.

A good understanding of spills occurrence trends can be used to target problematic areas and to focus prevention programs.

Related Ministry Targets

No targets related to spills, but MOE's 1997 business plan has set a target of cutting certain toxic chemicals discharged to surface waters by 90% by year 2000.

Quality of Monitoring

Good.

There is a legal requirement to report all spills to MOE; MOE receives about 5,000 spills reports annually and tracks location, nature and size of each spill with a computerized database system. In response to industry requests MOE is proposing to exempt "no adverse effect" small quantity spills from reporting requirements, reducing the number of reported spills by about 1,000 to 1,500 (20 %) per year. MOE plans to set quantity limits for specific industries, but some observers comment that the type of contaminant and the circumstances of the spill must also be considered.

The exemption is intended to redirect resources toward more serious spills, but it is unclear how this will occur.

Quality of Reporting

Good; stable

MOE produces a very thorough annual report on spills, including an analysis of trends in types and locations of spills, trends from year to year, and trends among industrial sectors. The most recent report is for 1995.

COTTAGE LAKE WATER QUALITY MONITORING

Small lakes can be overwhelmed with fertilizers and other pollutants from shoreline development and faulty septic systems. This can result in heavy algal growth and poor conditions for fish and other aquatic life.

In the past MOE could act on local water quality problems by doing selective inspection of septic systems or commenting on local development proposals. These options no longer exist. Now, cottagers are responsible for protecting their lakes from deteriorating.

Related Ministry Targets

No targets for cottage lake water quality, but MOE's 1997 business plan includes a focus on cleaner water, healthier ecosystems and environmental stewardship.

Quality of Monitoring

Fair; declining.

Under a 20-year-old program called the Self Help program, cottagers collected 6 water samples annually for each participating lake and MOE did tests. About 160- 300 lakes participated each year. In total, approximately 500 lakes were tested at least once during the life of the program.

In 1997 the Self Help program was replaced with the Lake Partner program, which reduces testing to once annually per lake, and relies more on historical data. Also, 20-30 lakes per year will be receiving 6 tests, and 6 lakes will get very detailed monitoring that measures chlorophyll, oxygen concentrations, etc. MOE has allocated a single person to this program. It depends heavily on volunteers, and is supported through fundraising by cottagers and partnerships with municipalities. When MOE identifies deteriorating local water quality, there are few mechanisms available for MOE or MNR to take action. Cottagers are encouraged to resolve the problem themselves.

Quality of Reporting

Poor; improving.

Under the old Self Help program, there was little reporting. MOE provided cottagers with one-page summaries of water sample results. An MOE coordinator is now working on summarizing 20 years of data, including trends and conclusions about water clarity and quality. A report is to be published every third year, and a brief annual report is also planned.

INDUSTRIAL WASTE WATER DISCHARGE MONITORING

Many industrial sources have approvals to discharge liquid wastes directly into lakes and rivers. Although these wastes are often treated to some degree, they still contain a large diversity of pollutants, including persistent toxic chemicals.

Related Ministry Targets

MOE's 1997 business plan says the ministry wants to measure the volume of toxic pollutants discharged to surface water and sets these targets

- "reducing tonnes of current tier 1 toxic chemicals by 90% by the year 2000"
- "virtually eliminating industrial effluents acutely toxic to fish"

These targets would require a knowledge of the current total loadings of toxic chemicals, as well as total loadings of acutely toxic effluents to lakes and rivers.

Quality of Monitoring

Much detailed data is collected, but very poor analysis.

Municipal Industrial Strategy for Abatement (MISA) regulations under the EPA require nine industrial sectors to monitor selected pollutants in their discharges to waterways. Details vary, but data must be submitted monthly to regional MOE offices, where they are checked for any exceedances of standards. Facilities report both flow rates and concentrations. Industries not caught under MISA may also have some monitoring/reporting requirements in their certificates of approval.

MOE regional offices receive this data from about 300 industrial facilities across the province, and compile summary reports. They focus on any exceedances of standards, but do not calculate total loadings of pollutants, nor do they monitor year-to-year trends in the percentage of facilities in compliance. MOE has not been tracking total loadings of pollutants into waterways. MOE is working on developing emission inventories for the various industry sectors, but work so far has covered only a few pollutants emitted by the pulp and paper and the petroleum industries, such as AOX (total adsorbable organic halides), BOD (biochemical oxygen demand) and suspended solids. MOE has no target date for completing these inventories, and summary reports are not available.

Quality of Reporting

Very poor; has declined.

Data are submitted to the International Joint Commission under the Great Lakes Water Quality Agreement. Raw data are also shared with the public but at a cost. An environmental group recently requested discharge records for all out of compliance facilities; MOE said this information would cost the group more than \$10,000.

For 1991 data, MOE published a detailed report on industrial direct discharges, including useful analysis on compliance trends. About 50% of facilities were in compliance in 1991.

For 1994 and 1995 data, MOE published a listing of each facility in non-compliance. The lists contained no summaries, trend analyses, or information on pollution loadings by any facility. It is unclear when or if reports for 1996 or 1997 data will be published.

SEWAGE TREATMENT PLANT (STP) DISCHARGE MONITORING

There are about 428 municipal STPs in Ontario which have approval to release effluents to waterways. These effluents may contain numerous conventional pollutants such as phosphorus, and also persistent toxics such as heavy metals.

STPs are regulated either through certificates of approval, or through an MOE effluent guideline. In 1991, 24% of all STPs were not in compliance. Currently, about 20% are not in compliance.

In emergencies, STPs may release raw sewage into waterways. For example, in 1991, STPs in the Central Region released a total of 4 million cubic metres of raw sewage.

Related Ministry Targets

MOE's 1997 business plan includes the following targets:

- 100% of municipal STPs are to achieve compliance.
- reduce tonnes of current tier 1 toxic chemicals by 90% by the year 2000.
- virtually eliminate industrial effluents acutely toxic to fish.

Ministry staff consider the 100% compliance target to be an ideal target that can never be met.

Quality of Monitoring

Poor; quality of analysis has declined.

Most STPs are required to monitor three parameters: biochemical oxygen demand, suspended solids and phosphorus. Some may measure pollutants like ammonia, which are acutely toxic to fish. Persistent toxics are not monitored.

STPs submit annual data to MOE voluntarily. MOE normally audits all STPs once in four years, but may do annual audits for plants with chronic noncompliance. MOE used to carry out detailed trend analyses on data, including ranking STPs from worst to best, and calculating compliance and loading trends.

Currently, MOE checks data only for noncompliance cases, but they hope to analyse long-term trends in future, and eventually develop emission inventories.

In response to concerns raised by the Provincial Auditor, MOE recently tightened reporting requirements on raw sewage releases; STPs must sample the sewage and at least estimate the flow.

Quality of Reporting

Poor; quality of reporting has declined.

Raw data are also shared with the public but at a cost. An environmental group recently requested discharge records for all out-of-compliance STPs, MOE said this information would cost the group almost \$7,500.

For 1991 data MOE published a detailed report on the performance of STPs including useful analyses trends and a ranking of STPs.

For 1994 and 1995 data MOE published a listing of each STP that was in noncompliance. The lists contained no summaries, trend analyses, or total pollution loadings by any STP. It is unclear when or if reports for 1996 or 1997 will be published.

SPORT FISH CONTAMINANT MONITORING

Eating sport fish can be a very significant exposure route for toxins such as PCBs, mercury and DDT. Monitoring is the only way to test whether sport fish meet Health Canada guidelines for human consumption.

Since sport fish are high on the food chain and accumulate persistent contaminants, they are also excellent indicators of general water quality and ecosystem health.

Related Ministry Targets

MOE's 1997 business plan has set a target to reduce the number of annual sportfish consumption advisories in Great Lakes by 10% by year 2010 (1995 base case).

To evaluate progress toward this target, MOE staff plan to use 1995 sampling protocols and 1995 tolerable intake levels. This should allow appropriate year-to-year comparisons.

Quality of Monitoring

Good; coping with cutbacks in staff and resources.

This program tests about 5,000-6,000 fish per year, and about 100 new sites per year. Testing priorities are thoughtfully planned, but are limited by funding. High priority sites may be retested every 3 years, while low priority sites may wait 10 years for a retest. Area covered includes 250,000 lakes and numerous locations in the Great Lakes. Staff pursue innovative partnerships with MNR and other agencies to secure fish and sampling funds. Access to lab analysis has been cut back, so staff focus on the highest priority samples. This program has three staff who are focussed on maintaining the basic program.

MOE used to study fish health and the incidence of tumours in fish, but cutbacks have ended this work. Staff have also been reduced for a key program monitoring effects of localized contaminants on non-migrating fish species.

Quality of Reporting

Good; coping with cutbacks in staff and resources.

MOE publishes a very useful, detailed Guide to Eating Ontario Sport Fish. About 300 000 are distributed free of charge through LCBO and Beer Store outlets. Users can readily look up their favourite fishing locations. Simple fish icons tell anglers what can be eaten from each size class of each fish species. This guide is superior to similar publications of U.S. Great Lakes states. Guide is published every second year used to be published annually until 1994. Ministry is considering charging for the guide.

Air Quality Monitoring Programs

INHALABLE PARTICULATES EMISSION INVENTORY

"Inhalable particulates" are microscopic airborne particulates that are small enough to enter lungs.

"Emission inventories" are produced by measuring (or estimating) emissions from every important type of source and then adding them up to discover the total provincial emissions for that pollutant.

Inhalable particulates (PM10) are connected to respiratory disease and premature death. PM10 is a chronic concern in cities like Windsor Hamilton Toronto and Sault Ste. Marie. An emission inventory is needed to identify major sources, to develop effective control strategies and to track progress.

Related Ministry Targets

MOE's 1997 business plan has set a target: Emissions of inhalable micro-particulates reduced 10% by year 2015.

To evaluate progress toward this target, MOE would need an accurate emission inventory for a baseline year.

MOE has also committed to developing a comprehensive reduction strategy for PM10 by the end of 1998.

Quality of Monitoring

Poor.

MOE acknowledges that emission inventory information for particulates is very uncertain.

There is no mandatory monitoring or reporting by major sources. Emission estimates are obtained from voluntary surveys of sources, based on any information available. Contributions from road dust, construction, secondary pollutants etc., are also poorly understood.

MOE has committed to producing an emission inventory for PM10, but has allocated only two staff and no research budget. Methodology and timelines are also unclear. MOE says that an improved PM10 emission inventory using 1995 statistical information will be completed by March 1998.

Quality of Reporting

Poor; MOE is reporting outdated weak data.

MOE included a chart of 1990 emission estimates for PM10 in its December 1997 overview of air quality, but did not mention known weaknesses of data. According to an expert group assembled by MOE, improvements in estimates "are crucial" for combustion and industrial sources, while emissions from road dust, construction farming etc., "are not well known."

INHALABLE PARTICULATES AMBIENT MONITORING

"Inhalable particulates" are microscopic airborne particulates that are small enough to enter lungs.

"Ambient monitoring" is the monitoring of air that people are normally exposed to in urban areas.

Inhalable particulates (PM10) are connected to respiratory disease and premature death. PM10 is a chronic concern in cities like Windsor, Hamilton, Toronto and Sault Ste. Marie. Monitoring of ambient air quality is needed to learn what particulate levels Ontarians are exposed to.

Related Ministry Targets

MOE has set a new interim ambient air quality criterion for inhalable particulates "to be used as a benchmark in our battle against smog."

Quality of Monitoring

Fair, coping with increasing demands and declining resources.

PM10 monitoring began in 1989, at five locations across Ontario. MOE's goal is to provide monitoring for Ontario's densely populated centres. MOE is also automating and changing focus of monitoring, away from total suspended particulates and focussing more on the fine particulates implicated in health concerns. There are currently 16 Air Quality Index sites monitoring PM10 across Ontario; in 1995 there were 23 locations. Environment Canada (federal) contributes a number of monitors. New automated monitors provide continuous data, and require less staff, but they don't allow chemical analysis for contaminants of particular health concern such as sulphates. Older filter samplers actually capture pollutants for chemical analysis.

Quality of Reporting

Good but slow; plans for improvement.

MOE provides an annual summary of PM10 trends in its air quality overview. The summary notes communities with high levels of PM10, and includes year-to-year comparisons. Useful charts and maps help the reader. But the overview is published one to two years after the fact.

MOE is planning with Environment Canada to provide real-time air quality advisories for PM10, similar to existing smog advisories. These would alert people sensitive to particulates to take precautions when air quality is poor.

WINDSOR AIR QUALITY MONITORING

MOE monitors ambient air quality in 24 urban centres. Windsor has documented chronic air quality problems, including problems with ground level ozone, particulates and air toxics such as benzo(a)pyrene. U.S. sources such as U.S. steel industry contribute about 2/3 of Windsor's air pollution.

Related Ministry Targets

No targets focused on Windsor air quality.

MOE's 1997 business plan notes that improving air quality in Ontario is a major focus of the ministry's environmental protection efforts.

Quality of Monitoring

Fair, has declined since 1993.

Monitoring for toxics intensified during a temporary study from mid-1991 to March 1993.

There are currently two ambient air quality monitoring stations in Windsor, measuring a standard set of pollutants (one less than in 1989). In early 1997, MOE's local district head told a public meeting that he was still waiting for lab results from air samples taken in 1995. MOE staff still consider Windsor's air monitoring network better than compara-

ble cities such as Scarborough. The Windsor MOE office lost half its staff in 1997, including the sole air quality technician. The London MOE office now manages Windsor air quality monitoring. Observers see a need for better toxics monitoring.

Quality of Reporting

Fair, detailed reporting has declined since 1994, but daily update on Internet is an improvement.

A special Windsor Air Quality Study produced a set of reports in late 1994, providing both highly technical information and plain English summaries. The Windsor Air Quality Committee, which was to propose solutions, has become inactive since the latest cutbacks.

MOE's Web site provides daily updates on local air quality in Windsor and other urban centres, as well as historical data for the last year.

Limited information and trend analysis for Windsor air quality is included in MOE's annual province-wide overview of air quality, the December 1997 edition covers 1995 results.

HAMILTON AIR QUALITY MONITORING

MOE monitors ambient air quality in 24 urban centres.

Hamilton has two major steel plants and other heavy industry, and also has frequent weather inversions trapping air pollutants. Pollutants of concern include fine particulates, ground level ozone, sulphur dioxide and nitrogen oxides. It is estimated that there are at least 90 premature deaths and 300 additional hospital admissions per year due to current air quality in Hamilton-Wentworth. In 1993, MOE received more than 500 complaints about Hamilton air quality.

Related Ministry Targets

No targets specific to Hamilton.

MOE's 1997 business plan notes that improving air quality in Ontario is a major focus of the ministry's environmental protection efforts.

Quality of Monitoring

Fair; coping with cutbacks in resources.

MOE staff say that Hamilton has the most intensive air monitoring program in Ontario. But a 1997 MOE report also notes that only a very general picture of particulate pollution is available, and that several more monitoring stations would be required to fill in some gaps. Six automated monitoring stations are located throughout the city. A seventh station was shut down in 1996 due to cutbacks. MOE has also set up video surveillance of industrial smokestacks. A number of monitors are provided by Environment Canada. Where possible, MOE also has fund-sharing agreements with industry to cover costs of instruments and technician salaries.

Quality of Reporting

Good; improved by addition of daily updates on MOE's Website.

In April 1997, MOE published a 70-page report on Hamilton air quality, based on 1995 data. The report provided useful charts, maps, a clear description of trends, and a useful overview of specific source problems and solutions.

In October 1997, the Hamilton Air Quality Initiative (a multi-sector group) published its summary report, which provided further analysis and discussion of Hamilton air quality.

MOE's Web site provides daily updates on local air quality in Hamilton and other urban centres, as well as historical data for the last year.

Limited information on Hamilton air quality is also included in MOE's annual province-wide overview of air quality; the December 1997 edition covers 1995 results.

Natural Resources Monitoring Programs

NIAGARA ESCARPMENT MONITORING PROGRAM

The Niagara Escarpment is one of Canada's most scenic landforms, and shelters very diverse plant and animal communities in an otherwise highly developed region. The Escarpment is protected through a provincial land use plan and special provincial legislation. Monitoring is needed to gauge whether the objectives of the land use plan are being met.

Related Ministry Targets

There are no ministry targets relating directly to the Niagara Escarpment.

MNR's 1997 Business Plan does state that Parks and Protected Areas are a core business of the ministry.

MNR took over responsibility for the Niagara Escarpment from MOE in March 1997.

Quality of Monitoring

Excellent potential, but few results to date. Negligible resources available.

The Niagara Escarpment Monitoring Program has been in development since 1993. Work led by MOE has so far produced a basic framework, indicators to be monitored, and 13 specialized monitoring protocols. Monitoring locations are still being identified. The goal is to analyse trends over time in land use, forest health and biodiversity. Strong partnerships with federal government, universities, the Smithsonian Institute and other agencies have produced a very well-designed program, linked to goals and objectives. But extensive reliance on volunteers and existing monitoring by other agencies make the program very vulnerable to external shifts in funding or priorities. Since the transfer from MOE to MNR, implementation has slowed significantly. The Niagara Escarpment Commission is implementing the program, but had a 30% budget cut in late 1995, and has currently allocated only 1/2 person to this monitoring project.

