Hi Deputy,

Tomorrow we have our briefing with PO (include Andrew Bevan and the SoC) on LTEP modeling outlooks. The attached deck was prepared, which is based primarily off of slides that were included in a previous draft of the Cabinet submission. The deck outlines the three scenarios on residential bill impacts, and speaks to some options for bending the cost curve (e.g. move conservation costs to GGRA, distribution sector savings, savings identified by IESO).

We wanted to share with you so you are aware, and in case you have any concerns. MO is planning to share this with PO before 9pm this evening.

Thanks,
Hillary
