
Organic Dairy Production in Ontario

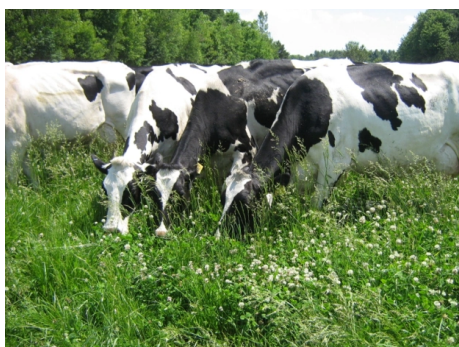

Posted on [September 5, 2022](#) by [ONOrganic](#)

Organic dairy production is a system of farm design and management practices for producing milk, yogurt, cheese, cream and other dairy products without the use of pesticides, synthetic fertilizers or antibiotics. For some producers, organic dairy production can be a good fit.

There are many factors to consider before making the transition to organic dairy production, including:

- current and future milk demand
- standards
- certification requirements
- production costs
- lifestyle goals
