There are Regulatory Registry postings meeting your request:

Dates: Posted Today

[Proposed amendments to O. Reg. 442/01 \(Rural or Remote Electricity Rate Protection\) and O. Reg. 315/14 \(Ontario Electricity Support Program\) made under the Ontario Energy Board Act, 1998 \(OEBA\) and proposed regulations under the OEBA as enabled under the Ontario Fair Hydro Plan Act, 2017, if passed.](#)

ENERGY has proposed legislation to enable distribution rate protection; on-reserve delivery credit; tax-based funding for new programs and moving the majority of the RRRP costs to provincial funds. Creation of regulations under the OEBA, would establish mechanisms to support tax-based funding for a portion of RRRP, continue the Ontario Electricity Support Program, establish distribution rate protection and the on-reserve delivery credit as tax-based funded programs.

[Proposed amendments to O. Reg. 275/04 made under the Ontario Energy Board Act, 1998 \(OEBA\); proposed amendments to O. Reg. 442/01 made under the OEBA; proposed regulations under the Ontario Fair Hydro Plan Act, 2017 \(OFHPA\), if passed; and revocation of spent provisions of O. Reg. 364/16 made under the Ontario Rebate for Electricity Consumers Act, 2016 \(ORECA\).](#)

ENERGY is proposing to amend existing regulations and introduce new ones related to electricity invoicing to implement the changes introduced by OFHPA, if passed. These proposed amendments would remove outdated informational messaging from invoices; introduce new messaging requirements related to OFHPA initiatives; and inform customers about resultant bill impacts. These amendments would also exempt Hydro One from specified requirements, as appropriate.
