Subject: RE: Energy Backgrounders for Review

In optimizing efficiencies, the LTEP section: can we include something about climate change?

The Province is committed to continuing to put conservation first in its energy planning decisions, where cost-effective, and to developing an LTEP that helps the province achieve its climate change goals.

Subject: Energy Backgrounders for Review
Importance: High

Hi all,

Attached please find the latest drafts of Energy's backgrounders for tomorrow's announcement.

- Refinancing the Global Adjustment
- Enhancing Electricity Support and Conservation Programs
- Previous Actions to Reduce Energy Costs
- Energy Sector Efficiencies

A couple outstanding questions I wanted to call your attention to:

- 1. In the 'Enhancing Electricity Support and Conservation Programs' BG, costs are broken out for each initiative for this coming fiscal year only (OESP, RRRP, Affordability Fund, FN credit). This is different from the approach we are taking in the statement/NR, where costs are presented cumulatively for all programs over a three year period. Please flag if there are any concerns with breaking out costs for individual programs in this way
 2. Per Scott's note, debt financing costs are not currently in the GA backgrounder, only total accumulated debt and GA reduction per year. Please let me know if there is a desire to add further details on costs.

Please provide any feedback to us to send back to Energy asap.

Thanks,
Bryan
