Introduction – Schedule 1

By the Numbers: 2013 WSIB Statistical Report

By the Numbers: WSIB Statistical Report available at www.wsibstatistics.ca is released annually to provide a wealth of useful information for both the wider prevention system and individual workplaces.

Based on feedback we received via our online survey and focus group sessions, we have enhanced By the Numbers: 2013 WSIB Statistical Report to meet Accessibility for Ontarians with Disabilities Act (AODA) requirements and have increased the data available through our downloadable tables. This is part of our ongoing commitment to an open and transparent approach to the way we do business.

The contents of this report can provide more insight into what is happening in Ontario workplaces. It provides a valuable resource for workers and employers as they continue the important work of making their workplaces safer and healthier.

Who We Are and What We Do

The WSIB administers the province's no-fault workplace insurance system for Ontario workplaces. We provide return to work, medical coverage, and wage loss benefits for workers injured on the job or contracting occupational diseases. For employers, we provide no-fault collective liability insurance and access to industry specific information about workplace fatalities, injuries and illnesses.

We are legislated by the Provincial Government of Ontario and are responsible for administering the *Workplace Safety and Insurance Act, 1997* (WSIA). We are completely funded by employer premiums, and to a lesser degree, income earned on our investments. The province does not provide us with any funding. We are a trust agency which is governed by an independent Board of Directors made up of representatives from employers, workers and others.

Schedules 1 and 2

Employers who are registered with the WSIB are covered under either Schedule 1 or Schedule 2 of the WSIA. By the Numbers presents 10 years of statistics on Schedule 1 and 2 separately.

Schedule 1 employers are those for which the WSIB is liable to pay benefit compensation for workers' claims. Schedule 1 employers are required by legislation to pay premiums to the WSIB and are protected by a system of collective liability. Since the WSIB pays benefits to injured workers out of money pooled in the insurance fund, Schedule 1 employers are relieved of individual responsibility for actual accident costs.

Schedule 2 employers are employers that self-insure the provisions of benefits under the WSIA. Schedule 2 employers are liable to pay all benefit compensation and administration costs for the workers' claims. The WSIB administers the payment of the benefits for workers of Schedule 2 employers and recovers the cost of these benefits plus administration fees from the employers.

Discussion and Analysis – Schedule 1

The WSIB provides one of the most comprehensive workers' compensation benefit systems in North America. In 2013, we served almost 4.4 million workers, more than 287,000 employers, registered over 194,000 claims and issued \$2,518 million in payments to or on behalf of Schedule 1 workers and families.

Summary of Performance

In recent years, the WSIB has demonstrated progress in modernizing all key aspects of its business – delivering better claims management, better health care, and improved support for return to work.

The WSIB is working hard to find faster, easier and more efficient ways for people to do business with us. With an improved service delivery model, a proactive health care strategy, and enhanced WSIB-managed work reintegration, the WSIB has embraced sound, effective, and proven approaches to managing and modernizing its business.

Overall, fewer claims are entering the system and more injured workers are getting back to work sooner. Over the past decade, the covered workforce has grown by 8% while the number of registered claims has decreased by 6%. As a result, the lost time injury rate decreased to 0.95 – and historically the lowest in Canada.

Industry, worker and claim profile

Since 2004, the leading five sectors (Services, Manufacturing, Health Care, Construction, and Transportation) accounted for over 80% of WSIB covered employment and allowed lost time claims. Since 2008, all five sectors have experienced an increase in the covered workforce and all of these sectors, with the exception of Health Care and Construction also had a decrease in the number of allowed lost time claims. Of these five, Construction was the only sector that experienced an increase in the number of allowed lost time claims between 2012 and 2013.

In 2013, some of the most common characteristics of lost time claims were

- Gender: Male (62%)
- Age group: 25 to 44
- Nature of Injury: Sprains and strains
- Event: Overexertion
- Part of Body: Low back
- Occupation: Motor vehicle and transit drivers

Our commitment to financial stability and improved recovery and return to work outcomes

Compared to 2004, there has been a decline in the average number of days lost within one and three months post injury or illness. In addition, more workers are recovering and returning to work earlier, as evidenced by the decrease in the percentage of claims receiving Loss of Earnings (LOE) benefits at three and six months.

Over the past 10 years, the number of registered claims has consistently decreased, and since 2009 benefit payments had the same decreasing trend. Continued reduction in registered claims, changes to the service delivery model, specialized and timely health care for injured workers and the positive improvements of the Work Reintegration Program have resulted in a 21% decrease in benefit payments (from \$3,178M to \$2,518M) compared to 2009. At the same time, after adjusting for inflation, the amount of Loss of Earnings (LOE) paid for a single day off work for an injured worker has remained relatively stable.

Locked-in claims are increasing as a percentage of all claims receiving a Loss of Earnings (LOE) benefit. Since 2009, there has been an increase in the number of Bill 99 locked in claims. However, with fewer lost time claims entering the system and improved return to work outcomes, it is expected that over time fewer claims will require a locked-in LOE award.

Our new service delivery model and our health care and Work Reintegration strategies are supporting successful recovery and return to work – and they continue to show improved results. In 2013, approximately 85% of Schedule 1 and 2 injured workers were off full Loss of Earnings (LOE) benefits within a month of a Work Reintegration staff member's involvement.

High Impact Claims

The WSIB has identified a group of allowed lost time claims that have been shown to have significant impacts on workers and employers. These "high impact" claims are those involving the low back, shoulder and fractures, and represent on average more than 40% of all lost time benefit payments and almost 35% of all lost time claims over the past five years. We have experienced a reduction in the number of low back claims and a decline in the average number of days lost. Despite this, the average days lost for high impact claims within three and six months post injury or illness remain consistently higher than all other lost time claims combined.

Recognizing that appropriate and timely medical care is important to an injured worker's recovery and return to work, the WSIB continues to invest in health care. We have expanded the network of specialized assessment and treatment services across the province for low back and shoulder injuries, resulting in better health care outcomes for injured workers in Ontario.

Improved Outcomes for Workers and Employers

We know we can meet the challenges ahead as we continue to introduce enhanced programs and new technology to deliver even better value to workers and employers. We have more work ahead of us, but we are on-track to creating a modern, financially sustainable system that's promoting economic growth and productivity.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Employer Profile – Schedule 1

Overview

The number of claims registered with the WSIB has been on the decline over the last 10 years. Between 2004 and 2009, claims for workplace injuries had a steady decline, while subsequent years experienced marginal decreases. Over the 10 year period, claims for occupational diseases have also remained fairly stable since 2011. At the same time the number of registered employers and the number of workers covered have increased steadily since 2004.

Comparing 2013 to 2012, the Number of Employers, WSIB Covered Employment, and Percentage Workforce Covered have increased, whereas Registered Claims has decreased.

Employer Profile – Schedule 1 (Continued)

Overview

The lost time injury rate (LTI) takes into account the number of allowed lost time claims and the number of workers employed in order to represent the number of lost time claims per 100 workers. Since 2004, the lost time and no lost time injury rates have declined by approximately 49% and 39% respectively, while the number of workers covered by WSIB has increased by approximately 8%. Covered employment at the WSIB is at its highest level over the last decade, an indication that employment has recovered from the last economic downturn. This trend is consistent with Statistics Canada's Labour Force Survey (LFS) on employment in Ontario. Despite this, since 2011, there has been a marginal increase in Allowed No Lost Time Claims while Allowed Lost Time Claims continue to decline.

