Hi Deputy,

Attached is a revised draft of the LTEP outlooks deck. Some revisions are still ongoing, but we wanted to share a revised draft in case there are any comments. The main changes to this draft are the addition of slide 8 (an integrated energy sector GHG modelling slide), smoothing of the bill impacts on the OFHP slides, changes to slide 24 and 25 on residential consumption, and the addition of a next steps SNAP ribbon on slide 27. ESP has also added in the modelling assumptions in the appendix.

I'm getting an update on the IESO's GHG modelling as well.

Ok to share the revised draft with MO?

Thanks,
Hillary