Quality of Reporting

Excellent potential, but few results to date. Negligible resources available

So far, few written reports have been released. Interesting findings from research projects used to be featured in *Cuesta*, a publication of the Niagara Escarpment Commission that has been cancelled due to cut backs. Some findings were presented at a fall 1997 conference.

In 1995, the plan was to release State of the Escarpment reports every five years starting in 1996. The first report has not yet been prepared, and it is uncertain whether this scale of reporting is still planned.

FOREST RESOURCES INVENTORY (FRI)

Ontario's Crown forests support a very large forest industry. To manage and regulate forestry activities, MNR needs accurate current information about the state of forests province wide.

The FRI began in 1946, for forest industry needs. The forest industry is legally required to use and update the FRI to produce forest management plans.

In the absence of alternatives, MNR also uses the FRI to identify potential natural heritage lands and to estimate wildlife habitat potential, even though the database design and data collection methods were not meant to capture such information.

Related Ministry Targets

For many years MNR had ambitious but unrealistic targets for province-wide wood production that were set according to demand, not calculated from the ability of the land to produce that wood supply. MNR has begun a process to develop new wood targets. MNR needs reliable FRI data as base information for the computer modelling system to create the wood supply estimates, and later to measure its progress toward achieving the desired forest condition.

MNR's 1997 business plan says the ministry wants core geographic information to be "available accessible and affordable," and that the ministry wants to measure the "percentage of the province with current resource inventory and base maps." No target percentage is mentioned however.

Quality of Monitoring

Database is being updated and being made more electronically accessible. It is not designed to measure values other than timber supply.

Inventory work begins by acquiring aerial photos, followed up by sampling forest conditions by ground crews. Then staff interpret forest cover and classify the area as either productive forest, non-productive forest, non-forested land or water. More detailed attributes such as species, height and age of trees are also noted, and are critical for estimating current and future wood supplies. Ground level vegetation, noncommercial forestry information and planning information are not monitored, but a new system which will integrate the FRI with other natural resource information in a Geographic Information System is just beginning.

MNR's FRI program has been criticized by many independent reviewers including the Provincial Auditor in 1986 and 1994, a specially appointed auditor in 1994, and the EA Board in 1994.

In the past, inventories were updated every 20 years, by focussing on about 5% of the forest annually on a rotating basis across the province. Recently, in response to criticism, MNR has accelerated these updates, especially for intensive forestry regions, and is even aiming for "continuous updates" by having industry update the FRI with all new wildfire, harvest and free-to-grow information. Province-wide, the average age of the inventory is between 5 and 10 years old. But some regions, particularly in southern Ontario and the far north, have inventories older than 20 years. All locations inventoried since 1987 are in a digital database, but much of the Northwest Region is not yet digitized.

MNR funding for FRI has declined since 1995/96. It is now being paid for by industry, with the share the ministry used to pay now coming from industry fees paid into the Forestry Futures Fund, a special purpose account.

Quality of Reporting

Sporadic, with little trend analysis.

In 1997 MNR committed to much better analysis and reporting of FRI data.

MNR has produced periodic summaries of the FRI: for the years 1963, 1986, 1993 and 1996. These reports are mainly tables of data with some descriptive text and useful maps.

In its 1997 Forest Resources Assessment Policy (FRAP), MNR committed to more thorough assessments of the forest condition using the FRI and other information to describe trends in the forest condition from one report to the next. The first assessment report, *An Assessment of Ontario's Forest Resources*, was also published in 1997.

Raw FRI data is available for a fee through MNR's Internet and Intranet sites, as well as at MNR's Information Centres. Forestry clients are licensed to access the data electronically.

NATURAL HERITAGE INFORMATION CENTRE (NHIC)

To manage Ontario's natural heritage effectively, MNR needs accurate up-to-date information on significant natural areas and rare species. The NHIC compiles, maintains and provides this information.

Examples MNR uses the information to determine which species to regulate and how to conserve species designated under the *Endangered Species Act*. Ontario Hydro uses the NHIC information to plan transmission corridors. Municipalities may use NHIC information to identify local natural heritage features as required by the *Planning Act*. The forest industry is legally required to use NHIC information in planning forestry operations. NHIC information is also used to determine who qualifies for the government's managed forest and conservation lands tax relief programs.

Related Ministry Targets

MNR's corporate priorities for 1997/98 include "leading the implementation of a government wide land related information strategy" and "to improve the knowledge base for natural resource management."

Quality of Monitoring

Good and improving; data quality weak in northern Ontario.

In 1997, MNR reduced field work.

NHIC compiles data from many sources (museums, universities, naturalist groups, MNR databases, etc.) and enters them into electronic databases. Quality of original data varies, but NHIC uses expert advice and field visits for verification. NHIC has developed standards for its data, and encourages contributing groups to use standards.

NHIC received significant temporary funding in 1997/98 to verify and input records from 10 acquired databases. The ministry is developing partnership agreements with conservation agencies which will provide data to the ministry in return for access to the NHIC databases and computer systems.

NHIC focussed on southern Ontario from its inception in late 1993 to early 1995; then its mandate was expanded to the whole province. Data for northern Ontario are weak; although much information was compiled in 1995, it sat in boxes until 1997 because funds were lacking to input the data. Also, fewer biological studies and inventories have been conducted in the north.

Most of the information on populations of rare species in the north relates to a few "featured species" such as Bald Eagle. Virtually nothing is known of the botany of large sections of the province.

Quality of Reporting

Fair and improving, with new electronic access to NHIC data.

NHIC publishes numerous scientific papers, atlases and lists of rare species. The intent is to update lists annually. In 1996 lists were updated for amphibians, reptiles and rare vascular plants. Lists note the status of each species, but provide no analysis of trends or research needs.

NHIC issued two or three newsletters a year in 1994-96 then one in 96/97 and one in 97/98. MNR says that another is planned for spring 1998.

NHIC launched an Internet Web site in September 1997, providing the general public with access to previously published lists, updated databases and the ability to make map-based queries and generate reports.

Enhanced access to NHIC data is provided to some ministry staff and conservation partners who require sensitive information about rare species to carry out conservation programs.

MONITORING FOREST REGENERATION

Forest lands are harvested, tended and regenerated using many different methods. They may be harvested by clearcutting or selective logging. They may be seeded, replanted with seedlings, or left to regenerate naturally. They may be sprayed with herbicides or insecticides. Without tracking these treatments and monitoring their success rates, it is impossible to know if the new forest is growing back as planned, or which treatments work best on different types of sites.

Related Ministry Targets

MNR committed in its 1997 business plan to report to the public on the state of forest resources in Ontario during the 1997/98 fiscal year.

MNR adopted a new Forest Resources Assessment Policy in 1997 that commits the ministry to several related principles: forest sustainability; the area and broad composition of Ontario's Crown forests, on a provincial scale, must not decline; and levels of forest renewal must be adequate to sustain the forest.

Quality of Monitoring

Poor; in flux.

Monitoring of regeneration efforts is in a great state of flux. In the past monitoring has been very poor. It could not link regeneration results with the forest treatment on a given plot of land. MNR's system of collecting and analysing regeneration information was criticized by the Provincial Auditor in 1986 and 1994, an Independent Forest Audit Committee in 1992 and by the Environmental Assessment Board in 1994. The EA Board ordered MNR to improve its ability to assess the effectiveness of regeneration by both natural and artificial methods. MNR was establishing a new system called STEMS (Silvicultural Treatment Effectiveness Monitoring System), but this program has been dropped due to budget cuts.

The ministry has very stringent and legally binding requirements for industry to report annually on their harvest, regeneration and other forestry operations. MNR currently can't link the information from operations, regeneration efforts and results, and inventories of the forest, but has taken some promising steps to be able to do this in the future.

Now MNR has a new team aided by Price Waterhouse to develop a "Forest Evaluation Project," with new indicators and measures of forest sustainability, to determine what data needs to be collected and the role of partners and MNR in meeting its monitoring and reporting responsibilities under the *Environmental Assessment Act* and the *Crown Forest Sustainability Act*. Implementation is planned for 1998, after consultation. MNR says the first reports using this new system are expected early in the next decade, and that it will use the best available information to assess and report on forest sustainability in the interim.

Quality of Reporting

Poor; expected to improve.

Until 1991 MNR provided an annual statistics document in conjunction with its annual report. The statistics included information on forest operations, but did not provide analysis of trends or context. MNR has not compiled or reported on any forestry statistics gathered from across the province - for example, the actual area harvested - since 1991. An audit of forest regeneration was published in 1992, but MNR issued no reports on forestry operations from 1992-1997.

MNR has not yet released a legally required first Annual Report on Forest Management to the Legislature, covering 1995/96 data.

Quality of Reporting

Poor.

For example, MNR manages a bear hunt which harvests about 7,000 bears annually. Although MNR has put out news releases estimating the Ontario bear population at 75,000 to 100,000 individuals, the ministry has not published any reports on bear population numbers.

The Big Game Mortality System has the capacity to produce provincial and regional reports, but they haven't been produced for several years because the data were not entered by field staff.

MNR intends to report the results of the new Wildlife Assessment Program in future in the five-year State of the Forest Reports.

WILDLIFE INVENTORY DATABASE

MNR needs to have accurate information on wildlife populations and habitats, and the stresses on them.

Related Ministry Targets

Fish and wildlife were described as one of MNR's top priorities in its 1997 business plan. MNR also said it would establish new targets for big game populations and make significant progress in achieving them by 2002.

Quality of Monitoring

Poor for many species; but improving.

Most attention is given to game species such as moose, deer and bear.

In 1995/96 MNR identified serious weaknesses and gaps in wildlife information. For example, problems were identified with bear population data, hunting data, and information systems.

There is little information collected on small game species or non-game wildlife.

Recent improvements:

- 1 The Environmental Assessment Board in 1994 required MNR to carry out a provincial wildlife population monitoring program to assess the effects of timber management on wildlife. MNR established the Wildlife Assessment Program in 1997 to monitor trends in populations of indicator species, including some non-game species for which data is currently lacking. The program is modest with a budget of \$500,000 annually from the Forest Management Program and six full-time staff in three regions.
- 2 MNR established dedicated funds for fish and wildlife inventory work during 1996/97, creating a special purpose account under the *Game and Fish Act* for fees received from hunting and fishing licences. About \$1.2 million is now budgeted annually on inventories, primarily of game species. This appears to be slightly more than was spent in the past.
- 3 Available wildlife data is being put into a new electronic database, which should provide improved access to data and allow statistics to be aggregated provincially.

Appendix F: Selected Ontario Voluntary Agreements

AUTOMOTIVE PARTS MANUFACTURING POLLUTION PREVENTION PROJECT

MEMORANDUM OF UNDERSTANDING (MOU), 1993.

MOE, Environment Canada, Automotive Parts Manufacturers Association (AMPA). Eight participating companies.

The agreement expired in 1996, but MOE expects that a proposed Addendum to the Agreement will be posted on the Registry in the winter of 1998. The ministry expects that the renewal would be until 2000.

Design features of the program

The MOU established a Task Force with industry and government representatives. General objectives include training opportunities for sharing information on pollution prevention and developing courses and workshops on pollution prevention planning. As well, the companies under took to identify and prioritize pollution prevention opportunities and implement them to achieve verifiable reductions in the use or discharge of toxics.

The Task Force is responsible for monitoring progress and ensuring that results are verifiable.

Selected results to date 1994 - 1997:

- The Task Force identified four priority processes for the participants' pollution prevention efforts.
- AMPA published the results of a survey which established benchmarks for technologies in cleaning and degreasing and in the use of metal-working fluids. A survey on surface-coating practices was initiated.
- Several workshops on environmental management systems and pollution prevention were conducted.

Reductions:

Two progress reports (1994 and 1996) document 22 case studies achieving annual emissions reductions of 660 tonnes of toxic substances and other wastes discharged to air and water.

CANADIAN AUTOMOTIVE MANUFACTURING POLLUTION PREVENTION PROJECT

MOU, 1992; RENEWED 1994.

MOE Environment Canada, the Canadian Motor Vehicle Manufacturers' Association and the Canadian subsidiaries of the "big three" auto makers (Ford GM, Chrysler). Although not a signatory, custom transport truck maker Navistar International has participated by submitting pollution prevention case studies.

The agreement has expired, but MOE expects that a proposed Addendum to the Agreement will be posted on the Registry in the winter of 1998. The ministry expects that the renewal would be until 2000.

Design features of the program

MOU established a Task Force responsible for meeting the objectives set in the Terms of Reference. The implementation plan, prepared in late 1992, focused on the development of pollution prevention plans at both the company and plant level. Each company developed a candidate list of toxins and other contaminants for voluntary reduction/elimination, based on a larger candidate list agreed to in the MOU and a latter addendum which renewed the MOU.

Results reported on a case study basis. Technology transfer to other industry members and to suppliers is another key aim of the projects undertaken by participants.

Selected results to date 1993-1996:

- Industry held several workshops with suppliers to encourage project support.
- Second Progress Report issued with 15 case studies documenting reductions of 2,200 tonnes annually in discharges of contaminants of concern; MOU renewed target list of toxics expanded.
- Third Progress Report indicated annual reductions of 126,937 tonnes of toxic substances and waste, through 24 pollution prevention projects.
- Fourth Progress Report indicated annual reductions of 21,385 tonnes of toxic substances, through 26 pollution prevention projects.

Reductions

- To 1995, 65 pollution prevention projects had been reported on by the parties, with a total annual reduction of 150,522 tonnes

JOINT CANADIAN CHEMICAL PRODUCERS' ASSOCIATION AND THE ONTARIO MINISTRY OF THE ENVIRONMENT POLLUTION PREVENTION & REDUCTION PROGRAM

MOU, 1994.

Canadian Chemical Producers' Association, MOE, and Environment Canada; six participating companies (one was not an original signatory). Participants include Du Pont Canada, Imperial Oil (Chemicals Division), Dow Chemical Canada, and Nova Chemicals.

Expiry date was February 1996. Not yet known whether the MOU was renewed.

Design features of the program

The MOU was intended to lead to the development of a four-stage voluntary pollution prevention program:

- 1 Preparation of a planning framework.
- 2 Sharing of pollution prevention knowledge.
- 3 Production of site-specific pollution prevention plans.
- 4 Implementation of the site plans.

Selected results to date

Reductions:

- 11 facilities have 15 toxic substance and waste reduction projects underway.
- Through 1995, participating companies reported the following reductions in annual discharges:
 - Solid wastes: 9,500 tonnes/yr.
 - Hydrocarbons: 2,372.5 tonnes/yr.
 - Organic liquids: 58.2 tonnes/yr.
 - Wastewater treatment sludge: 2.7 tonnes/yr.
 - CFCs: 1.7 tonnes/yr.

HAMILTON DISTRICT AUTOBODY REPAIR ASSOCIATION (HARA) PARTNERSHIP

PARTNERSHIP AGREEMENT, 1995.

HARA, MOE. This agreement was signed after joint MOE-HARA initiatives were underway, and the agreement commits the parties only to distribute information on environmentally sound practices in the autobody repair industry.

Expiry date is not known (there may not have been an expiry date, but a number of projects were to be completed before the end of the agreement).

Design features of the program

The Partnership Agreement relates to educational initiatives.

HARA has proposed a mix of self-regulatory and external control mechanisms: that the Canadian Council of Ministers of the Environment's (CCME) draft National Standards and Guidelines for the Reduction of Volatile Organic Compounds from Canadian Commercial/Industrial Surface Coating Operations be adopted and applied by an industry-run organization, the Autobody Repair Registration Inspection and Verification (ARRIV) Board. ARRIV would manage the implementation and enforcement of the proposed CCME standards by issuing a certificate, similar to a certificate of approval, and would then inspect, monitor and enforce the proposed standards. Without a certificate, facilities would not receive payment from insurers.

Selected results to date

1994-1995

- HARA conducted outreach activities for the over 300 auto repair businesses in the Golden Horseshoe. HARA won an MOE award (the P4 Leadership Award) for its programs in 1994.
- Under the Partnership Agreement, HARA developed a workbook and video on environmentally sound practices for autobody repair shops. A draft of the workbook was produced. HARA is involved in an organization which has conducted several workshops in southern and southwestern Ontario which provide information on: CCME VOC emission standards, efficient paint application techniques, avoiding problems through good environmental practices and industry self-regulation and accreditation.

METAL FINISHING INDUSTRY POLLUTION PREVENTION PROJECT

MOU, 1993; RENEWED IN 1995.

Environment Canada, MOE, Canadian Association of Metal Finishers, American Electro-platers and Surface Finishers Society, Metal Finishers Suppliers Association. Seventeen participating companies, not all signed the MOU.

The agreement has expired, but MOE expects that a proposed Addendum to the Agreement will be posted on the Registry in the spring of 1998. The ministry expects that the renewal would be until 2000.

Design features of the program

At this point, the project has involved assistance in pollution prevention planning, the production of educational materials, and the reporting of case studies.

Selected results to date

Reductions:

- Three progress reports were issued prior to October 1996 (First Progress Report, June 1994; Second Progress Report, April 1995; Third Progress Report, September 1996).
- The Fourth Progress Report was issued in September 1997 and identifies nine new case studies and 1,664 tonnes of waste reduced or eliminated.

PRINTING AND GRAPHICS SECTOR POLLUTION PREVENTION PROJECT

MOU, 1994.

