Hello! Just one point of clarification, let's be careful about the wording on "rural customers":
Currently says: "Rural consumers would receive an additional benefit from decreasing rural delivery charges."
A typical rural customer, eligible for the increased RRRP support, that consumes 1,000 kWh per month will see an annual benefit of approximately \$540 or a monthly benefit of approximately \$45, before tax, from the proposed rate mitigation measures."

Perhaps change it to "rural customers who receive RRRP" instead of "a typical rural customer"? My concern is that people in woodstock (etc.) who think of themselves as rural, but are not in the Hydro One low density area, won't get this benefit.
Thanks!

Hi all,

Please see attached for review. I will be adding bios.

Thanks,

Dani