Allowed Claims and Injury Rates

Schedule 1	Injury/Illness Year

Industry Profile – Schedule 1

WSIB Covered Employment by Industry Sector

The distribution of workers among the industry sectors has remained fairly consistent over the past 10 years. Since 2004, the leading five sectors (Services, Manufacturing, Health Care, Construction, and Transportation) accounted for over 80% of WSIB covered employment. The decrease in employment in the Automotive, Chemicals/Process, Forestry, Manufacturing, Primary Metals, and Pulp & Paper industry sectors since 2004 was offset by the significant increases seen in the Construction, Health Care and Service sectors leading to the overall 8% increase in the number of Schedule 1 workers.

Comparing 2013 to 2012, the majority of industry sectors with the exception of Mining, Electrical and Chemicals/Process did not experience a significant reduction in covered employment, whereas Construction had a 1.2% increase.

Industry Profile – Schedule 1 (Continued)

Allowed Lost Time Claims by Industry Sector

The distribution of lost time claims among the industry sectors remained fairly consistent over the past 10 years, with the Construction, Health Care, Manufacturing, Services, and Transportation sectors accounting for more than 80% of all Schedule 1 lost time claims in 2013. Over the same period, all sectors experienced significant decreases in the number of allowed lost time claims.

Comparing 2013 to 2012, of the five sectors with an increase in the number of lost time claims from prior year, the Agriculture and Construction sectors showed the largest increases of 10% and 5% respectively.

Industry Profile – Schedule 1 (Continued)

Lost Time Injury Rates by Industry Sector

The lost time injury (LTI) rate takes into account the number of lost time claims and the number of workers employed in order to represent the number of lost time claims per 100 workers. Over the last decade, all 16 industry sectors experienced LTI rate reductions.

The 2013 Schedule 1 lost time injury rate was 0.95, a 6% reduction compared to 2012. However, Agriculture, Municipal and Electrical sectors experienced an LTI rate increase over the same period. Of the 16 industry sectors, seven had a 2013 lost time injury rate above Schedule 1 and nine were below, with the Agriculture sector having the highest lost time injury rate and the Electrical sector having the lowest.

Lost Time Injury Rates Above Schedule 1 and Below Schedule 1

Schedule 1 Industry Sectors with Lost Time Injury Rates Above the Overall Schedule 1 Lost Time Injury Rate*

Industry Sector	Injury/Illness Year									
	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Claim Profile – Schedule 1

2013 Allowed Lost Time Claims by Accident Location

The map below highlights the number of 2013 Schedule 1 and 2 allowed lost time claims per 10,000 employed workers by accident location. The number of employed workers used in this calculation is sourced from the Statistics Canada 2011 National Household Survey. WSIB accident location has been mapped to Statistics Canada 2011 Census Districts for the province of Ontario. The 2013 Provincial Average for Ontario is 95.5 allowed lost time claims per 10,000 employed workers.

**2013 Number of Allowed Lost Time Claims Per 10,000 Employed Workers
by Statistics Canada Census District for Ontario**

See Appendix for additional data on the number of allowed lost time claims per 10,000 employed workers by accident location and leading industry sectors.

Claim Profile – Schedule 1 (Continued)

Allowed Lost Time Claims Average Days Lost

The average days lost is the average number of days for which wage loss benefits were paid. Improved recovery and return to work outcomes will be reflected in both the one and three month measures.

Since 2004, the average days lost within one month post injury or illness has remained relatively stable while the average days lost within three months post injury or illness has been declining steadily since 2009.

In 2013, the average days lost within one month post injury or illness remains steady at 7.5, while the average days lost within three months increased slightly to 13.8.

**Average Days Lost within
One Month and Three Months by Injury/Illness Year**

Claim Profile – Schedule 1 (Continued)

Allowed Lost Time Claims Average Days Lost by Industry Sector

The bar graphs below illustrate the average days lost within one month and three months post injury or illness by industry sector for 2012 and 2013. In 2013, the industry sectors with the highest average days lost one month post injury or illness were Forestry, Construction and Agriculture, and those with the lowest average days lost were Health Care, Automotive, and Education.

2012 Average Days Lost within One Month by Industry Sector by Injury/Illness Year

2013 Average Days Lost within One Month by Industry Sector by Injury/Illness Year

2012 Average Days Lost within Three Months by Industry Sector by Injury/Illness Year

2013 Average Days Lost within Three Months by Industry Sector by Injury/Illness Year

AG	Agriculture	AU	Automotive	CH	Chemical/Process	CO	Construction	ED	Education	EL	Electrical	FO	Food	FR	Forestry
HC	Health Care	MF	Manufacturing	MI	Mining	MU	Municipal	PP	Pulp & Paper	SE	Services	PM	Primary Metals	TR	Transportation

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Worker Profile – Schedule 1

Allowed Lost Time Claims by Age and Gender

Over the ten year period, the average percentage for all allowed lost time claims for males and females was 63% and 37% respectively. Compared to Statistics Canada's Labour Force Survey (LFS) over the same period, the average gender distribution of the Ontario employed workforce was 52% male and 48% female. This indicates that the demographic of Schedule 1 lost time claims is different from the overall profile of Ontario's employed workforce, as males represent slightly more than half of the workforce but about two thirds of Schedule 1 lost time claims.

See Appendix for historical and additional data on Age and Gender

(Continued)

Worker Profile – Schedule 1 (Continued)

Allowed Lost Time Claims by Age and Gender

Over the past ten years, the two older age groups (55 to 64 and 65+) are increasing as a percentage of all allowed lost time claims, whereas the younger age groups (15 to 24 and 25 to 44) are decreasing. This is a reflection of the continued aging of Ontario's workforce, and is consistent with Statistics Canada's employment trends.

In 2013, those aged 25 to 54 continue to represent the majority of lost time claims.

See Appendix for historical and additional data on Age and Gender

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Worker Profile – Schedule 1 (Continued)

2013 Allowed Lost Time Claims by Leading Occupations

Ontario has a diverse workforce undertaking a wide variety of occupations. Over the past 10 years, lost time claims were spread across more than 150 occupations, with Labourers in Processing, Manufacturing and Utilities, and Motor Vehicle and Transit Drivers representing the two occupations with the highest number of lost time claims.

This year, six of the seven leading occupations indicate that workers between the ages of 20 to 24 and 50 to 54 represent the leading age groups of lost time claims.

In 2013, for the two leading occupations (Motor Vehicle and Transit Drivers, and Labourers in Processing, Manufacturing and Utilities), workers in the 20 to 24 and 50 to 54 age groups represent the greatest percentage of lost time claims. The leading occupation for female workers was Assisting Occupations in Support of Health Services, whereas Motor Vehicle and Transit Drivers represented the leading occupation for male workers. In all cases the leading nature of injury was sprains and strains and the part of body most frequently injured was the lower back.

