Hi Deputy,

Attached is the draft LTEP implementation direction to the IESO, as well as the draft amending direction to the IESO, which amends the definition of conservation based on our direction in the LTEP. Staff have worked closely with the IESO on this direction, and both sides are comfortable with the attached.

Also attached here is the draft direction to the OEB. There are been a few rounds of back and forth with the OEB, and we believe everyone is comfortable with the language in the attached. The approach has been to build in more language in the LTEP, and keep the direction higher level. There is an amending directive to the OEB as well, which should track to you tomorrow.

The next step will be to share the directions with the MO, and determine how to bring these forward for Cabinet approval. CO has some suggestions for the path forward, and MO has flagged tabling the directions at our September Cabinet date. I'm happy to discuss these and give you some context tomorrow, but wanted to share them with you today so you have time to read through.

Thanks,
Hillary
