Bryan, at cabinet briefing Orsini said that IESO was producing a summary for public consumption.

Phil, have you seen that yet?

Thanks, looks good. And are summaries of the accountant opinions, as discussed at cab briefing, going to be available for release today too?

Here is the updated BG with LTEP bullets added to the last section (Energy Sector Efficiencies).

Let me know if this works.

I've requested LTEP language in the remarks as well.

Thanks, Andrew.

We asked energy to include LTEP in the BG, but ATel had concerns. He didn't want to call attention to it because it is not close to being ready. I explained we need to counter the notion of future increases through the clean energy adjustment with work to take costs out of system through LTEP.

We settled on including information on OEB market renewal (currently the last section in the BG).

I will go back to them and reiterate that we want to see LTEP included.

Thanks, I'm good with these, with the addition of referencing ltep in BG and remarks, and it's objectives.

Also we need to take the opportunity tomorrow and hereafter to not allow the NDP to get away with the idea there's is a 30 percent off plan. It's not. It's up to 30 and none of its real.

Thx

Just PO now.

I've made some changes to the NR and have attached a clean copy here.

Also reattaching the BG and remarks for convenience.

Let me know if you have any feedback or concerns at your earliest opportunity.

Thanks,
Bryan

Hi all,

Here's where we're at as of now with the NR & BG – attached. The BG reflects the discussion that occurred during the 3:15 p.m. meeting this afternoon in the LCSB boardroom with a number of those receiving this email. Also attached are the Minister's remarks for the 2 p.m. press conference in the media studio.

Ministry is currently translating. Any changes/edits need to be returned to us first thing tomorrow morning.

Thank you,
James