2013 Leading Occupations
Schedule 1

2013 Leading Occupation Characteristics
*Leading characteristics are independent from one another

Schedule 1	Leading Age Group	Leading Industry Sector	Leading Gender	Leading Event	Leading Source	Leading Part of Body	Leading Nature of Injury
Motor vehicle and transit drivers	50-54	Transportation	Male	Overexertion	Structures (including walkways, floors and buildings)	Lower back (lumbar, sacral, coccygeal regions)	Sprains and strains
Labourers in Processing, Manufacturing and Utilities	20-24	Manufacturing	Male	Struck by objects or equipment	Structures (including walkways, floors and buildings)	Lower back (lumbar, sacral, coccygeal regions)	Sprains and strains
Assisting Occupations in Support of Health Services	50-54	Health Care	Female	Overexertion	Persons (bodily motion or condition)	Lower back (lumbar, sacral, coccygeal regions)	Sprains and strains
Cleaners	50-54	Services	Female	Overexertion	Structures (including walkways, floors and buildings)	Lower back (lumbar, sacral, coccygeal regions)	Sprains and strains
Longshore workers and material handlers	45-49	Services	Male	Overexertion	Containers, boxes, barrels, packages (pressurized, non pressurized)	Lower back (lumbar, sacral, coccygeal regions)	Sprains and strains
Retail salespersons and sales clerks	20-24	Services	Female	Overexertion	Structures (including walkways, floors and buildings)	Lower back (lumbar, sacral, coccygeal regions)	Sprains and strains
Trades helpers and labourers	20-24	Construction	Male	Struck by objects or equipment	Structures (including walkways, floors and buildings)	Lower back (lumbar, sacral, coccygeal regions)	Sprains and strains

See Appendix for historical and additional data on Occupation.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Work Reintegration – Schedule 1

Referrals to Return to Work Specialists

Initial referrals to Work Reintegration staff within 12 weeks of the date of injury or latest recurrence have increased steadily over the past five years to 80.9% from 38.6% in 2009 when the role was first introduced. This increase is due in part to improved referral processes and recognition of the value of early return to work in a worker's recovery. In 2013, approximately 85% of Schedule 1 and 2 injured workers were off full Loss of Earnings (LOE) benefits within a month of a Work Reintegration staff member's involvement.

In 2013, our Work Reintegration staff made almost 26,000 Schedule 1 and 2 workplace visits to help workers and employers negotiate successful, safe return to work. In addition to the introduction of new roles to support return to work, we have significantly increased program oversight of return to work since 2009 – meaning more quality management and accountability for ourselves and our providers.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Work Reintegration – Schedule 1 (Continued)

Allowed Lost Time Claims Receiving Loss of Earnings (LOE) Benefits

Loss of Earnings (LOE) benefits are the wage loss benefits for time lost from work due to a work related injury or illness occurring on or after January 1, 1998. Improved recovery and return to work outcomes will be reflected in this measure.

The bar graphs below illustrate the percentage of claims receiving LOE benefits at three and six months. Each bar is split by level of LOE benefits – full and partial. Over the past four years, there has been a shift in claims durations to levels lower than those in 2009, meaning more workers are recovering and returning to work earlier. Upon further analysis of these graphs it can be seen that the overall improvement is due to the decrease in the percentage of claims receiving full LOE benefits.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Work Reintegration – Schedule 1 (Continued)

Work Transition (WT)/Labour Market Re-Entry (LMR)

The WSIB's "Better at Work" philosophy guides our Work Reintegration Strategy, comprising of our Return to Work and Work Transition programs. Work Transition replaces Labour Market Re-Entry (LMR) program with enhanced services for workers and employers. Statistics show that this new strategy is working to improve outcomes for injured workers and reduce costs.

In place since 2010, the Work Reintegration Strategy recognizes that:

- Workers and employers know their workplaces best, but they may benefit from help to understand their roles and responsibilities in the creation of fair, mutually beneficial return to work plans
- We need to take a more active role in cases where return to work is not possible
- We need to provide injured workers with more choices in their Work Transition plans, and we need to play an active role in making sure these plans give them the retraining they need

Continuous improvement of the Work Reintegration program over the last three years has shown improved return to work outcomes for workers through better case management, assessments, and work reintegration planning while still reducing program costs.

Work Transition/Labour Market Re-entry Program Costs (in thousands)

Schedule 1 & 2	2009 (000s)	2010 (000s)	2011 (000s)	2012 (000s)	2013 (000s)
WT/LMR Program Costs	\$ 167,913	\$ 155,546	\$ 88,951	\$ 66,544	\$ 53,771
Assessments/Evaluations	\$ 14,854	\$ 10,905	\$ 5,520	\$ 5,488	\$ 5,625
Education/Training	\$ 77,748	\$ 73,257	\$ 38,850	\$ 36,220	\$ 30,056
Placement & Retention	\$ 4,898	\$ 6,738	\$ 8,224	\$ 6,500	\$ 4,855
Provider Related	\$ 32,258	\$ 30,865	\$ 11,867	\$ (75)	\$ (13)
Supplies & Equipment	\$ 8,985	\$ 7,966	\$ 5,205	\$ 4,159	\$ 3,011
Travel Related	\$ 24,652	\$ 24,589	\$ 17,419	\$ 12,538	\$ 9,032
Other*	\$ 4,518	\$ 1,225	\$ 1,866	\$ 1,714	\$ 1,204
WT Administrative Costs**	N/A	N/A	\$ 20,700	\$ 24,600	\$ 25,038
Total	\$ 167,913	\$ 155,546	\$ 109,651	\$ 91,144	\$ 78,809

*Other Category includes GL Adjustment, Other, Support Services, and Miscellaneous Expenses

** WT Administrative Costs cannot be separated by Schedule 1 and 2, therefore the costs include both combined.

Work Reintegration – Schedule 1 (Continued)

Completed Work Transition/Labour Market Re-Entry Plans

Since the implementation of the Work Transition (WT) program, the percentage of cases with completed plans resulting in return to work either with the injury employer or a new employer is showing a steady increase from employment outcomes achieved under the earlier Labour Market Re-entry (LMR) program.

As a number of cases were transitioned from the LMR program to the WT program, results since 2011 demonstrate employment outcomes achieved by both programs. Over the last three years, the number of cases completed under the LMR program has significantly decreased. This trend is evident in the percentage of completed plans for the combined WT/LMR program becoming more closely aligned with that of the WT program alone.

Cases serviced exclusively by the WT program continue to show significantly better results (67.9% in 2013 and 61.2% in 2012) compared to the combined results of the WT/LMR programs (62.1% in 2013 and 51.5% in 2012).

2011 was the first year of the WT program and as a result there is an overrepresentation of employed outcomes in the statistics for that year due to shorter term WT plans. The Return to Work rates achieved after 2011 are more reflective of what can be expected in the coming years.

**Work Transition/Labour Market Re-Entry
Plans Completed Resulting in Return to Work**

Schedule 1

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Injury Profile – Schedule 1

2013 Schedule 1 Leading Injury Characteristics

Most Workers' Compensation Boards and Commissions in Canada code the injury details of a claim using the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z795-96 codes which allow for more detailed coding injury details. The WSIB adheres to this standard and codes all lost time claims using four categories: Nature of Injury, Event, Source and Part of Body.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Injury Profile – Schedule 1 (Continued)

2013 Allowed Lost Time Claims by Leading Nature of Injury

Over the past 10 years, Sprains and Strains have consistently represented the leading nature of injury. In 2013, they represented 40% of all lost time claims, compared to 43% in 2004. Fractures were the nature of injury that accounted for the second greatest percentage of lost time claims in 2013, with approximately 10%.