MOE, Environment Canada, Ontario Printing and Imaging Association, Printing Equipment Supply Dealers Association. Fifteen participating companies, including some of the largest in this industry (Kodak Canada, Quebecor Printing Canada, Kwik Copy Printing, Davis & Henderson, Du Pont Canada).

The agreement has expired, but MOE expects that a proposed Addendum to the Agreement will be posted on the Registry in the spring of 1998. The ministry expects that the renewal would be until 2000.

Design features of the program

The agreement is described in an MOE publication as "a joint pollution prevention planning agreement that [targets] toxic substances and wastes."

The approaches are similar to those in other MOU's with a planning focus, involving the distribution of general information related to pollution prevention and the development of industry-specific guides to best practices. Reduction actions are, of course, at the discretion of the companies involved.

Selected results to date

1994-1996:

- Prior to the signing of the MOU, a clean technology committee was formed to inventory the chemicals used and wastes generated in the industry.
- Another committee developed materials about pollution prevention for the sector.
- Training workshops explaining pollution prevention and clean technologies were held. A progress report was released in 1996.

Reductions:

- The First Progress Report was issued in April 1996. There were 23 facilities undertaking pollution prevention projects, and two had already reported some results - a reduction of 52 tonnes in the use of isopropyl alcohol and other solvents.
- The Second Progress Report was issued in October 1997 and identifies seven new case studies and 360 tonnes of waste reduced or eliminated.

Appendix G: Applications for Reviews and Investigations

REVIEWS

R0003-R0231, R0233-241:

Interim Ontario Drinking Water Objective (ODWO) for Tritium (MOE)

Application

The applicants were concerned about MOE's decision to establish an interim ODWO for the level of tritium in drinking water at 7000 Bq/L. The Advisory Committee on Environmental Standards recommended that tritium levels be set at 100 Bq/L and reduced to 20 Bq/L over the next five years.

Ministry Action

MOE decided to conduct a review (April 4/95) with expected completion within 8 to 10 months. On Feb. 23, 1996, page 40 of MOE's report to ECO stated that the review "cannot be completed until a related review is completed at the federal level. This federal review has been delayed until mid-1996, which is beyond the original estimate, due to the complexity of the issue." A chart on p. 41 of the same report states that the outcome is expected "4th quarter 1996."

MOE's report to the ECO in February 1997 stated that the federal review is actively underway but completion was delayed until late spring 1997. Ministry staff indicated in July 1997 that the review would be complete by September 1997. A letter from the minister in August 1997 does not commit to any completion date due to delays in the federal review.

ECO Comment

The ECO finds the 3-year delay by MOE in this review unacceptable and in a letter to the minister, proposed that the ministry consider an interim standard (similar to its action in respect of inhalable particulates) pending the outcome of the federal review. It is inconsistent with the intent of the EBR for the nearly 500 applicants to remain without a resolution of this issue for such a long period of time.

R0266: Review of regulations for refillable containers for carbonated soft drinks (MOE)

Application

The applicants wanted Reg 340 (container regulation) and s. 3 of Reg 357 (refillable containers for soft drinks) under the *EPA* to be replaced with policies that promote effective multi-material recycling programs and packaging stewardship in general. The applicants felt that the refillable quota regulation treats the soft drink industry unfairly, and that the regulations damage the environment through negative impacts on solid waste diversion and energy use.

Ministry Action

MOE agreed to review Regs 340 and 357 in the broader context of over all program streamlining and planned to report its decision by early 1997. As followup to I0002 (a related application), the ECO inquired (March 27/96) whether the ministry has received industry reports on use of refillables. The ministry responded April 22/96 that the industry has been experiencing delays in completing their reports, and that ministry staff would be meeting with the Canadian Soft Drink Association at the end of April/96. They also noted that the soft drink regulations are being reviewed as part of the overall MOE regulation review exercise and that it is too early to say what direction will be taken. MOE's Feb/97 report to the ECO (p. 13) indicates that final proposed changes will be posted on the Registry.

In November 1997, the MOE released its response to public comments on its July 1996 proposals for regulatory reform, indicating that the MOE intends to delay any further action on this issue until after April 1998.

In its 1997 report prepared for my office, MOE states that the ministry has been seeking stakeholder views on alternate approaches for promoting refillable containers through its consultations as part of the MOE regulatory reform exercise. In addition, MOE states that it has referred the related issue of funding the Blue Box system and clarifying roles and responsibilities in the province's solid waste management system to the Recycling Council of Ontario (RCO). The RCO, in turn, "has assembled a broad range of stakeholders to develop options to address product stewardship issues, specifically to address the sustainability of the Blue Box program." The ministry states it will "consider the RCO's recommendation with respect to this issue."

The ECO has made recommendations on refillable regulations in both Annual Reports.

ECO Comment

The ECO finds the delay in completing this review unacceptable. The applicants are entitled to a response within a reasonable length of time. This review will not be complete until at least three years after the application was submitted.

R0334: Classification of chromium-containing materials as hazardous waste (MOE)

Application

The applicants requested that Regulation 347 under the *EPA* be reviewed. Under the current regulation, a waste is considered toxic if the total chromium extracted from it during a leachate test exceeds 5 mg/L. The applicants said the legislation should differentiate between toxic and non-toxic forms of chromium. Treating a non-toxic material as hazardous places an unnecessary economic burden on industry.

Ministry Action

MOE decided in 1996 to conduct a review.

Communication with MOE at the end of December 1997 has determined the following:

Proposed changes to a federal Transport Canada regulation will deal with this issue. MOE indicates that in the interests of federal/provincial harmonization work, and to avoid duplication of effort, it is waiting for the federal regulation to be finalized before doing its own review. MOE does not anticipate that the federal work will be complete before early 1998.

ECO Comment

The ECO finds the delay in completing this review unreasonable. The applicants are entitled to a response within a reasonable length of time. This review will not be complete until at least two years after the application was submitted.

R96012: Downgrading of Areas of Natural and Scientific Interest (MNR)

Application

This review involved a privately owned portion of the Dobbinton Esker, a ridge-shaped hill in Bruce County, that had been designated as a provincially significant Area of Natural and Scientific Interest (ANSI). Under MNR policies, this designation had provided some protection from aggregate development. In 1996 portions of the Dobbinton Esker were redesignated as a regionally significant ANSI, and an aggregate licence was issued to allow extraction from this part of the esker.

The applicants requested a review of MNR's guidelines pertaining to Areas of Natural and Scientific Interest (ANSIs). They said the ministry is downgrading and eliminating these areas in an ad hoc manner without clear criteria.

Ministry Action

The ministry denied the application, noting that additional studies and new information sometimes result in modifications to ANSI boundaries and in changes to their status. This was the case with the Dobbinton Esker, where a more detailed study recommended downgrading parts of the esker to regional significance. MNR notes that all ANSI studies are guided by the ministry's earth science framework, which contains criteria for evaluating ANSIs.

ECO Comment

The ministry's rationale is not valid. MNR itself, in a 1997 document titled "Nature's Best," admits that procedures and criteria for identifying and protecting ANSI values are unclear and have caused confusion. MNR should have taken on this review in order to clarify its policies surrounding ANSIs, specifically the criteria used to evaluate ANSIs and their application.

MNR currently has draft confirmation procedures for ANSIs that contain valuable procedures such as peer reviews, which do not appear to have been followed in this case. In addition, criteria such as educational value do not appear to have been considered in this case.

Based on my review, it appears that MNR does not have clear criteria for designating or changing the status of ANSIs. MNR should finalize its draft confirmation procedures, develop standard ANSI evaluation criteria and post them on the Registry for comment. Redesignations of individual ANSIs, and any change in the ANSI program, should be posted on the Registry. This could alleviate concerns by the public that decisions regarding ANSIs are being taken in an ad hoc manner.

R96013: Adverse health effects from flare gases (MOE)

Application

The applicants said they and their livestock are suffering adverse effects from flare gases from a heavy water plant for the nuclear industry. They requested the certificate of approval (C of A) for the hydrogen flare system be amended to include additional conditions related to monitoring and operating procedures that take account of a meteorological condition known as TIBL - thermal internal boundary layer. MOE has previously requested that these additional conditions be complied with, but has not amended the C of A accordingly.

Ministry Action

MOE provides two reasons for denying the investigation, namely :

- insignificant effect on the environment. There was only one confirmed incident, caused by equipment malfunction, and this was reported to the ministry two hours after the onset of the incident.

There is no evidence of damage to animals or vegetation due to sulphur gases emitted by planned flaring.

- the issue has been the subject of review over the past five years.

Planned flaring is part of the Plant Process Manual, which includes consideration of meteorological conditions during planned flaring.

ECO Comment

The applicants' request to have the consideration of meteorological conditions (occurrence of a TIBL) included in the C of A controlling planned flaring was valid. The ministry did not provide a reason why the C of A should not include such a condition, which would be consistent with the precautionary principle (in the SEV) and which would emphasize a commitment to environmental protection.

MOE provided the following additional rationale in response to a follow-up inquiry by the ECO:

- The TIBL is difficult to define.
- Such a condition is not included in other C of As therefore Hydro is likely to appeal and reasonably claim that it is too restrictive and unfair.
- The link to the TIBL is not proven and incidents are extremely rare.

Although MOE's decision not to conduct the review was valid, the ministry should have provided clearer, more detailed reasons to the applicants.

R97001: Alleged Certificate of Approval violation by Irondale Landfill (MOE)

Application

The applicants were opposed to the Township of Snowdon's plan to put automobile shredder fluff in the municipal landfill (Irondale). The action was permitted by a certificate of approval (C of A) amendment which had been posted on the Environmental Registry but received no comments. The applicants requested a review of Reg. 347 of the EPA, which is the general waste management regulation, and raised a number of concerns regarding the operation of the landfill.

Ministry Action

The ministry accepted the review but actually did a site inspection instead. MOE prepared a report and made certain commitments. The site inspection in April 1997, revealed a number of operating deficiencies. The township was ordered to correct the problems and MOE committed to inspect the site again in late summer 1997, and to continue monitoring the site before updating the C of A to include an Operations and Development Plan.

In addition, one of the applicants applied for an investigation (I97003) separate from the site inspection conducted in April 1997.

ECO Comment

Rather than review Reg. 347, the ministry performed investigation activities related to the landfill which dovetail with work done on Application for Investigation I97003.

To the ministry's credit, it has fulfilled the commitments made in its report. The inspection promised for summer 1997 was done as part of the I97003 investigation. Follow-up monitoring of the operation of the site is being done at a level in excess of MOE's normal procedures.

The municipality has embarked on broad public consultation during winter 1998, including an open house in January, on the proposed changes to the C of A. Following these activities, the proposal for a revised C of A will be posted on the Environmental Registry.

**R97002: Need for a Watershed Management Plan,
Barnumhouse Creek, Haldimand Twp. (MNR)**

Application

The applicants state that during the construction of Highway 401, a serious washout occurred affecting private property. In order to remedy the problem the Ministry of Highways (now MTO) created a new drainage pattern through the applicant's property causing serious erosion. In the past two years the problem has been exacerbated by the construction of the Northumberland County Materials Recovery Facility (MRF). The applicants asked for a review of the need for a watershed management plan.

Ministry Action

The ministry denied the review stating that "the matters sought to be reviewed are available through an existing planning process that can be initiated by a municipality or a Conservation Authority"

In an update, MNR said that the ministry "provides funding, on a priority basis for: flood control; erosion control; flood forecasting and warning; ice management; and watershed planning."

ECO Comment

This application highlights the problems that can occur when specific responsibilities for watershed management are unclear. In 1993, MOE and MNR envisioned a multi-agency consultative approach as reflected in their co-authored discussion paper "Watershed Management on a Watershed Basis: Implementing an Ecosystem Approach." This document promoted water management and planning on a watershed basis with MOE and MNR providing technical guidance. Both ministries indicate in their Statements of Environmental Values that they have adopted an ecosystem approach to resource management and environmental protection, and they continue to provide policy support and some funding to Conservation Authorities.

In recent years, however, ministries have substantially cut their share of Conservation Authority funding from 33% to 5%. Ministries are funding only the CA's flood control activities and protection of provincially significant lands. An Evaluation of Watershed Management in Ontario, Final Report, 1997, states "As of 1997 [transfer payments to the Conservation Authorities] will not be available for watershed, or subwatershed planning projects." This means that the Authorities' financial ability to undertake other activities such as erosion control, watershed management planning etc. is limited. While the ministries' response to this application is technically accurate, it may not be a realistic approach for the applicants, given the increasingly limited ability of these Authorities to undertake watershed management activities.

**R97003: Need for a Watershed Management Plan,
Barnumhouse Creek, Haldimand Twp. (MOE)**

Application

The applicants state that during the construction of Highway 40, a serious washout occurred affecting private property. In order to remedy the problem, the Ministry of Highways (now MTO) created a new drainage pattern through the applicant's property causing serious erosion. In the past two years, the problem has been exacerbated by the construction of the Northumberland County Materials Recovery Facility (MRF). The applicants asked for a review of the need for a watershed management plan.

Ministry Action

MOE denied the application on the basis that this is a municipal responsibility.

MOE indicated that if it were to undertake studies related to land use change and stormwater drainage for development on the lands in question, these efforts would duplicate those of the municipality and would be at variance with the policies contained in the Provincial Policy Statement under the *Planning Act*.

ECO Comment

MOE's 1997 business plan states "... we will reach out more to companies and communities that can benefit from our extensive expertise in environmental management. This includes, for instance, providing guidance on watershed plans as a way to conserve water."

Follow up work on this application revealed that the relevant agencies (which include MOE, MNR, MTO and the regional municipality and local Conservation Authority) have met on this problem a number of times but have thus far been unable to develop and implement a satisfactory solution. The local Conservation Authority is presently looking at specific measures to assist the applicants, but can at this time only afford to provide consulting support to the applicants and other agencies (see R97002 for a fuller description of this issue).

**R97004: Review of Reg.347 - Waste Derived Fuel Sites
(MOE)**

Application

The application concerned emissions from the burning of waste oil in small space heaters. The application seeks the review of the section of Regulation 347 that permits waste oil to be burned in small space heaters on the basis that:

- it violates the ministry's SEV.
- the policy objectives of Regulation 347 are not being met.
- an environmentally superior option is available (re-refining the oil instead of burning it).
- the majority of waste-derived fuel sites are in the Windsor-Quebec corridor, which has serious air quality problems.

Ministry Action

The ministry denied this application on the basis that the waste-derived fuel site requirements are currently under review as part of the regulatory reform initiative of the ministry, and that all of the stated issues are included in the review. The ministry further states that, depending on the outcome of the review, a unique set of requirements may be developed for burning used oil in small space heaters.

ECO Comment

The ECO will review changes made as a part of the regulatory review process.

R97005: Review of an existing policy and of the need for a new policy, act or regulation to protect the Lynde Shores Marsh Ecosystem, Whitby (MOE)

Application

The applicants are concerned about damage to the Lynde Shores Marsh ecosystem (a Class 1 wetland on Lake Ontario) from a housing development being developed in close proximity to the marsh. The Minister of the Environment exempted the housing development from a full environmental assessment on the condition that an Environmental Management Plan (EMP) for the project be developed to ensure that environmentally significant areas are maintained or improved and that negative impacts are prevented. Although the minister approved an EMP in 1991, the applicants argued that the plan does not satisfy the terms of the exemption because it explicitly permits negative environmental impacts. The applicants therefore requested a review of the EMP on the basis that it is an existing policy.

The applicants also requested a review of the need for a new policy, act or regulation that protects the Lynde Shores Marsh ecosystem. Some options for a new policy, act or regulation include:

- the province acquiring the marsh lands including a buffer around the marsh.
- creation of a legislated no-development area including the marsh and a buffer area.
- a land swap between the province and owners of undeveloped lands around the marsh.

Ministry Action

MOE decided not to conduct a review. The ministry notes that the Environmental Management Plan is not a policy (as was categorized in the application). MOE claims that it is an instrument, and since it is not a classified instrument, it is not open for review under the *EBR*.

The ministry also cites a number of reasons why it decided not to review the need for a new policy, act or regulation to protect the marsh ecosystem: the decision-making that led to the approval of development in the area followed the processes of the day; participants in the decision-making had due regard for the well being of the marsh; and other agencies can be utilized to ensure that implementation of the EMP takes place. The ministry also notes that there are other activities currently under way that may assist in resolving the matter (the "activities" are not specified), and that an *EBR* review may duplicate the time, cost and resources to carry out these activities.

ECO Comment

Although MOE denied this application on the grounds that the public interest did not warrant a review, two weeks later the Minister of the Environment appointed David Crombie, Chair of the Waterfront Regeneration Trust, to examine possible options for protecting the marsh. MOE contradicted itself in this instance, arguing on the one hand that a review was not necessary, yet shortly afterward appointing someone to review the issue. MOE should ensure that its responses to *EBR* applications accurately reflect the ministry's ultimate response to an issue.

The application contained substantial evidence that environmental harm would occur if the review were not undertaken. MOE did not address this evidence in its response, and should have done so. Similarly the applicants argued that allowing development close to the marsh would be at odds with MOE's SEV. MOE should have responded to these concerns, and demonstrated how its SEV was considered in deciding that the public interest did not warrant a review.

Although MOE officially denied this application, the ministry has taken some action which may result in some of the applicants' concerns being addressed.

