Subject: Facts Still Matter - Approval

Draft below.

Facts Still Matter in Ontario – June 6, 2017

Earlier today, Patrick Brown was on the radio spreading misinformation about the electricity system. He has used these same tired speaking points dozens of times, and continues to use it to distract from the fact that he voted against our Fair Hydro Plan last week, and opposes an increased minimum wage in Ontario. He needs to remember that Facts Still Matter in Ontario.

He Claimed: *"In the short term, I want them to say no to the rate hikes"*

Fact: This is exactly what we are doing. Patrick Brown and the PC Party voted against taking 25% off electricity bills, and voted against holding future rates to inflation.

It's almost been 100 days since he promised his energy plan was coming soon – so all we know about his energy policy is that he's against significant, immediate short and medium term relief.

He Claimed: “Just last month they proceeded with 1100 more contracts”

Fact: For the tenth time, Brown’s own Energy Critic has already admitted this claim is “inaccurate.” It’s just not true - no new contracts were signed. Brown was mistakenly referring to a deadline for participants to withdraw applications to FIT 5. This is very, very clear on the IESO’s website.

He Claimed: “...the fact that Kathleen Wynne hides these deals, won’t show us the contracts...”

Fact: The contracts are already public on the IESO’s website Here is the link.

He Claimed: “...the Samsung deal shows there was an exit clause we could have got out of a billion and a half of surplus electricity.”

Fact: Premier Wynne renegotiated the contract with Samsung, saving Ontarians \$3.7 B.

He Claimed: “But I’m also looking at LRP2. We’re about to proceed with this giant new large procurement on renewables.”

Fact: We suspended LRP 2 last fall.