In 2013, the workers who were most prone to experiencing one of the five leading nature of injuries were male workers, in the Services sector (the largest sector in terms of number of covered workers). The majority of these injuries occurred in the Motor Vehicle and Transit Drivers occupation.

2013 Leading Nature of Injury

Schedule 1

2013 Leading Nature of Injury Characteristics

*Leading characteristics are independent from one another

Schedule 1	Leading Age Group	Leading Industry Sector	Leading Gender	Leading Occupation	Leading Event	Leading Source	Leading Part of Body
Sprains and strains	50-54	Services	Male	Motor vehicle and transit drivers	Overexertion	Persons (bodily motion or condition)	Lower back (lumbar, sacral, coccygeal regions)
Fractures	50-54	Services	Male	Motor vehicle and transit drivers	Fall on same level	Structures (including walkways, floors and buildings)	Finger(s), fingernail(s)
Cuts, lacerations, punctures	20-24	Services	Male	Chefs and cooks	Struck by objects or equipment	Hand tools, non-powered	Finger(s), fingernail(s)
Bruises, contusions	45-49	Services	Male	Motor vehicle and transit drivers	Struck by objects or equipment	Structures (including walkways, floors and buildings)	Leg(s)
Traumatic injuries, disorders, complications, unspecified, NEC	20-24	Services	Male	Motor vehicle and transit drivers	Struck by objects or equipment	Structures (including walkways, floors and buildings)	Multiple body parts

See Appendix for historical and additional data on Nature of Injury.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Injury Profile – Schedule 1 (Continued)

2013 Allowed Lost Time Claims by Leading Injury Event

Over the past 10 years, Overexertion has consistently represented the leading injury event. In 2013, Overexertion accounted for 19% of all lost time claims, down from 23% in 2004. Struck by Objects/Equipment and Fall on Same Level were the two other injury events that accounted for the next greatest percentages of lost time claims in 2013, with 16% and 14% respectively.

In 2013, workers in the Services sector (the largest sector in terms of number of covered workers) were most prone to experiencing one of the five leading injury events. While male workers represented the majority of lost time claims for these injury events, female workers represented the greatest percentage of Fall on Same Level lost time claims. These leading injury events also tended to be highest among the older age groups (50-54) and predominantly in the Motor Vehicle and Transit Drivers occupation.

2013 Leading Injury Event
Schedule 1

2013 Leading Injury Event Characteristics
*Leading characteristics are independent from one another

Schedule 1	Leading Age Group	Leading Industry Sector	Leading Gender	Leading Occupation	Leading Nature of Injury	Leading Source	Leading Part of Body
Overexertion	45-49	Services	Male	Motor vehicle and transit drivers	Sprains and strains	Containers, boxes, barrels, packages (pressurized, non pressurized)	Lower back (lumbar, sacral, coccygeal regions)
Struck by objects or equipment	20-24	Services	Male	Labourers in processing, manufacturing and utilities	Cuts, lacerations, punctures	Hand tools, non-powered	Finger(s), fingernail(s)
Fall on same level	50-54	Services	Female	Motor vehicle and transit drivers	Sprains and strains	Structures (including walkways, floors and buildings)	Multiple body parts
Bodily reaction	50-54	Services	Male	Motor vehicle and transit drivers	Sprains and strains	Persons (bodily motion or condition)	Lower back (lumbar, sacral, coccygeal regions)
Fall/jump to lower level	50-54	Construction	Male	Motor vehicle and transit drivers	Fractures	Structures (including walkways, floors and buildings)	Multiple body parts

See Appendix for historical and additional data on Injury Event.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Injury Profile – Schedule 1 (Continued)

2013 Allowed Lost Time Claims by Leading Injury Source

Over the past 10 years, Structures (including walkways, floors and buildings) and Persons (bodily motion or condition) have consistently represented the leading sources for all lost time claims. In 2013, two sources of injury accounted for 22% and 20% respectively, of all lost time claims.

Where Persons was the source of injury, female workers and workers in the Health Care sector represented the greatest percentage of these lost time claims in 2013. Most of the five leading injury sources were highest among the 45 to 49 age group, and each leading injury source was represented by a different leading occupation. The leading nature of injury for all five leading injury sources was Sprains and Strains and the part of body most often injured was the Low Back.

2013 Leading Injury Source
Schedule 1

2013 Leading Injury Source Characteristics

*Leading characteristics are independent from one another

Schedule 1	Leading Age Group	Leading Industry Sector	Leading Gender	Leading Occupation	Leading Event	Leading Nature of Injury	Leading Part of Body
Structures (including walkways, floors and buildings)	50-54	Services	Male	Motor vehicle and transit drivers	Fall on same level	Sprains and strains	Multiple body parts
Persons (bodily motion or condition)	45-49	Health Care	Female	Assisting occupations in support of health services	Bodily reaction	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)
Containers, boxes, barrels, packages (pressurized, non pressurized)	45-49	Services	Male	Longshore workers and material handlers	Overexertion	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)
Building materials	20-24	Construction	Male	Labourers in processing, manufacturing and utilities	Struck by objects or equipment	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)
Furniture and fixtures	45-49; 50-54	Services	Female	Cleaners; Retail salespersons and sales clerks	Overexertion	Sprains and strains	Lower back (lumbar, sacral, coccygeal regions)

See Appendix for historical and additional data on Injury Source.

Injury Profile – Schedule 1 (Continued)

2013 Allowed Lost Time Claims by Part of Body

Over the past 10 years, the Low Back has consistently represented the leading part of body injured. In 2013, Low Back Injuries accounted for approximately 18% of all lost time claims and has been on the decline since 2009 (21.6%).

In 2013, workers in the Services sector (the largest sector in terms of number of covered workers) were most prone to injuring one of the seven leading parts of body. Injuries to these parts of body tended to be the highest among male workers, those in older (50-54) and younger (20 to 24) age groups, and among Motor Vehicle and Transit Drivers. The leading nature of injury for most of these incidents was Sprains and Strains.

Where the leading injury part of body was multiple body parts, female workers in the 50-54 age group represented the greatest percentage of these lost time claims in 2013.

