

Supplementary Revision to the 2006/2007 Annual Report.

There is an error in the ECO's review of Application I2006005, describing a gasoline spill in a residential area in Kitchener (p. 239 of the Supplement). The article erroneously indicates that the applicants returned to their house in late October 2006. In fact the applicants never moved back into the house; instead, the house was sold in 2008. The ECO regrets the error.
