Hi Deputy.

Attached are the materials for November 20th LRC (OFHP reg amendments) and below is a short summary of the timeline.

OPG requires this to go to market as the rating agencies want final regulations prior to finalizing their ratings. OPG is in ongoing contact with the agencies and would aim to provide this to the rating agencies following approval on November 20th. This would allow them to be in market by the end of November or early December, which will require 7 days in market and 3 days to close (10 days total). As a result, going to LRC on December 11th would push them too close to holiday season to complete the transaction by the end of the year. Not going to market by the end of the calendar year would result in the IESO having to carry a liability on its books.

Let me know if you need anything else.

Thanks,
Martin