2013 Leading Part of Body

Schedule 1

2013 Leading Part of Body Characteristics

*Leading characteristics are independent from one another

Schedule 1	Leading Age Group	Leading Industry Sector	Leading Gender	Leading Occupation	Leading Event	Leading Nature of Injury	Leading Source
Low back (lumbar, sacral, coccygeal regions)	45-49	Services	Male	Motor vehicle and transit drivers	Overexertion	Sprains and strains	Persons (bodily motion or condition)
Leg(s)	50-54	Services	Male	Motor vehicle and transit drivers	Bodily reaction	Sprains and strains	Structures (including walkways, floors and buildings)
Finger(s), fingernail(s)	20-24	Services	Male	Labourers in processing, manufacturing and utilities	Struck by objects or equipment	Cuts, lacerations, punctures	Hand tools, non-powered
Multiple body parts	50-54	Services	Female	Motor vehicle and transit drivers	Fall on same level	Sprains and strains	Structures (including walkways, floors and buildings)
Shoulder	50-54	Services	Male	Motor vehicle and transit drivers	Overexertion	Sprains and strains	Persons (bodily motion or condition)
Ankle(s)	20-24	Services	Male	Motor vehicle and transit drivers	Bodily reaction	Sprains and strains	Persons (bodily motion or condition)
Cranial region, including skull	20-24	Services	Male	Motor vehicle and transit drivers	Struck by objects or equipment	Concussion	Structures (including walkways, floors and buildings)

See Appendix for historical and additional data on Part of Body.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

High Impact Claims – Schedule 1

High Impact Claims

High impact claims is a term used to identify allowed lost time claims that have been shown to have significant impacts on workers and employers. The WSIB is focused on mitigating the risks for these claims to maximize return to work, recovery outcomes and to reduce costs. The WSIB has implemented many initiatives to improve outcomes in these claims, including specialized case management teams, new evidence-based health services and expedited access to expert medical intervention.

We have identified three types of high impact claims, those involving the Low Back, Shoulder and Fractures. Since 2009, these claim types represented just over 40% of all benefits payments and represents almost 35% of all allowed lost time claims.

(Continued)

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

High Impact Claims – Schedule 1 (Continued)

Average Days Lost

Since 2009, the average days lost within three and six months post injury or illness was higher for high impact claims in comparison to all other lost time claims combined. Comparing 2009 to 2013, the average days lost within three and six months decreased for both high impact claims and all other lost time claims. In 2013, there has been a slight increase in the average days lost within three months for both types of claims.

The WSIB's continues to focus on programs aimed at improving recovery and return to work outcomes for high impact claims.

**High Impact Claims
Average Days Lost within Three Months
by Injury/Illness Year**

Schedule 1

**High Impact Claims
Average Days Lost within Six Months
by Injury/Illness Year**

Schedule 1

(Continued)

High Impact Claims – Schedule 1 (Continued)

High Impact Claims as a Percentage of all Lost Time Claims

Since 2009, the percentage of lost time claims that are shoulder injuries has remained steady while the percentage of low back has decreased slightly and fracture has increased.

In 2013, the three types of high impact claims represented approximately 34% of all lost time claims, of which low back claims represented 18%.

The four industry sectors that accounted for more than 70% of all high impact claims are Services, Manufacturing, Health Care and Construction. In addition, male workers represented over 65% of all high impact injuries. In 2013, the highest percentage of these injuries was experienced by the 50-54 age group.

Leading High Impact Claims Characteristics

Schedule 1	Injury/Illness Year				
	2009	2010	2011	2012	2013
Leading Age Groups	35 to 39 – 11.2% 40 to 44 – 13.5% 45 to 49 – 15.4% 50 to 54 – 13.1%	35 to 39 – 11.1% 40 to 44 – 13.0% 45 to 49 – 16.1% 50 to 54 – 13.4%	35 to 39 – 11.3% 40 to 44 – 12.5% 45 to 49 – 15.0% 50 to 54 – 14.0%	35 to 39 – 11.0% 40 to 44 – 12.0% 45 to 49 – 14.7% 50 to 54 – 14.5%	40-44 – 11.7% 45-49 – 13.5% 50-54 – 14.1% 55-59 – 11.1%
Gender	Male 62.4% Female 37.6%	Male – 62.9% Female – 37.1%	Male – 64.4% Female – 35.6%	Male – 64.6% Female – 35.4%	Male – 65.5% Female – 34.5%
Leading Industry Sectors	Services – 29.3% Health Care – 16.8% Manufacturing – 15.0% Transportation – 12.8%	Services – 28.9% Health Care – 17.3% Manufacturing – 14.4% Transportation – 12.4%	Services – 28.9% Health Care – 15.5% Manufacturing – 15.2% Transportation – 12.5%	Services – 29.1% Health Care – 15.8% Manufacturing – 15.0% Transportation – 12.4%	Services – 29.2% Manufacturing – 15.0% Health Care – 14.8% Construction – 12.7%

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Fatalities – Schedule 1

Allowed Traumatic Fatalities by Year of Death

Traumatic fatalities are allowed claims for workers who died of a work-related traumatic incident. Over the past 10 years, 92% of all traumatic fatalities occurred among males, with the predominant age group being 45 to 49. During this period, three industry sectors - Construction, Transportation and Services - accounted for more than 60% of these tragic workplace incidents.

For Schedule 1 employers in 2013, 82 workers lost their lives due to a workplace fatality. Motor vehicle incidents were the cause of 35% of the deaths in 2013 and remain the leading cause of traumatic fatalities since 2004.

Over the 10 year period from 2004 to 2013, the following age groups, industry sectors, events and gender accounted for the highest traumatic fatality percentages.

- Age Groups: 45-49 (13.3%), 55-59 (11.3%), 35-39 (10.8%), 25-29 (10.8%), 40-44 (10.8%), 30-34 (10.5%)
- Industry Sectors: Construction (26.6%), Transportation (25.4%), Services (12.2%)
- Events: Motor Vehicle Incidents (39.9%), Falls (16.8%), Struck By/Caught in Objects (11.6%)
- Gender: Males (91.9%)

See Appendix for historical and additional data on Traumatic Fatalities.

Fatalities – Schedule 1 (Continued)

Allowed Occupational Disease Fatalities by Year

Occupational disease fatalities are allowed claims for workers who died of a work-related disease or condition. Over the past 10 years, occupational disease fatalities predominantly occurred among males, with a significant number in the Construction and Manufacturing sectors. During this period, approximately 60% of the 158 deaths in 2013 were caused by cancers, including mesothelioma and lung cancer.

In 2013, 158 fatality claims were allowed for workers from Schedule 1 employers who lost their lives due to an occupational disease.

Over the 10 year period from 2004 to 2013, the following industry sectors, disease types and gender accounted for the highest Occupational Disease fatality percentages.

- Industry Sectors: Construction (27.2%), Manufacturing (21.6%), Primary Metals (12.5%)
- Diseases: Mesothelioma (33.3%), Lung Cancer (27.3%)
- Gender: Males (96.4%)

See Appendix for historical and additional data on Occupational Disease Fatalities.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Benefit Payments – Schedule 1

Benefit Payments by Benefit Category

Benefit payments are payments made during a specific year to or on behalf of injured workers and are detailed by the eight benefit categories found in the table below. Continued reduction in registered claims, changes to the service delivery model, specialized and timely health care for injured workers and the positive improvements of the Work Reintegration program have resulted in a year over year decrease in total benefit payments. Despite this the amount of LOE paid for a single day off for an injured worker, after adjusting for inflation, has remained relatively stable.

LOE, Workers' Pensions and Health Care continue to represent the greatest percentage of benefits paid to injured workers. In 2013, these three benefit categories contributed to almost 80% of all benefit payments made to or on behalf of injured workers (excluding Loss of Retirement Income Fund expense).

