Introduction – Schedule 2

In the past, presentation of WSIB statistics has mainly focused on claim volumes and types of claims. For our 2011 statistics, we have added additional information, interpretation and discussion to help the reader understand what's happening in Ontario workplaces.

We have made our statistics more accessible and easier to use and interpret. This is part of our ongoing commitment to an open and transparent approach to the way we do business.

Although the Ministry of Labour is now the lead agency on prevention in Ontario, the WSIB still plays a key role in the work to make our workplaces safer and healthier. This presentation of our claims statistics provides a wealth of useful information for both the wider prevention system and individual workplaces.

A study of these statistics can help the reader to understand trends in workplace fatalities, injuries and illnesses in Ontario. They provide a valuable resource for workers and employers as they continue the important work of making their workplaces safer and healthier.

Who We Are and What We Do

The WSIB administers the province's no-fault workplace insurance system for Ontario workplaces. We provide wage loss benefits, medical coverage and help getting back to work for workers injured on the job or contracting occupational diseases. For employers, we provide no-fault collective liability insurance and access to industry specific information about workplace fatalities, injuries and illnesses.

We are legislated by the Provincial Government of Ontario and are responsible for administering the Workplace Safety and Insurance Act, 1997 (WSIA). We are funded by employer premiums, and to a lesser degree, income earned on our investments. The province does not provide us with any funding. We are a trust agency and are governed by an independent Board of Directors made up of representatives from employers, workers and others.

By the Numbers: 2011 WSIB Statistical Report

By the Numbers presents 10 years of statistics on Schedule 1 and 2 separately.

Schedule 1 employers are those for which the WSIB is liable to pay benefit compensation for workers' claims. Schedule 1 employers are required by legislation to pay premiums to the WSIB and are protected by a system of collective liability. Since the WSIB pays benefits to injured workers out of money pooled in the insurance fund, Schedule 1 employers are relieved of individual responsibility for actual accident costs.

Schedule 2 employers are employers that self-insure the provisions of benefits under the WSIA. Schedule 2 employers are liable to pay all benefit compensation and administration costs for the workers' claims. The WSIB administers the payment of the benefits for workers of Schedule 2 employers and recovers the cost of these benefits plus administration fees from the employers.

Discussion and Analysis – Schedule 2

The WSIB provides one of the most comprehensive workers' compensation benefit systems in North America. In 2011, we served nearly 700,000 workers, 600 employers, registered over 39,000 claims and administered \$277 million in payments to and on behalf of Schedule 2 workers and families.

Summary of Performance

Overall, fewer claims are entering the system and more injured workers are getting back to work sooner. Since 2002, there has been a 4% reduction in registered claims and a 24% decline in the lost time injury rate. At the same time, the number of workers covered increased by 20%.

Worker and Claim Profile

In 2011, some common characteristics of lost time claims were:

- Gender: Male
- Age group: 25 to 44, with an increase in 55 and over
- Nature of Injury: Sprain or strain
- Event: Overexertion or fall on same level
- Part of Body: Lower back
- Occupation: Police officers and firefighters

Our Commitment to Financial Stability and Improved Recovery and Return to Work Outcomes

Compared to the past 10 years, 2011 experienced:

- the lowest percentage of claims receiving full Loss of Earnings (LOE) benefits, at three and six months post injury or illness
- the lowest average days lost within one, three and six months post injury or illness

Locked-in claims are increasing as a percentage of all claims receiving an LOE benefit, however, with fewer claims entering the system and improved return to work outcomes, over time fewer claims will require a locked-in loss of earnings award.

The amount of benefit payments administered to injured workers of Schedule 2 employers has been decreasing since 2009, with 2011 experiencing a 7.7% reduction in benefit costs paid when compared to 2010. The change in benefit payments can be attributed to fewer claims entering the system, continued improvements in return to work and recovery outcomes, specialized case management teams, new evidence-based health services and expedited access to expert medical intervention.

Focus – High Impact Claims

WSIB has identified a group of allowed lost time claims that have been shown to have significant impacts on workers and employers. These high impact claims are those involving the lower back, shoulder and fractures, and have represented on average more than 35% of all lost time benefit payments and more than 30% of all lost time claims over the past five years. In addition, the percentage of high impact claims receiving LOE benefits at six months post injury or illness is consistently higher than all other lost time claims.

The WSIB is focused on mitigating the risks for these claims to maximize return to work, recovery outcomes and to reduce costs.

Improved Outcomes for all Ontarians

Our 10 year historical trends indicate that significant improvements in claims management, health care and return to work has resulted in better outcomes for injured workers and employers, while reducing benefit costs.

WSIB will continue to focus on restoring workers as closely as possible to where they were before injury, while supporting employers in restoring their businesses to full productivity.

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months, with the exception of benefit payments, which represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

2011 Highlights – Schedule 2

Employers

- Served over 600 employers and approximately 700,000 workers
- Registered over 39,000 claims

Claim

- Decrease in the percentage of claims receiving full Loss of Earnings (LOE) benefits at three and six months
- Lowest levels of claims durations in 10 years, indicating more workers are returning to work sooner

Worker

- Male workers represented 52% of Ontario's employed workforce and 51% of all allowed lost time claims
- Female workers represented 48% of Ontario's employed workforce and 49% of all allowed lost time claims
- Workers aged 25-54 represented over 69% of Ontario's employed workforce and approximately 78% of all allowed lost time claims

Injury

- Sprains and strains represented over 50% of all allowed lost time claims

Benefit Payments

- \$277 million in benefit payments were administered to injured workers of Schedule 2 employers
- Three benefit payments, Loss of Earnings, Workers' Pension and Health Care, contributed to over 80% of all benefit payments

Focus

- WSIB has identified a group of allowed lost time claims that have been shown to have significant impacts on workers and employers
- These high impact claims are those involving the lower back, shoulder and fractures
- These claims represented approximately 30% of all allowed lost time claims and 36% of all lost time benefit payments

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months, with the exception of benefit payments, which represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Employer Profile – Schedule 2

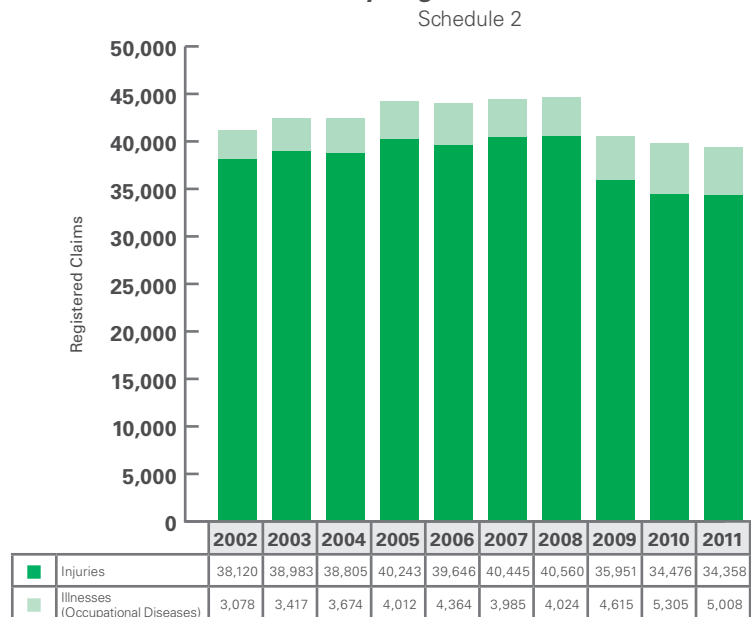

Overview

Since 2002, the number of registered claims has decreased by 4% while employment has increased (despite a decrease in the number of employers) resulting in considerable improvements for workers and employers. There are more injuries being prevented and fewer claims entering the system than in prior years, relative to the number of workers being employed.

WSIB Covered Employment and Registered Claims

Schedule 2	Calendar Year									
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011

Employer Profile – Schedule 2

Overview

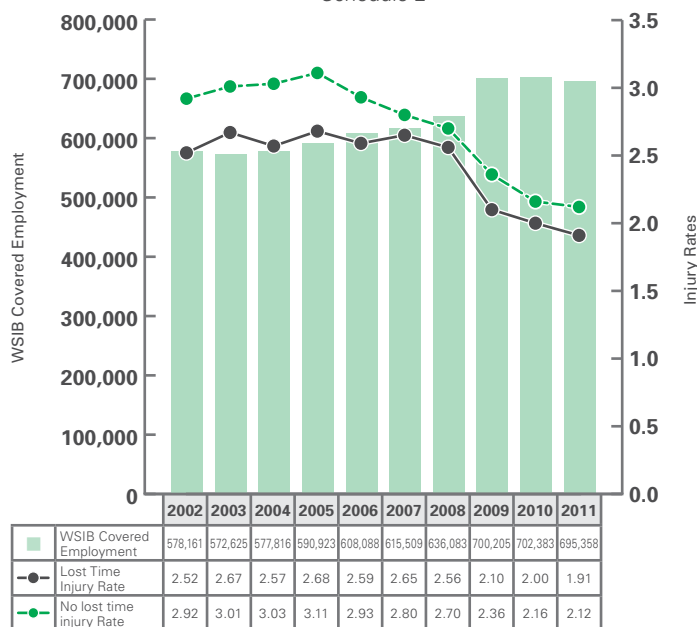

The lost time injury rate takes into account the number of lost time claims and the number of workers employed in order to represent the number of lost time claims per 100 workers. Since 2002, the lost time injury rate declined by 24% and the no lost time injury rate declined by 27%, while the number of workers covered by WSIB has increased by approximately 20%. Overall, Schedule 2 did not experience the same employment trends as Schedule 1, as there were no significant decreases in the covered workforce during the economic downturn. Instead, Schedule 2 experienced a consistent increase in WSIB covered employment (with the exception of 2011), which may be attributed to recent changes in the federal and provincial budgets.

Allowed Claims and Injury Rates

Schedule 2	Injury/Illness Year									
	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
Allowed Lost Time Claims	14,580	15,283	14,865	15,850	15,778	16,339	16,268	14,739	14,040	13,301
Allowed No Lost Time Claims	16,892	17,241	17,487	18,355	17,816	17,220	17,182	16,503	15,192	14,721
WSIB Covered Employment	578,161	572,625	577,816	590,923	608,088	615,509	636,083	700,205	702,383	695,358
Lost Time Injury Rate	2.52	2.67	2.57	2.68	2.59	2.65	2.56	2.10	2.00	1.91
No Lost Time Injury Rate	2.92	3.01	3.03	3.11	2.93	2.80	2.70	2.36	2.16	2.12

