Hi Deputy,

Attached are the two decks for Monday's Minister's briefing: Energy Accessibility and Innovation.

As discussed last night, the energy accessibility deck contains a couple up front slides to set the context for how we're still working with the OEB on the product, and that what is presented is initial thoughts. These are slides that are from the deck we used to brief you on Wednesday. At the briefing, staff can mention that these slides pertain to the innovation deck content as well. In the innovation deck, the changes have been made to the grid modernization deck that you had previously requested, including removing references to the OEB establishing a grid modernization working group, and recasting the commentary around that initiative.

Ok to share these decks with the MO?

Thanks,
Hillary