Benefit Payments by Benefit Category

Schedule 1	Benefit Payment Year									
	2009		2010		2011		2012		2013	
	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments	Benefit Payments (millions)	% of Benefit Payments
Workers' Pension	\$723	23%	\$701	23%	\$678	24%	\$652	24%	\$624	25%
Loss of Earnings	\$1,149	36%	\$1,117	36%	\$1,069	38%	\$968	36%	\$908	36%
Health Care	\$513	16%	\$497	16%	\$468	16%	\$457	17%	\$455	18%
External Providers	\$164	5%	\$151	5%	\$86	3%	\$65	3%	\$52	2%
Non-Economic Loss	\$129	4%	\$126	4%	\$88	3%	\$60	2%	\$48	2%
Future Economic Loss	\$315	10%	\$292	10%	\$278	10%	\$259	10%	\$242	10%
Survivor Benefits	\$167	5%	\$178	6%	\$172	6%	\$176	7%	\$178	7%
Other	\$18	1%	\$5	0%	\$11	0%	\$27	1%	\$11	0%
Total Benefit Payments	\$3,178	100%	\$3,067	100%	\$2,850	100%	\$2,664	100%	\$2,518	100%

Prior to 2011, all publications referenced five benefit payment categories. As of 2011 these categories were reclassified into eight categories. As such, prior years have been reclassified in this report to reflect the new Benefit Categories.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Benefit Payments – Schedule 1 (Continued)

Loss of Earnings Benefit Payments

Over the past five years, Loss of Earnings (LOE) accounted for the greatest percentage of benefit payments made to injured workers. LOE benefits represent wage loss benefits for time lost from work due to a work-related injury or illness occurring on or after January 1, 1998. The number of allowed lost time claims receiving LOE benefits has been steadily decreasing since 2009. Factors that are contributing to this trend include improved claims management, fewer claims entering the system and improvement in longer term durations; a reflection of more workers recovering, returning to work and mitigating their wage loss.

After adjusting for inflation, the amount of LOE paid for a single day off work for an injured worker has remained relatively stable over the last five years.

Since 2009, there has been an increase in the number of Bill 99 locked in claims. However, with fewer lost time claims entering the system and improved return to work outcomes, it is expected that over time fewer claims will require a locked-in LOE award.

Loss of Earnings Claims and Average Loss of Earnings per Full Paid Day by Payment Year

Schedule 1

The claim population includes Bill 99 Legislation only. A Locked-in is defined as a claim, with an injury/illness date on or after January 1, 1998 (Bill 99), where a final review of the LOE benefit at 72 months post injury/illness has been completed and the benefit will continue to be paid to age 65, with few exceptions.

A claim is considered locked-in if a lock-in payment occurred at any point within the Benefit Payment year.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Benefit Payments – Schedule 1 (Continued)

Non Economic Loss Benefit Payments

Non Economic Loss (NEL) benefits are based on the age of the worker and the severity of the permanent impairment (PI) sustained by the injured worker. They are awarded to recognize that, beyond a wage loss; an injured worker has also suffered a physical, functional or psychological loss. NEL benefits are calculated as a percentage of whole body impairment.

Since 2009, improved health care outcomes for injured workers and fewer claims entering the system in recent years has led to a 36% decrease in the yearly total of allowed claims currently receiving a NEL benefit.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Payments – Schedule 1 (Continued)

Health Care Payments

Health Care payments are made to or on behalf of injured or ill workers and in 2013 represented 18% of total payments. An overall decrease in the number of claims entering the system, and the implementation of the Health Care and Narcotics Strategies have contributed to the steady decrease in Health Care payments since 2009. The Health Care Strategy includes initiatives such as the Programs of Care, Specialty Clinics as well as Low Back Injury and Shoulder Programs, which all promote early access to care and return to work. The Narcotics Strategy includes increased oversight of how narcotics support treatment goals, including quality of function, quality of life with safe and sustained return to work.

Schedule 1	Health Care Payments by Leading Service Categories			
	Payment Year			
Service Category	2012 (000s)	% of 2012 Total	2013 (000s)	% of 2013 Total
Drug Benefits	\$71,129	15.5%	\$64,456	14.2%
Specialized Clinical Services and Programs	\$83,229	18.2%	\$89,502	19.7%
Physiotherapy, Chiropractic and other Non-Physician Treatment	\$55,670	12.2%	\$54,315	11.9%
Allowances (Clothing, Independent Living, Personal Care)	\$30,706	6.7%	\$24,701	5.4%
Physician Services via Ministry of Health & Long Term Care	\$39,503	8.6%	\$37,843	8.3%

Hearing Aid Devices and Services	\$28,860	6.3%	\$34,508	7.6%
Travel and Accommodations	\$24,176	5.3%	\$23,788	5.2%
Reports and Information	\$25,084	5.5%	\$25,773	5.7%
Medical Devices	\$20,072	4.4%	\$19,374	4.3%
Other	\$42,478	9.3%	\$40,317	8.9%
Total	\$457 (\$M)	100.0%	\$455 (\$M)	100.0%

External Provider Expense Payments

Since the implementation of the Work Reintegration program in November 2010, there has been a significant decrease in the payments for external providers. This decrease is a reflection of improved return to work outcomes for injured workers and fewer claims entering the system in recent years. In 2013, Schedule 1 claims experienced a 20% decrease in external provider payments compared to prior year. Education/training continues to be the largest category, representing approximately 56% of external provider payments in 2013.

Schedule 1	External Provider Payments by Leading Service Categories			
	Payment Year			
Service Category	2012 (000s)	% of 2012 Total	2013 (000s)	% of 2013 Total
Assessments/Evaluations	\$5,138	8.0%	\$5,166	9.9%
Education/Training	\$35,416	54.8%	\$29,142	56.2%

Travel Related	\$12,187	18.9%	\$8,804	17.0%
Other	\$1,585	2.5%	\$1,143	2.2%
Total	\$65 (\$M)	100.0%	\$52 (\$M)	100.0%

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

FOCUS ON 100 YEARS OF SERVING ONTARIANS

THE 1915 ANNUAL REPORT of the Ontario Workmen's Compensation Board described the first year of Ontario's workplace insurance system:

The benefits of the new system of law to both workmen and employers are recognized and appreciated. Claims are expeditiously and inexpensively disposed of. Employers are immune from the expense and annoyance of litigation. The intricacies and hardships upon workmen and their families of the old doctrines of negligence, common employment and assumed risk are eliminated.

On April 28, 1914, the passing of Ontario's workers compensation legislation eliminated the courts from the process of compensation. Workers gave up their right to sue their employers in return for fast, fair compensation and employers agreed to pay into the fund. In 2014, the majority of Ontario's

workers and employers still benefit from the same provincially-administered, shared liability, no-fault system.

In October 1914, the Board's first office opened its doors and its 45 staff began work to prepare for January 1, 1915, when the legislation came into effect.

