

Independent Electricity Market Operator

2004 Corporate Performance

Performance to the end of September

Summary of Corporate Performance to the end of September

Objective	Performance Measure	Performance Expectation	Current Status
Effective Use of Constrained Funds	Total spending (OM&A + Interest + Amortization) compared to the budget amount approved by the IMO Board	Total spending (OM&A + Interest + Amortization) is within the amount approved by the IMO Board	On Track: Total spending to the end of September is \$110.6 million, \$6.6 million lower than the year-to-date budget of \$117.2 million. Currently, projected total spending for 2004 is \$152.6 million, a level that would be \$3.6 million below the approved budget.
	Capital spending associated with the current operational mandate is performed within the budget amount approved by the IMO Board, timelines are met, and required results are achieved	Approved capital expenditures for the Market Operation Program are within budget and required results are delivered according to approved schedule	On Track: Current operations program capital expenditures are \$3.8 million to the end of September. The 2004 projected capital expenditure level for current operations is \$10.4 million, a level that is within the approved budget.
Marketplace Evolution Effectively Managed	Appropriate evolution of the market is achieved and managed effectively	Recommendations to the Board are made in a timely manner Approved capital expenditures for market evolution are within budget and required results are delivered according to approved schedule	On Track: Schedules and estimates for specific phases of Market Evolution Program projects were accepted by the IMO Board during the first quarter. \$1.8 million in capital expenditures has been spent to date, and it is projected that \$4.1 million will be spent of the \$26.4 million initially budgeted for 2004. Regular reviews and project status updates have been provided to the IMO Board regarding these initiatives.

Summary of Corporate Performance to the end of September

Objective	Performance Measure	Performance Expectation	Current Status
Customer/ Stakeholder Satisfaction	IMO's preparation and operation of the marketplace meets participants' and stakeholder needs	IMO is assessed to be an organization which continually satisfies its customers. This assessment will focus on three specific services: • providing effective stakeholding • providing effective market information and communications • providing support for customer inquiries, issues and training needs. This assessment is to be based on surveys, customer comments and other anecdotal evidence	On Track: • the 2003 consultation effectiveness review recommended improvements to the process. These have been implemented and initial feedback has been positive. • extensive stakeholding was completed during the first nine months including over 90 committee, technical panel and working group meetings, webcasts, and training venues. The IMO also completed six roundtable discussions in London, Toronto, Mississauga, Ottawa, Windsor and Sudbury on the future of Ontario's electricity sector. Feedback from participants has been very positive and the IMO is continuing the discussions across the province. • market information and communications met all obligations and provided value-added reports and messages. The new, expanded IMO web site was launched as scheduled on April 1. • Help Centre performance and account management continues to receive positive reviews from customers. IMO training courses, including a number of post-blackout reliability/restoration workshops, continually assessed as superior. These assessments will be further guided by customer survey results conducted during the 4th quarter as well as ongoing stakeholder-focused improvement discussions with MAC and committees, and through regular internal improvement reviews. A review of the impact of Bill 100 on the consultation process is also being conducted. Recognizing diverse stakeholder opinions on the correct level of near term investment in market evolution in the face of Bill 100 changes, the IMO is consulting extensively, revisiting participants' long term vision for the competitive market with a focus on strategic value.
	Control of tie line flows under normal & disturbance conditions meets or exceeds industry median	DCS, CPS1 & CPS2 meet/exceed median values of Eastern Interconnection Control Areas >10,000 MW	On Track: DCS, CPS1 & CPS2 are tracking at or above median levels
	Electrical reliability is maintained within the province	IMO actions to avert/address significant reliability events are assessed as appropriate	On Track: Results to date support an assessment that appropriate measures have been taken by the IMO in addressing significant reliability events. The North American Electric Reliability Council (NERC) posted their audit of the readiness of the IMO to perform its assigned reliability responsibilities in April, 2004. The results of the audit indicate that the IMO meets or exceeds electricity system reliability standards. The 2004 NPCC peer group review/appraisal will be completed in the 4th quarter, incorporating actions and assessments of the entire year.
	Market systems and processes operate effectively	Assessed on a suite of market operations performance measures	On Watch: Performance relative to 23 operational measures is generally good, however ongoing attention will be required. 3 measures are currently assessed as being at risk that the performance expectation at year end will not be met: Dispatch & Scheduling Instructions, Day Ahead Hourly Demand Forecast Bias, and Administrative Pricing Duration.