R97006: Review the need for a new policy to protect the Lynde Shores Marsh Ecosystem, Whitby (MNR)

Application

The applicants were concerned about damage to the Lynde Shores Marsh ecosystem (a Class 1 wetland on the shore of Lake Ontario) from a housing development being developed in close proximity to the marsh. They requested a review of the need for a new policy, act or regulation that protects the Lynde Marsh ecosystem. Some options for a new policy act or regulation include:

- the province acquiring the lands including a buffer around the marsh.
- creation of a legislated no-development area including the marsh and a buffer area.
- a land swap between the province and owners of undeveloped lands around the marsh.

Ministry Action

MNR decided not to review. MNR cites the following as reasons why the public interest does not warrant a review:

- The decisions related to the marsh were made within the context of an established, open municipal planning process.
- Committees have been established to ensure that the Environmental Management Plan (EMP) is implemented.
- A private member's bill that calls for measures to protect Lynde Marsh received first reading in August 1997.
- The provincial policy governing wetlands protection (the Provincial Policy Statement), released in May 1996, was developed with substantial public consultation, and is scheduled to be reviewed by the year 2001.

ECO Comment

MNR's reasons for denying the application were weak. For example, the ministry cited the existence of a monitoring committee designed to oversee implementation of the EMP as a reason to deny the review. This is a poor argument, as the applicants clearly felt that the EMP itself was inadequate, so implementation of it would not address their concerns.

The application contained substantial evidence that environmental harm would occur if the review were not undertaken. MNR did not address this evidence in its response, and should have done so. Similarly, the applicants argued that allowing development close to the marsh would be at odds with MNR's SEV. MNR should have responded to these concerns, and demonstrated how the SEV was considered in deciding that the public interest did not warrant a review.

R97007: Review of an existing policy and the need for a new policy related to noise restrictions on motor vehicle race tracks (MOE)

Application

The applicants requested a review of an existing policy as follows:

- The stated policy of MOE to require race tracks to obtain certificates of approval for noise under the *Environmental Protection Act*.
- The actual policy of the MOE not to enforce this requirement consistently among all race tracks and race events.
- The lack of realistic noise guidelines that would permit motor vehicle racing to operate lawfully in Ontario.

The applicants also requested a review of the need for a new policy that would apply clear rules regarding noise consistently among all race car facilities and other hospitality facilities such as bandstands, rock concerts, and fireworks displays.

Ministry Action

The review was denied on the basis that:

- The requirement for a certificate of approval for racetracks is the law as contained in s. 9 of the *Environmental Protection Act*. If the applicants believe that racetracks should be exempt from the requirement of s. 9 they should make an application for review under the *EBR* requesting a review for the need for a new regulation exempting racetracks from s. 9. without such a regulation the ministry does not have the authority to exempt sources of contaminants from s. 9.
- The requirement applies to all racetracks and is enforced at all racetracks in accordance with the ministry's "compliance policy."
- The existing noise guidelines are now being revised by MOE based on "available state of the art technical information." The ministry looks at each racetrack proposal on its merits and may allow a deviation from noise guidelines in view of proposed mitigative measures and the views of nearby residents and the local municipality in relation to the proposal.
- There are already clear rules that apply to motor vehicle racing and other hospitality industries as prescribed by s. 9; there are no exceptions. The principle applied here is adverse effect.

ECO Comment

The MOE denial was reasonable but the rationale provided to the applicants was complex and difficult to understand.

The suggestion by MOE that the applicants make a further application for review under the *EBR* requesting a review of the need for a new regulation to exempt racetracks from *EPA* s. 9 is not helpful. The attitude of MOE towards this application for review provides no indication that a further application for review would succeed.

R97008: Review of the Lands for Life planning process and of the need for a new policy to correct the shortcomings of the Lands for Life process (MNR)

Application

The applicants are requesting a review of MNR's policy initiative to create a comprehensive plan for 46 million hectares of Ontario's Crown land resources (the "Lands for Life" planning process). The applicants argue that the public is not adequately represented by the Round Tables (who are to develop recommendations on land use); there are no specific guidelines or policies for how the Round Tables are to arrive at their recommendations; and there is no clear process for involving the public at large. The applicants are also requesting a review of the need for a new policy to correct the problems in the existing process (as outlined above).

Ministry Action

MNR decided not to conduct a review of the existing policy, as it was developed during the past five years with opportunities for public consultation. MNR cites the following as reasons for not conducting a review of the need for a new policy:

- The current Lands for Life process will not result in harm to the environment.
- The Round Tables are balanced in terms of representation of interest.
- Since the application was submitted, MNR has issued guidelines to the decision making process.
- The guidelines noted above outline substantial requirements for public participation. Since the application was submitted four, public meetings have been held for members of the public in southern Ontario, and MNR has established an Internet Web site containing information on the Lands for Life process.

ECO Comment

Some of the applicants' concerns have been addressed by actions taken by the ministry since the time the application was submitted. Although other concerns have not been addressed, the ministry provided adequate reasons for not conducting a review to address these concerns. The ministry's response to the application was thorough and well-organized.

The decision whether or not to conduct a review was inappropriately assigned to the person in the ministry responsible for the Lands for Life program. In order to avoid the perception of bias, MNR should have assigned this decision to someone free from any direct interest in the subject matter outlined in the application.

MNR has told the ECO that it is "reviewing its review procedures."

R97009: Review of Certificates of Approval (Cs of A) for Ontario Hydro fossil stations for caps on heavy metals and particulates (MOE)

Application

The applicants requested that MOE review whether the certificates of approval for Ontario Hydro fossil-fuelled electric generating stations should be amended to include legally enforceable emissions caps for mercury carcinogens (arsenic, beryllium, cadmium, chromium and lead) and particulates. The generating stations included in the application were Atikokan, Lakeview, Lambton, Lennox, Nanticoke, Thunder Bay. The applicants noted that under the Canada-Ontario Agreement respecting the Great Lakes Ecosystem 1994, Ontario and Canada agreed to seek a 90% reduction in the use, generation or release of mercury by the year 2000. However emissions of mercury from Hydro plants are

expected to increase by 70% in 1998, as a result of greater reliance on fossil fuel for generating power. Emissions of the other pollutants of concern to the applicants are also expected to increase substantially in 1998.

Ministry Action

The ministry decided not to conduct the review since the stations currently meet the existing regulated limits for the pollutants of concern. The ministry notes that the maximum point of impingement (POI) concentrations of arsenic, cadmium, beryllium, chromium, particulate matter and lead are well below their allowable limits, and will remain below the limits even with the increased emissions in 1998. MOE notes that it is in the process of reviewing Reg. 346 to update the dispersion modelling used to determine the POI concentration of an air contaminant. In addition MOE has a Three-Year Plan for updating existing and developing new environmental standards, under which cadmium, arsenic, chromium and particulate matter are among priority substances for standard development. Finally, MOE indicates that it is concerned about the impacts of mercury and is working with the federal government and the other provinces to develop a Canada-wide standard for mercury. Related to this initiative, MOE has committed to a Mercury Action Plan, and intends to work with all mercury emitters in the province, including Ontario Hydro, to develop strategies to reduce mercury emissions.

ECO Comment

Although the ministry is correct in stating that the projected future emissions from the stations are expected to remain below the legal POI concentrations, MOE did not address the need for legally binding emission caps to be added to the Cs of A to force Hydro to reduce its emissions further, as requested by the applicants. The ministry stated that there was no potential for environmental harm if the review were not undertaken, because the plants would continue to operate below current emissions limits, yet the ministry itself has acknowledged that its existing limits are outdated. To its credit MOE is undertaking initiatives to attempt to address on a province-wide basis some of the pollutants of concern to the applicants. However it is not clear whether the new standards they are developing, and changes to the dispersion modelling in Reg. 346, will result in any changes to Hydro's Cs of A and its allowable emission levels. MOE did not explain this to the applicants.

MOE has not explained what progress it is making toward the target of 90% reduction of mercury by 2000, and what effect the increased emissions from Hydro will have on its progress. This information would have been helpful to the applicants.

R97010: Review of MNR's decision to withdraw from the administration and enforcement of section 35 of the federal Fisheries Act (MNR)

Application

The applicants are requesting a review of MNR's decision to withdraw from reviewing and authorizing works and undertakings that may harmfully alter fish habitat under s. 35 of the federal *Fisheries Act*, and to return this responsibility to Department of Fisheries and Oceans (DFO). The applicants note that MNR, in withdrawing from the activities outlined above, is jettisoning an important mechanism for the protection of fish habitat. They note that DFO could not possibly assume these duties in the short notice provided by MNR (30 days). They also note that this decision is contrary to the ministry's SEV, including the section of the SEV that states that people "must have a real voice in the decisions affecting their lives." (Note: MNR posted its decision to withdraw from these responsibilities on the Registry on August 18, 1997, with no opportunity for public comment).

Ministry Action

Not yet decided

ECO Comment

The ECO will review this application in 1998.

R97011: Review of guidelines and procedures under the Ontario Water Resources Act (OWRA) as they pertain to the continuous chlorination of a town's potable water (MOE)

Application

The applicants are requesting a review of MOE's guidelines and procedures under the *OWRA* that require the continuous chlorination of a town's drinking water. These guidelines require that all municipal water supplies be disinfected, even if the source of water is free of contaminants, because contaminants can enter water supplies through various pathways, including leaking or broken sewer lines. The applicants note that scientific studies have shown that exposure to chlorine and chlorinated compounds can be linked to increased numbers of certain cancers. They also note that 71% of town residents who voted in the November 1997 municipal election were not in favour of continuous chlorination.

Ministry Action

MOE decided in February 1998 not to conduct a review.

ECO Comment

The ECO will review this application in 1998.

INVESTIGATIONS

196005: Alleged contravention of s. 14 of the EPA and s. 30 of the OWRA, by runoff from a closed iron ore mine (MOE)

Application

The applicants alleged that a closed iron ore mine in Temagami continues to discharge contaminants (primarily heavy metals) into the environment, impairing surface and groundwater and fish habitat.

Ministry Action

The investigation was done by the Investigations and Enforcement Branch (IEB) of MOE, which took water samples and tested them for heavy metals, pH and conductivity. The IEB concluded that the concentration of contaminants was within the guidelines set out in the mine closure plan finalized in 1995, and that the water quality had improved over time. The ministry decided that no further action was required.

The applicants had serious concerns about the way the ministry handled the investigation and stated that the investigation was "inadequate" for the following reasons:

- MOE failed to use information available to the government (e.g. MNM data, including 1995 and 1996 monitoring data).
- MOE failed to respond to concerns raised by the applicants or to produce documents requested by the applicants.
- MOE's investigation was based on one day's worth of sampling, and did not account for changes in flow rates or natural variability in discharge rates.
- MOE relied on numerical guidelines and standards rather than on the presence of "adverse effects."

ECO Comment

The ECO reviewed the applicants' concerns about the handling of this investigation and found that the ministry met, and in some respects exceeded all requirements of the EBR. It is commendable that the ministry assigned this application to the Investigations and Enforcement Branch, which sampled and tested water quality, and provided a detailed report to the applicants and the ECO.

The applicants have unresolved concerns about the adequacy of the mine closure plan to protect the environment. In the future mine, closure plans will be prescribed instruments of MNM under the *Mining Act* for the purposes of the EBR. This means that the public will have an opportunity to comment on proposed mine closure plans posted by the MNM on the Environmental Registry, and two Ontario residents will have the right to request reviews of existing mine closure plans if they have evidence of the need for a revised or new plan, or to request investigations if they believe that companies are violating terms of those plans.

This particular mine closure plan does include provisions for monitoring to ensure that the environment is adequately protected.

(See 196011) 196010: Alleged dewatering of a stone quarry in contravention of the terms and conditions of the permit to take water (MOE)

Application

The applicants alleged that an aggregate company's dewatering of a stone quarry adjacent to their farm in Dunnville was interfering with the water level in the local aquifer. They alleged that the company took water without a permit, failed to submit a water management plan, failed to submit reports to MOE when changes were made to the dewatering operation, and failed to monitor water levels as required in the terms and conditions of its permit to take water issued under the *Ontario Water Resources Act* (OWRA).

Ministry Action

MOE investigated.

Because of the two-year limitation period for prosecuting offences under the OWRA, MOE investigated only those allegations of contraventions occurring in 1995 and 1996. MOE determined that although the company took water without a valid permit during part of this period, this was because MOE had not assigned a high priority to a permit renewal application submitted by the company, and the permit was allowed to expire. MOE did not want to prosecute the company for taking water without a permit because at that time the ministry was reviewing the company's application for permit renewal. IEB also determined that the company had violated some of the conditions of the permit during 1995 and 1996. MOE maintains that it had already taken action to bring the company into compliance, and will continue to monitor the company's compliance record.

ECO Comment

The MOE investigation was thorough and impartial, and considered the applicants' concerns beyond the specific allegations set out in the application. They are to be commended for this and for having the Investigations and Enforcement Branch undertake the investigation.

However the information provided by the applicants and MOE report indicated a long history of complaints against the company. Although the ministry may have been justified in not undertaking further enforcement activity at the time of the EBR investigation, its findings indicate that MOE has not strictly enforced the terms and conditions of permits issued to the company.

196011: Alleged contravention of the federal Fisheries Act, by runoff from a closed iron ore mine (MNR)

Application

The applicants claimed that a closed iron ore mine in Temagami continues to discharge contaminants (primarily heavy metals) into the environment, impairing surface and groundwater and fish habitat.

Ministry Action

MNR did the investigation and concluded that they don't think that s. 36(3) of the *Fisheries Act* was contravened, solely because sampled effluent has not exceeded the levels of contaminants allowed in the mine closure plan. MNR stated that it has confidence in the ability of the mine closure plan approved in 1995 to protect the environment, and further that the conditions of the closure plan were deemed acceptable to protect fish habitat. As a result, MNR's investigation file was closed.

The applicants believe that "the course of action taken by MNR does not constitute a reasonable investigation of compliance with the *Fisheries Act* for the purposes of the *Environmental Bill of Rights*. In the opinion of the applicants, failing to conduct a timely and independent investigation constitutes a breach of the EBR."

ECO Comment

MNR closed the investigation file prematurely, based on information from MNDM and the results of MOE's investigation (I96005). MNR should have carried out its own investigation, over and above MOE's water quality testing, to determine whether the *Fisheries Act* was contravened. The mine closure plan, agreed to in 1995 by five ministries including MNR, includes requirements for not only water quality monitoring, but also for benthic and fisheries studies to demonstrate that aquatic communities have been maintained.

It was inappropriate for MNR to rely on MOE's water quality analyses to conclude that no infractions of the federal *Fisheries Act* had occurred, and to rely on the Provincial Water Quality Objective as sufficient to protect fish habitat under the deleterious substances section of the federal *Fisheries Act*, when the mine closure plan itself commits MNR to conducting fisheries studies to determine whether aquatic communities have been maintained at current levels or better. Moreover, the *Fisheries Act* does not allow the dilution of effluent in mixing zones at the point of discharge, even though this is permitted under the *EPA* by MOE.

While not a "breach" of the EBR as suggested by the applicants, this was an inappropriate use of the ministerial discretion afforded by ss. 77(1) of the EBR.

MNR did not meet the timelines required by ss. 79(1) of the EBR. From the time MNR received the application from the ECO, the ministry took more than 120 days to notify the applicants that an investigation would be conducted, and approximately 8 months to notify the applicants of the results of their investigation – that, in essence, an investigation was not warranted and would not be conducted.

I96012: Alleged contraventions of the *Public Lands Act* (PLA) and the *Lakes and Rivers Improvement Act* (LRIA) by proposing to permit development of a campground (MNR)

Application

The allegations are related to the ministry's proposal to issue a land use permit for a private campground on Crown land on Munro Lake in the District of Cochrane.

Ministry Action

MNR decided not to investigate because the alleged contraventions were "not serious enough to warrant an investigation" and are "not likely to cause harm to the environment." MNR reviewed the sections of the *PLA* identified by the applicants, and determined that no violation of the act had occurred.

ECO Comment

MNR's reasons for not investigating are valid. MNR's rationale was thorough. Although an actual investigation was not conducted, MNR did examine each section of the *PLA* that the applicants felt was being contravened, and determined that no contraventions had occurred.

I96013: Alleged contraventions of the *EPA* by proposing to permit development of a campground (MOE)

Application

The allegations related to the MNR's proposal to issue a land use permit for a private campground on Crown land on Munro Lake in the District of Cochrane.

Ministry Action

MOE decided not to investigate because, based on the information provided, an offence or violation of the *EPA* has not occurred. The ministry notes that the proponent has not yet applied for approval and has not commenced with the implementation of the proposal.

ECO Comment

The reasons provided by MOE for not investigating are valid. Since a permit had not yet been issued or applied for, and activity at the site had not been implemented, no contravention of the *EPA* could have occurred.

I96014: Alleged contraventions of the *LRIA* and the federal *Fisheries Act* by altering a river bank. (MNR)

Application

The applicants alleged that their neighbours straightened a river bank on Morningside Creek, Scarborough, in 1994. This caused increased silting, erosion and flooding on the applicants' property and destroyed fish habitat.

Ministry Action

MNR investigated and concluded that the alteration is in violation of the federal *Fisheries Act*. MNR decided to prosecute for violations of s. 35(1) and s. 36(3) of the federal *Fisheries Act*.