For 100 years, injured workers have been compensated quickly and fairly. Looking at the system's first year of operation, we see that Ontario workplaces have changed – just as the WSIB has changed to meet the evolving needs of its customers. Due to new technologies and modern management, 92% of claim decisions are now made within two weeks meaning workers have faster access to health care and a speedier return to work than ever before in the 100 year history of the WSIB.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Glossary

Term	Business Definition
Allowed Lost Time Claim	A lost time claim is created when a worker suffers a work-related injury/disease which results in: • being off work past the day of accident • loss of wages/earnings, or • a permanent disability/impairment.
Allowed No Lost Time Claim	A no lost time claim results from a work-related injury where no time is lost from work, other than on the day of accident, but where health care is required. The health care costs resulting from the injury are paid by the WSIB.
Allowed Occupational Disease Fatalities	Allowed claims for workers who died of a work-related disease or condition.
Allowed Traumatic Fatalities	Allowed claims for workers who died of a work-related traumatic incident.
Average Days Lost	The average number of days lost for which wage loss benefits were paid for claims within 1 month, 3 months or 6 months after the injury/illness occurred.
Average Loss of Earnings (LOE) per Full Paid Day	Average amount paid for an entire day off work, adjusted for inflation.
Benefit Payment Year	The year benefit payments were made to or on behalf of injured workers.
Benefit Payments	Payments made to or on behalf of injured and ill workers. Includes Loss of Earnings (LOE), Workers' Pension, Health Care, Future Economic Loss (FEL), Survivor Benefits, External Providers and Non-Economic Loss (NEL). Excludes benefit liabilities and claims administration costs.
Data Maturity	Data continues to be revised after the year has concluded as additional claims are reported and decisions on complex claims are made. The revision of data after the year has concluded is called "maturing". All data contained in this report is matured three months, with the exception of benefit payments which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.
eClearance (%)	A clearance certificate tool used for the online issuance and management of clearance certificates.
ePremium (%)	A premium remittance tool used for the online submission/reporting of premium information.
eRegistration (%)	An employer account registration tool used for the online submission of account registration information.
eService Usage	Active subscribed users of our online services.
Eligibility Decisions within 2 Weeks	The percentage of claims where eligibility decisions are made within the targeted timeframe of 10 business days after their registration date. Excludes occupational disease, serious injury, fatality, withdrawn, abandoned and re-opened claims.
Employer	An employer means every person having in his, her or its service under a contract of service or apprenticeship another person engaged in work in or about an industry and includes, 1. a trustee, receiver, liquidator, executor or administrator who carries on an industry, 2. a person who authorizes or permits a learner to be in or about an industry for the purpose of undergoing training or probationary work, or 3. a deemed employer. Coverage under the WSIA only applies to those employers: • whose operations are compulsorily covered by Schedules 1 or 2 of the Act, or • whose operations have been added to Schedule 1 of the Act by application, or • who have optional insurance only .
Entitlement Year	The year in which a decision was made on a claim.
External Provider Payments	These are payments associated with the reintegration program and represent payments to external agencies providing rehabilitation services, such as training programs to assist an injured worker's return to work and the costs of work transition assessments and plans, in the case of injured workers not returning to work with their pre-injury employer.
First Return to Work Specialist Referrals Within 12 Weeks	Cases with a first referral received by the Return to Work program within 12 weeks of either the case's date of injury or latest recurrence date.
Future Economic Loss Benefit Payment	Compensation to a worker, who was injured after January 1, 1990 and prior to January 1, 1998 and suffers a workplace injury resulting in a permanent impairment or temporary disability for 12 continuous months.
Health Care Payment	Payments made on behalf of an injured or ill worker for professional services provided by health care practitioners, hospitals and health facilities as well as the cost of drugs, attendant services, home or vehicle modifications, assistive devices and prostheses, extraordinary transportation costs to obtain health care and other measures to facilitate independent living and to improve the quality of an injured or ill worker's life.
High Impact Claims	WSIB has identified a group of allowed lost time claims that have been shown to have significant impacts on workers and employers. These claims are those involving the low back, shoulder and fractures.
Illnesses (occupational disease)	An occupational disease is a health problem caused by exposure to a workplace health hazard. For more details, please refer to the Occupational Disease fact sheet located under the 'Workers' tab on the WSIB website.
Industry Sector	The WSIB's operations are organized into 17 industry sectors (Schedule 2 is a separate industry sector).
Injury	A worker who sustains a personal injury by accident arising out of and in the course of his or her employment is entitled to benefits under the insurance plan.

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Term	Business Definition
Injury/Illness Year	The year in which injury or illness occurred.
Injury Event	Describes the manner in which the injury/disease was produced/inflicted and is based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z795-96 codes which allow for more detailed coding injury details.
Injury Source	The object, substance, exposure or bodily motion that directly produced or inflicted the injury/disease identified under Nature of Injury and is based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z795-96 codes which allow for more detailed coding injury details.
Labour Market Re-entry (LMR) Program	The Labour Market Re-entry (LMR) Program was introduced January 1, 1998 as part of Bill 99. LMR services were outsourced to primary service providers who provided assessments, LMR planning, and case management services. These primary service providers used a variety of secondary service providers (public, not for profit, and private) to deliver education and training programs. The WSIB established a new integrated return to work and LMR program in November 2010 called the Work Reintegration program.
Locked-In Claim	Those claims, with an injury/illness date on or after January 1, 1998 (Bill 99), where a final review of the loss of earnings benefit at 72 months post injury/illness has been completed and the benefit will continue to be paid to age 65, with few exceptions.
Loss of Earnings Benefits (LOE)	Wage loss benefits for time lost from work due to a work-related injury or illness occurring on or after January 1, 1998.
Lost Time Injury Rate (LTI)	The number of allowed lost-time injury and illness claims per 100 Full-Time Equivalent (FTE) workers for the injury year specified.
Nature of Injury	The principal physical characteristics of an injury/disease and based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z795-96 codes which allow for more detailed coding injury details.
No Lost Time Injury Rate (NLTl)	The number of allowed no lost-time injury and illness claims per 100 Full-Time Equivalent (FTE) workers for the injury year specified.
Non Economic Loss Benefits (NEL)	Compensation paid to a worker, beyond wage loss who suffers a permanent impairment as a result of an injury based on the severity of the permanent impairment and the age of the worker.
Non Locked-In Claim	Those claims, with an injury/illness date on or after January 1, 1998 (Bill 99), receiving loss of earnings benefits that may not be reviewed at the 72 month post injury/illness date.
Occupation	A major grouping of occupations that are coded based on National Occupational Classification standards.
Other Benefit	Payments made to or on behalf of injured and ill workers. Includes situational payments such as Temporary Total and Temporary Partial for Bill 162 claims (accident dates between January 2, 1990 and December 31, 1997) and pre-1990 claims.
Part of Body	The injured/disease part of body affected by an injury/disease and is directly linked to the nature of injury/disease which is based on the National Work Injuries Statistics Program (NWISP) coding standard (NWIS). This standard is based on the Canadian Standards Association (CSA) Z795-96 codes which allow for more detailed coding injury details.
Percentage of Workforce Covered	Percentage of the employed labour force that is covered under the WSIA.
Percentage Receiving Loss of Earnings Benefits	The percentage of injured or ill workers that continue to receive full or partial Loss of Earnings (LOE) benefits on the specified anniversary.
Permanent Impairment	Any permanent physical or functional abnormality or loss (including disfigurement) which results from an injury, and any psychological damage arising from the abnormality or loss. A worker's degree of permanent impairment is expressed as a percentage of total permanent impairment of the whole person.
Registered Claims	Registered claims for injuries, illnesses or fatalities reported to the WSIB in the year (as some claims are registered with the WSIB after the year in which the injury, illness or fatality occurred) and includes all allowed, denied, abandoned and pending claims.
Registration Year	Total number of claims registered with the WSIB by year. Some claims are registered with the WSIB after the year in which the injury, illness or fatality occurred.
Return to Work Specialist (RTWS)	The Return to Work (RTW) Specialist is an objective facilitator who intervenes in a case at the request of a Case Manager or workplace parties. When a Case Manager is unable to resolve or remove RTW barriers, the RTW Specialist will lead the early and safe RTW process by meeting on-site with workplace parties.
Schedule 1	Schedule 1 employers are those for which the WSIB is liable to pay benefit compensation for workers' claims. Schedule 1 employers are required by legislation to pay premiums to the WSIB and are protected by a system of collective liability. Since the WSIB pays benefits to injured workers out of money pooled in the insurance fund, Schedule 1 employers are relieved of individual responsibility for actual accident costs.
Schedule 2	Schedule 2 employers are employers that self-insure the provisions of benefits under the WSIA. Schedule 2 employers are liable to pay all benefit compensation and administration costs for the workers' claims. The WSIB administers the payment of the benefits for workers of Schedule 2 employers and recovers the cost of these benefits plus administration fees from the employers.
Statistics Canada – Labour Force Employment	Statistics Canada. Table 282-0008 – Labour force survey estimates (LFS), by North American Industry Classification System (NAICS), sex and age group, annual (persons unless otherwise noted). (accessed: April 29, 2013)
Survivor Benefit Payment	Benefits payments provided to a spouse, dependent children and other dependants when an injured worker suffers a fatality in the workplace or as a result of an occupational disease. Benefits include lump sum payments, monthly payments, bereavement counselling and burial expenses.

