Thanks. I think I am going to take it out as people seemed more concerned with it in I think as it was new to everyone? And maybe include that in a comment you have.

Right – so I put that back in with a question on whether it is needed / should be more flexible.

Thanks. Will do. No the 25% was an addition energy made then took out, was related to how much the cost could increase by for ga smoothing.

Hi – here is the last email you sent to the group on the minute. Thought you could just reply all to it and send the latest for their feedback? Unless you rather I just do it, but perhaps it ought to come from you. I've attached the minute I just sent to Steven.

Subject: Updated minute

Hi all,

Attached is an updated minute that incorporates the version received from energy last night as well as SoC comments and Steven's comments this morning. We have incorporated most of the detail energy included but not in all areas, for example some of the detail on legislative change isn't here and some detail is more appropriate for a TB minute (e.g., on the affordability fund). I have left one comment in, around whether OEFC or the OFA would require any expanded powers as it could be added in 2Ai, will leave that to MOF to answer.

Tracked changes was not a pleasant read so I have made this clean but if you would like further

details on the changes, just email me and I can walk you through them.

I've saved this version as Feb 18 130pm.

Same password.

Thanks,
martha