The ministry decided not to proceed for any violations under the *LRIA* because the limitation period for prosecution under the *LRIA* had expired.

ECO Comment

This is an application success story. MNR initiated a prosecution under the federal *Fisheries Act* and withdrew the charges after the accused agreed to rehabilitate the stream back to its original condition. The stream was rehabilitated, and other matters before the court were withdrawn.

I96015: Alleged contraventions of the *Ontario Water Resources Act* (OWRA) and the *Environmental Protection Act* (EPA) by altering a river bank (MOE)

Application

The applicants alleged that their neighbours straightened a river bank on Morningside Creek, Scarborough, in 1994. This allegedly caused increased silting, erosion and flooding on the applicants' property and destroyed fish habitat.

Ministry Action

MOE denied the investigation because there was no violation of the *EPA* and because MNR was already investigating.

ECO Comment

MOE's reasons for not investigating are valid. Investigation under the *OWRA* would have duplicated MNR's investigation under the federal *Fisheries Act* and the *Lakes and Rivers Improvement Act*. It is commendable that the applicants were invited to contact an MOE employee if they continued to have concerns after MNR's investigation.

196016: Alleged operation of a gravel pit in contravention of the *Aggregate Resources Act* (MNR)

Application

The applicants alleged that MNR accepted an application for a gravel pit licence under the *Aggregate Resources Act* (ARA) that did not initially meet the requirements of the act. They said that the draft site plan failed to show a well and a pond, that it had not been signed by a qualified engineer as required by the ARA, that it claimed incorrectly that a provincially significant area of natural and scientific interest (ANSI) on the site had been downgraded, failed to identify groundwater on the site, and allowed the destruction of a significant natural feature.

The ECO review of the application and associated materials showed the following chronology of events:

November 1993 - A consultant was retained by the proponent to investigate and obtain approvals for a Class A aggregate extraction licence.

May 1994 - A letter from an MNR employee to the consultant indicated an intention by MNR to downgrade the Dobbinton Esker from a provincially significant ANSI to one of regional significance, thus clearing "one hurdle in the application process."

July 1994 - An Application for a Class A licence was made by the proponent.

January 1995 - Draft plans were stamped by a professional engineer.

1996 - Final report was issued by MNR regional geoscientist formally recommending that part of the Dobbinton Esker be downgraded from Provincial to Regional Significance.

Ministry Action

The ministry denied the EBR application on the basis that all ARA requirements were met, that the MNR regional geoscientist had concluded that the Dobbinton Esker ANSI did not warrant its provincially significant status, and that an aggregate operation would not result in the destruction of a significant natural feature. The ministry stated that "after the initial review [of the Class A aggregate extraction licence], a set of plans with the engineer 3 stamp were kept on file." The ministry also indicated that the proponent's application had been the subject of an Ontario Municipal Board hearing, and the Board recommended approval of the licence.

ECO Comment

The ministry's response indicates that the site plan was stamped by a professional engineer after the licence application was originally submitted. The chronology indicates that the plans were unstamped for over 6 months. This practice did not technically meet the requirements of the ARA s. 8 (4), and resulted in an unstamped site plan being examined by the EBR applicants, causing them concern. The EBR applicants thus appear to be correct in their allegation that the draft plans were not stamped by an engineer for several months. This application highlights the conflict between MNR policies to protect ANSIs and the Provincial Policy Statement under the *Planning Act* which requires MNR and municipalities to make aggregate deposits available for extraction. The need for clear policies for the redesignation of ANSIs, noted in related EBR Review Application R96012, is also emphasized in this case.

196017: Alleged approval of activities in contravention of sections of the *Environmental Assessment Act* (MOE)

Application

The applicants alleged that MNR approved construction of a road, clearing of vegetation, construction of parking facilities and construction of a boat ramp without following the public participation procedures set out in MNR's Class EA for Small Scale Projects. The allegations related to access to two lakes in Temagami; Cross Lake and Baie Jeanne (on Lake Temagami).

Ministry Action

MOE decided not to investigate under the EBR as the ministry's Investigation and Enforcement Branch was already investigating the allegations. On April 17, 1997, MOE announced that it had laid charges against MNR with respect to the allegation about construction of an access road to Cross Lake. On Sept. 11, 1997, MNR pleaded guilty to the charges, and on December 11, 1997, the Provincial Court fined MNR \$1,200.

MOE also investigated the allegations relating to the access point at Baie Jeanne. The ministry's investigation report indicates that MNR gave a local group seeking access to the lake verbal approval to do minor clearing to provide parking, but that the group, in addition to brushing, brought in about 10 truckloads of gravel to make a parking area, which exceeded MNR's verbal authorization. Although the actual improvements made at Baie Jeanne in the fall of 1996 may have fallen under the requirements of the EAA, it is doubtful that the work that was approved by MNR (only minor brushing) would fall under EA requirements. As a result MOE decided not to lay charges against MNR.

ECO Comment

MOE's reasons for not conducting an investigation under the EBR were valid. Despite the fact that an investigation under the EBR was not undertaken, the ministry did investigate and laid charges. In the end, the applicants achieved their objective with respect to the Cross Lake allegations.

197001: Alleged contravention of provisions in the *Environmental Assessment Act* (EAA) for public access to environmental assessment review documents (MOE)

Application

The applicants alleged that MOE contravened the EAA by refusing public access to review documents for the Dufferin Landfill Environmental Assessment. The applicants were particularly interested in obtaining individual government technical reviewers' comments. Their request for this information from the Approvals Branch under the *Freedom of Information and Protection of Privacy Act* (FOIPPA) was denied by the MOE FOI Coordinator, and this decision was upheld by the Information and Privacy Commissioner (IPC) following an appeal by the requester.

Ministry Action

MOE decided not to conduct an investigation as there are "no grounds" on which to proceed with an investigation. They note that MOE's Environmental Assessment Branch has maintained a public record file for the EA which contains all information required by the EAA (not including the information that the applicants were requesting). They also note that the MOE FOI Coordinator's decision not to release the individual reviewers' comments was upheld by the IPC.

ECO Comment

MOE's action was upheld by an independent review agency, the Information and Privacy Commissioner under the *FOIPPA*. However, the decision whether or not to investigate should have been assigned to a ministry branch other than the EA Branch, against which the complaint was laid. No fresh perspective was provided.

I97002: Erosion and siltation related to construction of Highway 401 and subsequent activities (MOE)

Application

The applicants state that during the construction of Highway 401 in the 1960s, a serious washout occurred affecting private property. In order to remedy the problem, the Ministry of Highways (now MTO) manufactured a new drainage pattern through the applicant's property causing serious erosion. The applicants maintain that the problem has been exacerbated in the past two years by the construction of the Northumberland County Materials Recovery Facility. The allegations relate to MOE's failure to enforce certificate of approval conditions relating to surface drainage both during and after construction of the facility.

Ministry Action

MOE investigated and stated in the report of its investigation that the conditions pertaining to stormwater in the C of A have been complied with and that there is no evidence that the stormwater detention pond is not in compliance with the certificate of approval. The ministry also stated that the runoff flowed via roadside stormwater drainage systems and that discharges to and impacts from roadside drainage systems are the responsibility of provincial and municipal road authorities and are therefore not subject to the *EBR*. MOE makes the valid point that water drainage systems associated with provincial and municipal roads are not regulated under the *OWRA* and the *EPA*.

ECO Comment

Follow-up work on this application revealed that the relevant agencies (which include MOE, MNR, MTO, and the regional municipality and local Conservation Authority) have met on this problem a number of times but have been unable to develop and implement a satisfactory solution. The local conservation authority is presently looking at specific measures to assist the applicants, but can at this time only afford to provide consulting support to the applicants and other agencies (see R97002).

Due to the multi-jurisdictional nature of the problem, the ministry's approach has the appearance of buck-passing. Indeed, once an investigation was undertaken by the ministry, the issue should have been pursued more fully with the appropriate authorities. The ministries involved are urged to ensure that gaps and overlaps in jurisdiction over watershed management matters do not become a basis for allowing these types of problems to continue unaddressed for many years.

I97003: Alleged EPA violations by Irondale Landfill (MOE)

Application

Applicants allege that Township of Snowdon and Crew Construction & Engineering are improperly managing the municipal landfill in contravention of *EPA* and Reg 347. Applicants also allege that there was insufficient public participation for the amended certificate of approval (C of A) which allowed auto shredder fluff to be put at the site.

Note: automobile shredder fluff is not considered a hazardous substance in Ontario, but applicants did not request a review of whether it should be classified as a hazardous substance.

Ministry Action

The ministry undertook the investigation, which did not support the applicants' allegations. The ministry indicated that the township has applied to amend the C of A for this site to incorporate updated and enhanced design, development, and operation plans, which will be reviewed by MOE staff. A requirement for the completion of a closure plan will be incorporated into any future amendments of the C of A.

The site has ceased receiving any further shredder fluff waste material. MOE has committed to addressing any existing or future concerns regarding this site.

The municipality has embarked on broad public consultation during winter 1998, including an open house in January, on the proposed changes to the C of A. Following these activities, the proposal for a revised C of A will be posted on the Environmental Registry.

ECO Comment

The investigation by the ministry was thorough and is described in detail in the investigation report sent to the applicant. The evidence indicates that the Township of Snowdon has complied with the majority of the conditions of the C of A and is not in violation of the *EPA* (Regulation 347), nor is it causing impairment of the natural environment.

Follow-up monitoring of site operations is being done at a level in excess of MOE's normal procedures.

I97004: Alleged EPA and OWRA violations involving pollutants entering a mutually shared water drain (MOE)

Application

Applicants alleged that Stratford Auto Recycle allows pollutants to enter a storm drain located on their property. The pollutants exceeded provincial limits for oil, grease and heavy metals. The drain leads to the Avon River. Applicants alleged effects on their soil and drinking water.

Ministry Action

The investigation was denied because MOE was already investigating the allegations. MOE has committed to advising the applicants about the results of the existing investigation, and the steps it will be taking to address the pollution problem.

ECO Comment

The ministry decision not to investigate is valid in view of its ongoing investigation. The MOE's district office in the southwestern region has taken effective abatement measures and the facility will be putting in a pollution control device which should prevent and control future contamination from its activities. Future testing will occur. A proposal for the certificate of approval for the pollution control device will be posted on the Environmental Registry.

197006: Alleged EPA and OWRA violations by Ontario Hydro in allowing discharges to Lake Ontario (MOE)

Application

Applicants allege that Ontario Hydro has discharged large quantities of copper and zinc from the Pickering A and B Nuclear Generating Stations into Lake Ontario through erosion of condenser tube walls. It is alleged that Ontario Hydro has not taken any steps to prevent the discharge even though they were aware of it over the past 15 years. Ontario Hydro is also alleged to have failed to report the discharges and to have provided false information to MOE.

Ministry Action

MOE decided to investigate and said that the investigation would be completed by February 28, 1998.

ECO Comment

The ECO will review this application in 1998.

197007: Discharges of contaminants including copper, zinc, tin, arsenic and lead from Pickering, Lakeview, Nanticoke, Lambton and Bruce A power plants into Lake Ontario, Lake Erie and St. Clair River (MNR)

Application

Applicants allege that Ontario Hydro has discharged large quantities of contaminants through the erosion of condenser tube walls. It is alleged that Ontario Hydro has not taken any steps to prevent the discharge, even though they were aware of it over the past 20 years. Ontario Hydro is also alleged to have failed to report the discharges and to have provided false information to MOE.

Ministry Action

MNR decided to investigate and expects to complete the investigation by June 1998.

ECO Comment

The ECO will review this application in 1998.

197008: Discharges of contaminants including copper, zinc, tin, arsenic and lead from Lakeview, Nanticoke, Lambton and Bruce A power plants into Lake Ontario, Lake Erie and St. Clair River. (MOE)

Application

Applicants allege that Ontario Hydro has discharged large quantities of contaminants through the erosion of condenser tube walls. It is alleged that Ontario Hydro has not taken any steps to prevent the discharge, even though they were aware of it over the past 20 years.

Ministry Action

MOE decided to investigate and said that the investigation would be completed by February 28, 1998.

ECO Comment

The ECO will review this application in 1998.

197009: Alleged Fisheries Act violations by Ontario Hydro in allowing copper, zinc and other discharges to Lake Ontario (MNR)

Application

Applicants allege that Ontario Hydro has discharged large quantities of copper and zinc from the Pickering A and B Nuclear Generating Stations into Lake Ontario through erosion of condenser tube walls. It is alleged that Ontario Hydro has not taken any steps to prevent the discharge, even though they were aware of it over the past 15 years. Damage to fisheries is alleged.

Ministry Action

MNR decided to investigate and expects to complete the investigation by June 1998.

ECO Comment

The ECO will review this application in 1998.

197010: Violation of EAA by denying Rocky Bay First Nation opportunities to negotiate options during preparation of a Forest Management Plan (MOE)

Application

Applicants allege that the company and MNR did not meet the requirements of the Class EA for Timber Management during the preparation of a Forest Management Plan (FMP) for the Auden Forest (located east of Lake Nipigon). Condition 77 of the Class EA requires MNR to conduct negotiations with Aboriginal peoples whose communities are situated within a forest management unit, in order to identify and implement ways of achieving a more equal participation by Aboriginal peoples in the benefits provided through forest management planning. Prior to the submission of this EBR application, MOE had refused a request from one of the applicants that the Forest Management Plan be bumped up to a full environmental assessment.

Ministry Action

MOE decided not to conduct an investigation, noting it had investigated the allegations during the bump-up request, and determined that MNR did comply with Condition 77 during the development of the FMP.

ECO Comment

During 1997, some First Nations members have voiced concerns through a number of different means (including this EBR application) that MNR is not complying with condition 77 of the Class EA for Timber Management.

In this case, MOE was justified in not conducting an investigation, as the ministry had previously examined the same issue and determined that the allegation could not be supported. However, MOE should not automatically turn down an EBR application on the grounds that they have considered (or are considering) a bump-up request related to the same undertaking. Only where identical allegations have been made in the bump-up request and have been or are being investigated should the ministry deny an EBR investigation.

This investigation was denied by MOE's EA Branch, the same branch that denied the bump-up request. MOE should consider assigning EBR investigations related to the *Environmental Assessment Act* to a branch other than the EA Branch in order to provide a fresh perspective on the allegations.

197011: Alleged that the City of Timmins contravened the EAA and EPA in planning a road-widening project (MOE)

Application

The applicants allege that the City of Timmins contravened the EAA because it did not meet the requirements of the Class Environmental Assessment for Municipal Road Projects (June 1993) when planning a road-widening project. Specifically the applicants alleged that the environmental study report was contracted out to a company which was in a position of conflict of interest, and that the study was flawed. The applicants also alleged that construction of the road widening and subsequent increase in traffic would contravene several provisions of the EPA causing environmental harm to a residential area by increasing contaminants such as noxious fumes, odours, heat, sound, dust and vibrations.

MOE decided not to conduct an investigation because the minister was currently considering a bump-up request under the EAA. The ministry's response did not address the allegations of contravention of the EPA.

Ministry Action

The ministry's rationale for denying the request for an investigation - that it is currently considering a bump-up request stemming from the same allegations - is invalid in this case. Consideration of a bump-up request looks only at the need for an individual environmental assessment of a project. An investigation would look at whether a proponent has contravened the EAA.

ECO Comment

The ministry's decision report and letter sent to the applicants by the EA Branch did not address the allegation that the EPA had been contravened. This failure to respond to the allegations raised by the applicants is not justified.

197012: Discharges of contaminants including copper, zinc, tin, arsenic and lead from Lakeview, Nanticoke, Lambton and Bruce A power plants into Lake Ontario, Lake Erie and St. Clair River (MOE)

Application

Applicants allege that Ontario Hydro has discharged large quantities of contaminants through the erosion of condenser tube walls. It is alleged that Ontario Hydro has not taken any steps to prevent the discharge, even though they were aware of it over the past 20 years. Violations of the EPA and Ontario Water Resources Act are alleged.

Ministry Action

MOE decided not to investigate because there was an ongoing investigation which would be completed by February 28, 1998.

ECO Comment

The ECO will review this application in 1998.

197013: Discharges of contaminants including copper, zinc, tin, arsenic and lead from Lakeview, Nanticoke, Lambton and Bruce A power plants into Lake Ontario, Lake Erie and St. Clair River (MNR)

Application

Applicants allege that Ontario Hydro has discharged large quantities of contaminants through the erosion of condenser tube walls. It is alleged that Ontario Hydro has not taken any steps to prevent the discharge, even though they were aware of it over the past 20 years. Violation of the federal *Fisheries Act* is alleged.

Ministry Action

MNR decided to investigate and expects to complete the investigation by June, 1998.

ECO Comment

The ECO will review this application in 1998.

197014: Alleged contravention of EPA s.14 due to MOE's slow response to toxic fire in Hamilton, and alleged improper issuance of certificate of approval to company (MOE)

Application

The applicants allege that MOE contravened s. 14 of the EPA through their slow response to a toxic fire at a plastic recycling plant (Plastimet) in Hamilton on July 9, 1997. The applicants allege that ministry officials did not arrive at the fire until 12 hours after it had started. They also allege that the ministry contravened s. 39 of the EPA by issuing a certificate of approval (C of A) to the company, noting that the company was not in compliance with environmental regulations nor with the Fire Code.