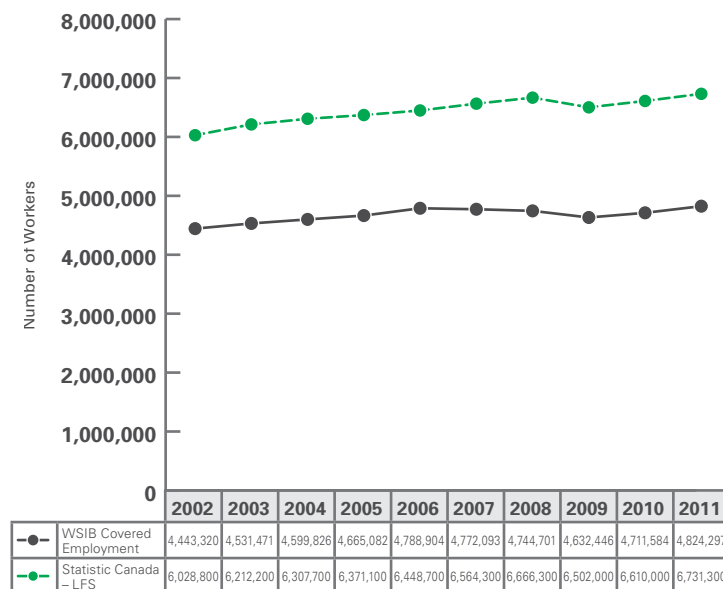

WSIB Covered Employment and Injury Rates by Illness/Injury Year

Schedule 2

Employment Trends by Calendar Year

Schedule 1 & 2

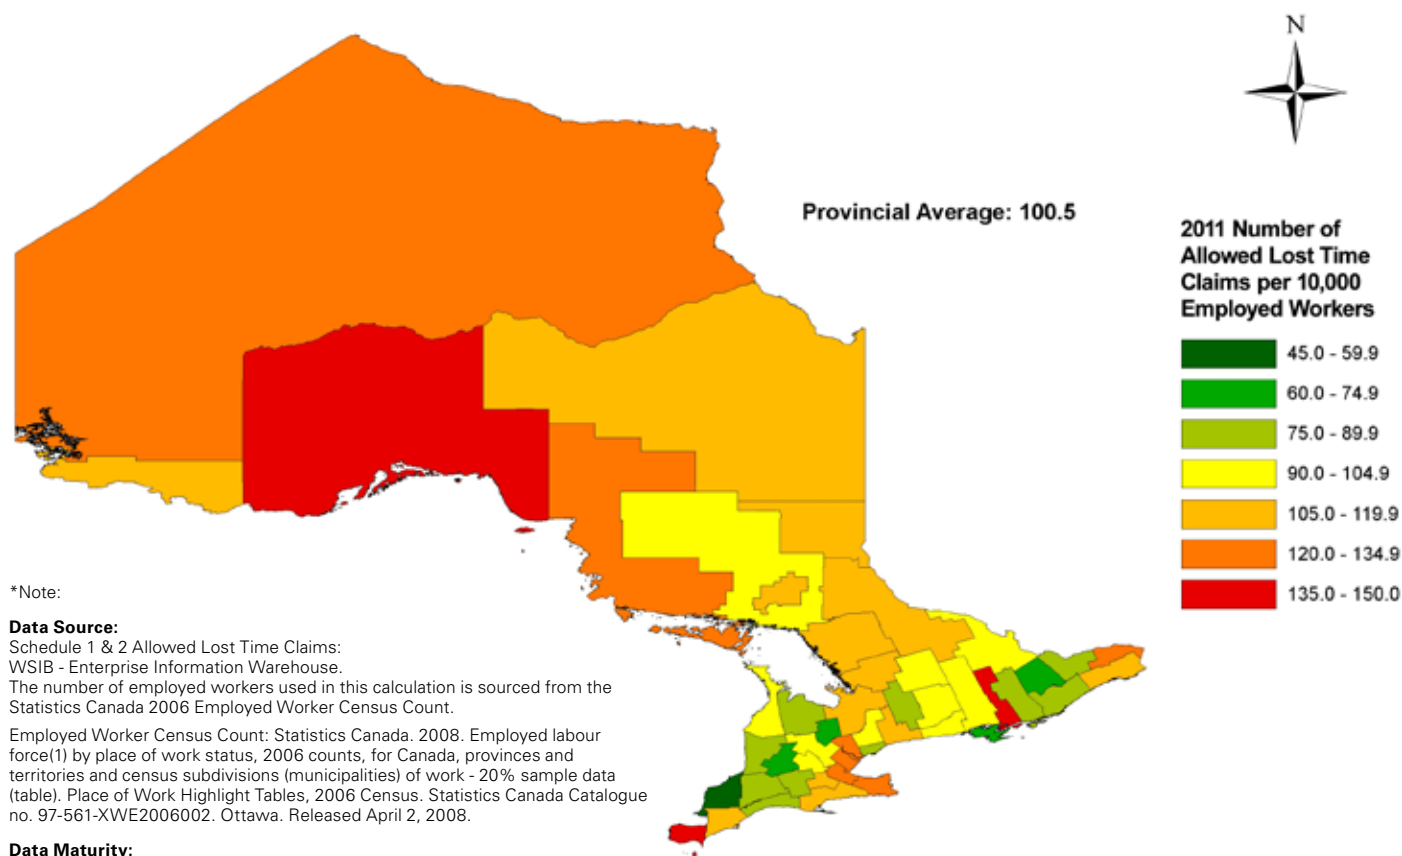

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data maturity of the 2011 WSIB Statistical Report is three months following year end, unless otherwise stated.

Claim Profile – Schedule 2

2011 Allowed Lost Time Claims by Accident Location

The maps below highlight the number of 2011 Schedule 1 and 2 allowed lost time claims per 10,000 employed workers by accident location. The number of employed workers used in this calculation is sourced from the Statistics Canada 2006 Employed Worker Census Count. WSIB accident location has been mapped to Statistics Canada 2006 Census Districts for the province of Ontario. The 2011 Provincial Average for Ontario is 100.5 allowed lost time claims per 10,000 employed workers.

2011 Number of Allowed Lost Time Claims per 10,000 Employed Workers by Statistics Canada Census District*

Data Maturity:

Schedule 1 & 2 Allowed Lost Time Claims: As at March 31st of the following year for 2011 injury year

Data Exclusions:

Schedule 1 & 2 Allowed Lost Time Claims: Allowed lost time claims where accident location is Unknown, Ontario Navigational Waters and Outside of Ontario

Employed Worker Census Count: Employed workers identified as having 'No Fixed Place of Work'

Formula for Number of Lost Time Claims per 10,000 Employed Workers:

$$\frac{\text{Number of Schedule 1 \& 2 Allowed Lost Time Claims}}{\text{Statistics Canada Employed Worker Census Count}} \times 10,000$$

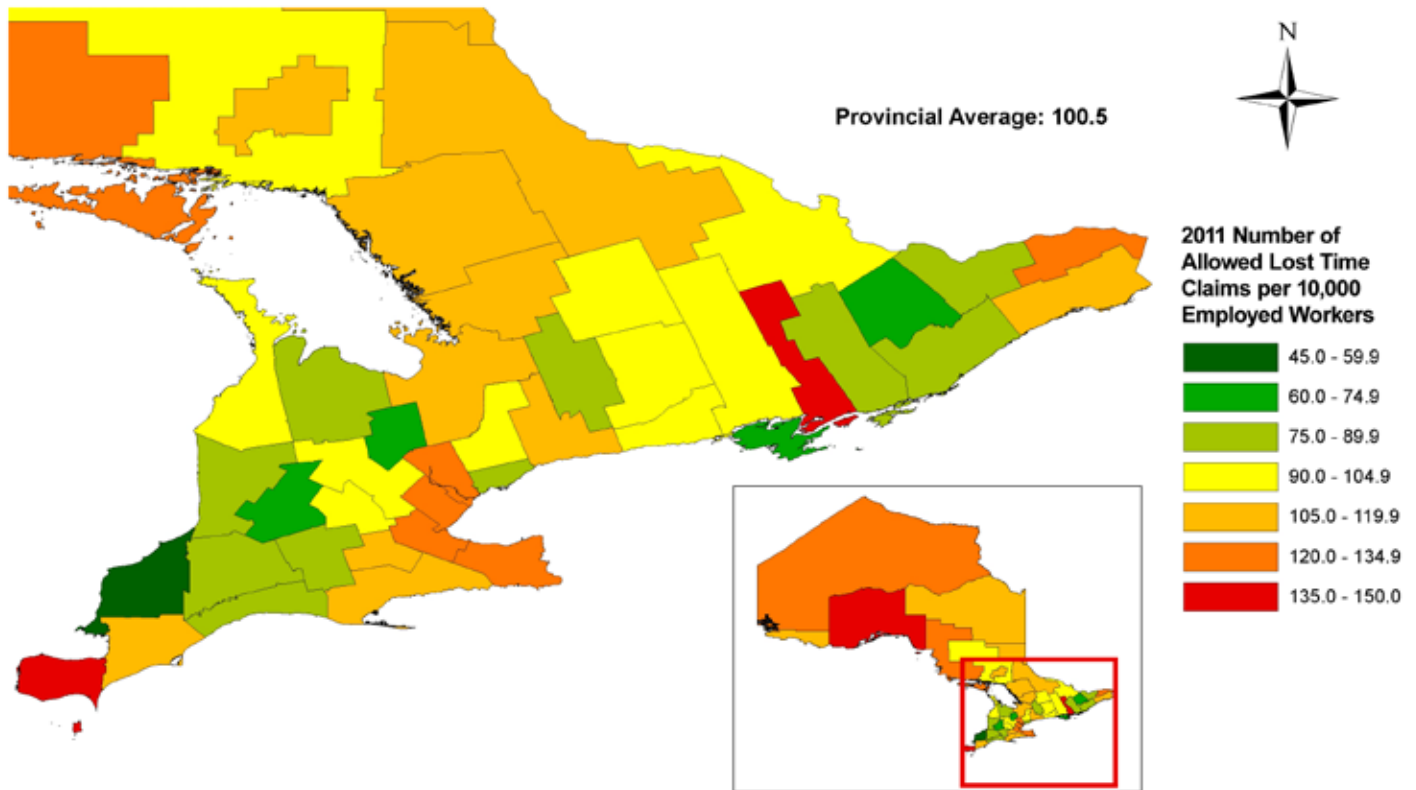

See Appendix for additional data on the number of allowed lost time claims per 10,000 employed workers by accident location.

Claim Profile – Schedule 2 (Continued)

2011 Number of Allowed Lost Time Claims per 10,000 Employed Workers by Statistics Canada Census District* for Southern Ontario

*Note:

Data Source:

Schedule 1 & 2 Allowed Lost Time Claims:

WSIB - Enterprise Information Warehouse.

The number of employed workers used in this calculation is sourced from the Statistics Canada 2006 Employed Worker Census Count.

Employed Worker Census Count: Statistics Canada. 2008. Employed labour force(1) by place of work status, 2006 counts, for Canada, provinces and territories and census subdivisions (municipalities) of work - 20% sample data (table). Place of Work Highlight Tables, 2006 Census. Statistics Canada Catalogue no. 97-561-XWE2006002. Ottawa. Released April 2, 2008.

Data Maturity:

Schedule 1 & 2 Allowed Lost Time Claims: As at March 31st of the following year for 2011 injury year

Data Exclusions:

Schedule 1 & 2 Allowed Lost Time Claims: Allowed lost time claims where accident location is Unknown, Ontario Navigational Waters and Outside of Ontario

Employed Worker Census Count: Employed workers identified as having 'No Fixed Place of Work'

Formula for Number of Lost Time Claims per 10,000 Employed Workers:

(Number of Schedule 1 & 2 Allowed Lost Time Claims/Statistics Canada Employed Worker Census Count) x 10,000

See Appendix for additional data on the number of allowed lost time claims per 10,000 employed workers by accident location.

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months.

