Hi. I think the storyline doesn't quite work with the GA discussion at the front of the deck on the GA charts at the back. An easy fix would be to group GA at the end so start with the social programs etc. Fiscal chart should probably move to after we have GA discussion.

Good Morning :

Slide #4 - remove item #5. We are absolutely NOT seeking a decision on actions this afternoon.

Slide 15-20 = checking now, but be prepared to return to delivery options from FPC. PO apparently unaware of SoC instruction to our team yesterday. Also, for greater clarity, the reason that the charge remains high for 2,500 kWh customers is because of use - so Tx and line loss charges account for that level of volatility, since we've held dx charge constant in the deepest option?

Slide 25 - green line of 2013 LTEP - please show at 800 kWh consumption - what was published in Achieving Balance, please. Same as what has been shown here for 2010.

Many thanks, in advance.

Andrew
