Hi Deputy,

Attached is a revised LTEP outlooks deck for tomorrow morning's briefing with MO. Changes are tracked in this version. There are some places where slides still have placeholders, or require further revisions, such as the GHG slides and the slide on moving to 700kwh. The residential price forecast slide was also moved down into the price section, and ESP removed the 2017 projected price line.

Ok to share a clean version of this deck with MO?

Thanks,
Hillary
