

Water Requirements of Livestock

Posted on [October 12, 2023](#) by [ONOrganic](#)

OMAFRA Water Requirements of Livestock Factsheet

Providing enough high-quality water is key for good livestock health. The Water Requirements for Livestock factsheet, written by Dan Ward and Kevin McKague, discusses water needs for all major livestock types depending on weight and weather, including dairy cattle, beef cattle, swine, sheep and chickens. Information on the importance of water quality and livestock tolerance to minerals in water is also provided.

Read more or download a PDF version of this [factsheet here](#).
