

Media Prep Note: LIVE Interview with CHCH Evening News

Reporter: Taz Boga

Wednesday, March 8, 2017

Time: 6:00pm – 6:05pm Prep time // 6:05pm-6:15pm Interview

Location: Randy Rath's Queen's Park Office (4th Floor, Main Legislature Building)

Prepared by: Jennifer Beaudry

Premier,

Tomorrow you will do a live interview, about our Fair Hydro Plan, into the CHCH Evening News with co-anchor Taz Boga. Your interview with Taz will be 5-10 minutes long from Randy Rath's Queen's Park Office. At the end of this note you will find a brief bio and photo of Taz who will be coming to Queen's Park to conduct the interview.

For this interview it will be important to continue to return to the strategic objectives you spoke about on announcement day and continued to draw on for your interviews on Friday.

It will be important not to be boastful, because as you said: Electricity is not a frill it's an essential part of our daily lives; I think we all know that. And everywhere I go, I hear from people worried about the price that they're asked to pay for hydro and the impact that it has on their household budgets.

It will also be important not to take shots at the opposition, to go back to our plan, your motivation and what it means for people.

You'll want try to avoid explanations of our investments and upgrades or get pulled into a policy discussion about our electricity system. And as much as possible, stay away from explaining the reductions we tried to make before the 25 percent (8 percent HST, renegotiating Samsung etc). Most Ontarians don't know about these investments and don't feel we've done anything for them yet. Instead pivot back to the motivation wherever possible.

And, like you were on Metro Morning, be confident about answering the "you're kicking the can down the road/burdening our children with debt" questions. I have included that section of your transcript below.

1) This is about fairness - For too long, governments, my own included, have made mistakes in the way we've structured Ontario's electricity system. That has resulted in rates that are unfairly high. It's time to fix those mistakes in ways that work for today and for the future. We've created an electricity grid that is second to none. In the past few years, we've invested more than \$50 billion in electricity infrastructure: new dams in the south, new towers in the north, \$13 billion to refurbish nuclear power plants alone, and billions more to ensure new transmission and distribution lines everywhere.

These are enormously important assets that meet the need for cleaner and reliable power everywhere in the province. These are assets that belong to all of the people of Ontario and

they'll serve us for many decades to come. But the way we financed those investments was a mistake. We asked one generation, today's generation, to unfairly shoulder the burden of nearly all of those costs. We had to play catch up and we asked today's ratepayers to cover nearly the whole tab.

Think of it in terms of a mortgage. We needed to rebuild the system and so we went to the bank for that money. But the terms that were set weren't fair, particularly the amortization. Instead of paying off the mortgage in 30 years we agreed to a term of 20. That means that we pay things down faster, but the monthly mortgage payments, or in this case your hydro bills, are higher. And it doesn't really make sense since that house, or in this case the electricity system, is an asset that will continue to benefit people for long past that contract term. In effect, this generation has been subsidizing not just those who came before, but those who will come next. And that's not right. And it has been notably unfair on today's hydro users. So we're fixing that. We're refinancing the mortgage and we're setting a new term that stretches over a longer period.

Over time, it will cost a bit more; that's true. And it will take longer to pay off; that's also true. But it is fairer because it doesn't ask this generation of hydro customers alone to pay the freight for everyone who came before and everyone who is going to come after. The burden will now be shared more evenly and more appropriately. So that's the first and the most important fix we're putting in place.

2) What this means for people. For the past couple of months, I've made a point of connecting with people who have written to me about this issue. I've called them up or I've seen them on a visit. I've sat and I've talked and I've listened to what they had to say. People want to know three things. First, they want to know that relief, and by that they mean substantial relief, is on its way. Secondly, they want to know that that relief is going to go to everyone. And third, that the relief will be lasting because it's built on a real change. In other words, that bills won't jump back up in a couple of months or even in a couple of years. So we're going to deliver on all three counts. And that starts by bringing down what people pay on their bills. Last September, I committed to reducing electricity bills by 8 per cent across the board, equivalent to the provincial portion of the HST. But it hasn't been enough. It's made too small a dent in people's bills. And for that reason we're taking more action.

We are tripling the size of the cut we're making to people's hydro bills from 8 per cent to an average of 25 per cent. Electricity rates in Ontario will come down significantly. They're going to stay down and everyone will benefit. And let me emphasize that last point. The cut will go to all households that pay for electricity. There will be no asterisks, no loopholes and no exceptions. Our plan will lower electricity bills by 25 per cent on average for all residential consumers in the province.

And for those living in rural communities or people who are living on low-incomes, the break will be even greater.

3) Structural Change. We are making structural changes. So when I talk about taking costs like the distribution charge or the Ontario Electricity Support Program which is really a social program to help people who are living on low income, taking those off the rate base saying you know it's not up to electricity users to pay for those programs and putting those on the tax base. That's a structural change. Asking people across a couple of generations to pay for upgrades to an electricity system that's going to last for those generations and can be used by those generations, that's a structural change. We are actually making structural changes because we

made structural investments. You know we could not just let the electricity system fail so when we came into office in 2003 there was a debate. It needed to be upgraded.

Jenn will be accompanying you during this interview. As always please let us know if you have any questions. You can reach me at: 647-299-5435.

Taz Boga

Having spent the last decade working in various cities in both Canada and the U.S., Taz is happy to be closer to home. Born in London, Ontario, Taz pursued a career in journalism after obtaining a Master's Degree in Broadcast Journalism from Syracuse University.

Before moving to Hamilton in the fall of 2009, Taz spent six and a half years in Ottawa as a reporter and weekend anchor at 'A' News. Previous to that, she spent two and a half years as a general assignment reporter for 'A' News in Calgary. She began her career in Erie, PA, where she was a reporter/fill-in anchor at the CBS affiliate. Taz currently co-anchors the Evening News with Nick Dixon.

Taz is an accomplished violinist and pianist and is a strong proponent of the arts. She is also an avid reader, and can often be found curled up with a good book. In her spare time, she enjoys traveling and spending time with family and friends.

What Taz loves about her job: "There's nothing better than feeling like you've made a difference. Each day brings with it new challenges and new faces. I can't think of another career that allows for more creativity and reflection."
