Let me know if this is what you were going for. Can expand on this or tighten it up – happy to make edits regardless.

Through Ontario's Fair Hydro Plan, we're cutting electricity bills by 25 per cent on average for all families, with 8 per cent cut already and the rest to follow this summer.

It is the single largest rate reduction in the province's history, helping families along with about half a million farms and small businesses.

Our plan will also keep rates consistent, holding them to inflation over the next four years.

While our plan helps every family across the province, it's especially helpful to those who have been struggling unfairly.

What the Conservatives don't understand is that you can't focus on your family if you're too busy worrying about how you're going to pay your next electricity bill.

And other priorities slip away when hydro costs are eating into your grocery budget.

That's why it's so important for families to know about this 25 per cent cut as well as other programs, like the expanded Ontario Electricity Support Program and the new \$200 million Affordability Fund.

These programs are helping those who need it and we have a responsibility to make sure these families are aware so they can manage their household budgets appropriately.

Instead of attacking these support programs, Conservative MPPs should be doing everything they can to make sure their constituents get the help they need.
