This morning, the Speaker confirmed what we already knew to be true – that there are no grounds to consider either the Minister of Energy or the Government of Ontario in contempt of the Legislature. We welcome this ruling.

Despite the fact that they have yet to come up with their own plan, the PCs were merely trying to use procedural delay tactics in an attempt to prevent Ontarians from hearing about the Fair Hydro Plan. This is a plan that would, if passed, take 25% off Ontarians' hydro bills. We believe that Ontarians deserve Hydro relief, and as the PCs have no alternative proposal, we had hoped they would support this initiative.
