List of Forest Management Units and Forest Management Plan Renewal Schedule

(January 2007)

For the purposes of forest management, Ontario's Crown forest is divided into geographic planning areas known as forest management units. Forest management plans are prepared for each of these management units and are periodically renewed based on the forest management planning cycle.

This list of forest management units is organized by the scheduled plan renewal year (i.e. scheduled year of implementation) and includes the applicable lead MNR District and MNR Region. New plans are normally scheduled to be implemented in April of the applicable plan renewal year. For those planning processes being initiated this year (i.e. scheduled for implementation in 2009), an "Invitation to Participate" notice will normally be issued between January and March of 2007.

To assist in the delivery of new forest management business directions and to realize efficiencies in forest management planning, the Ministry of Natural Resources is reducing the total number of individual management units through management unit amalgamation. Anticipated amalgamations are noted. Management Unit names/numbers will change as these amalgamations occur.

A small-scale map showing the general location of each forest management unit and a list of current Ontario Ministry of Natural Resources Districts are included. For information on a specific management unit or forest management plan, please contact the District Manager at the Ministry of Natural Resources District indicated in the list.

This list is prepared annually as required by Condition #1. (d) of the Class Environmental Assessment Approval for Forest Management on Crown Lands in Ontario (dated June 25, 2003).