Claim Profile – Schedule 2

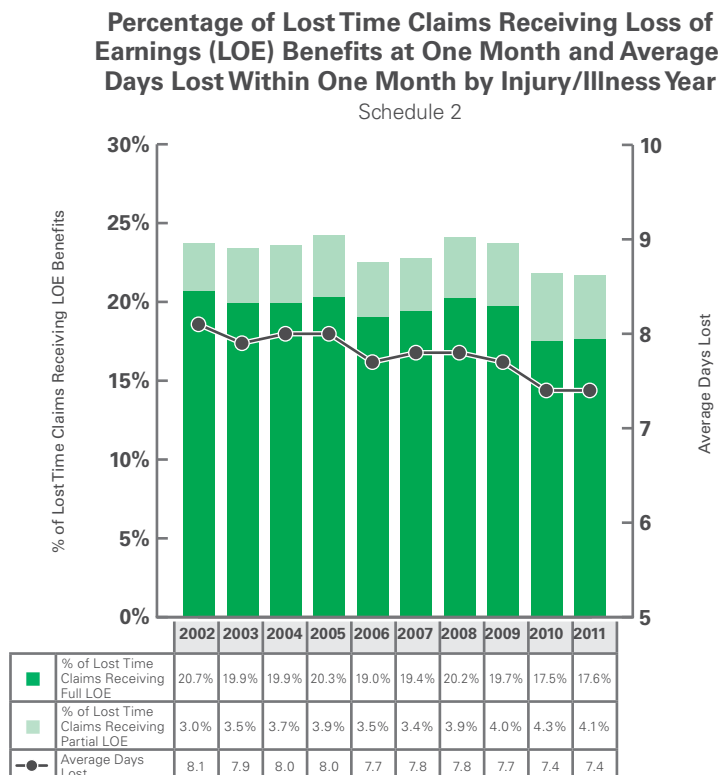

Allowed Lost Time Claims Receiving Loss of Earnings (LOE) Benefits and Average Days Lost

Loss of Earnings (LOE) benefits are wage loss benefits for time lost from work due to a work-related injury or illness occurring subsequent to 1998. The average days lost is the average number of benefit days lost for which LOE benefits were paid. Improved recovery and return to work outcomes will be reflected in both of these measures.

The bar graphs below illustrate the percentage of claims receiving LOE benefits at one, three and six months post injury or illness. Each bar is split by level of LOE benefits – full vs. partial. From 2002 to 2008, the percent of claims receiving benefits (in all three graphs) is steady or trending slightly upwards, indicating more workers remained on LOE benefits. Over the past three years, there has been a shift in claims durations to levels lower than those in 2002. The most significant decrease is evident three months from the date of injury from 12.3% in 2008 to 8.8% in 2011.

Upon further analysis of all three graphs, it can be seen that the overall improvement is due to the decrease in the percentage of claims receiving full LOE benefits.

The line graphs illustrate the average days lost within the first one, three and six months post injury or illness. The average days lost remained steady from 2002 to 2008, but has decreased over the past three years.

(Continued)

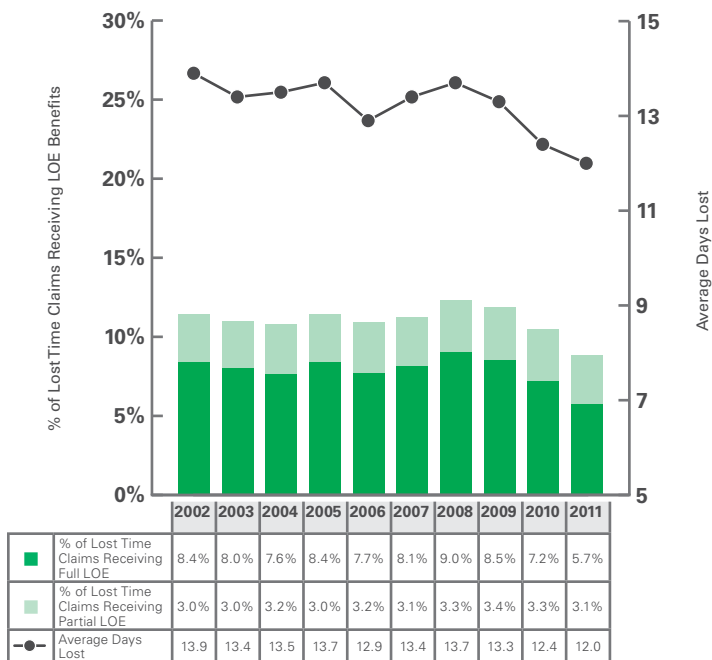

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months.

Claim Profile – Schedule 2 (Continued)

Allowed Lost Time Claims Receiving Loss of Earnings (LOE) Benefits and Average Days Lost

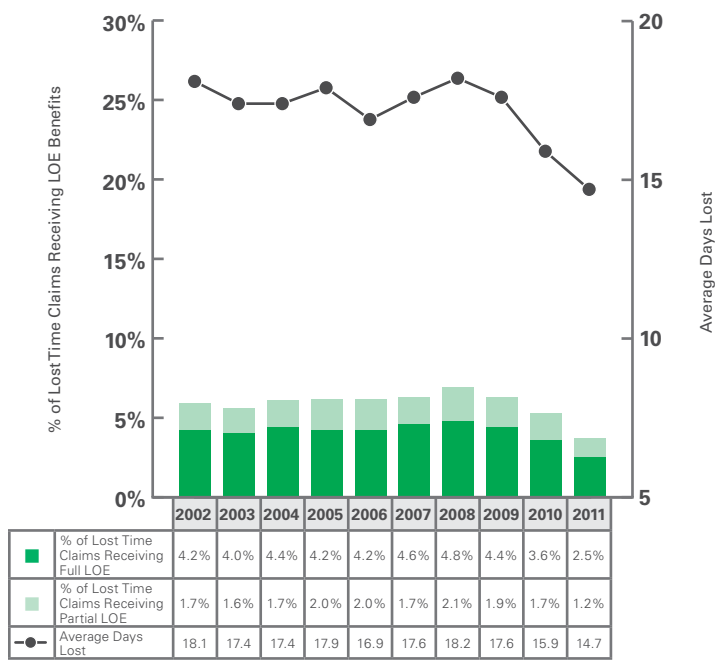

Percentage of Lost Time Claims Receiving Loss of Earnings (LOE) Benefits at Three Months and Average Days Lost Within Three Months by Injury/Illness Year

Schedule 2

Percentage of Lost Time Claims Receiving Loss of Earnings (LOE) Benefits at Six Months and Average Days Lost Within Six Months by Injury/Illness Year

Schedule 2

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months.

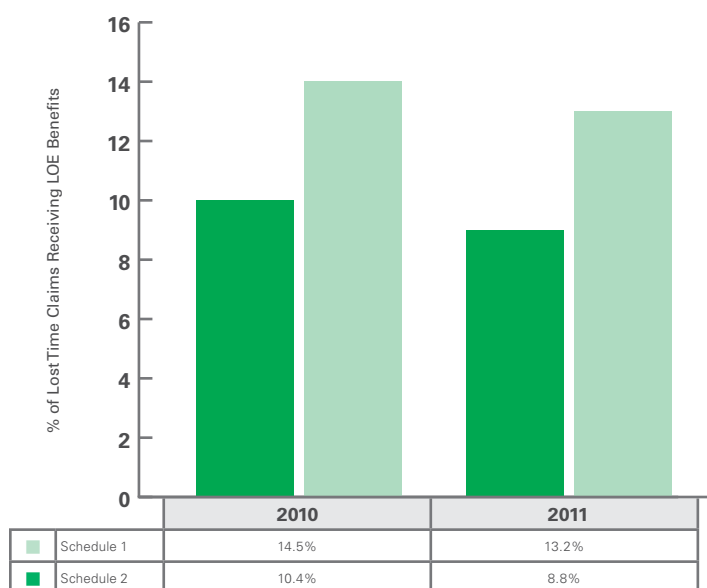

Claim Profile – Schedule 2

Allowed Lost Time Claims Receiving Loss of Earnings (LOE) Benefits at Three Months and Average Days Lost Within Three Months

Although Schedule 2 demonstrated better performance than Schedule 1 in both percentage of claims receiving LOE benefits and average days lost, they did show similar trends. Specifically, Schedule 2 experienced a 1.6% decrease in the percentage of lost time claims receiving LOE at three months when compared to 2010 and had a minimal decrease in average days lost within three months.

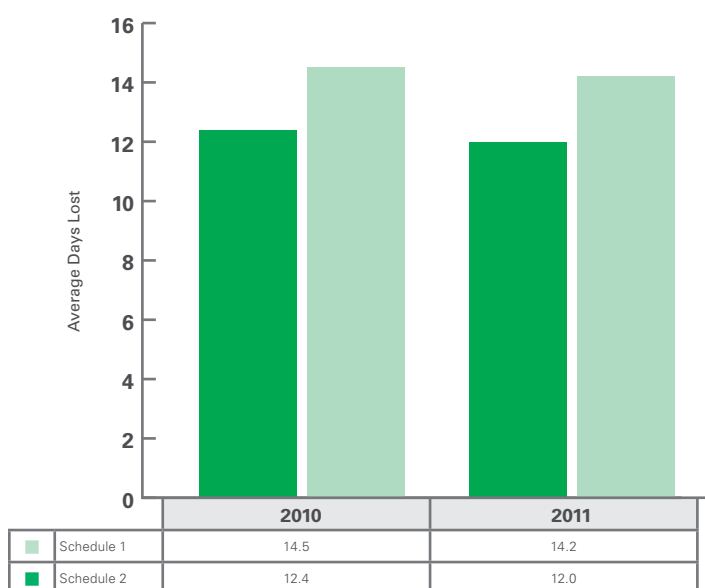

Comparison of Lost Time Claims Receiving Loss of Earnings (LOE) Benefits at Three Months by Injury/Illness Year

Schedule 1 & 2

Comparison of Average Days Lost Within Three Months by Injury/Illness Year

Schedule 1 & 2

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies.
Data in the 2011 WSIB Statistical Report is matured three months.

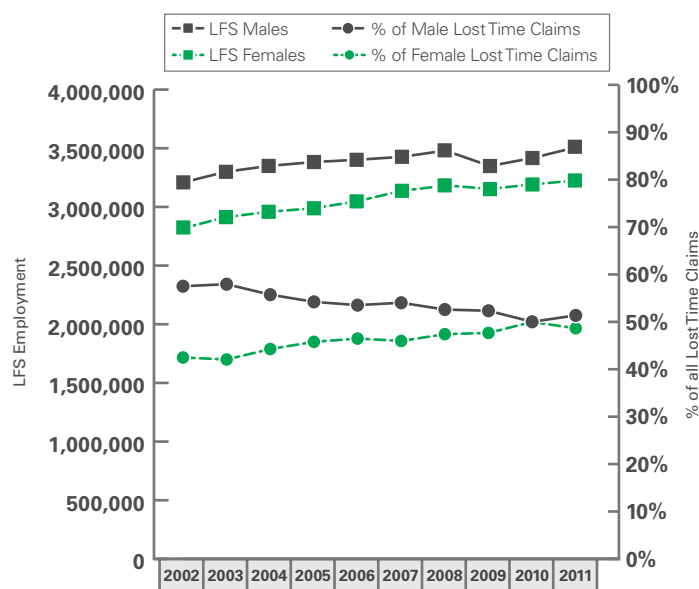

Worker Profile – Schedule 2

Allowed Lost Time Claims by Age and Gender

Between 2002 and 2011, the average gender distribution for all allowed lost time claims was 54% male and 46% female. Whereas Schedule 1 had a larger proportion of Males (64%), Schedule 2 appeared to have an even distribution. Schedule 2 is also more aligned to the Statistics Canada's Labour Force Survey (LFS) which indicated that the average gender distribution of Ontario's employed workforce was 53% male and 47% female. This indicates that the demographic of lost time claims in Schedule 2 are closely aligned to the gender distribution in Ontario's employed workforce.

Two age groups comprised the majority of claims, those between 25 to 44 and 45 to 54. Over the past 10 years, the three older age groups increased as a percentage of all allowed lost time claims, whereas the two youngest age groups decreased. This is a reflection of the continued aging of Ontario's workforce, and is consistent with Statistics Canada employment trends.

