

Ontario Cutting Electricity Bills by 25 Per Cent

System Restructuring Delivers Lasting Relief to Households Across Province

NEWS

March 2, 2017

Ontario is lowering electricity bills by 25 per cent on average for all residential customers as part of a significant system restructuring that will address long-standing policy challenges and ensure greater fairness.

Starting this summer, Ontario's Fair Hydro Plan would provide households with this 25 per cent break. Many small businesses and farms would also benefit from the initiative. People with low incomes and those living in eligible rural communities would receive even greater reductions to their electricity bills. As part of this plan, rate increases over the next four years would be held to the rate of inflation for everyone.

These measures include the eight per cent rebate introduced in January and build on previously announced initiatives to deliver broad-based rate relief on all electricity bills.

Taken together, these changes will deliver the single-largest reduction to electricity rates in Ontario's history.

Recently, electricity rates have risen for two key reasons:

- Decades of under-investment in the electricity system by governments of all stripes resulted in the need to invest more than \$50 billion in generation, transmission and distribution assets, to ensure the system is clean and reliable.
- The decision to eliminate Ontario's use of coal and produce clean, renewable power, as well as policies put in place to provide targeted support to rural and low-income customers, have created additional costs.

The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's ratepayers. To relieve that burden and share costs more fairly, two system fixes are being undertaken.

Recognizing that the electricity infrastructure that has been built will last for many decades to come, the province would refinance those capital investments to ensure that system costs are more equitably distributed over time. In addition, a number of important programs, such as the Ontario Electricity Support Program (OESP), will now be funded by the government instead of by ratepayers.

The province will also launch a new Affordability Fund, enhance the existing OESP and Rural or Remote Rate Protection Program (RRRP) and provide on-reserve First Nations households with a delivery credit. These new measures will cost the government up to \$2.5 billion over the next three years.

Notwithstanding that hydro rate relief costs will add significant pressure on the fiscal framework, the province continues to project a balanced budget for 2017-18, and will provide a full update on its fiscal plan in the spring budget.

Reducing electricity costs is part of Ontario's plan to create jobs, grow our economy and help people in their everyday lives.

QUOTES

"I have heard from people around the province who are worried about the price they are asked to pay for electricity and the impact it has on their household budget. Electricity is a necessity. By fixing problems in the system, we will be able to provide every residential customer in Ontario with an average 25 per cent off their bills now and make rates fairer in the future."
— Kathleen Wynne, Premier of Ontario

"Ratepayers across Ontario have been loud and clear — we need to do more to help reduce costs. The government has listened and Ontario's Fair Hydro Plan would reduce costs now and ensure an affordable and reliable electricity system. These new measures would have a significant impact on your monthly hydro bill and would help the most vulnerable."
— Glenn Thibeault, Minister of Energy

QUICK FACTS

- Ontario's Fair Hydro Plan would improve sector efficiency and modernize the province's electricity market, working in collaboration with the Independent Electricity System Operator (IESO) and the Ontario Energy Board (OEB).
- The Province will expand the RRRP to provide distribution charge relief to additional customers served by LDCs with the highest rates. About 800,000 customers would benefit from the enhanced RRRP program.
- The Affordability Fund would be accessible to Local Distribution Companies (LDCs) for customers who do not qualify for low-income conservation programs and who are unable to undertake energy efficiency improvements without financial assistance.
- On-reserve First Nations customers will receive a 100 per cent credit of the delivery line on their monthly electricity bills.
- The expanded OESP will provide an additional \$180 to \$276 per year for households of eligible size and combined income.
- Ontario is expanding the Industrial Conservation Initiative (ICI) program by reducing the threshold from 1 MW to 500 kW and targeting more small manufacturing and industrial consumers.
