

Timeline to Implementation of 25% Price Reduction

Notes: There are a number of initiatives that are part of Ontario's Fair Hydro Plan (OFHP) that are not directly part of the 25% reduction for residential electricity consumers. Most small businesses and farms would also benefit from OFHP initiatives. Consumers that are newly eligible for the Industrial Conservation Initiative (ICI) and opt in will begin being billed as Class A consumers on July 1, 2017. The new Affordability Fund will provide energy efficiency measures to customers on a targeted basis. It is expected that electricity distributors will be able to apply to the Fund starting in Summer 2017. The increase of OESP credits, broadening of the RRRP and First Nations Delivery would result in benefits beyond the 25% reduction for eligible consumers.
