Ontario Cap and Trade Program

Auction of Greenhouse Gas Allowances

September 2017 Ontario Auction #3

Background

The Ontario Ministry of the Environment and Climate Change (MOECC) held the third auction of greenhouse gas (GHG) allowances on September 6, 2017. The auction included a Current Auction of 2017 vintage allowances and an Advance Auction of 2020 vintage allowances. The information provided in this report is a balance between the need for program transparency and protection of individual auction participants' market positions.

Prior to the certification of the auction, MOECC staff and an independent market monitor evaluated the bids and determined that the auction process and procedures complied with the requirements of The Ontario Cap and Trade Program Regulation (Regulation). As provided below, the Market Monitor made the following findings:

The Market Monitor found that the auction was cleared consistent with the auction clearing rules in the Regulation. To address potential market manipulation or collusion, the Market Monitor also uses a number of economic analysis tools to evaluate the auction results. The Market Monitor confirmed the clearing price and clearing quantities by participant for the Current Auction of 2017 vintage allowances and for the Advance Auction of 2020 vintage allowances. The auction algorithm correctly applied the Regulation requirements covering the bid guarantee. The Market Monitor did not observe any breaches of security or communication protocols. The Market Monitor recommended that MOECC approve the September 2017 Ontario Auction #3 results.

Summary Results

The first table below provides key data and information on the results of the auction. The second table provides qualified bid summary statistics from the auction. Please see Explanatory Notes at the end of this report for descriptions of all summary information.

Table 1: Auction Results for September 2017 Ontario Auction #3

Auction Results	Current 2017 Vintage	Future 2020 Vintage
Total Allowances Available for Sale	25,296,367	3,116,700
Total Allowances Sold	25,296,367	3,116,700
Total Qualified Bids Divided by Total Allowances Available	1.19	1.53
Proportion of Allowances Purchased by Capped Participants*	96.4%	96.1%
Herfindahl-Hirschman Index	1,361	1,788

*Note this statistic may not be provided if it would result in the disclosure of confidential information.

Table 2: Qualified Bid Summary Statistics for September 2017 Ontario Auction #3

Qualified Bid Summary Statistics	Current 2017 Vintage	Future 2020 Vintage
Ontario Auction Reserve Price (CAD)	\$16.79	\$16.79
Settlement Price (CAD)	\$18.56	\$18.03
Maximum Price (CAD)	\$32.84	\$26.69
Minimum Price (CAD)	\$16.79	\$16.79
Mean Price (CAD)	\$21.19	\$20.14
Median Price (CAD)	\$18.50	\$18.36
Median Allowance Price (CAD)	\$20.21	\$18.26
Auction Exchange Rate	1.2371	

List of Qualified Bidders for the Current Auction of 2017 Vintage Allowances and the Advance Auction of 2020 Vintage Allowances

A Qualified Bidder is a cap and trade program participant that completed an auction application, submitted an acceptable bid guarantee, and was approved by MOECC to participate in the auction. Qualified bidders may or may not have participated in the auction.

CITSS Entity ID Number	Participant Legal Name

Explanatory Notes: Qualified Bid Summary Statistics

Current Auction of 2017 Vintage Allowances

Term	Definition
Total Allowances Available for Sale	Total allowances available, by vintage, for purchase in the Current Auction in metric tons, sold by the Province of Ontario
Total Allowances Sold at Auction	Total allowances, by vintage, purchased in the Current Auction
Total Qualified Bids Divided by Total Allowances Available for Sale	Total number of allowances included in all the qualified bids for the Current Auction allowances (regardless of bid price) divided by the total number of Current Auction allowances available in the auction
Proportion of Allowances Purchased by Capped Participants	The total number of Current Auction allowances (by vintage) purchased in the Current Auction by Capped Participants divided by the total number of Current Auction allowances sold in the Current Auction Capped Participant is as defined in the Ontario Cap and Trade Regulation.
Herfindahl–Hirschman Index (HHI)	The HHI is a measure of the concentration of allowances purchased by winning bidders relative to the total sale of Current Auction allowances in the auction. The percentage of allowances purchased by each winning bidder is squared and then summed across all winning bidders. The HHI can range up to 10,000, representing 100% of the current vintage allowances purchased by a single bidder (i.e. $100 \times 100 = 10,000$)

Term	Definition
Qualified Bid Price Summary Statistics	Statistics are calculated from all the qualified bids for the Current Auction allowances (regardless of bid price). All price statistics are shown in CAD.
Auction Reserve Price	The minimum acceptable auction bid price for Current Auction allowances, in CAD
Settlement Price	The Current Auction allowance price that resulted from the auction, in CAD
Maximum Price	Highest qualified bid
Minimum Price	Lowest qualified bid
Mean Price	Average qualified bid calculated as the sum of the bid price times the bid quantity of each qualified bid divided by the sum of the bid quantities across all qualified bids
Median Price	The price per metric ton calculated so that 50% of the qualified bids fall above and below the median bid price
Median Allowance Price	The price per metric ton calculated so that 50% of the quantity of allowances in the qualified bids fall above and below that price median value
Auction Exchange Rate (USD to CAD)	The United States dollar to Canadian dollar (USD to CAD) daily average exchange rate as provided by the Bank of Canada for the day before, or a date that is before and as close as possible to, each Ontario auction. The Auction Exchange Rate is used in the determination of the Auction Reserve Price as described in the Detailed Auction Requirements and Instructions document.

Advance Auction of 2020 Vintage Allowances

The data for future vintage allowances available for sale at the Advance Auction are computed in the same manner as computed for the Current Auction.
