Yes -- please discuss and try to land closer to our view... need to confirm on both other sides.

Subject: Approval Needed - Energy Plan Accounting - Ministry Fact Check

Mike,

Here is what came back from the ministry when asked for a fact check (highlighted). I much prefer your line and can work with Forge on language but wanted to check on the ministry language in case there are any nuances I'm not aware of.

PO line:

- The government has been working closely with major accounting firms on the development of this plan, and all have agreed that the accounting is possible, subject to certain conditions.

Your line:

- In developing this plan, the government has received advice from major audit firms on the accounting requirements to support this plan. We are working to meet those requirements through the drafting of legislation.

Ministry line:

- In developing this plan, the government has considered accounting related considerations and risks, and sought the advice of external experts. Once available, the draft legislation will help to inform the Province's accounting analysis and final decisions regarding the initiative.

Thanks,
Lauren
