Hi Kelsea,

Please find attached a draft deck for PD&G, acknowledging this will likely change direction a bit.

A few notes:

- Title needs changing!
- Might want to include some break-up slides for headings
- The leg/reg slide is rather busy, feel free to cut what you don't want to include!
- The pie charts don't really tell a story... There is essentially no change in risk status and so I would recommend removing this piece... If anything the only thing that has happened is we are tracking more key activities.
- The major policy and delivery milestones were me trying to pick the most "major" ones.... I could have missed something you feel should be on here
- We tried to incorporate the risk statuses and key activities without overbearing the info (I think Jay said to not focus too much on MYAP codes and more on the priority report stuff
- Placeholders are there for extra info re: looking forward etc.

Thanks,

Lauren Birch
