Hi everyone,

Starting a new thread for tonight's content. I've added a line about 4 years to the Facebook post, assuming we'd want that mentioned (but happy to take it back out if it isn't needed!). I'd like to keep the Facebook post fairly short as it will be accompanied by the update video, which CO is working on right now.

Thanks!
Jen

Twitter – SHAREABLE (attached):
We're bringing down hydro rates by 25% & fixing the system's structure. It's better for Ontario & fairer on families Ontario.ca/FairHydroPlan

Facebook – Update VIDEO:
This morning I announced that we're bringing down hydro rates by 25% starting this summer, and bills won't increase beyond the rate of inflation for at least 4 years. For those living in rural communities or with low incomes, the reduction will be even greater.

Whether you live in a rural community or the city, the north or the south, your hydro bill has gone up way too much in recent years. It isn't fair. For 50 years, mistakes have been piled on mistakes. That ends now.