Term	Business Definition
Work Reintegration (WR) Program	The Work Reintegration program is a comprehensive and integrated approach to returning injured workers to employment. Early and ongoing support is provided to the workplace parties to create work reintegration plans. The focus is on return to the injury employer, and where that isn't possible, to provide high quality training and placement services that enable the worker to find a job with a new employer. The Work Reintegration program, launched in November 2010, integrates Return to Work and Work Transition programs.
Work Transition (WT) Program	The Work Transition program replaced the outsourced Labour Market Re-entry (LMR) Program. Unlike the LMR program, Work Transition focuses first on helping the injured workers and employers find suitable and available work with the injury employer. The Work Transition Program provides new options to help workers remain with their employer including re-training and the alternative of part time employment in appropriate cases. When it is not possible for a worker to return to work with the injury employer, the Work Transition Program offers a broad range of services including high quality assessment, training and placement services to support workers to find a job with a new employer.
Work Transition Administrative Costs	Total administrative costs of the Work Transition Program.
Work Transition Plans Completed Resulting in Return to Work	Work Transition plans where the injured worker is employed at the conclusion of the plan. This measure excludes cases with prior Labour Market Re-entry plan services.
Work Transition Specialist (WTS)	Provide expert advice, vocational rehabilitation planning, and support workers and employers to co-ordinate work reintegration which may include accommodation and transition to a different job if necessary.
Work Transition/Labour Market Re-entry Plans Completed	Work Transition/Labour Market Re-entry plans where the injured worker is employed or employable at the conclusion of the plan.
Work Transition/Labour Market Re-entry Plans Completed Resulting in Return to Work	Work Transition/Labour Market Re-entry plans where the injured worker is employed at the conclusion of the plan.
Work Transition/Labour Market Re-entry Program Costs	Totals costs by service category (Assessment Evaluations, Education/Training, Placement & Retention, Provider Related, Supplies & Equipment, Travel Related, and Other) for the Work Transition/Labour Market Re-entry programs.
Worker's Pension Benefit Payment	Pensions for injured workers suffering a workplace injury prior to January 1, 1990 based on the degree of the injured worker's permanent disability.
WSIB Covered Employment Schedule 1	The number of full time equivalent workers is an estimate based on employer reported insurable earnings divided by the average hourly wage for the rate group divided by 2,000 hours, it is assumed a person works 2,000 hours per year.
WSIB Covered Employment Schedule 2	The number of full time equivalent workers is an estimate based on data from Statistics Canada's Survey of Employment, Payrolls and Hours (SEPH).

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Appendix – Schedule 1

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Injury Profile – Schedule 1

Allowed Lost Time Claims – Leading Nature of Injury by Gender

Schedule 1 – Allowed Lost Time Claims – Leading Nature of Injury by Gender

20-24	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Finger(s), fingernail(s)
25-29	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
30-34	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
35-39	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
40-44	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
45-49	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
50-54	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
55-59	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end. **(Continued)**

Schedule 1 – Allowed Lost Time Claims – Leading Part of Body by Age Group (Continued)

Data Source: WSIB – Enterprise Information Warehouse. Data Maturity: As at March 31st of the following year for each injury year

Schedule 1	Injury / Illness Year									
	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
60-64	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
65+	Leg(s)	Leg(s)	Chest, including ribs, internal organs	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Multiple body parts	Multiple body parts	Leg(s)	Multiple body parts

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Injury Profile – Schedule 1

Allowed Lost Time Claims – Leading Part of Body by Industry Sector

Schedule 1 – Allowed Lost Time Claims – Leading Part of Body by Industry Sector

Data Source: WSIB – Enterprise Information Warehouse. Data Maturity: As at March 31st of the following year for each injury year

Schedule 1	Injury / Illness Year									
	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Agriculture	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Automotive	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Chemicals/Process	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Construction	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Education	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Electrical	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Food	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Forestry	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Leg(s)	Lower back (lumbar, sacral, coccygeal regions)	Leg(s)
Health Care	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end. **(Continued)**

Schedule 1 – Allowed Lost Time Claims – Leading Part of Body by Industry Sector (Continued)

Data Source: WSIB – Enterprise Information Warehouse. Data Maturity: As at March 31st of the following year for each injury year

Schedule 1	Injury / Illness Year									
	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Manufacturing	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Mining	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Leg(s)	Leg(s); Lower back (lumbar, sacral, coccygeal regions)
Municipal	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Primary Metals	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Pulp & Paper	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Services	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Transportation	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Injury Profile – Schedule 1

Allowed Lost Time Claims – Leading Part of Body by Gender

Schedule 1 – Allowed Lost Time Claims – Leading Part of Body by Gender

Data Source: WSIB – Enterprise Information Warehouse. Data Maturity: As at March 31st of the following year for each injury year

		Injury / Illness Year								
Schedule 1	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Female	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)
Male	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)	Lower back (lumbar, sacral, coccygeal regions)

Data in By the Numbers: 2013 WSIB Statistical Report may not match previously published results. This is due to factors such as data maturity, updated definitions and methodologies, and rounding. Data in By the Numbers is matured three months, with the exception of benefit payments, which represents cash paid during the year to or on behalf of injured workers and are not matured three months following year end.

Fatalities – Schedule 1

Allowed Traumatic Fatalities by Age Group

Schedule 1 – Allowed Traumatic Fatalities by Age Group

Data Source: WSIB – Enterprise Information Warehouse. Data Maturity: As at March 31st of the following year for each year

Schedule 1 Age Group	Year of Death										Total
	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
