16. For the purposes of paragraph 3 of subsection 24 (1) of the Act, the IESO shall record the following adjustments in a variance account each month: 1. All funding rebates and other amounts paid by the IESO to a financing entity during the month. 2. Any variance account balances in variance accounts established and maintained under subsection 25.33 (5) of the <i>Electricity Act, 1998</i> and costs incurred in relation to the balances.	16. 3. Any amounts paid or incurred by the IESO under section 9.1.	Proposed amendments to section 16 of O. Reg. 206/17 enable the IESO to record amounts related to financing entities' carrying costs in the variance account established under section 24 of the OFHPA, allowing such amounts to be included as part of the regulatory asset to be transferred to the financing entity as set out in the legislation. The overall net on-bill impact to specified consumers within the inflationary cap period is expected to be zero. This approach would be in accordance with the government's commitment to hold increases to electricity bills for a typical consumer to the rate of inflation for four years. Adding the carrying costs to the variance account allows such amounts to be recovered through the CEAs on and after May 1, 2021.
