Subject: One-Pager

I think this is what he has in mind

Advantages side needs some help....

ADVANTAGES	DISADVANTAGES
· Immediate reduction costs (from \$19 to \$28 per month depending on borrowing option) ·	· Total cost increase over long-term (up to 68B borrowing requirement to fund \$25-\$28 reduction) · Longer-term impact on rates (future electricity bills over 12 to 17 years could be as much as \$46 to \$51/month over true costs of electricity) · Independence of entity post-creation and loss of control over future rate increases · Requires significant legal analysis to ensure proper implementation and avoid unintended consequences on fiscal plan · Risk of negative public perception and reaction from AG/FAO
