H1N1 Important Health Notice

An Important Health Notice (IHN) was issued by the Ministry of Health and Long-Term Care (MOHLTC) on October 14. The Notice provides a status update on the current situation in the Ontario and introduces three new provincial guidance documents for: ambulatory care settings; emergency departments, and long-term care settings.

Once issued, Important Health Notices and guidance documents are posted and maintained on the ministry website at: <http://www.health.gov.on.ca>

Personal Support Occupations Employer Survey

The North East Personal Support Occupations Task Force is requesting your feedback on working conditions, training, and recruitment and retention issues facing employers of persons in personal support occupations. Those working in personal support occupations are unregulated care providers, often known as Personal Support Workers, Health Care Aides or Nurse Aides.

The Task Force is seeking your perspective as an employer. The information gathered confidentially will be compiled into a report and recommendations for the North East Health Human Resources Steering Committee to address the identified issues.

A survey, which takes only five minutes to complete, has been developed to assist with the information gathering.

To access the survey visit: <http://www.surveymonkey.com>