Market Operations Performance Measures

Category/Name	Measure	Criteria	Performance Standard	Status Year to Date
Provide Sufficient Information For Effective and Successful Bids and Offers				
Implement Intertie Schedules	Accuracy	Average for the year	≥98%	99.9%
Publish SAA's and SSR's	Timeliness	Published as per Market Rule timelines	≥97%	99.5%
Day Ahead Hourly Demand Forecast	Accuracy	Average absolute error for the year	≤3%	1.9%
		Average bias* for the year	≤5%	9.0%
Outage Request Processing	Accuracy	Processed vs. Valid	≥97%	99.6%
Transmission Rights Auction Processing	Timeliness	Processed as per Market Rule timelines	<3 failures to complete a full auction per year	0 failures
Publish Price Every 5 Minutes	Completeness	Average for the year	≥99%	99.8%
Continuous Operation Of the Market	Frequency of Market Suspension	Number of market suspensions per year	<3 suspensions	0 suspensions
	Duration of Market Suspensions	Total duration of market suspensions per year	<20 hours	0 hours

*Over an entire period, the percentage of time that the day ahead hourly demand forecasts were above and below actual Ontario hourly demand are calculated. Then 50% is subtracted from the larger of the two percentages to yield the bias. If the larger percentage was based on forecasts being above actual demand, the bias sign is positive. If the larger percentage was based on forecasts being below actual demand, the bias sign is negative. (Example 1: A quarter in which forecasts that were above actual demand occurred in 52% of hours, resulting in a bias of +2%. Example 2: A quarter in which forecasts that were below actual demand occurred in 54% of hours resulting in a bias of -4%)

Market Operations Performance Measures

Category/Name	Measure	Criteria	Performance Standard	Status Year to Date
Market Services				
Settlement-ready Meter Data	Timeliness	Available next trading day	≥99.3%	99.7%
Meter Trouble Reports Issued to Meter Service Providers	Timeliness	Available next business day	≥88%	94.8%
Meter Trouble Reports Closed	Timeliness	Closed on the 1st business day after the receipt of a satisfactory resolution from the Meter Service Provider	≥88%	97.4%
Preliminary and Final Settlement Statements	Timeliness	Issued as per schedule	≥99%	100%
	Accuracy	No IMO errors	≥99%	99.9%
Help Centre Performance	Average time to close an open ticket	Average for the year	≤12 days	10.6 days
Invoice Market Participants				
Issue Invoices	Timeliness	As required per <i>IMO Settlement Statement Payments Calendar</i>	≥99%	100%
	Accuracy	Average for the year	≥99%	100%

Market Operations Performance Measures

Category/Name	Measure	Criteria	Performance Standard	Status Year to Date
Administrative Pricing				
Administrative Pricing (AP)**	Frequency	Number of occurrences of AP per year	≤ 50	36
	Duration	Number of intervals AP applied per year	≤ 250	206
Market Facing Systems Availability				
Outbound Market Reports Publication	Availability	Average for the year as per respective schedule	$\geq 99.0\%$	99.4%
Market Participant Interface	Availability	Average for the year	$\geq 99.0\%$	99.8%
Dispatch & Scheduling Instructions	Availability	Average for the year	$\geq 99.5\%$	99.5%
Corporate Web Site	Availability	Average for the year	$\geq 99.0\%$	99.6%

**Changes made to the Market Rules implemented on July 26, 2004 resulted in a different methodology for defining the administrative pricing measures. These changes are expected to increase both frequency and duration.