Ministry Action

The ministry denied the application. MOE noted that the allegation that the ministry was untimely in its response "cannot support an allegation that the ministry contravened s. 14 of the EPA." The ministry notes that even if a charge under the EPA was possible, that the ministry was not untimely in its response. The ministry also notes that charges cannot be laid under s. 39 of the EPA as this section merely sets out the powers of a MOE director to issue, revoke, etc., a certificate of approval. In addition the ministry does not require C of As for the type of recycling activities that Plastimet was undertaking. The ministry could not be accused of improperly issuing a C of A to Plastimet, as one was never issued.

ECO Comment

MOE's reasons for not investigating are valid, as charges on the ministry could not be laid under either section of the EPA identified by the applicants.

197016: Alleged contravention of EPA s.14 related to a plastic recycler in Amherstburg (MOE)

Application

The applicants allege that s. 14 of the EPA is being violated by a plastics recycling company in Amherstburg. The company is located in a residential area, and the applicants, who are local residents, are concerned about flies, odour, noise, fire and contamination of sewage from process waste from the plant.

Ministry Action

MOE completed its investigation in January 1998.

ECO Comment

The ECO will review this application in 1998.

Appendix H: Ministry Compliance with 1996 Recommendations

I asked the ministries to submit reports to me outlining their progress in implementing the recommendations made in my 1996 Annual Report. I summarize here the ministry responses, along with my comments.

Response to Recommendations on the Environmental Registry

- 2.1 I recommended that ministries maximize the potential of the Environmental Registry to get public feedback by posting proposals early and often. All of the ministries are in agreement with this recommendation. I commend MNR for its multiple postings on forest management plans a fisheries management plan, several park plans and its instrument classification regulation. MOE also continued to provide multiple postings for its proposals related to regulatory review. Some MOE postings should have been posted earlier in the decision-making process such as those for its Drive Clean Program and the Pilot Emission Reduction Trading Project (PERT).
- 2.2 I commend MOE for its commitment of resources to the upgrade of the Environmental Registry. I encourage the ministry to continue technical and administrative support for, and enhancement of, the Registry.

Response to Recommendations on Environmental Decisions

- 3.1 Ministries were asked to assess and summarize the potential environmental effects of proposals and include this information in their Environmental Registry postings. Regulatory Impact Statements (RISs) were recommended for proposed regulations. I received a variety of responses here with some ministries in agreement, some in qualified agreement and others not in agreement.
- MOE has been including RISs in regulatory postings since July 1997. Overall, 22 of MOE's 39 postings included either an RIS or some other description of environmental effects. Less than half of MNR's postings contained a description of environmental effects, and MNR did not include RISs for any of its regulation proposals. All three of MCCR's postings described environmental effects and one included an RIS. MMAH qualified its agreement by citing available resources as a factor to consider. MNDM cited the complexity of the proposal. MTO and OMAFRA did not agree with the recommendation explaining that environmental effects were taken into account in developing the proposal.
- 3.2 Ministries agreed and were committed to the avoidance of jargon and the provision of clear information about the purpose of the proposed decision and the context in which it is being considered. The quality of information in most ministry postings was good, although there were exceptions. For example, MNR's posting for its proposal to designate parts of northern Ontario under the *Aggregate Resources Act (ARA)* fails to explain what designation under the ARA means, why designation for these areas is being proposed, or what the environmental, social and economic effects of designation would be.
- 3.3 All ministries agreed and were committed to including contact name, telephone and fax numbers, and information about where people can review written material. MBS's posting of ministry business plans did not contain contact information or where hard copies could be obtained. Although MTO failed to include contact names or phone numbers in its postings, it was the only ministry to provide information consistently on whether further information was available and where it was located.

- 3.4 Ministries agreed that the public should not be asked to comment on too many proposals all at once, and that ministries should extend comment periods to compensate for overlapping comment periods. During July 1997, MNR posted seven forest management policies with overlapping comment periods. Considering the large numbers of postings, and the fact that they were posted during the busy summer months, MNR should have provided longer comment periods. MOE did provide 45-day comment periods for most of its detailed proposals in the second stage ("Better, Stronger, Clearer") of its regulatory review. However this is likely insufficient considering the volume of proposals being posted.
- 3.5 The ministries agree to consider the complexity of an issue and the level of public interest when deciding on the length of comment periods. They generally did so in 1997.
- 3.6 The ministries agree that decision notices should contain sufficient information, including where people can get a copy of the new policy, act or regulation. However, many of the postings did not indicate where to get a copy of the decision. For example, over half of MNR postings did not include this information.
- 3.7 The ministries do recognize that posting proposals on the Environmental Registry is the minimum legal requirement and do provide additional opportunities for public consultation. MNR has expressed strong commitment to this recommendation by noting that "public involvement is essential to good resources management." The ministry, however, did not pursue opportunities for additional consultation on two proposals that should have had wider exposure: "Ontario's Approach to Wilderness"; and "Conservation Strategy for Old Growth Forest Ecosystems." In most cases, details of non-Registry consultation activities were included in their Registry postings.
- 3.8 The ministries agree with multiple postings of proposals when appropriate. I have already commended MNR for its multiple postings of several proposals in 1997. Another proposal which MNR should have posted more than once was the amendment of the *Game and Fish Act*. OMAFRA should have posted the *Farm Practices Protection Act* once the bill was introduced.
- 3.9 In response to my recommendation that ministries stop using omnibus-style legislation, except for housekeeping matters, most ministries responded that "omnibus legislation is at the discretion of the government." The following 1997 proposals were "omnibus style": *Bill 119, the Red Tape Reduction Act (MNR)*; and the *Services Improvement Act*, which contained amendments to the *Building Code Act (MMAH)* and proposed amendments to the *Health Protection and Promotion Act (MOH)*.
- 3.10 In response to my recommendation that ministries assess, summarize and publicize for comment the anticipated environmental consequences of planned cutbacks and transfer of responsibilities, many ministries responded as follows: "The ministry is not required to seek public input on budgetary activities." There is however wide public concern that cutbacks to environmentally significant programs can and do result in environmental consequences. I urge the ministries to respond to such concerns by examining and publicizing the potential effects. I note that MOE has told me that "a ministry is responsible for consideration of the implications and consequences of budget cutbacks. This is the sole responsibility of the Ministry and falls outside the mandate of the Environmental Commissioner of Ontario."

- 3.11 MOE expressed a general commitment to the goal of strengthening environmental protection for regulatory amendments and, in fact, has made the strengthening of new laws an explicit goal of the second stage of its regulatory reform initiative ("Better, Stronger, Clearer").
- 3.12 I had recommended that MOE provide adequate resources to enforce its regulations and report regularly on enforcement activities. MOE responded that emphasis is on key environmental issues, i.e., those deemed to pose a high risk to the environment. However, it is unclear to me how MOE determines its priorities. The public should have an opportunity to have input into establishing priorities and should have access to regular reports on enforcement activity. I note that MOE has told me that "the Ministry is planning to release shortly a compliance report covering a two year period (1995 and 1996). This report will include information on the number of orders issued, the Provincial Offences Act Tickets, any charges laid and prosecutions (i.e., successful convictions)."
- 3.13 In response to the recommendation that MOE publish a plan for updating certificates of approval to ensure the new standards of the Three-Year-Plan for Standard-Setting are met, MOE responded that "the merits of upgrading all existing certificates of approval to new regulatory standards as they are developed will have to be considered within the context of resource implications to both the certificate holders and the Ministry, and the ensuing environmental benefits."
- 3.14 with regard to my recommendation that MOE conduct audits to ensure that all municipal drinking water supplies undergo adequate routine testing, especially smaller treatment plants and plants with historical compliance problems, the ministry indicated that it is the responsibility of the waterworks owner to ensure that water is monitored. The ministry went on to claim that its "Sewage and Water Inspection Program" (SWIP) and "Drinking Water Surveillance Program" (DWSP) already fulfil these auditing requirements.
- MOE says that SWIP audits taken since 1995 show that approximately 90 per cent of municipal waterworks were voluntarily conforming to Ontario's monitoring standards for drinking water. Ontario has approximately 490 water treatment plants. Of these, 135 were included in the Drinking Water Surveillance Program at the end of 1996. Because many large plants are included among the 135, they represent 85 per cent of the population on municipal drinking water. MOE also says that of the 14 plants in 1996 that were out of compliance with regard to drinking water quality, 13 had been assessed by DWSP by the end of 1997.
- 3.15 I recommended that MOE update its goals regarding acid rain, set clear emission and deposition targets for pollutants that contribute to acid rain, and establish control programs to meet those targets. The ministry indicated that existing emission and deposition targets already protect 85 per cent of acid sensitive lakes; that the annual sulphur dioxide emissions cap has been met and emissions have been below target levels for three years; that Ontario action is of limited value without U.S. actions; and that Ontario participates in the development of a Canada-Wide Acid Rain Strategy. Although I recognize the significant reductions in sulphur dioxide emission that have been achieved, I reiterate the need for further action and will continue to monitor progress toward this recommendation. In fact, a 1997 federal-provincial report, "Toward a National Acid Rain Strategy," says that many lakes in central and eastern Canada will not recover from acid rain unless emissions are curbed by a further 75 per cent.

- 3.16 To my recommendation that MNR establish strengthening environmental protection as an explicit goal for current and future regulatory amendments, the ministry indicated that the explicit direction regarding environmental protection, derived from MNR's objectives and its SEV, guides all MNR decision-making.
- 3.17 In response to my recommendation that MNR provide adequate resources to enforce its regulations, and regularly report on enforcement activities, the ministry provided examples from Aggregate and Forestry Programs to demonstrate that MNR staff and partners are equipped with sufficient training and regulatory tools necessary for effective enforcement.
- 3.18 I recommended that MNR assess and report on the effectiveness of the self-monitoring system with respect to aggregates and forestry management in achieving environmental protection, and make this information available annually. MNR responded that the first annual aggregate resources compliance report will be available by summer 1998, I look forward to an assessment of the effectiveness of the transfer to self-monitoring in that report.
- With respect to forestry management, the Five-year State of the Forest Report has not yet been released. I trust that it will include a report on the effectiveness of the transfer to self-monitoring in forestry management.
- 3.19 MOE, MNR and MMAH were asked to work together to develop ways to ensure that up-front financial assistance is provided to participants in environmental decision-making and hearings. The three ministries responded in different ways. MOE pointed out that the *Intervenor Funding Project Act* had expired in 1996. MNR stated that the issue had been discussed at the Interministerial Committee. MMAH said that no funds were available.
- 3.20 MNMD was asked to assess and report on the effectiveness of the self-certifying system for mine closure plans in achieving environmental protection. The ministry response stated that "MNMD agrees to design an audit program based upon the standards and requirements of the amended Part VII of the *Mining Act*," and that "a quantitative assessment will be completed when sufficient data are available." I am pleased with these commitments and will monitor progress in this area.

Response to Recommendations on Applications for Review and Investigation

- 4.1 I recommended that ministries develop procedures for handling applications that include an independent evaluation for situations where the application involves previous decisions by local staff. Five ministries were subject to applications in 1997, and three indicate that they have taken action on this recommendation. MNMD indicated that it had implemented procedures for independent evaluation. MOE stated that "procedures generally assign applications to the district or region in which the issue occurs (but) provisions do exist for assigning applications to other parties as needs dictate." At MNR, "investigation applications are to be sent to the next higher level of authority." However, on occasion in 1997 this continued to be a problem at both MOE and MNR. For further ECO comments on the handling of applications, see the section of this report on Reviews and Investigations.

- 4.2 I recommended that ministries provide detailed reasons to applicants whose applications are rejected, cite any additional factors in their decision, and address, whenever possible, the valid concerns of the applicants. All of the subject ministries agree and are committed to the implementation of this recommendation, although some applications were handled much better in this regard than others.
- 4.3 MOE with input from OMAFRA, MNR, MTO and MMAH, was encouraged to follow through on its commitment to develop a comprehensive groundwater management strategy. MOE responded that it is working with those ministries to develop a groundwater protection and management framework. It would be helpful, however, for the ministry to associate a time line with this commitment.
- 4.4 I recommended that MOE and MCCR undertake environmental, scientific, economic and social research on the benefits and costs of adapting new refillable container technologies to Ontario's beverage industries and implementing a deposit refund system for liquor containers, and make the information public. MOE stated that its refillable and deposit refund initiatives are linked to its regulatory review exercise and that "all options are being considered." The "Blue Box" issue is examined in some detail elsewhere in this report.
- MCCR stated that it will "facilitate the exchange of information between the Liquor Control Board of Ontario and the MOE on refillable containers technologies."

Response to Recommendations on Instruments

- 5.1 MNR was asked to comply with the *Environmental Bill of Rights* by drafting a proposal for classifying its instruments, providing full public consultation for the proposal, and implementing it. MNR reported that its instrument proposal was posted in March 1997, for a 60-day comment period and that a revised proposal was posted November 1997, for a 75-day comment period. MNR instrument classification is discussed elsewhere in this report.
- 5.2 In response to my recommendation discouraging the removal of the so-called "clutter" instruments from the Registry, MOE claimed that its proposal to remove instruments with low environmental significance "received the support of the public." I am pleased to see however that in the second stage ("Better, Stronger, Clearer") of its regulatory review process, the ministry did not remove any instruments from Registry requirements.

Response to Recommendations on Statements of Environmental Values (SEVs)

- 7.1 I recommended that ministries make every effort to apply the environmental values contained in their SEVs and integrate them into their business plans and other decision-making activities. Most ministries agreed and were committed to this recommendation with some exceptions. MCzCR and MTO replied that it is more useful to emphasize the SEV at the operational or implementation level. MOH replied that business plans relate to "core business" only, and MOL indicated that none of its proposals have been environmentally significant. I believe that OMAFRA may have done the opposite of what I recommended, by proposing to revise its SEV to reflect its new business plan. OMAFRA has told the ECO that its 1998 business plan will include reference to the ministry's SEV. A number of ministry responsibilities related to environment and sustainability have been eliminated.
- My review of the ministry business plans appears elsewhere in this report.

Response to Recommendations on Education Initiatives

- 8.1 Ministries reported on various initiatives in response to my recommendation that they show their commitment to their stated environmental values by educating staff, stakeholders and clients about the *Environmental Bill of Rights*. In particular, I commend MNR for the diversity of its training programs and the establishment of an *EBR* network in the ministry. My staff participated in three regional staff training sessions and provided feedback on the excellent quality of the program. I was disappointed in the responses of other ministries, including MEDTT, MMAH, MNDM, and particularly MOH, which indicated that "our scarce resources are dedicated to reforming the health care system, however, when the opportunity arises MOH will remind staff stakeholders and clients about the *EBR*." I find this vague commitment to possible future weak actions inconsistent with the intent of the *EBR*.
- 8.2 My final recommendation was that MOE ensure that efforts to educate the public on the Environmental Registry continue and are well-coordinated. MOE reported that it will "continue to provide advice and assistance to the public as requested." Unfortunately however, the gap left by the elimination of the Ontario Environment Network Registry Coordinator has not been filled.

ECO Commentary

Some ministries also reported on additional accomplishments. MBS has introduced *EBR* or sustainability considerations into a number of its documents. MCCR has delegated to the Technical Standards and Safety Authority (TSSA) the duties for the acts it administers (including the Gasoline Handling Act) and has finalized the draft of its instrument classification regulation. MCzCR and MMAH are working on revised SEVs to reflect changes in name and core business. MNR has introduced a number of training guidelines related to the *EBR*. MOE has completed work on regulatory amendments to the two *EBR* regulations. OMAFRA has produced a new procedures manual that addresses many of the issues raised by my 1996 review of OMAFRA's procedures.

