Hi Deputy,

Apologies these products are only getting to you now. Attached are two products for today's briefing with MO. The first is the revised climate change deck. The next steps slide has been revised per your comments.

The second product is the modeling assumptions from the IESO, that they would like approved today. We figured we could discuss with MO at the briefing if they have any last questions so we can get IESO the approval to start running their model. IESO shared a tracked version of the document, which I have attached, as well as a clean version that just includes their comments back to us.

Ok to share these with MO?

Thanks,
Hillary