Percentage of Schedule 2 Lost Time Claims by Gender Compared to Statistics Canada's LFS Employment by Injury/Illness Year

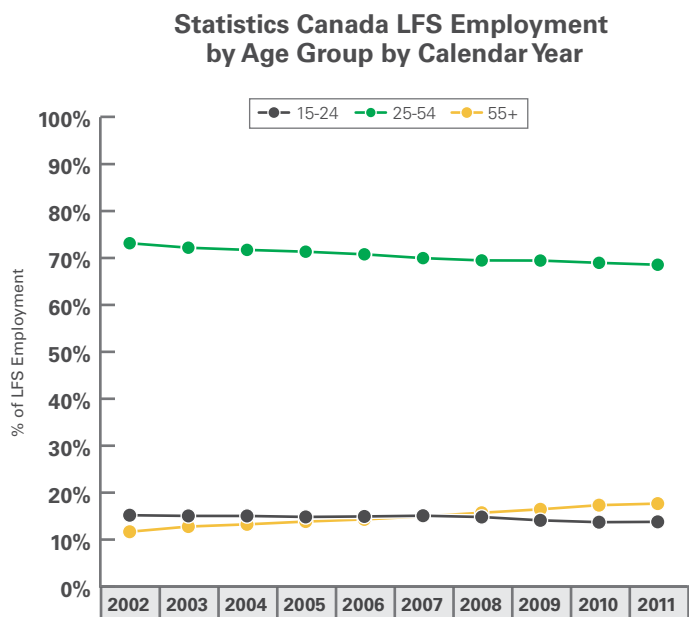

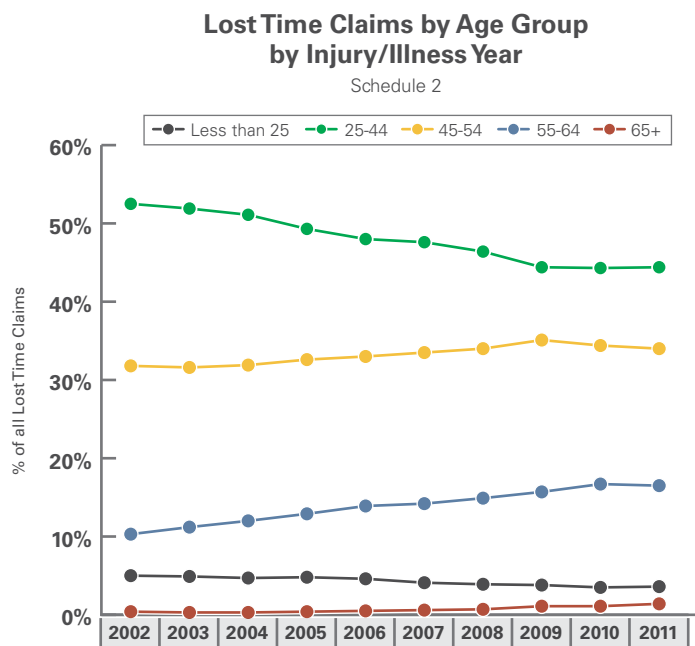

See Appendix for historical and additional data on Age and Gender

(Continued)

Worker Profile – Schedule 2 (Continued)

Allowed Lost Time Claims by Age and Gender

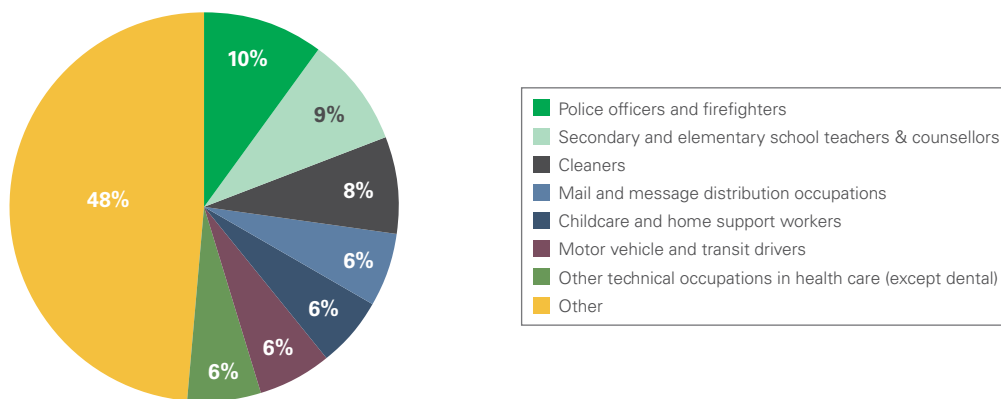

See Appendix for historical and additional data on Age and Gender

Worker Profile – Schedule 2

2011 Allowed Lost Time Claims by Leading Occupations

Ontario has a diverse workforce undertaking a wide variety of occupations. Over the past 10 years, lost time claims were spread across over 150 occupations. Police Officers and Firefighters, Secondary/Elementary School Teachers/Counsellors and Cleaners represented the occupations with the highest number of lost time claims and have remained the leading occupations over the past 10 years. Among the leading occupations, Cleaners experienced a decline since 2002 (10% to 8%), whereas the others either had no change or experienced an increase. Overall, these leading occupations spanned a wide variety of age groups, sectors, events, sources and parts of body injured, but the leading nature of injury was Sprains and Strains for all.

2011 Leading Occupations
Schedule 2

2011 Leading Occupation Characteristics
*Leading characteristics are independent from one another

Schedule 2	Leading Age Group	Leading Gender	Leading Event	Leading Nature of Injury	Leading Part of Body	Leading Source
Police officers and firefighters	35-39	Male	Assaults, violent acts, harassment and acts of war or terrorism	Sprains and strains	Leg(s); Lower back (lumbar, sacral, coccygeal regions)	Persons (bodily motion or condition)
Secondary and elementary school teachers & counsellors	50-54	Female	Fall on same level	Sprains and strains	Multiple body parts	Structures (including walkways, floors and buildings)
Cleaners	45-49	Male	Overexertion	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)	Structures (including walkways, floors and buildings)
Mail and message distribution occupations	50-54	Female	Bodily reaction	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)	Persons (bodily motion or condition)
Childcare and home support workers	50-54	Female	Fall on same level	Sprains and strains	Multiple body parts	Persons (bodily motion or condition)
Motor vehicle and transit drivers	45-49	Male	Bodily reaction	Sprains and strains	Body systems	Persons (bodily motion or condition)
Other technical occupations in health care (except dental)	30-34	Male	Overexertion	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)	Persons (bodily motion or condition)

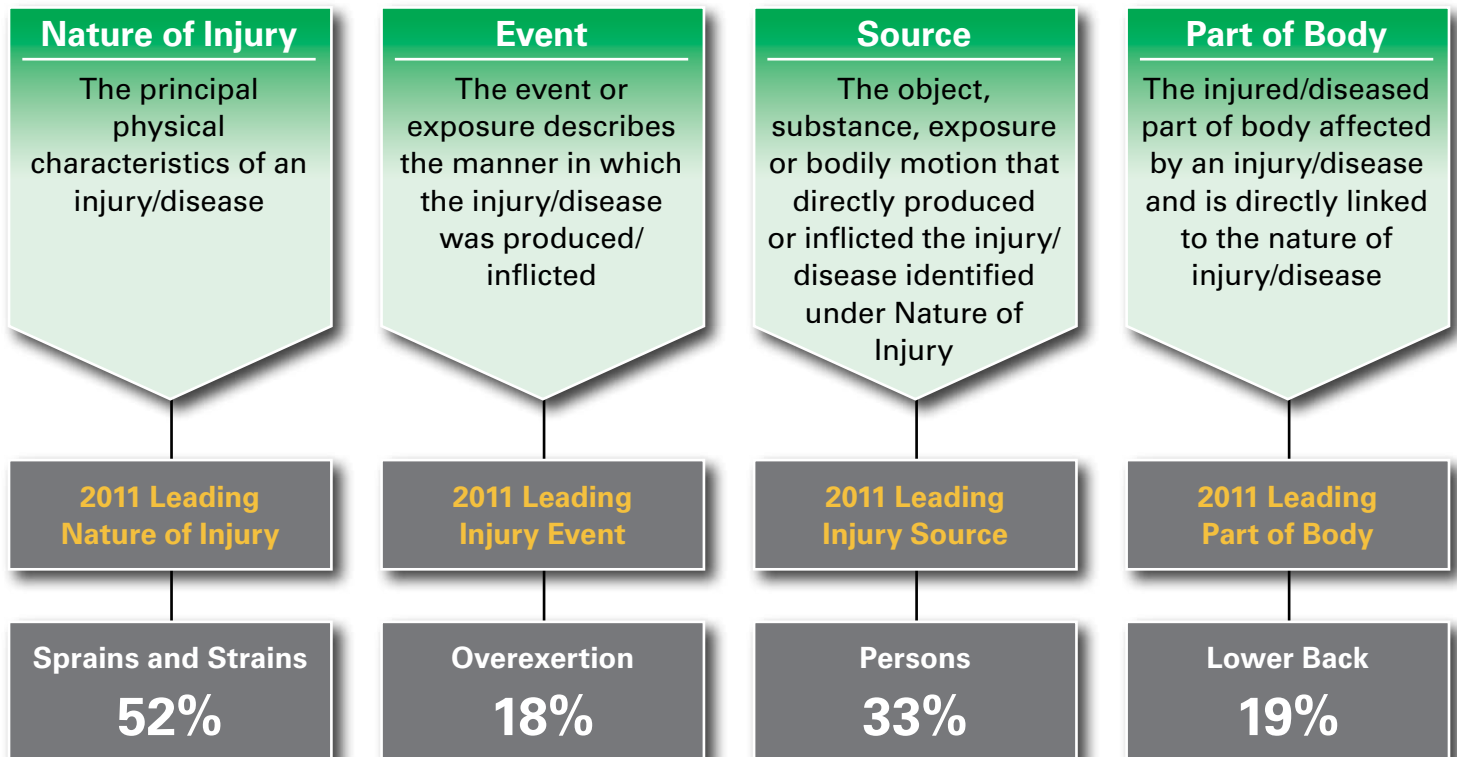

See Appendix for historical and additional data on Occupation

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data maturity of the 2011 WSIB Statistical Report is three months following year end, unless otherwise stated.

Injury Profile – Schedule 2

2011 Schedule 2 Leading Injury Characteristics

Most Workers' Compensation Boards and Commissions in Canada code the injury details of a claim using the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z795-96 codes which allow for more detailed coding injury details. The WSIB adheres to this standard and codes all lost time claims into four categories: Nature of Injury, Event, Source and Part of Body.

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data maturity of the 2011 WSIB Statistical Report is three months following year end, unless otherwise stated.

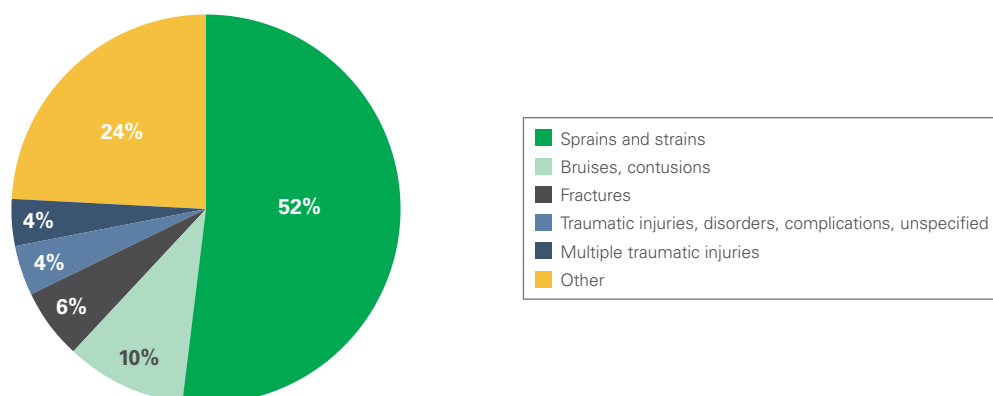

Injury Profile – Schedule 2

2011 Allowed Lost Time Claims by Leading Nature of Injury

From 2002 to 2011, Sprains and Strains consistently represented the leading nature of injury, and accounted for 52% of all lost time claims in 2011. This nature of injury experienced little change as a percentage of all claims when compared to 2010 but increased as a percentage compared to 2002 (46% to 52%). In 2011, Bruises/Contusions accounted for 10% of all lost time claims, while Fractures accounted for 6%.

