Attachments: Notes re Cap and Trade Program deck for Ministers Table Aug 25 2017.docx (21.61 kB);
Notes re LTEP Part 2 Aug 25 2017.docx (18.11 kB)

In particular, in the LTEP doc, please note the graph on pg 22 needs to be corrected. The CCAP targets need to be compared to the economy-wide emissions which include 31 Mt of Uncovered GHG emissions (agriculture, waste, non-energy industry). Doing so means the plan comes in 11 Mt above target in 2030. (The MOECC submission includes them in their C&T Linking document on pg 15.)

Hi Paul,

-

Sorry about the confusion yesterday. I just wanted to follow up on next steps as we had discussed. We have a couple of documents we would like you to review and provide us feedback on. Perhaps you could come into the office here at 900 Bay tomorrow, and we can set you up with a temporary workspace to review them. We're still working on a more longer term spot in 77 Grenville that you can use. We expect that to be ready for Monday.

-

Let us know if that works for you?

-

Thanks.

Martin

Subject: Next Week

-

Hi Paul,

-
Thanks for coming in today. Sorry for having to shuffle you around between boardrooms, we are organizing office space for you for next week. We'll work out all of those details on Monday and get back to you then about coming in the rest of the week, so we won't need you on site on Monday.

-
Have a great weekend.

-
Martin