Appendix I: Technical Supplement

Section 1: List of Policies, Acts and Regulations

Section 2: List of Instruments

Section 3: Education Outreach (1997)

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
AB6E5010	MNR	Changes to the Game and Fish Act	24-Sep-96	Changes to biological issues, application of the act enforcement, efficiency, administrative matters, client service and program delivery.	24-Sep-96 / 07-Nov-96
AB7E4001	MNR	Red Tape Reduction Act (Ministry of Natural Resources) 1996	06-Feb-97	Changes to legislative and regulatory mechanisms, including surveys, land management, forestry, conservation authorities, parks, mining, lakes and rivers.	06-Feb-97 / 23-Mar-97
AC7E0001	OMAFRA	Farm Practices Protection Act	28-Jan-97	Discussion on how to improve the act to provide stronger protection for the farming community and more consideration for the rights of the non-farming public.	28 Jan-97 / 27-Feb-97
AF7E0002	MMAH	An Act To Promote Job Creation And Municipal Accountability While Providing For The Recovery Of Costs Related To Growth	03-Feb-97	New development charges legislation so that municipalities will no longer be permitted to impose development charges for certain services and facilities, but will be able to impose charges for net capital costs for other services. This will enable municipalities and developers to more effectively enter into front-end financing agreements.	03-Feb-97 / 05-Mar-97
AF7E0003	MMAH	Municipal Act Reform	08-Apr-97	Reform of the Municipal Act and related legislation with the main emphasis on broadening municipal authority, making legislation less prescriptive and removing many unnecessary provincial approvals.	08-Apr-97 / 09-May-97
AI6E0001	MMAH	Tenant Protection Legislation – New Directions for Discussion	23-Jul 96	Consolidation of Tenant Protection Act, Rent Control Act, Landlord and Tenant Act, Rental Housing Protection Act, Municipal Amendment Act (Vital Services), Residents Rights Act (Care Home) and the Land Lease Statute Law Amendment Act and changing the current legislative rent control to market rent.	23-Jul-96 / 30 Aug-96
PA6E0012	MOE	Lake Superior Lakewide Management Plan – Stage 2: Load Reduction Targets and Ecosystem Principles and Objectives, Indicators and Targets for Lake Superior	25-Oct-96	Discussion papers requesting comments on draft schedules for reducing the loadings of pollutants to Lake Superior, including two major categories of pollutants, and general objectives for aquatic ecosystem structure, terrestrial wildlife, habitat, human health and sustainability.	25-Oct-96 / 23-Jan-97
PA6E0014	MOE	Proposed Three Year Plan for Standard-Setting	10-Oct-96	Plan identifies ministry's standard-setting priorities for the next three years.	10-Oct-96 / 09-Dec-96
PA6E0034	MOE	Transition Strategy - application of certain new provisions of the Environmental Assessment Act (as amended by Bill 76) to "transitional" environmental assessments	23-Dec-96	Transition strategy has been developed to deal with "transitional" environmental assessments prepared in accordance with the unamended Environmental Assessment Act and submitted either prior to or, if the proponent so elects, within one year after the coming into force of the amended act.	23-Dec-96 / 22-Jan-97
PA7E0001	MOE	Guide To Preparing Terms Of Reference For Individual Environmental Assessments	19-Feb-97	Guideline for the preparation of Terms of Reference documents and advising on the process to be followed leading up to the decision.	19-Feb-97 / 21-Mar-97

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
PA7E0002	MOE	Use of Mediation in Environmental Assessment	10-Mar-97	Document to provide a proactive and creative means to address and resolve contentious issues in a timely manner that may arise in environmental assessment planning.	10-Mar-97/ 09-Apr-97 10-Mar-97/ 18-Apr-97
PA7E0005	MOE	Amendment to Compliance Guideline F-2	08-Jul-97	Amendment to provide interim clarification on the issue of liability allocation in the issuing of site clean-up orders under existing legislation.	08-Jul-97 / 22 Aug 97
PA7E0007	MOE	Pilot Emission Reduction Trading (PERT) Project	18-Jun-97	Emission reduction trading is considered as a cost-effective option for air contaminant emission reduction program.	18-Jun-97/ 17-Aug-97
PA7E0009	MOE	Environmental Management Agreement	29-Jul-97	Agreement between Dofasco Inc. of Hamilton, Ontario Environment Canada and MOE with an overall objective to protect and enhance the natural environment in the Province of Ontario, enabling each of the parties to focus their efforts on implementing measures which address the environmental priorities established within the Agreement.	29-Jul-97 / 28-Aug-97
PA7E0011	MOE	Ontario Realty Corporation Parent Class Environmental Assessment (Class EA) approval extension	14-Oct-97	Extension of the Ontario Realty Corporation Class EA which required that the minister seek public comment with respect to a request for an extension of that approval.	14-Oct-97/ 28-Nov-97
PB5E4003	MNR	Presqu'île Provincial Park Management Planning	19-Jun-96	Development of a park management plan for the next 20 years of operations and invitation to the public to participate in the process.	19-Jun-96/ 21-Jul-96
PB6E1005	MNR	Wabikimi Park Expansion	13-Dec-96	Increase of park's size to protect a range of natural and cultural heritage values to assist in the sustainability of the area's woodland caribou population and to allow natural fire to remain an important ecological force within the area's boreal forest landscape.	13-Dec-96/ 27-Jan-97
PB6E2002	MNR	Larder River Provincial Park Preliminary Management Plan	23-May-96	Development of a preliminary park management plan including draft policies for operation, resource management, maintenance of access roads, development of a water way class park, unregulated camping and an aquaculture facility.	23-May-96 / 22-Jun-96
PB6E3002	MNR	Mikisew Provincial Park Management Planning	02-Jul-96 18-Dec-96	Development of a park management plan for the next 20 years of operation and invitation to the public to participate in the process.	02-Jul-96 / 11-Aug-96 18-Dec-96/ 01-Feb-97
PB6E3003	MNR	Arrowhead Provincial Management Plan Review	02-Jul-96	Review of the park management plan for the next 20 years of operation and invitation to the public to participate in the process.	02-Jul-96/ 11-Aug-96
PB6E3004	MNR	Mono Cliffs Provincial Park Preliminary Management Plan	04-Oct-96	Development of a preliminary park management plan containing proposed policies and direction statements and invitation to the public to participate in the process.	04-Oct-96 / 03-Nov-96

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
PB6E4004	MNR	Turkey Point Provincial Park Management Plan - Amendment	25-Jun-96	Amendment to existing management plan to incorporate four hectares of previously Crown land that was added to the park.	25-Jun-96 / 27-Jul-96
PB6E7001	MNR	Forest Operations Prescription Guideline	04-Jun-96	Guideline explains how to prepare and complete a Forest Operations Prescription as required by the Crown Forest Sustainability Act.	04-Jun-96 / 04-Jul-96
PB7E1002	MNR	Onaman Lake Fisheries Management Plan	08-Apr 97 30-Jul-97 24-Oct-97	Resource Management Plan to guide the use and health of the fisheries in the lake, which have been showing signs of a steady decline in the walleye population over the past several years.	08-Apr-97 / 15-May-97 30-Jul-97 / 01 Sep-97 24-Oct-97 / 23-Nov-97
PB7E1003	MNR	Amendment to the Ministry of Natural Resources' Fort Frances District Land Use Guidelines to facilitate the deregulation of the mainland portion of Lake of the Woods Provincial Park	18-Jun-97 27-Nov-97	Amendment to allow deregulation of the mainland portion of Lake of the Woods Provincial Park, to facilitate the transfer to the federal government to be held in trust as an Indian Reserve for the use and benefit of the Big Grassy First Nation and Ojibways of One gaming First Nations.	18-Jun-97 / 06-Sep-97 27-Nov-97 / 11-Jan-98
PB7E2013	MNR	Lake Nipissing Management Plan Review 1997	05-Dec-97	Review of the existing information available on the status of the fishery and opportunity to become involved in finding solutions to any problems which may exist.	05-Dec-97 / 04-Jan-97
PB7E2014	MNR	Mississagi Delta Nature Reserve Management Plan	08-Dec-97	Development of Management Plan to provide long-term direction related to protection and heritage objectives consistent with provincial park policy objectives.	08-Dec-97 / 22-Jan-98
PB7E3002	MNR	Bronte Creek Provincial Park Management Plan Review	04-Jun-97 24-Oct-97	Review of the Management Plan to ensure that the original management plan continues to be relevant for the next 20 years.	04-Jun-97 / 19-Jul-97 24-Oct-97 / 08-Dec-97
PB7E4001	MNR	Lands for Life - Invitation to Participate in the development of the Great Lakes - St. Lawrence Land Use Strategy	08-Aug-97	Invitation to participate in the development of a Regional Land Use Strategy for the Great Lakes - St. Lawrence Planning Area.	08-Aug-97 / 07-Sep-97
PB7E4002	MNR	Lands for Life - Invitation to Participate in the development of the Boreal East Land Use Strategy	08-Aug-97	Invitation to participate in the development of a Land Use Strategy for the Boreal East Planning Area.	08-Aug-97 / 07-Sep-97
PB7E4003	MNR	Lands for Life - Invitation to Participate in the development of the Boreal West Land Use Strategy	08-Aug-97	Invitation to participate in the development of a Land Use Strategy for the Boreal West Planning Area.	08-Aug-97 / 07-Sep-97
PB7E4005	MNR	Resource-Based Tourism Policy Implementation Plan – Draft	20-Aug-97	Draft Policy Implementation Plan contains background information on Lands for Life, the resource-based Tourism Policy, key issues identified by the Resource-Based tourism industry, a list of interested stakeholders, the process for addressing the Resource-Based Tourism Policy in 1997 Forest Management Plans, introduction, implementation structure, working group products, and a discussion on consultation and proposed time lines.	20-Aug-97 / 04-Oct-97

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
PB7E4006	MNR	Guidelines for the Preparation of Regional Land Use Strategies - Working Draft	01-Oct-97	Guidelines to assist ministry staff and members of planning Round Tables to carry out land use planning for Crown lands and resources.	01-Oct-97/ 31-Oct-97
PB7E6004	MNR	A Silvicultural Guide for the Boreal Forest in Ontario A Silvicultural Guide for the Tolerant Hardwood Forest in Ontario; and A Silvicultural Guide for the Great Lakes - St. Lawrence Conifer Forest in Ontario	06-May-97	Guides describe the various tree species encountered in the Boreal and Great Lakes - St. Lawrence forest regions of Ontario; the silvicultural treatments that are available for harvesting, renewing, tending and protecting them; and the recommended practices to be followed on specific sites to ensure the continued sustainability of Ontario's forest ecosystems.	06-May-97 / 05-Jun-97
PB7E6005	MNR	Review of the Population Status and Management of Double-Crested Cormorants in Ontario - Draft Report	21-May-97	Draft report presents information on increased cormorant populations, impact on fish populations, wildlife habitat, and other species and the possible need for measures to control cormorant populations.	21-May-97/ 20-Jun-97
PB7E6007	MNR	Wildlife Habitat Inventory Manual - for use in forest management planning	10-Jun-97	Manual explains the methodologies to use when inventorying habitat of selected species of wildlife that are most likely to be of concern in areas of the province where Crown Land forest management is being contemplated.	10-Jun-97/ 10-Jul-97 23-Jun-97 / 24-Jul-97
PB7E6009	MNR	Conservation Strategy for Old Growth Forest Ecosystems on Crown Lands in Ontario	02-Jul-97	Strategy identifies common principles and provides for the development of definitions of old growth forest ecosystem across Crown forest lands in Ontario.	02-Jul-97 / 01-Aug-97
PB7E6012	MNR	Private Stewardship Agreement	08-Jul-97	Agreement sets out the fashion in which MNR and Wildlife Habitat Canada will operate a jointly funded program to assist private landowners in the protection and restoration of the natural values of their wetland.	08-Jul-97 / 07-Aug-97
PB7E6013	MNR	Forest Management Guidelines for the Protection of the Physical Environment	21-Jul-97	Guidelines describe the best management practices to help maintain forest site productivity that may be adversely affected by alterations to soil structure, soil displacement, nutrient removals, the loss of productive land and negative hydrological impacts that can arise from some forest practices in some circumstances.	21-Jul-97/ 20-Aug-97
PB7E6014	MNR	Enforcement Guidelines for Aboriginal Persons (EGAP)	05-Aug-97	Guidelines to replace the Interim Enforcement Policy as amended since 1991; intended to assist MNR enforcement officers in application of MNR's mandated resource related law in relation to aboriginal persons.	05-Aug-97 / 04-Sep-97
PB7E6015	MNR	Plan for the Restoration of Elk in Ontario	16-Sep-97	Plan to provide direction for the restoration of a self-sustaining herds of elk which were once native to Ontario.	16-Sep-97/ 16-Oct-97
PB7E6016	MNR	Simplified EA Act Coverage - Provincial Parks and Conservation Reserves - Consultation	23-Oct-97	Consultation program to address long-term EA Act coverage for the designation and management of Provincial Parks and Conservation Reserves.	23-Oct-97 / 07-Dec-97

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
PB7E6017	MNR	Waterfront Boundaries for Grants of Public Crown Lands	03-Nov-97	Policy change in process when disposing of Crown waterfront lands; a survey practice will be adopted that will result in a conveyance of land to the waters' edge, highest regulated water level or flood contour elevation.	03-Nov-97 / 03-Dec-97
PC7E0001	OMAFRA	Statement of Environmental Values - Draft November 1997	13-Nov-97	Revisions to statement of environmental values to reflect the ministry's new business plan and to fulfill a commitment to develop an internal ministry statement of environmental values monitoring process.	13-Nov-97 / 12-Jan-98
PE6E4501	MTO	Southwestern Ontario Transportation Perspective	30-Apr-96	Study explores the implication of a strategic transportation network. The purpose of this initiative will be to set transportation directions in the study area over the next 30 years.	30-Apr-96 / 30-May-96
PN7E0001	MBS	Government Business Plans	03-Jul-97	Business Plans released by Ontario government ministries for 1997, providing Ontario taxpayers with the opportunity to review ministries' core businesses, the government's goal for the coming year and strategies to meet those goals.	03-Jul-97 / 01-Sep-97
RA5E0017	MOE	Township of Edwardsburgh Waste Disposal Site Interim Expansion - Request for Exemption under the Environmental Assessment Act	29-Jun-95	Request for Exemption to allow interim expansion of site, being the most reasonable alternative to continue township waste management activities.	29-Jun-95 / 29-Jul-95
RA5E0022	MOE	Town of Georgina Landfill Interim Expansion - Request for Exemption under the Environmental Assessment Act	31-Aug-95	Request for Exemption to allow interim expansion, being the most reasonable alternative to continue township waste management activities.	31-Aug-95 / 30-Sep-95
RA5E0031	MOE	Amendments to the pesticide licencing system under the Pesticides Act and Regulation 914	02-Oct-95	Amendments to streamline existing system, improve education and have mandatory health and safety requirements.	02-Oct-95 / 01-Nov-95
RA6E0006	MOE	Regulatory Standards for New Landfilling Sites Accepting Non-Hazardous Waste	17-Jun-96	Standards would apply to new landfill sites; they are designed to clarify the approval requirements and reduce delays.	17-Jun-96 / 06-Sep-96
RA6E0010	MOE	Proposed Amendments to Regulation 914 under the Ontario Pesticides Act	09-Aug-96	Amendments to consolidate and clarify certain requirements and sections of the act and provide certain exemptions.	09-Aug-96 / 16-Sep-96
RA7E0001	MOE	Amendment to Regulation 826 (City of Hamilton)	10-Feb-97	Revision to boundary of regulated land within the City of Hamilton, including the addition of a small area of previously unregulated land and deleting the majority of the currently regulated land designated Urban by the Niagara Escarpment Plan.	10-Feb-97 / 12-Mar-97
RA7E0002	MOE	Amendment to Ontario Regulation 826 (Caledon-Alton)	25-Feb-97	Revisions to boundaries and deletion of a portion of development control which lies outside the boundaries of the Niagara Escarpment Plan.	25-Feb-97 / 27-Mar-97
RA7E0005	MOE	Town of Kincardine Valentine Landfill Interim Expansion - Declaration Order under the Environmental Assessment Act	23-Apr-97 29-Apr-97	Request for exemption order to allow the interim expansion.	23-Apr-97 / 23-May-97 29-Apr-97 / 29-May-97

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
RA7E0010	MOE	Timeline Regulation under Bill 76 - Environmental Assessment and Consultation Improvement Act 1996	22-Jul-97	Regulation for the prescription of time lines for all key steps in environmental assessment decision-making including approval of the terms of reference; completion of the government's technical review; and the decision on approval of a project under the Environmental Assessment process.	22-Jul-97 / 20-Sep-97
RA7E0011	MOE	Designation by regulation under the Environmental Assessment Act of a proposal by KMS Peel Inc. to expand the Energy-From-Waste (EFW) Facility located at 7656 Bramalea Road in the City of Brampton	22-Oct-97	Request for designation regulation for proposed expansion of facility to add a fifth incineration and boiler modification to the air-cooled condenser, and modifications to the air pollution control system.	22-Oct-97 / 21-Nov-97
RA7E0012	MOE	Designating industrial process residues as waste and adding specific activities to the recyclable materials exemptions	22-Oct-97	Amendment to Regulation 347 to add certain residues, chipped wood, waste wood, pickle liquor and photographic waste to the recyclable material exemptions.	22-Oct-97 / 21-Nov-97
RA7E0013	MOE	Proposed amendments to the Effluent Monitoring and Effluent Limits - Organic Manufacturing Sector - Ontario Regulation 63/95	24-Dec-97	Amendments to conventional parameters to allow for increase in production at the plants subject to the regulation.	24-Dec-97 / 23-Jan-98
RA7E0014	MOE	Proposed amendments to the Effluent Monitoring and Effluent Limits - Inorganic Manufacturing Sector - Ontario Regulation 64/95	24-Dec-97	Amendments maintain the requirement for non-toxic effluent discharge while accommodating increase in production, changes in process and correction to flow rates used for the basis for calculating effluent limits.	24-Dec-97 / 23-Jan-98
RA7E0016	MOE	Ministry of the Solicitor General and Correctional Services (MSGCS), Declaration Request under the Environmental Assessment Act for construction and operation of one of two new correctional facilities in central Ontario; Town of Penetanguishene, Site N9	16-Dec-97	MSGCS is requesting that the construction and operation of a new correctional facility be declared not subject to the requirements of the Environmental Assessment Act.	16-Dec-97 / 15-Jan-98
RA7E0017	MOE	Proposal to amend Ontario Regulation 77/92 - Exemption for Ground Source Heat Pumps	24-Dec-97	Amendment prohibits the installation of ground source heat pumps that use methanol as a heat transfer agent, and the alteration extension or replacement of existing pumps using methanol.	24-Dec-97 / 07-Feb-98
RA7E0018	MOE	Amendments to the Electric Power Generation Sector Regulation - Ontario Regulation 215/95 as amended to 525/95	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing, reduction of daily monitoring requirement for some parameters and removal of effluent limits for substances that are not used produced or stored at site and require annual monitoring of effluent for these substances	30-Dec-97 / 13-Feb-98
RA7E0019	MOE	Amendments to the Iron and Steel Sector Regulation - Ontario Regulation 214/95	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing reduction of daily monitoring requirement for some parameters and removal of effluent limits for substances that are not used, produced or stored at site and require annual monitoring of effluent for these substances.	30-Dec-97 / 13-Feb-98
RA7E0020	MOE	Amendments to the Industrial Minerals Sector Regulation - Ontario Regulation 561/94	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing and removal of effluent limits for substances that are not used, produced or stored at site and requires annual monitoring of effluent for these substances.	30-Dec-97 / 13-Feb-98

