Not urgent. But Bryan and I thought it might be a good idea to add the hydro plan to the boilerplate that goes at the bottom of Today's News. Does this work for you?

*Our government's four-part economic plan to **build Ontario up** includes our plan to **cut electricity bills by 25 per cent** for all residential customers in Ontario and fix the system's structure. We are **investing in people's talents and skills** to help them get and create the jobs of the future by **expanding access to high-quality college and university education**. We're making **the largest infrastructure investment in Ontario's history** —\$160 billion over 12 years — part of which is our Moving Ontario Forward plan to build roads, transit and infrastructure. Our plan includes **fostering a dynamic, supportive environment for business to thrive**, including investing in a **low-carbon economy driven by innovative, high-growth, export-oriented businesses**. And it includes creating a **secure retirement pension plan for workers** to have the retirement they deserve.*