Unlike Schedule 1, females workers in Schedule 2 represented the greatest percentage of lost time claims in most of the leading nature of injury categories. These types of injuries tended to be highest among the older age groups (45 and older) and concentrated within two occupations, Police Officers/Firefighters and Secondary/Elementary School Teachers and Counsellors. The leading causes of these incidents were Overexertion and Falls on Same Level. They also tended to be a result of two sources and affect three body parts, Persons and Structures and Lower Back, Ankles and Multiple Body Parts.

2011 Leading Nature of Injury
Schedule 2

2011 Leading Nature of Injury Characteristics
*Leading characteristics are independent from one another

Schedule 2	Leading Age Group	Leading Gender	Leading Occupation	Leading Event	Leading Source	Leading Part of Body
Sprains and strains	45-49	Male	Police officers and firefighters	Overexertion	Persons (bodily motion or condition)	Lower back (lumbar, sacral, coccygeal regions)
Bruises, contusions	45-49	Female	Secondary and elementary school teachers & counsellors	Fall on same level	Structures (including walkways, floors and buildings)	Multiple body parts
Fractures	50-54	Female	Secondary and elementary school teachers & counsellors	Fall on same level	Structures (including walkways, floors and buildings)	Ankle(s)
Traumatic injuries, disorders, complications, unspecified, NEC	50-54	Female	Secondary and elementary school teachers & counsellors	Fall on same level	Structures (including walkways, floors and buildings)	Multiple body parts
Multiple traumatic injuries	50-54	Female	Secondary and elementary school teachers & counsellors	Fall on same level	Structures (including walkways, floors and buildings)	Multiple body parts
Others	45-49	Male	Police officers and firefighters	Fall on same level	Persons (bodily motion or condition)	Body systems

See Appendix for historical and additional data on Nature of Injury.

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data maturity of the 2011 WSIB Statistical Report is three months following year end, unless otherwise stated.

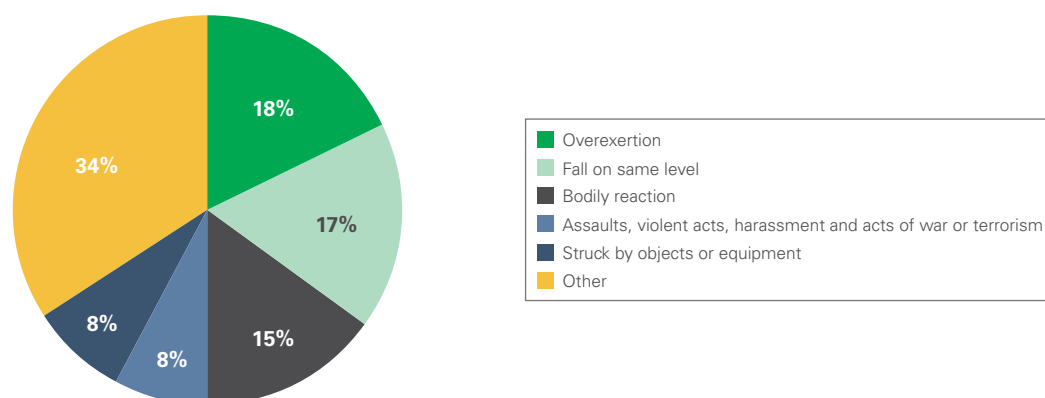

Injury Profile – Schedule 2

2011 Allowed Lost Time Claims by Leading Injury Event

Similar to Schedule 1, from 2002 to 2011, Overexertion consistently represented the leading event, and accounted for 18% of all lost time claims in 2011. This event experienced a 2% reduction in the percentage of all claims compared to 2010, and decreased as a percentage compared to 2002 (23% to 18%). The leading events were Fall on Same Level and Bodily Reaction. When comparing Schedule 1 and 2, Assaults and Violent Acts were a leading event in Schedule 2, representing 8% of all lost time claims in 2011, whereas in Schedule 1 they only represented 2%.

Females represented the greatest percentage of lost time claims for the following two leading injury events, Fall on Same Level and Struck by Objects or Equipment. Within each of the five leading injury event categories, workers aged 45 and older represented the highest number of lost time claims, except for Assaults and Violent Acts, which tended to occur among those 35 to 39 years old. Three occupations represented the greatest percentage of these claims, Police Officers/Firefighters, Secondary/Elementary School Teachers and Counsellors and Other Technical Occupations in Health Care (Except Dental).

2011 Leading Injury Event
Schedule 2

2011 Leading Injury Event Characteristics
*Leading characteristics are independent from one another

Schedule 2	Leading Age Group	Leading Gender	Leading Occupation	Leading Nature of Injury	Leading Source	Leading Part of Body
Overexertion	45-49	Male	Other technical occupations in health care (except dental)	Sprains and strains	Containers, boxes, barrels, packages (pressurized, non pressurized)	Lower back (lumbar, sacral, coccygeal regions)
Fall on same level	50-54	Female	Secondary and elementary school teachers & counsellors	Sprains and strains	Structures (including walkways, floors and buildings)	Multiple body parts
Bodily reaction	45-49	Male	Police officers and firefighters	Sprains and strains	Persons (bodily motion or condition)	Ankle(s)
Assaults, violent acts, harassment and acts of war or terrorism	35-39	Male	Police officers and firefighters	Sprains and strains	Persons (bodily motion or condition)	Multiple body parts
Struck by objects or equipment	45-49	Female	Secondary and elementary school teachers & counsellors	Bruises, contusions	Recreational/ Athletic Equipment	Finger(s), fingernail(s)

See Appendix for historical and additional data on Injury Event

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data maturity of the 2011 WSIB Statistical Report is three months following year end, unless otherwise stated.

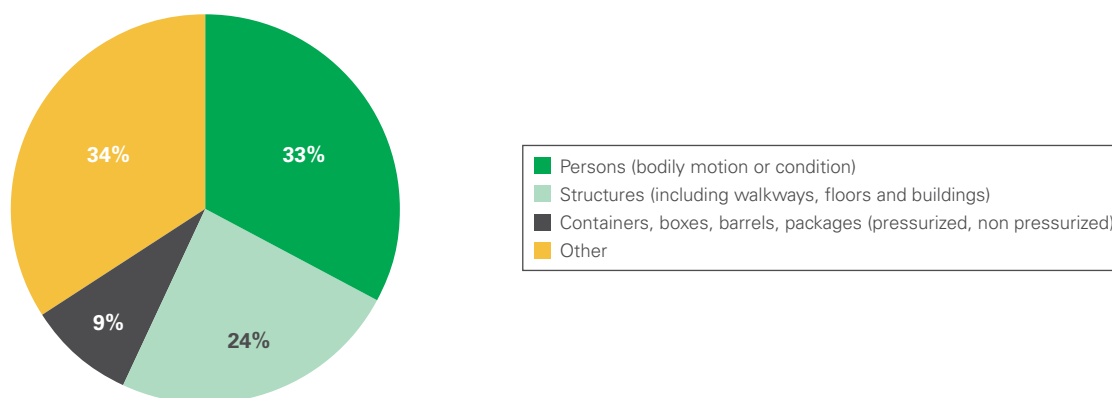

Injury Profile – Schedule 2

2011 Allowed Lost Time Claims by Leading Injury Source

Over the past 10 years, Persons (bodily motion or condition) consistently represented the injury source with greatest number of lost time claims, and accounted for 33% of all lost time claims in 2011. Similar to Schedule 1, Structures (including walkways, floors and buildings) has experienced an upward trend, with a 3% increase in the percentage of all claims compared to 2010 and a 1% increase as a percentage compared to 2002 (23% to 24%).

Among the two leading sources of injury, females represented the greatest percentage of lost time claims over males. Similar to Schedule 1, these types of claims tended to be highest among the older age groups (45 and older) and within a variety of occupations and events. The leading nature of injury for all three sources was Sprains and Strains and the part of body most often injured was the Lower Back.

2011 Leading Injury Source
Schedule 2

2011 Leading Injury Source Characteristics

*Leading characteristics are independent from one another

Schedule 2	Leading Age Group	Leading Gender	Leading Occupation	Leading Event	Leading Nature of Injury	Leading Part of Body
Persons (bodily motion or condition)	45-49	Female	Police officers and firefighters	Bodily reaction	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)
Structures (including walkways, floors and buildings)	50-54	Female	Secondary and elementary school teachers & counsellors	Fall on same level	Sprains and strains	Multiple body parts
Containers, boxes, barrels, packages (pressurized, non pressurized)	45-49	Male	Other transport equipment operators and related workers	Overexertion	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)

See Appendix for historical and additional data on Injury Source.

Injury Profile – Schedule 2

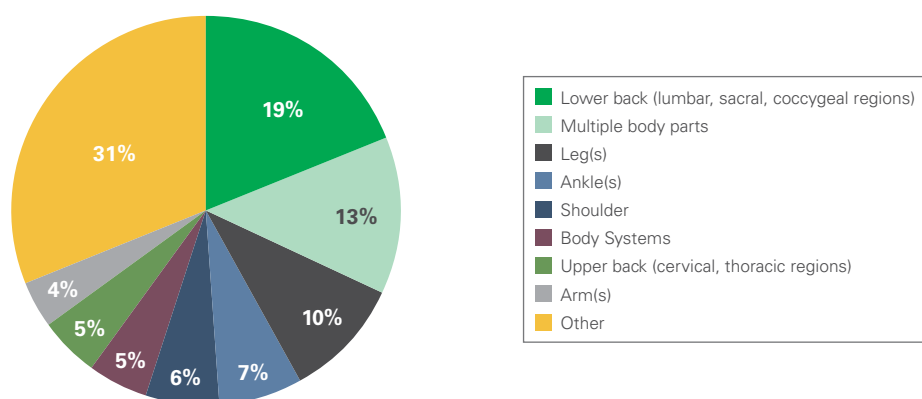

2011 Allowed Lost Time Claims by Part of Body

Similar to Schedule 1, from 2002 to 2011, the Lower Back consistently represented the leading part of body injured with 19% of all lost time claims in 2011. The second leading part of body, Multiple Body Parts, has experienced an upward trend over the 10 year period, with a 4% increase as a percentage compared to 2002 (9% to 13%) and a 2% increase compared to 2010 (11% to 13%). The other leading part of body injured, Leg(s), has experienced little change as a percentage of all claims over the past 10 years.

Similar to Schedule 1, these types of claims were highest among males and those in the older age groups (45 and older) but were within a variety of occupations and events. The leading nature of injury for these leading claims was Sprains and Strains and the leading source was Persons.