RA7E0021	MOE	Amendments to the Inorganic Manufacturing Sector Regulation - Ontario Regulation 64/95 as amended to 523/95	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing and removal of effluent limits for substances that are not used, produced or stored at site and requires annual monitoring of effluent for these substances.	30-Dec-97 / 13-Feb-98
RA7E0022	MOE	Amendments to the Metal Casting Sector Regulation - Ontario Regulation 562/94 as amended to 526/95	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing, reduction of daily monitoring requirement for some parameters, removal of effluent limits for substances that are not used, produced or stored at site and requires annual monitoring of effluent for these substances and minor administrative changes to company name, address and ownership.	30-Dec-97 / 13-Feb-98
RA7E0023	MOE	Amendments to the Metal Mining Sector Regulation - Ontario Regulation 560/94	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing and removal of effluent limits for substances that are not used, produced or stored at site and requires annual monitoring of effluent for these substances.	30-Dec-97 / 13-Feb-98
RA7E0024	MOE	Amendments to the Organic Chemical Manufacturing Sector Regulation - Ontario Regulation 63/95 as amended to 522/95	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing, removal of effluent limits for substances that are not used, produced or stored at site and requires annual monitoring of effluent for these substances and minor administrative changes to company name, address and ownership.	30-Dec-97 / 13-Feb-98
RA7E0025	MOE	Amendments to the Pulp and Paper Sector Regulation - Ontario Regulation 760/93 as amended to 521/95	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing, reduction of daily monitoring requirements for some parameters, removal of effluent limits for substances that are not used, produced or stored at site and requires annual monitoring of effluent for these substances and minor administrative changes to company name, address and ownership.	30-Dec-97 / 13-Feb-98
RA7E0026	MOE	Amendments to the Petroleum Refineries Sector Regulation - Ontario Regulation 537/93 as amended to 524/95	30-Dec-97	Amendment includes reduction of the monitoring frequency of chronic toxicity testing, reduction of daily monitoring requirements for some parameters, removal of effluent limits for substances that are not used, produced or stored at site and requires annual monitoring of effluent for these substances and minor administrative changes to company name, address and ownership.	30-Dec-97 / 13-Feb-98
RA7E0027	MOE	Regulation 351, Marina Regulation	30-Dec-97	Revokes the regulation and replaces it with a voluntary code of practice that would go beyond the current regulatory requirements and recommends comprehensive environmental protection practices for marinas and yacht clubs.	30-Dec-97 / 13-Feb-98
RA7E0028	MOE	Amendment to Ontario Regulation 73/94 (General)	30-Dec-97	Amendments to the general regulation made under the Environmental Bill of Rights are administrative in nature, involving only the renaming of ministries and acts and the addition of declarations under the Environmental Assessment Act to the definition of regulations under the EBR.	30-Dec-97 / 13-Feb-98

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
RA7E0030	MOE	Consolidation of Acid Rain Regulations (Ontario Regulations 660/85, 661/85, 663/85 and 355/90)	30-Dec-97	Consolidation of four individual acid gas regulations into a single regulation without altering the existing annual acid gas emission limits for these sources.	30-Dec-97/ 13-Feb-98
RA7E0031	MOE	Environmental Practices Guide for Hot Mix Asphalt Facilities to Supplement Regulation 349 (Hot Mix Asphalt Facilities)	30-Dec-97	Guidelines to retain existing regulation concerning Hot Mix Asphalt Facilities and augment it by monitoring the voluntary implementation of an Environmental Practices Guide, which was designed to provide clear, comprehensive guidance to ensure the environmentally safe operation of hot mix asphalt facilities beyond the measures required by the existing regulation.	30-Dec-97/ 13-Feb-98
RA7E0034	MOE	Ontario Refrigerant Regulation (Ontario Regulation 189/94)	19-Dec-97	Regulation aimed at ozone depleting substances developed to support the national commitments to the Montreal Protocol.	19-Dec-97/ 02-Feb-98
RA7E0037	MOE	Proposed amendments to certification requirements for growers (agriculturists), Regulation 914 under the Pesticides Act	24-Dec-97	Amendment to accommodate current farming needs including removal of certification requirement to use Schedule 3 pesticides and allows for alternative approach to strengthen supervision of assistants by certified growers, placing restriction on duties and implementing formal training for assistants.	24-Dec-97 / 23-Jan-98
RB7E1001	MNR	Lake of the Woods Reduction in Possession Limits for Anglers Not Staying in Ontario - Amendment to Section 9 of the Game and Fish Act	16-Jul-97	Amendment to reduce the possession limits for walleye and sauger for anglers not staying in Ontario.	16-Jul-97/ 15-Aug-97
RB7E1002	MNR	Northwest Region MNR, OFAH, and NOTO: Proposed Recommendations for Fish Regulations (Sport Fish Divisions 20, 21, 22, 24, 30, 31, 32, 33 only)	05-Nov-97	Recommendations to achieve a sustainable, high quality fishery in Northwestern Ontario by simplifying and modernizing the current fishing regulations across 8 fisheries management divisions.	05-Nov-97 / 05-Dec-97
RB7E3003	MNR	Larose Forest Controlled Moose Hunt (Regulation under the Game and Fish Act)	15-Sep-97	Regulation to allow for controlled moose hunt in a closed habitat without natural predators to avoid over-population and related problems.	15-Sep-97/ 15-Oct-97
RB7E4001	MNR	Red Tape Reduction Act (Ministry of Natural Resources) 1996	06-Feb-97	Changes to legislative and regulatory mechanisms within its mandate, including surveys, land management, forestry, conservation authorities, parks, mining, lakes and rivers.	06-Feb-97/ 23-Mar-97
RB7E6001	MNR	Instrument Regulation Under EBR - Amendment to O.Reg. 681/94 and O.Reg. 73/94	11-Mar-97 10-Nov-97	Classification of instruments to be posted on the Environmental Bill of Rights Registry.	11-Mar-97/ 10-May-97 10-Nov-97/ 16-Jan-98
RB7E6003	MNR	Amend Ontario Regulation 951 under the Provincial Parks Act; Polar Bear, Winisk River and Osooskwin-Attawapiskat River Provincial Parks	21-May-97	Regulation to deregulate 465 hectares of Polar Bear Provincial Park, 40 hectares of Osooskwin-Attawapiskat River Provincial Park and 22 hectares of Winisk River Provincial Park, resulting in a re-configuration of the southern boundary of Winisk River Provincial Park.	21-May-97 / 20-Jun-97

Registry Number	Ministry	Act, Policy, Regulation	Proposal Date	Description	Comment Period
RB7E6006	MNR	Amending 11 Provincial Park Boundaries (Regulation 951 under the Provincial Parks Act)	15-Sep-97	Regulation to amend the boundaries of Awenda Provincial Park, Bigwind Lake Provincial Park, Driftwood Provincial Park, Duncan Escarpment Provincial Nature Reserve, Fawn River Provincial Park, Frontenac Provincial Park, Kap Kig Iwan Provincial Park, Lola Lake Provincial Park, Pigeon River Provincial Park, Port Burwell Provincial Park and Wasaga Beach Provincial Park.	15-Sep-97/ 15-Oct-97
RB7E6007	MNR	Designation of parts of the Territorial District of Algoma and Territorial District of Sudbury under the Aggregate Resources Act	04-Nov-97	Regulation to increase the lands designated under the Aggregate Resources Act resulting in all aggregate operations conducted on these lands being subject to the act.	04-Nov-97 / 04-Dec-97
RB7E8001	MNR	Amendment to Ontario Regulation 826 (The Enclave - Town of Ancaster) under the Niagara Escarpment Planning and Development Act	10-Jun97	Regulation to delete development control from a recently approved draft plan of subdivision which has an Urban Area designation.	10-Jun-97/ 10-Jul-97
RB7E8002	MNR	"The Bluffs of Burlington" - City of Burlington Mt. Nemo Settlement - Amendment to Ontario Regulation 826 under the Niagara Escarpment Planning and Development Act	10-Jul-97	Regulation to delete Niagara Escarpment development control from a recently approved subdivision known as "The Bluffs of Burlington."	10-Jul-97/ 09-Aug-97
RB7E8003	MNR	Niagara Escarpment Planning and Development Control Act - Amendment to Ontario Regulation 826 - City of Stoney Creek, Winona Urban Area	06-Aug-97	Regulation to delete a portion of the Niagara Escarpment development control which lies within the approved boundaries of the settlement area of Winona.	06-Aug-97 / 05-Sep-97
RD7E0001	MNDM	Classification of Proposals for Instruments within the Mining Act that may have a significant effect on the environment A Regulation under the Environmental Bill of Rights, 1993.	15-May-97	Regulation to provide 27 different proposals for instruments from various sections and subsections of the Mining Act to require posting on the Environmental Registry.	15-May-97/ 13-Aug-97
RL6E0001	MCCR	Classification of Proposals for Instruments under the Gasoline Handling Act	02-Dec-96	Regulation to classify proposals for instruments under the Gasoline Handling Act in accordance with Environmental Bill of Rights section 20. Class 1 instruments have been identified.	02-Dec-96 / 15-Feb-97
RL7E0001	MCCR	Standard Adopted under the Gasoline Handling Act Forest Management Activities	03-Jan-97	Changes to the Gasoline Handling Code to regulate the storage and handling of fuel by the forest industry.	03-Jan-97 / 02-Feb-97
RL7E0002	MCCR	Fuel Oil Regulation	30-Jan-97	Changes to the Fuel Oil Code to provide requirements for aboveground and underground tank installation, appliance installation and the venting of combustion products from appliances; also requirements for equipment and regulation of service persons involved in the installation, maintenance and removal of fuel oil equipment.	31-Jan-97/ 01-Apr-97
RL7E0003	MCCR	Certification of Petroleum Equipment Mechanics under the Gasoline Handling Act	07-Apr-97	Regulation to set out the qualifications an individual must meet in order to qualify for a certification of qualification as a petroleum equipment mechanic.	07-Apr-97 / 07-May-97

List of Instruments

Registry Number	Ministry	Instrument	Class	Proposal Date	Proponent	Location of Activity	Description	Comment Period
IA7E0462	MOE	EPA s. 27	2	04-Apr-97	Ardee Recycling Inc.	Borough of East York	Certificate of approval to blend petroleum naphtha with used lube oils	04-Apr-97 / 04-May-97
IA7E1338	MOE	EPA s. 27	2	04-Sep-97	Ardee Recycling Inc.	Borough of East York	Certificate of approval for use of tanks and drums for temporary storage of waste	04 Sep-97 / 04-Oct-97
IA7E1089	MOE	EPA s. 9	1	23-Jul-97	Schneider Canada Inc. East York Facility	Borough of East York	Certificate of approval for natural gas fired heaters and various exhausts	23-Jul-97 / 22-Aug-97
IA7E1869	MOE	EPA s. 27	2	23-Dec-97	2R Service Inc.	City of Barrie	Certificate of approval to modify service area boundary to include North America	23-Dec-97/ 22-Jan-98
IA4E0131	MOE	EPA s. 27	2	17-Jan-95	B.W.A. Treatment Technologies Inc.	City of Barrie	Certificate of approval for processing and storage of liquid industrial waste	17-Jan-95/ 16-Feb-95
IA6E0528	MOE	EPA s. 9	1	18-Apr-96	Cable Recycling Inc.	City of Barrie	Certificate of approval for baghouse and cyclones to control emissions from industrial process	18-Apr-96 / 18-May-96
IA7E1911	MOE	EPA s. 9	1	31-Dec-97	Kerv Johnston Motors 1996 Ltd.	City of Barrie	Certificate of approval for waste derived fuel heater to provide comfort heat	31-Dec-97 30-Jan-98
IA7E1014	MOE	EPA s. 9	1	08-Jul-97	Molson Breweries	City of Barrie	Certificate of approval for exhaust fan to ventilate analytical laboratory fume hoods	08 Jul-97 / 07-Aug-97
IA6E0050	MOE	EPA s. 9	1	02-Feb-96	Northstar Advertising	City of Barrie	Certificate of approval for exhaust fan to vent emissions from screen printed products	02-Feb-96 / 03-Mar-96
IA5E2425	MOE	EPA s. 9	1	20-Dec-95	Oryx Fixtures Inc.	City of Barrie	Certificate of approval for exhaust system for foam insulation manufacturing	20-Dec-95 / 19-Jan-96
IA7E1446	MOE	EPA s. 9	1	19-Sep-97	Phil Dennis Enterprises H & H Heat Treating Div.	City of Barrie	Certificate of approval for natural gas fired generator for metal heat treating processes	19-Sep-97/ 19-Oct-97
IA6E0311	MOE	EPA s. 27	2	27-Feb-96	WMI Waste Management of Canada Inc.	City of Barrie	Certificate of approval for transfer from haul vehicles to transfer trailer	27-Feb-96 / 28-Mar-96
IA6E0649	MOE	EPA s. 27	2	29-Apr-96	WMI Waste Management of Canada Inc.	City of Barrie	Certificate of approval for increased waste storage capacity	29-Apr-96 / 29-May-96
IA7E1808	MOE	EPA s. 9	1	11-Dec-97	Ault Foods Ltd. Black Diamond Cheese Div.	City of Belleville	Certificate of approval for three new air exhaust points to maintain acceptable air exchange	11-Dec-97/ 10-Jan-98

Registry Number	Ministry	Instrument	Class	Proposal Date	Proponent	Location of Activity	Description	Comment Period
IA5E1908	MOE	EPA s. 9	1	14-Sep-95	Autosystems Manufacturing Inc.	City of Belleville	Certificate of approval for solvent recovery system to remove acetate and butanol	14-Sep-95/ 14-Oct-95
IA5E2367	MOE	EPA s. 9	1	07-Dec-95	Halla Climate Control Canada Inc.	City of Belleville	Certificate of approval for vent stacks for degreaser and aluminum brazing	07-Dec-95 / 06-Jan-96
IA6E0037	MOE	EPA s. 9	1	19-Jan-96	Halla Climate Control Canada Inc.	City of Belleville	Certificate of approval for exhaust fan to ventilate welding station	19-Jan-96/ 18-Feb-96
IA7E1756	MOE	EPA s. 9	1	27-Nov-97	Halla Climate Control Canada Inc.	City of Belleville	Certificate of approval for bake oven containing ventilation stacks and spray wash system with ventilation stacks.	27-Nov-97 / 27-Dec-97
IA7E1883	MOE	EPA s. 9	1	23-Dec-97	Halla Climate Control Canada Inc.	City of Belleville	Certificate of approval for mechanical filter system to control airborne particulate	23-Dec-97 / 22-Jan-98
IA7E1503	MOE	EPA s. 9	1	02-Oct-97	Northern Telecom Enterprise Networks Div.	City of Belleville	Certificate of approval for installation of new filters and new duct work including discharge stack	02-Oct-97 / 01-Nov-97
IA6E0256	MOE	EPA s. 9	1	20-Feb-96	Procter & Gamble Inc.	City of Belleville	Certificate of approval for existing fans and new fan for dust cloth collectors	20-Feb-96 / 21-Mar-96
IA7E0991	MOE	EPA s. 27	2	04-Jul-97	Rancor Wood Recycling Inc. Randy Corfield	City of Belleville	Certificate of approval for storage, sorting, grinding, shredding and bailing of solid non-hazardous waste	04-Jul-97 / 03-Aug-97
IA7E1262	MOE	EPA s. 9	1	27-Aug-97	Automotive Refinish Technical Inc.	City of Brampton	Certificate of approval for paint mixing room complete with push mechanical ventilation system.	27-Aug-97 / 26-Sep-97
IA7E0607	MOE	EPA s. 27	2	05-May-97	Brampton Bio Conversion Inc.	City of Brampton	Certificate of approval for receiving and processing of liquid and solid non-hazardous organic wastes	05-May-97 / 04-Jun-97
IA7E1855	MOE	EPA s. 9	1	22-Dec-97	Caag Auto Auction Group Inc.	City of Brampton	Certificate of approval for waste derived fuel heater to provide comfort heat	22-Dec-97 / 21-Jan-98
IA7E0853	MOE	OWRA s. 53(1)	2	11-Jun-97	Canadian National Railway Co.	City of Brampton	Certificate of approval for storm water management facility consisting of collection, drainage and separation systems	11-Jun-97/ 11-Jul-97
IA7E1598	MOE	EPA s. 9	1	28-Oct-97	Firmenich of Canada Ltd.	City of Brampton	Certificate of approval for fan units complete with ducting to ventilate clean-up process	28-Oct-97 / 27-Nov-97
