I agree that this would likely be non-discussion at Cabinet given the technical nature of the regulations. On timing, we have not yet seen draft materials and although we prepared a note based on the information we have from our regular fair hydro meetings, it has a cursory summary of the regulations and quite a few holes. As of yesterday neither TBS officials nor the Provincial Controller had seen the draft regulations and both expressed a desire to review them. At this stage I would be concerned that no one outside the ministry would have the time to truly review and provide advice on the regulations, and if they did it would be at the expense of members themselves having time with the material.

Thanks. They asked yesterday we said no, there is no need for them to rush in based on what we know, we understand OPG wants to go out to the market in November, we said oct. 25th would be fine for that (even LRC on Oct. 30!). Obviously others feel differently. We have nothing from them which is why it was kicked off LRC on Monday but now they are ready??

Hmmmmmm....

Agree this isn't something that will need a lot of discussion, it's just another step to getting out there.

Hi.

Just concluded 1:1 with Bevan. He confirmed that we should track to next Wednesday for the OFHP Regulations to keep it all on track and that while it is a bit dramatic to go direct to cabinet, etc they don't think that it would be much of a discussion since it's just implementing what we said we would do.
