

Ontario's Proposed Fair Hydro Plan Compendium

If passed, Ontario's proposed Fair Hydro Plan Act would lower electricity bills by 25 per cent, on average, for residential consumers starting in the summer of 2017. The plan also includes initiatives to reduce costs for up to half a million small businesses, farms and manufacturers.

Included in these measures is the eight per cent rebate introduced on January 1, 2017, which builds on previously announced initiatives to deliver broad-based relief on all electricity bills.
