

Follow up question:

Are you aware of any upcoming changes in the GA allocation formula? Is there enabling legislation in the pipeline that would change the above mentioned formula?

Proposed response:

Under Ontario's Fair Hydro Plan, the Global Adjustment (GA) refinancing would only apply to the portion of GA for **Regulated Price Plan (RPP) eligible consumers** ~~that electricity consumers eligible for the Regulated Price Plan (RPP) and non-RPP eligible consumers that currently receive the 8% rebate as specified in the *Ontario Rebate for Electricity Act* are responsible for.~~ Other consumers would not be eligible for near term benefits or longer term repayment. Implementation is subject to pending legislative/regulatory changes.