2011 Leading Part of Body

Schedule 2

2011 Leading Part of Body Characteristics

*Leading characteristics are independent from one another

Schedule 2	Leading Age Group	Leading Gender	Leading Occupation	Leading Event	Leading Nature of Injury	Leading Source
Lower back (lumbar, sacral, coccygeal regions)	45-49	Male	Other technical occupations in health care (except dental)	Overexertion	Sprains and strains	Persons (bodily motion or condition)
Multiple body parts	50-54	Female	Secondary and elementary school teachers & counsellors	Fall on same level	Sprains and strains	Structures (including walkways, floors and buildings)
Leg(s)	45-49	Male	Police officers and firefighters	Bodily reaction	Sprains and strains	Persons (bodily motion or condition)
Ankle(s)	40-44, 45-49	Male	Secondary and elementary school teachers & counsellors	Bodily reaction	Sprains and strains	Persons (bodily motion or condition)
Shoulder	45-49	Male	Cleaners	Overexertion	Sprains and strains	Persons (bodily motion or condition)
Body systems	45-49	Male	Motor vehicle and transit drivers	Exposure to caustic, noxious, or allergenic substances	Mental disorders or syndromes	Persons (bodily motion or condition)
Upper back (cervical, thoracic regions)	45-49	Male	Other technical occupations in health care (except dental)	Overexertion	Sprains and strains	Persons (bodily motion or condition)
Arm(s)	45-49	Male	Police officers and firefighters	Overexertion	Sprains and strains	Persons (bodily motion or condition)

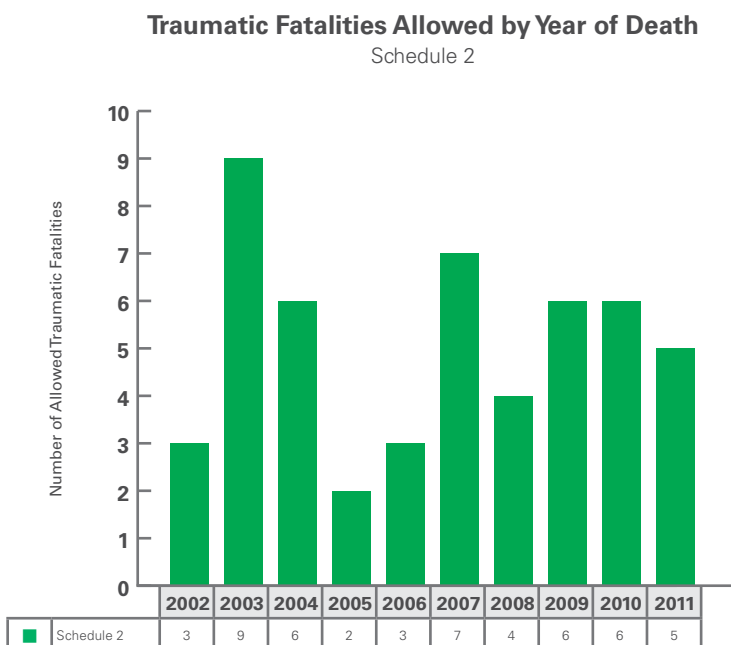

See Appendix for historical and additional data on Part of Body.

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data maturity of the 2011 WSIB Statistical Report is three months following year end, unless otherwise stated.

Fatalities – Schedule 2

Traumatic Fatalities Allowed by Year of Death

Traumatic Fatalities are allowed claims for workers who died of a work-related traumatic incident. In 2011, there were five traumatic fatalities allowed. Over the past 10 years, from 2002 to 2011, more than 85% of all traumatic fatalities have occurred among males with the predominant age group being 54 to 59. A significant cause of traumatic fatalities continues to be Motor Vehicle Incidents as they accounted for more than 40% of these deaths over the 10 year period.

Over the 10 year period, from 2002 to 2011, the following age groups, events and gender accounted for the highest traumatic fatality percentages.

- Age Groups: 50-54 (21.6%), 35-39 (17.6%), 30-34 (15.7%)
- Events: Motor Vehicle Incidents (43.1%), Other Transportation Incidents (ie. Aircraft) (25.5%)
- Gender: Males (88.2%)

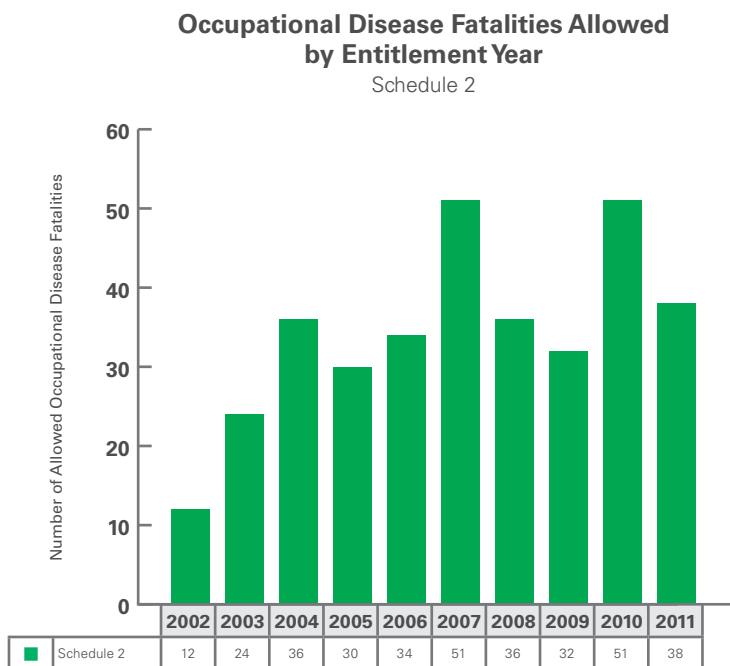

See Appendix for historical and additional data on Traumatic Fatalities

Fatalities – Schedule 2

Occupational Disease Fatalities Allowed by Entitlement Year

Occupational Disease Fatalities are allowed claims for workers who died of a work-related disease or condition. In 2011, there were 38 occupational disease fatalities allowed, which is a significant reduction compared to the prior year. This reduction reflects fewer Occupational Disease fatalities reported to WSIB.

Over the past 10 years, from 2002 to 2011 occupational disease fatalities have predominantly occurred among males. During this period, more than 25% of occupational disease deaths were caused by mesothelioma.

Over the 10 year period, from 2002 to 2011, the following events and gender accounted for the highest Occupational Disease fatality percentages.

- Diseases: Mesothelioma (26.8%), Lung Cancer (9.3%), Brain Cancer (6.7%), Leukemia (6.4%)
- Gender: Males (97.4%)

See Appendix for historical and additional data on Occupational Disease Fatalities.

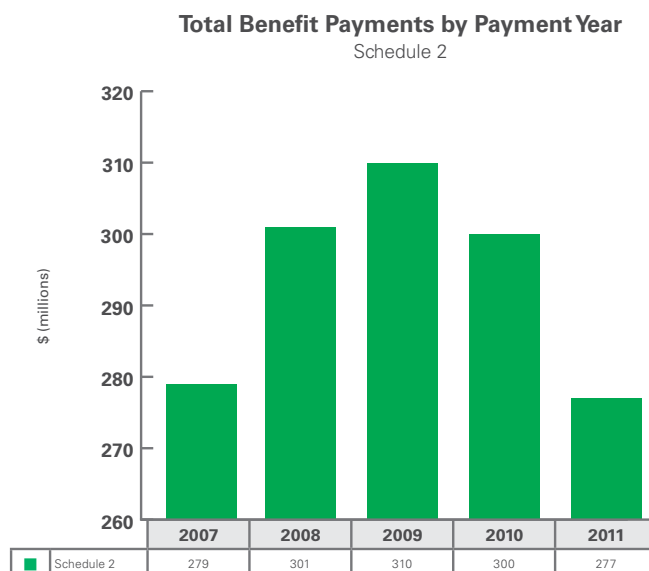

Benefit Payments – Schedule 2

Benefit Payments by Benefit Category

The WSIB administers the payment of benefits to injured workers of Schedule 2 employers. The WSIB recovers the cost of these benefits from those Schedule 2 employers. Benefit payments are payments made during a specific year to or on behalf of injured workers and are detailed by the eight benefit categories found in the table below.

Since 2009, registered claims have consistently decreased and benefit payments began a downward trend in 2010. This reversal in the trend is due to the continued reduction in registered claims but more significantly due to changes to the service delivery model that resulted in overall improvements, specifically, a newly implemented health care strategy and creation of a new work reintegration program.

Over the past five years, Loss of Earnings (LOE), Workers' Pension and Health Care represented the greatest percentage of benefits paid to injured workers. In 2011 these three benefit categories contributed to 80% of all the benefit payments administered by WSIB on behalf of Schedule 2 employers for their injured workers.

Benefit Payments by Benefit Category

Schedule 2	Benefit Payment Year									
	2007		2008		2009		2010		2011	
	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments
Workers' Pension	\$64	23%	\$64	21%	\$64	21%	\$61	20%	\$58	21%
Loss of Earnings	\$95	34%	\$112	37%	\$118	38%	\$110	37%	\$102	37%
Health Care	\$54	19%	\$59	20%	\$66	21%	\$65	22%	\$60	22%
External Providers	\$4	1%	\$4	1%	\$4	1%	\$5	2%	\$3	1%
Non-Economic Loss	\$15	5%	\$14	5%	\$15	5%	\$16	5%	\$11	4%
Future Economic Loss	\$22	8%	\$21	7%	\$20	6%	\$20	7%	\$18	6%
Survivor Benefits	\$21	8%	\$22	7%	\$18	6%	\$21	7%	\$22	8%
Other	\$4	1%	\$5	2%	\$5	2%	\$2	1%	\$3	1%
Total Benefit Payments	\$279	100%	\$301	100%	\$310	100%	\$300	100%	\$277	100%

Prior to 2011, all publications referenced five benefit payment categories. As of 2011 these categories were reclassified into eight categories. As such, prior year's have been reclassified in this report to reflect the new Benefit Categories

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Benefit payments represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

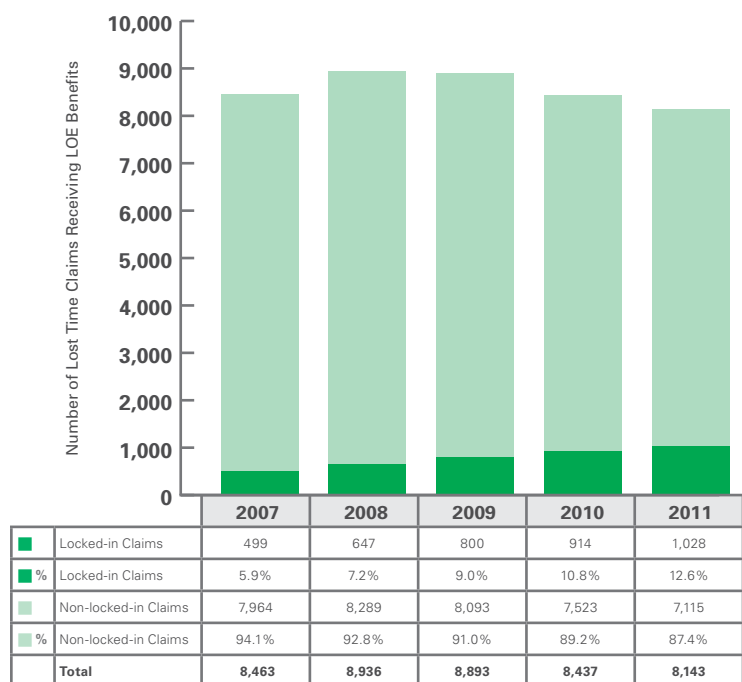

Benefit Payments – Schedule 2

Loss of Earnings Benefit Payments

Similar to Schedule 1, Loss of Earnings (LOE) was consistently the leading benefit category for payments administered by the WSIB on behalf of Schedule 2 employers. LOE benefits represent wage loss benefits for time lost from work due to a work-related injury or illness occurring subsequent to 1998. The number of allowed lost time claims for Schedule 2 injured workers receiving LOE benefits has been steadily decreasing since 2008. Factors that may be contributing to this are improved claims management, less claims in the system and shorter claims durations; a reflection of more workers recovering, returning to work and mitigating their wage loss.

Locked-in claims are increasing as a percentage of all claims receiving an LOE benefit, however with fewer claims entering the system and improved return to work outcomes, over time fewer claims will require a locked-in loss of earnings award.

Loss of Earnings Claims by Benefit Payment Year
Schedule 2

Claim considered locked-in if lock-in payment occurred at any point within Benefit Payment year.
Claim population includes Bill 99 Legislation only.

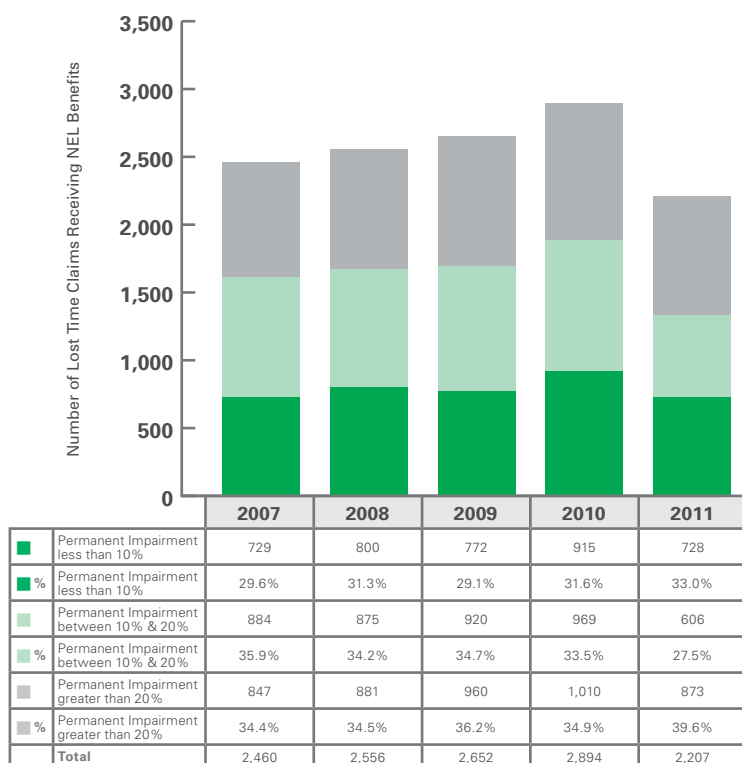

Benefit Payments – Schedule 2

Non Economic Loss Benefit Payments

Non Economic Loss (NEL) benefits are based on the age of the worker and the severity of the permanent impairment (PI) and are awarded to recognize that, beyond a wage loss, an injured worker has also suffered a physical, functional or psychological loss and are calculated as a percentage of whole body impairment.

In 2011 the number of allowed claims currently in the WSIB system receiving a NEL benefit has decreased by 23.7% from 2010. This decrease is a reflection of a reduction in the percentage of permanent impairments experienced (specifically those receiving a PI between 10% and 20%), improved outcomes for injured workers, and fewer claims entering the system in recent years.

Non Economic Loss Claims by Payment Year
Schedule 2

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Benefit payments represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Payments – Schedule 2

Health Care Payments

Health Care payments are made to or on behalf of injured or ill workers for Schedule 2 employers and in 2011 represented 22% of total payments. There has been a decrease in Health Care payments since 2010, which can mainly be attributed to a decrease in overall claims, and also due to the newly implemented health care strategy, which includes initiatives such as a Low Back Injury Program, and the direction to limit the use of narcotic drugs highlighted in the Narcotics Strategy.

Schedule 2	Health Care Payments by Leading Service Categories			
	Payment Year			
Service Category	2010 (000s)	% of 2010 Total	2011 (000s)	% of 2011 Total
Drug Benefits	\$7,475	11.5%	\$6,735	11.3%
Specialized Clinical Services and Programs	\$10,799	16.7%	\$10,167	17.1%
Physiotherapy, Chiropractic and other Non-Physician Treatment	\$12,114	18.7%	\$10,349	17.4%
Allowances (Clothing, Independent Living, Personal Care)	\$4,446	6.9%	\$4,366	7.3%
Physician Services via Ministry of Health & Long Term Care	\$5,513	8.5%	\$5,416	9.1%
Hospital In/Out Patient	\$5,677	8.8%	\$4,755	8.0%
Hearing Aid Devices and Services	\$4,795	7.4%	\$3,782	6.4%
Travel and Accommodations	\$3,857	6.0%	\$3,808	6.4%
Reports and Information	\$3,766	5.8%	\$3,571	6.0%
Medical Devices	\$2,692	4.2%	\$2,312	3.9%
Others	\$3,593	5.6%	\$4,278	7.2%
Total	\$64,726	100.0%	\$59,540	100.0%

External Provider Expense Payments

Since the implementation of the new Work Reintegration Program in November 2010, there has been a significant decrease in the payments for external providers. In 2011, Schedule 2 claims experienced a 42% decrease in external provider payments, after taking into account the costs to in-source these initiatives, we achieved a \$44 million net savings while generating better outcomes for injured workers. Education/Training continues to be the largest category representing 37% of external provider payments in 2011.

Schedule 2	External Provider Payments by Leading Service Categories			
	Payment Year			
Service Category	2010 (000s)	% of 2010 Total	2011 (000s)	% of 2011 Total
Assessments/Evaluations	\$459	9.4%	\$329	11.5%
Education/Training	\$2,237	45.7%	\$1,048	36.8%
Placement & Retention	\$157	3.2%	\$234	8.2%
Provider Related	\$954	19.5%	\$370	13.0%
Supplies & Equipment	\$281	5.7%	\$197	6.9%
Travel Related	\$807	16.5%	\$611	21.4%
Other*	\$1	0.0%	\$61	2.1%
Total	\$4,896	100.0%	\$2,849	100.0%

*Other Category includes GL Adjustment, Other, Support Services and Miscellaneous Expenses

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Benefit payments represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Focus – Schedule 2

High Impact Claims

High impact claims* is a term used to identify allowed lost time claims that have been shown to have significant impacts on workers and employers. The WSIB is focused on mitigating the risks for these claims to maximize return to work, recovery outcomes and to reduce costs. WSIB has implemented many initiatives to improve outcomes in these claims, including specialized case management teams, new evidence-based health services and expedited access to expert medical intervention.

We have identified three types of high impact claims, those involving the Low Back, Shoulder and Fractures. Over the past five years, these three types of claims have represented on average approximately 35% of all benefit payments and more than 30% of all lost time claims.

In 2011, these three types of high impact claims represented approximately 36% of all lost time benefit payments.

**High Impact Claims by Benefit Payment Percentage
by Payment Year**

Schedule 2

*These categories are mutually exclusive in the order of: 1) Lower Back 2) Shoulder 3) Fracture.

(Continued)

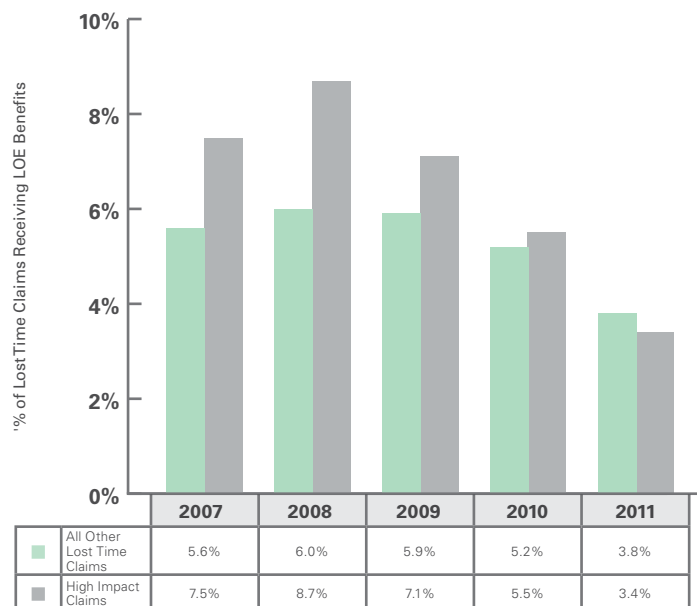

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months, with the exception of benefit payments, which represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Focus – Schedule 2 (Continued)

The percentage of high impact claims receiving Loss of Earnings (LOE) benefits at six months is higher than all other lost time claims, except for 2011 where a decrease was experienced. The average days lost within six months illustrates similar trends with high impact claims having a greater number of average days lost compared to all other lost time claims. WSIB's continued focus on mitigating the consequences of high impact claims has contributed to the 2011 reductions in both the percentage of claims receiving LOE at six months and the average days lost within six months as a result of better return to work and recovery outcomes.

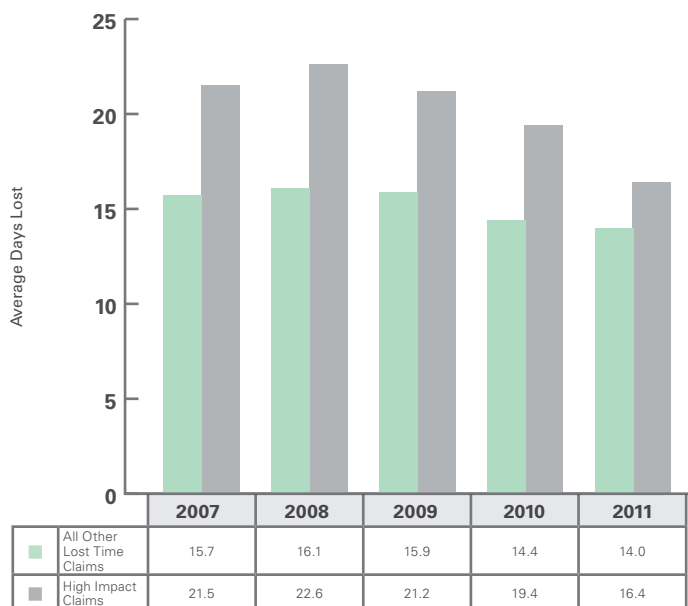

Percentage of High Impact Claims Receiving Loss of Earnings (LOE) Benefits at Six Months by Injury/Illness Year

Schedule 2

High Impact Claims Average Days Lost Within Six Months by Injury/Illness Year

Schedule 2

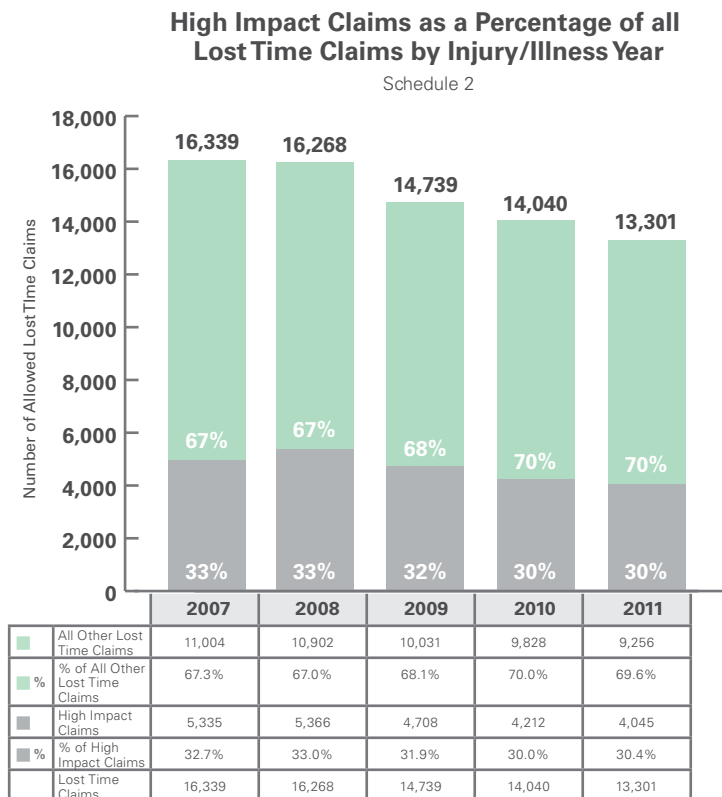

(Continued)

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months, with the exception of benefit payments, which represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Focus – Schedule 2 (Continued)

In 2011, these three types of high impact claims represented approximately 30% of all lost time claims.

High impact claims are predominantly occurring in males as they represent more than 55% of these claims each year. The 50 to 54 age group which is among the four leading age groups is increasing slightly in recent years. This is a reflection of the continued aging of the Ontario workforce and is consistent with Statistics Canada employment trends.

Leading High Impact Claims Characteristics					
Schedule 2	Injury/Illness Year				
	2007	2008	2009	2010	2011
Gender	Male - 58.1% Female - 41.9%	Male - 56.8% Female - 43.2%	Male - 58.8% Female - 41.1%	Male - 55.5% Female - 44.5%	Male - 55.6% Female - 44.4%
Leading Age Groups	45 to 49 - 18.9% 40 to 44 - 18.0% 50 to 54 - 15.7% 35 to 39 - 12.2%	45 to 49 - 18.6% 50 to 54 - 16.9% 40 to 44 - 15.4% 35 to 39 - 12.4%	45 to 49 - 19.0% 50 to 54 - 16.6% 40 to 44 - 15.6% 55 to 59 - 11.5% 35 to 39 - 11.4%	45 to 49 - 18.1% 50 to 54 - 16.5% 40 to 44 - 14.4% 35 to 39 - 12.4%	45 to 49 - 17.8% 50 to 54 - 17.5% 40 to 44 - 14.6% 35 to 39 - 12.0%

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months, with the exception of benefit payments, which represent cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Glossary

Term	Business Definition
% of Workforce Covered	Percentage of the employed labour force that is covered under the WSIA.
Allowed Lost Time Claim	A lost time claim is created when a worker suffers a work-related injury/disease which results in: • being off work past the day of accident • loss of wages/earnings, or • a permanent disability/impairment.
Allowed No Lost Time Claim	A no lost time claim results from a work-related injury where no time is lost from work, other than on the day of accident, but where health care is required. The health care costs resulting from the injury are paid by the WSIB.
Allowed Occupational Disease Fatalities	Allowed claims for workers who died of a work-related disease or condition
Allowed Traumatic Fatalities	Allowed claims for workers who died of a work-related traumatic incident
Average Days Lost	The average number of days lost for which wage loss benefits were paid for claims within 1 month, 3 months or 6 months after the injury/illness occurred.
Average Loss of Earnings per Full Paid Day	Average amount paid for a single day off work, adjusted for inflation
Benefit Payment Year	The year benefit payments were made to or on behalf of injured workers.
Benefit Payments	Payments made to or on behalf of injured and ill workers. Includes Loss of Earnings (LOE), Workers' Pension, Health Care, Future Economic Loss (FEL), Survivor Benefits, External Providers and Non-Economic Loss (NEL). Excludes benefit liabilities and claims administration costs.
Data Maturity	Data continues to be revised after the year has concluded as additional claims are reported and decisions on complex claims are made. The revision of data after the year has concluded is called "maturing". All data contained in this report is matured 3 months, with the exception of benefit payments which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.
Employer	An employer means every person having in his, her or its service under a contract of service or apprenticeship another person engaged in work in or about an industry and includes, 1. a trustee, receiver, liquidator, executor or administrator who carries on an industry, 2. a person who authorizes or permits a learner to be in or about an industry for the purpose of undergoing training or probationary work, or 3. a deemed employer. Coverage under the WSIA only applies to those employers: • whose operations are compulsorily covered by Schedules 1 or 2 of the Act, or • whose operations have been added to Schedule 1 of the Act by application, or • who have optional insurance only
Entitlement Year	The year in which a decision was made on a claim.
External Provider Payments	These are payments associated with the reintegration program and represent payments to external agencies providing rehabilitation services, such as training programs to assist an injured worker's return to work and the costs of work transition assessments and plans, in the case of injured workers not returning to work with their pre-injury employer.
Future Economic Loss Benefit Payment	Compensation to a worker, who was injured after January 1, 1990 and prior to January 1, 1998 and suffers a workplace injury resulting in a permanent impairment or temporary disability for 12 continuous months.
Health Care Payment	Payments made on behalf of an injured or ill worker for professional services provided by health care practitioners, hospitals and health facilities as well as the cost of drugs, attendant services, home or vehicle modifications, assistive devices and prostheses, extraordinary transportation costs to obtain health care and other measures to facilitate independent living and to improve the quality of an injured or ill worker's life.
High Impact Claims	WSIB has identified a group of allowed lost time claims that have been shown to have significant impacts on workers and employers. These claims are those involving the lower back, shoulder and fractures.
Illnesses (occupational disease)	An occupational disease includes: - a disease resulting from exposure to a substance relating to a particular process, trade or occupation in an industry - a disease peculiar to or characteristic of a particular industrial process, trade or occupation - a medical condition that in the opinion of the Board requires a worker to be removed either temporarily or permanently from exposure to a substance because the condition may be a precursor to an occupational disease Occupational disease claims include disease claims, noise induced hearing loss claims, disease fatalities and Pre-1990 100% permanent disability pension fatalities.
Industry Sector	The WSIB's operations are organized into 17 industry sectors (Schedule 2 is a separate industry sector).
Injury	A worker who sustains a personal injury by accident arising out of and in the course of his or her employment is entitled to benefits under the insurance plan.
Injury/Illness Year	The year in which injury or illness occurred.
Injury Event	Describes the manner in which the injury/disease was produced/inflicted and is based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIIS). This standard is based on the Canadian Standards Association (CSA) Z95-96 codes which allow for more detailed coding injury details.

Injury Source	The object, substance, exposure or bodily motion that directly produced or inflicted the injury/disease identified under Nature of Injury and is based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z95-96 codes which allow for more detailed coding injury details.
Locked-In Claim	Those claims, with an injury/illness date on or after January 1, 1998 (Bill 99), where a final review of the loss of earnings benefit at 72 months post injury/illness has been completed and the benefit will continue to be paid to age 65, with few exceptions.
Loss of Earnings Benefits	Wage loss benefits for time lost from work due to a work-related injury or illness occurring subsequent to 1998.
Lost Time Injury Rate	The number of allowed lost-time injury and illness claims per 100 Full-Time Equivalent (FTE) workers for the injury year specified.
Nature of Injury	The principal physical characteristics of an injury/disease and based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z95-96 codes which allow for more detailed coding injury details.
No Lost Time Injury Rate	The number of allowed no lost-time injury and illness claims per 100 Full-Time Equivalent (FTE) workers for the injury year specified.
Non Economic Loss Benefits	Compensation paid to a worker, beyond wage loss who suffers a permanent impairment as a result of an injury based on the severity of the permanent impairment and the age of the worker.
Non Locked-In Claim	Those claims, with an injury/illness date on or after January 1, 1998 (Bill 99), receiving loss of earnings benefits that may not be reviewed at the 72 month post injury/illness date.
Occupation	A major grouping of occupations that are coded based on (National Occupational Classification) standards.
Other Benefit	Payments made to or on behalf of injured and ill workers. Includes situational payments such as Temporary Total and Temporary Partial for Bill 162 claims (accident dates between January 2, 1990 and December 31, 1997) and pre-1990 claims.
Part of Body	The injured/disease part of body affected by an injury/disease and is directly linked to the nature of injury/disease which is based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z95-96 codes which allow for more detailed coding injury details.
Percentage Receiving Loss of Earnings Benefits	The percentage of injured or ill workers that continue to receive full or partial Loss of Earnings (LOE) benefits on the specified anniversary, which in this case is at 1 month, 3 months or 6 months post the injury/illness date.
Permanent Impairment	Any permanent physical or functional abnormality or loss (including disfigurement) which results from an injury, and any psychological damage arising from the abnormality or loss. A worker's degree of permanent impairment is expressed as a percentage of total permanent impairment of the whole person.
Registered Claims	Registered claims for injuries, illnesses or fatalities reported to the WSIB in the year (as some claims are registered with the WSIB after the year in which the injury, illness or fatality occurred) and includes all allowed, denied, abandoned and pending claims.
Registration Year	Total number of claims registered with the WSIB by year. Some claims are registered with the WSIB after the year in which the injury, illness or fatality occurred.
Schedule 1	Schedule 1 employers are those for which the WSIB is liable to pay benefit compensation for workers' claims. Schedule 1 employers are required by legislation to pay premiums to the WSIB and are protected by a system of collective liability. Since the WSIB pays benefits to injured workers out of money pooled in the insurance fund, Schedule 1 employers are relieved of individual responsibility for actual accident costs.
Schedule 2	Schedule 2 employers are employers that self-insure the provisions of benefits under the WSIA. Schedule 2 employers are liable to pay all benefit compensation and administration costs for the workers' claims. The WSIB administers the payment of the benefits for workers of Schedule 2 employers and recovers the cost of these benefits plus administration fees from the employers.
Statistics Canada – Labour Force Employment	Statistics Canada, Table 282-0008 - Labour force survey estimates (LFS), by North American Industry Classification System (NAICS), sex and age group, annual (persons unless otherwise noted). (accessed: July 12, 2012)
Survivor Benefit Payment	Benefits payments provided to a spouse, dependent children and other dependants when an injured worker suffers a fatality in the workplace or as a result of an occupational disease. Benefits include lump sum payments, monthly payments, bereavement counselling and burial expenses.
Work Reintegration and Work Transition Programs	The Work Reintegration Program is a comprehensive and integrated approach to returning injured workers to employment. Early and ongoing support is provided to the workplace parties to create work reintegration plans. The focus is on return to the injury employer, and where that isn't possible, to provide high quality training and placement services that enable the worker to find a job with a new employer. This new work reintegration program, launched in November 2010, integrated the Return to Work and Work Transition Programs. The new in-sourced Work Transition program replaced the previously outsourced Labour Market Re-entry program.
Worker's Pension Benefit Payment	Pensions for injured workers suffering a workplace injury prior to January 1, 1990 based on the degree of the injured worker's permanent disability.
WSIB Covered Employment Schedule 1	The number of full time equivalent workers is an estimate based on employer reported insurable earnings divided by the average hourly wage for the rate group divided by 2,000 hours, it is assumed a person works 2,000 hours per year.
WSIB Covered Employment Schedule 2	The number of full time equivalent workers is an estimate based on data from Statistics Canada's Survey of Employment, Payrolls and Hours (SEPH).

Appendix – Schedule 2

*Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies.
Data maturity of the 2011 WSIB Statistical Report is three months following year end, unless otherwise stated.*

Employed labour force(1) by place of work status, 2006 counts, for Canada, provinces and territories and census subdivisions (municipalities) of work - 20% sample data (table). Place of Work Highlight Tables, 2006 Census. Statistics Canada Catalogue no. 97-561-XWE2006002. Ottawa. Released April 2, 2008.

Data Maturity: Allowed Schedule 1 & 2 Lost Time Claims: As at March 31st of the following year for 2011 injury year

Data Exclusions: Allowed Schedule 1 & 2 Lost Time Claims: Allowed lost time claims where accident location is Unknown, Ontario Navigational Waters and Outside of Ontario

Employed Worker Census Count: Employed workers identified as having 'No Fixed Place of Work'

Formula for Number of Lost Time Claims per 10,000 Employed Workers: (Number of Allowed Schedule 1 & 2 Lost Time Claims/Statistics Canada Employed Worker Census Count) x 10,000

Data in the 2011 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity and updated definitions and methodologies. Data in the 2011 WSIB Statistical Report is matured three months.

Worker Profile – Schedule 2
